under the law passed in 1980 despite valiant efforts by many to try to comply with the new regulations and requirements.

What was needed was a clarification of the act so that the responsible entities could proceed in an appropriate way.

Unfortunately, we have not been able to agree on amendments which would provide the necessary clarification. It is indeed unfortunate; we are having great difficulties as a result of high interest rates particularly in the housing and construction industries. I understand the need to be patient and to tighten our belts so that interest rates come down, inflation is controlled, and we become productive again. But I do not see any reason to block minor changes in an act to make the act more effective.

The 1980 act was to stop abuses which had occurred in the past; but let us not throw out the baby with the bathwater.

I urge my colleagues to devote attention to this important issue and work to clarify the problems which exist with our law. It is counterproductive to do nothing. I urge my colleagues to take this issue up as early as possible and help the housing industry get going again.

Mr. President, I support and urge others to support the Senator from Tennessee's legislation (S. 1348) to amend the Mortgage Subsidy Bond Tax Act of 1980.●

CHARITABLE CONTRIBUTIONS—AMENDMENT NO. 246

● Mr. D'AMATO. Mr. President, as a longtime supporter and cosponsor of S. 170, the bill to allow above-the-line deductions for charitable contributions, I am pleased to cosponsor this amendment and to add my urgings to those of my distinguished colleagues that this Chamber adopt this most worthwhile of amendments. This amendment is vitally important if we are to preserve America's volunteer community. It belongs as part of this tax reduction package.

This amendment will extend to every American taxpayer the privilege that is currently afforded to only the 29 percent who itemize their deductions, that is, it would allow all taxpayers, regardless of their income class, to deduct their charitable contributions from their taxable income. This amendment will be phased in slowly in order not to disrupt the President's budget objectives.

For private philanthrophy to keep pace with inflation plus make up for the loss in Federal financing resulting from budget cuts already approved by Congress, 1982 private giving to nonprofit organizations would have to be 26 percent greater than it was in 1981. This is about three times the annual rate of growth recorded in the recent past. In 1983 the rate of increase in private giving to volunteer organizations over 1982 would have to be 39 percent just to maintain present services. In 1984 a 44-percent increase would be necessary.

We have historically been a nation of givers, rather than takers. I have every confidence that private philanthropy will meet this challenge and keep our volunteer community alive and active. Our commitment to the Nation's needy and deserving can, and will, be met.

It is perfectly appropriate, however, for the Government to encourage these activities through the tax system. Deductions for charitable contributions have long been a part of the law. Over time, however, fewer and fewer taxpayers have elected to itemize their deductions. Now only 29 percent do, and these individuals are primarily in the upper income brackets. This amendment will extend this deduction to the rest of America's taxpayers. It is consistent with the President's policy of across-the-board tax relief. It is consistent with my policy of protecting the average American taxpayer. It is consistent with the policy of this Chamber to encourage the private sector to step in and provide those services which the Government can no longer afford to offer.

Volunteer organizations involved in social welfare, education, health services, conservation, and the arts will all benefit through this legislation. With this legislation nonprofit community organizations will be able to make up the $27.3 billion shortfall they would otherwise suffer during the next 3 years.

Mr. President, I support the amendment.●

ORDER FOR ROUTINE MORNING BUSINESS

Mr. HEINZ. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

CARD TRICKS FOR ILLEGAL ALIENS

Mr. HUDDLESTON. Mr. President, recent newspaper reports have indicated that the Reagan administration is inclined to take the easy way out on the issue of illegal aliens. According to those reports, the President's advisers are recommending that the United States try to halt the flow of millions of illegal aliens into this country by relying on an employer-employee affidavit to prevent the employment of illegal aliens. While this approach would be a good initial step as we are phasing in a more secure verification system, it would not be practical or effective as the only means of discouraging the employment of illegal aliens.

Yesterday the Washington Post ran an editorial which in essence agreed that we need some other means. The Post stated:

> Without relying on some fair, accurate and simple means of distinguishing legal migrants from the illegals, proper enforcement of immigration laws becomes hopeless. Therefore, the test of any administration's determination to confront the problem seriously becomes a willingness to devise some national identifier, the most commonly mentioned being a counterfeit-resistant Social Security card.

I cannot agree more with the editor of the Post, or should I say that the editor could not agree more with me. Approximately 4 months ago I introduced a major immigration bill, S. 776, which incorporated the use of a counterfeit-resistant social security card for the purpose of preventing the employment of illegal aliens. I thank the Post for the endorsement of this concept and ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CARD TRICKS

At this point, only the president himself can rescue the critical component of his own Cabinet task force's package of immigration policies—a new and less easily forged Social Security card, now threatened with extinction by sudden assault from a few powerful but misguided administration snipers.

Most people who have studied the immigration problem, including a majority of the Select Commission on Immigration and Refugee Policy (whose final report formed the basis for the task force's deliberations), subscribe to the following common sense syllogism: without enforcing strictly our existing immigration laws (or their successors), we cannot curb effectively the flood of illegal immigrants now entering the country. But without relying on some fair, accurate and simple means of distinguishing legal migrants from the illegals, proper enforcement of immigration laws becomes hopeless. Therefore, the test of any administration's determination to confront the problem seriously becomes a willingness to devise some national identifier, the most commonly mentioned being a counterfeit-resistant Social Security card.

Not only did most members of the select commission support the use of a universal identifier but, initially, the Cabinet task force also endorsed that plan. Most published accounts agree, however, that the full Cabinet rejected the proposal at the urging of a few opponents who led the attack determined to wipe out completely the concept of an identity card. Apparently First Amendment fastidiousness was less the issue than the potential use of a reliable Social Security card to impose sanctions on employers—among them the giant agribusinesses of the western states—who often hire illegal migrants.

The president has been badly served by his Cabinet in this instance, though not by its task force on immigration. That group recognized in its scrutiny of the immigration tangle something long obvious to experts such as Sen. Alan K. Simpson (R–Wyo.), formerly an influential member of the Select Commission and now chairman of the Senate Judiciary subcommittee on the problem—namely, that the cosmetic substitute of requiring workers and employers merely to sign a piece of paper attesting to the employee's legal status is meaningless.

At a time of continuing high unemployment among low-income workers in this country, both native-born and immigrant, asking illegals to swear *pro forma* to their legality while employers wink at the process reduces the level of national cynicism about hiring underpaid illegals to a new low point. Sen. Simpson said as much the other day, while urging that some form of national identifier, a new Social Security card or a useable alternative, be enacted.

Mr. Reagan should support the original Cabinet task force recommendation for a Social Security identifier. Undoubtedly creating a national identity card will make it easier to penalize unscrupulous employers who violate the immigration laws. That, however, seems a worthwhile step for a president committed already to a range of experimental programs in the field, including the new Mexican "guest worker" scheme and the elaborate plan to legalize the status of millions of

undocumented workers already living in the United States.

Mr. HUDDLESTON. Mr. President, the New York Times also addressed this issue in an editorial yesterday and came to a similar conclusion. I ask unanimous consent that that editorial also be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BAD ADVICE ON IMMIGRATION

The Cabinet has muffed President Reagan's assignment to help him shape a comprehensive immigration policy. No system for deciding which aliens enter and stay in the United States can be cohesive, or even coherent, that fails to address the question of worker identification.

Unless employers have a sure way of knowing which applicants are legally eligible to work in the United States, they cannot reasonably be held accountable for hiring illegal aliens. And if employers cannot be required to police the effort, there is no reasonable hope of controlling illegal immigration. It just won't matter how many migrants the Government decides it wants to admit; without job controls, the nation will be burdened by hundreds of thousands more than the law allows.

This simple proposition has eluded the Cabinet. It wants the President to recommend penalties for anyone hiring illegals but to leave the identification issue up in the air. If Mr. Reagan forwards these incomplete ideas to Congress, he simply cannot expect to be taken seriously.

This is not, alas, the first evasion of the issue. The Select Commission on Immigration studied the problem for two years but only a slender majority of its members faced up to the need for foolproof identification techniques.

Fortunately, the key legislators are familiar with the commission's best thinking. Senator Alan Simpson, who heads the Senate's immigration subcommittee, served on the commission and has seen the value of a secure, counterfeit-resistant permit for all workers. A worthy alternative would be a labor force communications system by which employers could quickly check the eligibility of applicants.

Exaggerated concern about privacy adds to the problem. Some fear that a foolproof identification document would become an all-purpose domestic passport. That would indeed be unfortunate. But all that is needed is a Social Security card that cannot be forged.

What frightens the Reagan Cabinet, apparently, is another red herring—the possibility of excessive Government surveillance of employers. But with a reliable identification system, Government could enforce the law with minimal intrusion; it need only inquire whether the employer demanded satisfactory proof of a worker's eligibility.

The Cabinet's half-measure is actually the most dangerous possible approach. To make employers culpable for hiring illegals without giving them a reliable means of checking would encourage them to turn away deserving applicants on a hunch. Some would shun Hispanics and other minorities altogether. And some would use concern about identification as a pretext for discrimination.

Mr. Reagan should not endorse, and Congress should not approve, a program so flawed at the core.

DSAA DIRECTOR RETIRING

Mr. PERCY. Mr. President, it is a great pleasure for me to pay tribute to the retiring Director of the Defense Security Assistance Agency, Lt. Gen. Ernest Graves, who will retire on July 31.

His is an exceptionally distinguished career. General Graves has been an extraordinary soldier-scientist-diplomat, a superb leader of men and a person with the highest standards of integrity. He has unwaveringly adhered to the highest traditions of the motto, "Duty, Honor, Country," of the U.S. Military Academy, his alma mater.

It has been my privilege to have known and worked with General Graves for over 3 years. As chairman of the Senate Foreign Relations Committee, I have sought his advice and observed the extraordinary high quality of his work.

General Graves had made extraordinarily valuable contributions in the area of nuclear energy, civil works, and military construction but perhaps his greatest contribution to our national security has been during his tenure at the helm of the Defense Security Assistance Agency, a period of considerable change in the Nation's national security policy. He has superbly managed very limited resources to insure that the United States could assist our allies and friends to meet the challenges and opportunities of the 1980's and join with the United States in collective security.

General Graves has testified often before the Senate Foreign Relations Committee. His is an unblemished record of integrity and the spirit of cooperations so essential to the effective development of foreign policy by the executive legislative branches of Government. He has impressed all members of the committee with the clarity of his presentation of the administration's programs for security assistance and his keen insight into the importance and interrelationship of the security assistance program with our national security policy.

I regret to see him leave the service, but I know that he will be equally as successful in his future endeavors. I wish him great and continued success and satisfaction in the years ahead. I congratulate General Graves on a most distinguished career.

THE HIGH INTEREST RATE POLICY

Mr. BOREN. Mr. President, in spite of growing evidence that the high interest rate policy is failing and is placing an unbearable burden on the American people, Chairman Paul Volcker of the Federal Reserve Board seems bent on continuing such a policy.

Yesterday's Washington Star and today's Washington Post carry stories quoting Mr. Volcker that the Fed would continue a tight money, high interest rate policy for the remainder of the year. I shall ask unanimous consent that the text of these articles be printed in the RECORD.

The chairman of the House Banking Committee, Representative FERNAND J. ST GERMAIN, according to the article "bitterly contrasted the ready availability of multibillion dollars lines of credit for major corporations to acquire other companies with the problems which individuals and small business have in obtaining loans."

The criticism of the high interest rate policies is bipartisan. Representative GEORGE HANSEN, a Republican from Idaho, declared that this policy is destroying middle America and the American dream. Another Republican Congressman, NORMAN SHUMWAY, asked if the country could stand this kind of cure.

The answer, Mr. President, is that it cannot. It is increasingly evident that the high interest policy is deliberate. The CPI has fallen but the Treasury bill rate has not. The spread between the two is artificially large. Treasury spokesmen have clearly indicated acquiescence in and even encouragement for the policy. Unless the President strongly repudiates the policy and either turns Mr. Volcker around by persuasion or requests congressional authority to do so, it will be correctly concluded that the Volcker policy has become the administration's policy.

I take no partisan satisfaction from the administration's failure to act though if it continues, it will undoubtedly be of political benefit to my party.

I am an American before I am a member of any political party. As an American I very much want our President to succeed. I have supported many of his programs because in many areas he is trying to do what is right. It will be a tragedy, however, if he lets the extremist policy of Mr. Volcker on interest rates, completely derail the Nation's economic recovery program.

I have spoken before about the danger that such a policy poses to the entire economy. I will not recite again today the alarming statistics about the impact which interest rates are having on key segments of the economy and upon thrift institutions. I do want to ask my colleagues to carefully consider the very real effect of these policies on individual human beings. We must not bury ourselves in statistics to the point that we forget how these policies are affecting people in their daily lives, our own friends and neighbors, the kinds of average Americans who cannot afford high-paid spokesmen and who look to us to protect them.

I recently spoke to one man who has been in business for over 40 years. He has put virtually all of his adult life into building his small business. Next month he will close its doors. No one will be buying it from him. High interest rates have destroyed the equity which had been built up in that business. High interest rates have made it impossible to continue to operate it. To a man who has seen the work of a lifetime go down the drain, it is impossible to look at the high interest rate policy with statistical objectivity.

I will also never forget the middle-aged farmer who described to me what it was like to drive out the gate of his family farm for the last time after he had been forced to sell it and liquidate all of his holdings. He had grown up on the farm and raised his children past

their teenage years there. He and his wife had worked hard and lived frugally. When all was sold, this industrious pair had a net of less than $2,000 to show for over 20 years of hard work, planning, and commitment to their own dream. They too show up as a statistic on a page reciting the effects of high interest rates.

We must not forget the human tragedy that is reflected in the statistics. The suffering, disillusionment and bitter disappointment being caused by high interest rates is mounting like a tidal wave.

I hope that Mr. Volcker is not allowing any pride in authorship of the program to deter him from changes that should be made in it, I hope he will not forget the true meaning of the figures on the page.

I hope the President will not wait to act until it is too late.

Mr. President, I ask unanimous consent that the text of articles to which I have referred be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Star, July 21, 1981]

VOLCKER SETS FURTHER TIGHTENING ON MONEY SUPPLY GROWTH RATE

(By Jonathan Fuerbringer and Sheilah Kast)

The Federal Reserve, in a move that could keep upward pressure on interest rates, announced today a further tightening in the growth rate of the nation's money supply this year and even more restraint for 1982.

The new tightening for 1981 could prevent the expansion of the money supply, which financial markets had been counting on to help bring down interest rates in the near future.

For 1981, the Fed will now aim at the lower end—instead of the midpoint—of its 3.5 percent to 6 percent growth range for the key money supply figure called M–1B. In 1982, the midpoint of the M–1B growth range will be cut by three-quarters of a percentage point. M–1B includes currency in circulation, checking accounts and the new interest-bearing NOW accounts.

Many financial analysts, assuming that the Fed would aim for the midpoint of the range, had predicted that interest rates would decline based on the expectation of this easing. The prime rate is now hovering between 20 percent and 20.5 percent and, with other interest rates, has not declined despite a significant decline in inflation.

Fed Chairman Paul A. Volcker also said there has been some initial progress on inflation but that "it could prove temporary." For 1981, the Fed's range of inflation predictions is slightly more optimistic than the administration's. And in 1982, the administration prediction falls in the middle of the Fed range.

Volcker said the Fed expects slow economic growth this year and a slower rate of growth than the Reagan administration does next year.

In addition, the Fed expects that unemployment could top 8 percent by the end of next year, much higher than the administration's 7 percent prediction.

Volcker outlined the Fed's tighter monetary policy and its economic outlook in his mid-year review before the House Banking Committee today.

The tightening of the money supply's growth rate this year and next is consistent with long-term Fed policy and with the monetary policy advocated by the Reagan administration. Both are trying to curb inflation by slowing the growth rate of money. The Fed had been expected to reduce monetary growth rates for next year but the slight tightening this year was not expected.

Both the administration and the Fed contend that in the long run this restrictive monetary policy will reduce inflation and lead to lower interest rates. President Reagan defended this policy at the economic summit in Ottawa yesterday against complaints from European leaders about the impact of high U.S. interest rates on their economies.

However, the tighter restraint, which this year already has produced near-record interest rates despite the unexpected decline in the rate of inflation, could result in a sharper curb in economic growth than the Reagan administration is predicting. This assumption of slower growth by the Fed is what produces the predictions of higher unemployment rates.

In February the Fed set a 1981 target growth range of 3.5 percent to 6 percent for the M-1B money supply number. At the time, Volcker said the Fed would aim for the mid-point of the range.

But today Volcker said the Fed would now aim for the lower end of the range. He said the Fed made this decision partly because the effort to get the money supply growth rate back to the mid-point of the range—4.75 percent—could lead to "excessive" growth in money in the next couple of months. As of the most recent reporting week, M-1B is growing at a 2.6 percent annual rate, far below the mid-point of the range.

For 1982, the Fed set a tentative target for M-1B of 2.5 percent to 5.5 percent, with a mid-point of 4 percent.

Volcker said the Fed would leave the target ranges for other money supply numbers unchanged but would aim next year for the mid-point of the ranges rather than the top this year. The range for M-2, which includes M-1B, money market funds and savings deposits, is 6 percent to 9 percent.

Citing "tentative signs of a relaxation of price pressures," Volcker said that energy and food prices have moderated and commodity prices generally have weakened as speculators retreated in the face of high interest rates.

But he said rising labor costs "maintain the momentum of the inflationary process," and said he sees little evidence of slowing in wage increases.

A crucially important round of union wage bargaining begins next January, potentially setting a pattern for several years ahead," he said.

Last week the administration predicted that the real Gross National Product, after adjustment for inflation, would rise 2.5 percent this year and 5.2 percent next year. The Fed, however, predicts a range of growth of 1 percent to 3.5 percent this year and only 1 percent to 4 percent in 1982.

Partly as a result of this assumption of slower growth, the Fed is also more pessimistic about unemployment, seeing little likelihood of improvement through 1982. The Fed predicts unemployment will average between 7.5 to 8.25 percent this year and between 7 and 8.5 percent in 1982.

[From the Washington Post, July 21, 1981]

BANKING PANEL ATTACKS VOLCKER ON TIGHT MONEY

(By John M. Berry)

Federal Reserve Chairman Paul A. Volcker yesterday came under a drumfire of criticism from members of the House Banking Committee as he announced that the Fed is further tightening monetary policy by lowering a key money supply growth target.

Democrats and Republicans alike denounced the harsh impact that near-record high interest rates are having on home builders, home buyers, small businesses and the auto industry, among others.

It was by far the sharpest criticism Volcker has faced as chairman, and its bipartisan nature indicates that previously strong congressional backing for tight control of money supply growth is eroding in the face of constituent complaints. The latest Fed tightening was first reported in The Washington Post last Tuesday.

"We are destroying the small businessmen. We are destroying Middle America. We are destroying the American dream," declared conservative George Hansen (R-Idaho). Rep. Norman D. Shumway (R-Calif.) more quietly asked, "Can the country stand the cure for this [inflation] problem?"

On the other side, Rep. Frank Annunzio (D-Ill.), shouting and pounding his desk, accused the Fed of favoring big business over American workers. An incensed Rep. Henry Gonzalez (D-Texas) charged that the Fed has "legalized usury," and said he is preparing a bill of impeachment covering Volcker and a majority of the Fed's seven-member board of governors.

Many of the members, including Chairman Fernand J. St Germain (D-R.I.), bitterly contrasted the ready availability of multi-billion-dollar lines of credit for major corporations to acquire other companies with the problems individuals and small business have in obtaining loans. About $40 billion in such lines of credit have been arranged in recent weeks, St Germain said.

Despite all the criticism, Volcker said the Fed would continue to pursue a tight money policy to combat inflation.

Specifically, the chairman said the central bank's Federal Open Market Committee decided for the remainder of this year to aim for the lower end of the 3½-to-6 percent target range for growth of M1–B, instead of the midpoint of the range. As was reported last week in The Washington Post and confirmed by Volcker's testimony, the FOMC, which sets monetary policy, considered formally lowering the target but chose instead to lower its objective within the range.

For 1982, the target for growth of M1–B, the measure of money that includes currency in circulation and checking deposits at all financial institutions, was lowered to a range of 2½-to-5½ percent, Volcker said.

The target for M–2—which includes the items in M1–B as well as savings accounts at commercial banks, shares in money market mutual funds and funds obtained by financial institutions by selling securities with overnight repurchase agreements—was left unchanged at 6-to-9 percent both for this year and for 1982. However, Volcker said that next year the Fed would shoot for the midpoint of that range, whereas this year the central bank hopes merely to stay within its upper bound.

Recently, growth of M1–B has been below the 1981 target range, encouraging many financial market analysts to predict that the Fed soon would ease its tight money stance. M–2, on the other hand, has been at or above the 9 percent upper limit of its range.

Some monetarist economists, including Robert Weintraub of the Joint Economic Committee staff, praised the new Fed targets. Weintraub said the M1–B target, if achieved, would be "deflationary." The Fed, he declared, "is showing real toughness."

Volcker acknowledged that high interest rates were hurting the economy, particularly housing, autos, small business and thrift institutions, and that the high level of rates "also has repercussions internationally, complicating already difficult economic policy decisions of some of our major economic partners." U.S. monetary policy, for just that reason, was an issue at the economic summit meeting in Ottawa that ended yesterday.

"Amidst these difficulties, we must not lose sight of the fundamental point that so many

of the accumulated distortions and pressures in the economy can be traced to our high and stubborn inflation," Volcker told the committee. "Moreover, turning back the inflationary tide, as we can see, is not a simple, painless process, free from risks and strains of its own. All I would claim is that the risks of not carrying through on the effort to restore price stability would be much greater."

MESSAGE FROM THE HOUSE

At 6:47 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 3454) to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and has appointed Mr. BOLAND, Mr. ZABLOCKI, Mr. MINETA, Mr. STUMP, Mr. ROBINSON, Mr. WHITEHURST, and Mr. YOUNG as managers of the conference on the part of the House; that Mr. PRICE, Mr. STRATTON, and Mr. DICKINSON were appointed as additional managers for consideration of such matters within the jurisdiction of the Committee on Armed Services pursuant to clause 1(c) of rule X of the Rules of the House of Representatives; and that Mr. RODINO, Mr. EDWARDS of California, and Mr. MCCLORY were appointed as additional managers for consideration of such matters within the jurisdiction of the Committee on the Judiciary pursuant to clause 1(m) of rule X of the Rules of the House of Representatives.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1681. An act for the relief of Andre Bartholo Eubanks.

H.R. 1785. An act for the relief of Gladys Belleville Schultz.

H.R. 2010. An act for the relief of Kai-Mee Chen.

H.R. 2218. An act to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes.

H.R. 2573. An act for the relief of Moses Bank.

H.R. 2820. An act to provide that certain lands constituting part of the El Dorado National Forest be conveyed to certain persons who purchased and held such lands in good faith reliance on an inaccurate surveyor's map.

H.R. 2975. An act for the relief of Yuk Yee Li.

H.R. 4034. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes.

HOUSE BILLS REFERRED

The following bills were read twice, by unanimous consent, and referred as indicated:

H.R. 1681. An act for the relief of Andre Bartholo Eubanks; to the Committee on the Judiciary.

H.R. 1785. An act for the relief of Gladys Belleville Schultz; to the Committee on the Judiciary.

H.R. 2010. An act for the relief of Kai-Mee Chen; to the Committee on the Judiciary.

H.R. 2218. An act to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 2573. An act for the relief of Moses Bank; to the Committee on the Judiciary.

H.R. 2820. An act to provide that certain lands constituting part of the El Dorado National Forest be conveyed to certain persons who purchased and held such lands in good faith reliance on an inaccurate surveyor's map; to the Committee on Energy and Natural Resources.

H.R. 2975. An act for the relief of Yuk Yee Li; to the Committee on the Judiciary.

H.R. 4034. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1629. A communication from the Secretary of Agriculture transmitting, pursuant to law, the fiscal year 1980 annual report of the Rural Electrification Administration; to the Committee on Agriculture, Nutrition, and Forestry.

EC–1630. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on a proposed foreign military sale to the United Kingdom; to the Committee on Armed Services.

EC–1631. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements other than treaties entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC–1632. A communication from the Assistant Secretary of the Treasury for Legislative Affairs transmitting, pursuant to law, certain project performance audit reports of the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank; to the Committee on Foreign Relations.

EC–1633. A communication from the Vice Chair of the Merit Systems Protection Board transmitting, pursuant to law, a status report on performance appraisal and merit pay among mid-level employees; to the Committee on Governmental Affairs.

EC–1634. A communication from the Chairman of the Council of the District of Columbia, transmitting a copy of an Act of the Council No. 4–69; to the Committee on Governmental Affairs.

EC–1635. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a list of the reports of the General Accounting Office for the month of June 1981; to the Committee on Governmental Affairs.

EC–1636. A communication from the Register of Copyrights, the Library of Congress, transmitting, pursuant to request, a report on the likely effects of the expiration of the manufacturing clause of the copyright law; to the Committee on the Judiciary.

EC–1637. A communication from the Secretary of Education, transmitting, pursuant to law, notice of a final regulation relative to institutional grants for graduate and professional study program; to the Committee on Labor and Human Resources.

EC–1638. A communication from the Secretary of Education transmitting, pursuant to law, a copy of final regulations for training in the legal profession program; to the Committee on Labor and Human Resources.

EC–1639. A communication from the Secretary of Education transmitting, pursuant to law, a copy of final regulations relative to the Pell grant program; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. WARNER, from the Committee on Energy and Natural Resources, without amendment:

S. 859. A bill to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes (Rept. No. 97–162).

S. Res. 190. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 859; referred to the Committee on the Budget.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

George A. Keyworth II, of New Mexico, to be Director of the Office of Science and Technology Policy.

(The above nomination from the Committee on Commerce, Science, and Transportation was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PERCY, from the Committee on Foreign Relations:

Davis Rowland Robinson, of the District of Columbia, to be Legal Adviser of the Department of State.

Gilbert A. Robinson, of New York, to be Deputy Director of the International Communication Agency.

Dean E. Fischer, of Virginia, to be an Assistant Secretary of State.

Joan M. Clark, of New York, a career member of the Senior Foreign Service, to be Director General of the Foreign Service.

Everett Alvarez, Jr., of Maryland, to be Deputy Director of the Peace Corps.

Richard T. Kennedy, of the District of Columbia, to be the Representative of the United States of America to the International Atomic Energy Agency.

Contributions are to be reported for the period beginning on the first day of the

fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Richard Thomas Kennedy.

Post: U.S. Representative to the IAEA, with the rank of Ambassador.

Contributions, amount, date, donee:

1. Self (joint w/wife), $100.00, February 12, 1981, Rep. Natl Comm; (joint w/wife), $100.00, October 26, 1980, Rep. Natl Comm.

2. Spouse, $100.00, January 15, 1980, Rep. Natl Comm; $50.00, January 16, 1979, Rep. Natl Comm; $25.00, October 14, 1978, Rep. Natl Comm; $30.00, February 4, 1978, Rep. Natl Comm; $25.00, February 14, 1977, Rep. Natl Comm.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. D'AMATO:

S. 1508. A bill to allow U.S. banks which establish international banking facilities to compete on equal terms with foreign banks establishing such facilities thereby enhancing the position of the United States in the international financing markets; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HEINZ (for himself, Mr. MOYNIHAN, Mr. COHEN, and Mr. MELCHER):

S. 1509. A bill to amend title XVIII of the Social Security Act to change the method of medicare reimbursement for competitive medical plans; to the Committee on Finance.

By Mr. PERCY (by request):

S.J. Res. 100. Joint resolution to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. D'AMATO:

S. 1508. A bill to allow U.S. banks which establish international banking facilities to compete on equal terms with foreign banks establishing such facilities, thereby enhancing the position of the United States in the international financing markets; to the Committee on Banking, Housing, and Urban Affairs.

INTERNATIONAL BANKING COMPETITION ACT

● Mr. D'AMATO. Mr. President, in 1978, the Congress took an historic step toward restoring U.S. based banking operations to their rightful place in the international financial marketplace by passing the International Banking Act. On June 9, 1981 the Federal Reserve Board authorized the establishment of Interna-

tional Banking Facilities (IBF's) within the boundaries of the United States.

These facilities will be permitted to carry on purely foreign deposit and loan activities; activities which are currently carried on in the offices of United States and foreign banks located overseas. Sophisticated international investors currently place their business at foreign offices because they prefer the higher returns available overseas over protective, yet burdensome investor-oriented regulation.

On February 18, 1981, however, the FDIC realized that its obligations under Federal Deposit Insurance Act required that the deposits held at these IBF's be covered by Federal Deposit Insurance and be assessed the one-twelfth of 1 percent FDIC insurance premium.

Unfortunately, approximately one-half of all the business currently carried in off-shore branches carry margins of one-sixteenth of 1 percent; less than the FDIC assessment. I am, therefore, introducing a bill that would exempt deposits at IBF's from FDIC coverage, allowing foreign investors to accept the same risk presently they incur at a foreign branch, thereby allowing IBF's to remain competitive.

By reducing the regulation on transactions between U.S. based International Banking Facilities and their foreign clients to only those necessary to protect the safety and soundness of the U.S. economy the IBF's will obtain the competitive equality necessary to attract a significant amount of economic activity back to America's shores.

The Congress, in 1978, foresaw three benefits that are as real and important today as they were then.

First, the United States and its major cities would enhance their status as International Banking Centers and increase their overall attractiveness as places, with a consequent creation of new jobs.

Second, U.S. Treasury revenues would increase because of the taxes on the profits of International Banking Business brought to the U.S.

Third, supervisory oversight of the conduct of international banking business would be facilitated by having this activity take place within the boundaries of the United States.

These benefits will be lost if we do not allow IBF's to offer services that are competitive with those currently in existence.

Mr. President, I ask unanimous consent that my bill be printed in its entirety in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1508

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Subsection 5 of Section 3(1) of the Federal Deposit Insurance Act (12 U.S.C. § 1813(1) is hereby amended to read in its entirety as follows:

(5) such other obligations of a bank as the Board of Directors, after consultation with the Comptroller of the Currency and the Board of Governors of the Federal Reserve System, shall find and prescribe by regulation to be deposit liabilities by general usage: *Provided further,* that the following shall not be a deposit for any of the purposes of this chapter or be included as part of total deposits or of an insured deposit:

(i) any obligation of a bank which is payable only at an office of the bank located outside of the States of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, and the Virgin Islands; and

(ii) any international banking facility deposit, including an international banking facility time deposit as that term is from time to time defined by the Board of Governors of the Federal Reserve System in its Regulation D or any successor regulation thereto.

SEC. 2. This Amendment shall take effect immediately.●

By Mr. HEINZ (for himself, Mr. MOYNIHAN, Mr. COHEN, and Mr. MELCHER):

S. 1509. A bill to amend title XVIII of the Social Security Act to change the method of medicare reimbursement for competitive medical plans; to the Committee on Finance.

COMPETITIVE HEALTH AND MEDICAL PLAN ACT OF 1981

Mr. HEINZ. Mr. President, today I am introducing, along with my colleagues Mr. MOYNIHAN and Mr. COHEN, the Competitive Health and Medical Plan Act (CHAMP) of 1981. The purpose of this legislation is threefold:

First, to offer the elderly a wider choice in selecting a health delivery system suited to their individual needs; second, to stimulate competition among alternative systems of health care delivery; and third, to contain health care costs through greater utilization of more efficient health care delivery systems.

To accomplish these goals, the CHAMP Act—we call it CHAMP after Competitive Health and Medical Plan—would reform the method of reimbursement to health maintenance organizations (HMO's) and provide medicare reimbursement to certain prepaid health benefit plans.

Mr. President, as chairman of the Special Committee on Aging, I am extremely concerned about the long-range projections for the medicare, or health insurance (HI) trust fund of social security.

I am also very troubled by the growing costs and shrinking medicare benefits for older people.

Last week, the social security trustees issued their 1981 report. Their long-range forecast for the HI Trust Fund was quite dismal. The trustees reported that the Medicare Trust Fund may go broke as early as 1989.

Furthermore, over the next 25 years, the deficit in the HI Trust Fund continues to balloon, with no reversal of this trend in sight. Extrapolating from the trustees' projections, it would require more than doubling the payroll taxes over the next 75 years to salvage the HI Trust Fund.

A rate of growth in hospital costs that continues to outstrip the growth rate of wages and prices is at the root of the impending shortage of medicare funds. Inpatient hospital costs for medicare recipients are projected to rise 15.6 percent in 1981. The HI Trust Fund will be further strained by a burgeoning elderly population living longer than ever before.

If we continue along our current course, making no reforms in medicare or the way we approach the overall cost of health care, the cost implications for both the elderly and the Nation are immense.

The public cost of treating our Nation's elderly has been approximately doubling every 4 years. Such a doubling of the current medicare outlay of $41 billion is difficult to fathom, let alone to budget.

At the same time, the elderly and disabled covered by medicare continue to be asked to dig deeper into their pockets to help pay the escalating costs of medicare. On July 1, the Health Care Financing Administration raised the monthly premium for medicare—part B from $9.60 to $11, or about 14.6 percent. This increase came close on the heels of the 13.3-percent hike in part A hospital insurance deductible, from $180 to $204, that the elderly and disabled began paying January 1 of this year. And, after reconciliation, we will ask them to pay still more.

For these soaring costs, the elderly health care consumer will get little more in the way of benefits than he or she does today.

At present, medicare covers only 38 percent of the elderly's total medical costs. Furthermore, the ability of the elderly to select their physician is steadily diminishing because the number of doctors willing to accept assignment under the medicare program is steadily declining. The assignment rate today is about 51 percent, down from 61 percent just 10 years ago.

Mr. President, the fact is that the medicare program is in dire need of reform now. We must begin to reverse the incentives contributing to skyrocketing costs, so that we can afford to pay health care costs of our elderly tomorrow.

The CHAMP bill that I am introducing today represents a vital first step in reforming the medicare program. It will not solve all of the problems faced by the Nation's elderly, nor is it intended to, but it is critically important that we begin now to address these issues.

The bill is designed to encourage a continuity of care that is so often lacking when an elderly individual seeks treatment today in the existing system. The traditional health care system is a bewildering array of medical specialties, hospitals, nursing homes, claim forms, and unplanned expenses.

The CHAMP bill would enable medicare beneficiaries to enroll voluntarily in HMO's and other prepaid physician-insurer contractual arrangements, all of which would be called competitive medical plans, or CMP's. In my judgment, an organized system of care like that provided through an HMO or Individual Practice Association (IPA) is an effective approach to dealing with the health problems of the elderly.

The advantages for an elderly individual receiving care from a single provider group reimbursed prospectively are particularly pronounced. From the el-

derly's perspective, perhaps the greatest benefit is the elimination of the cumbersome, frequently overwhelming paperwork for claims reimbursement under the medicare fee-for-service system.

In addition, older Americans enrolled in prepaid plans are able to budget their health care costs. Typically, these plans eliminate copayments and deductibles, and provide complete protection against catastrophic illnesses. Frequently, there is home health coverage as well.

Prepayment also removes the incentive to overserve and replaces it with an incentive to maintain health and reduce unnecessary hospitalization. For example, in 1976, hospital days per 1,000 persons age 65 and over totaled 4,121 in the United States. In the Kaiser-Permanente medical care program, the Nation's largest HMO with 4 million members, including 200,000 medicare beneficiaries, the age/sex adjusted rate for the over 65 population was 1,945 days per 1,000 members.

Under CHAMP, a competitive medical plan would receive a fixed prospectively determined payment per enrollee, which would be unrelated to the amount of care provided. This payment is set at 95 percent of the adjusted average per capita cost (AAPCC), or in other words, 95 percent of what it cost medicare today to provide its package of benefits to an eligible individual served by the fee-for-service sector.

This payment level would serve as a cost-controlling limit and also provide qualified plans an incentive to provide care in settings most appropriate to a patient's needs.

Under the maximum payment level, the actual payment per beneficiary would fluctuate based on appropriate adjustments for the population served, such as adjustments for age, sex, and health status.

Another important provision of the bill will insure that the economies realized through greater medicare participation in efficient medical plans will save not only the taxpayer's money, but that of the enrolled beneficiary as well.

Under this provision, all savings above the normal return a CMP receives through its private business will be passed on to the enrolled medicare beneficiary. Thus, this feature requires a CMP to provide medicare enrollees with increased benefits and decreased cost-sharing to the extent that medicare reimbursement exceeds the CMP's normal return or adjusted community rate.

Within the last year and a half, the Health Care Financing Administration (HCFA) has sponsored a number of demonstration projects to test the prospective reimbursement mechanism that is a central feature of my bill. The results to date show promise, although the demonstrations also have identified some probems that will need to be addressed during committee consideration of my bill.

The demonstrations prove several things: In particular that many elderly consumers are attracted to plans that can provide broader benefits in exchange for receiving all of their care from certain, efficient providers.

The Special Committee on Aging has scheduled a hearing for July 29, at 2 p.m., to look at both the benefits that accrue to medicare consumers who enroll in CMP's, and the difference between physician treatment of the elderly in a CMP and the fee-for-service system.

The Health Subcommittee of the Finance Committee has scheduled a hearing for July 30, at 2 p.m., to examine the prospective medicare financing mechanism being tested in the HCFA demonstrations, and additional methods of reimbursement to HMOs and other prepaid health plans.

It is my hope and expectation that these hearings will provide us with the information necessary to proceed in taking this vital first step to reform the medicare program.

I ask unanimous consent that a detailed factsheet, and the bill, be printed in the RECORD.

There being no objection, the bill and factsheet were ordered to be printed in the RECORD, as follows:

S. 1509

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Competitive Health and Medical Plan Act".

MEDICARE PAYMENTS TO COMPETITIVE MEDICAL PLANS

SEC. 2. Section 1876 of the Social Security Act is amended to read as follows:

"PAYMENTS TO COMPETITIVE MEDICAL PLANS

"SEC. 1876. (a)(1) The Secretary shall annually determine a per capita rate of payment for each class of individuals entitled to benefits under parts A and B who are enrolled under this section with a competitive medical plan with which he has entered into a risk sharing contract under subsection (g), and shall annually determine a per capita rate of payment for each class of individuals entitled to benefits under part B alone who are enrolled under this section with such a competitive medical plan. The Secretary shall define appropriate classes of members, based on such factors as age, sex, institutional status, disability and health status, and place of residence. The rate for each class shall be equal to 95 percent of the adjusted average per capita cost for that class. Each month the Secretary shall pay each such plan (other than a plan with which he has entered into a reasonable cost reimbursement contract under subsection (h)) the appropriate rate, in advance, for each individual enrolled under this section with the plan, or such lesser amount as the plan requests. Those payments shall be instead of the amounts which would be otherwise payable, pursuant to sections 1814(b) and 1833(a), for services furnished by or through the plan to individuals enrolled under this section with the plan, or enrolled other than under this section with the plan but eligible to enroll under this section with the plan.

"(2) With respect to any competitive medical plan which has entered into a reasonable cost reimbursement contract with the Secretary pursuant to subsection (h), payments shall be made to such plan in accordance with subsection (h) rather than under paragraph (1).

"(3) For purposes of this section, the term 'adjusted average per capita cost' means the average per capita amount that the Secretary estimates in advance (on the basis of actual experience, or retrospective actuarial equivalent based upon an adequate sample and other information and data in a geographic area served by a competitive medical plan or in a similar area, with appropriate adjustments to assure actuarial equivalence) would be payable in any contract year for services covered under parts A and B, or part B only, and types of expenses otherwise reimbursable under parts A and B, or part B only (including administrtive costs incurred by organizations described in sections 1816 and 1842), if the services were to be furnished by other than a competitive medical plan.

"(4) The payment to a competitive medical plan under this subsection for individuals enrolled under this section with the plan and entitled to benefits under part A an enrolled under part B shall be made from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund. The portion of that payment to the plan for a month to be paid by the latter trust fund shall be equal to 200 percent of the sum of—

"(A) the product of (i) the number of such members for the month who have attained age 65, and (ii) the monthly actuarial rate for supplementary medical insurance for the month as determined under section 1839(c)(1), and

"(B) the product of (i) the number of such members for the month who have not attained age 65, and (ii) the monthly actuarial rate for supplementary medical insurance for the month as determined under section 1839(c)(4).

The remainder of that payment shall be paid by the former trust fund.

"(5) If an individual is enrolled under this section with a competitive medical plan, neither the individual nor any other person or entity (except for the competitive medical plan) shall be entitled to receive payments from the Secretary under this title for services furnished to the individual, except as otherwise provided in subsection (h) in the case of a plan which has entered into a cost reimbursement contract.

"(b)(1) For purposes of this section, the term 'competitive medical plan' means a public or private entity, organized under the laws of any State, which—

"(A) is a qualified health maintenance organization (as defined in section 1310(d) of the Public Health Service Act);

"(B) is licensed as a health maintenance organization in the State in which it operates; or

"(C) meets the requirements of paragraph (2).

"(2) An entity meets the requirements of this paragraph if such entity—

"(A) provides to enrolled members at least the following health care services: physicians' services performed by physicians (as defined in section 1861(r)(1)), inpatient hospital services, laboratory, X-ray, and emergency services, and out of area coverage;

"(B) is compensated (except for deductibles, coinsurance, and copayments) for the provision of health care services to enrolled members by a payment which is paid on a periodic basis without regard to the date the health care services are provided and which is fixed without regard to the frequency, extent, or kind of health care service actually provided to a member;

"(C) provides physicians' services primarily (i) directly through physicians who are either employees or partners of such entity, or (ii) through contracts with individual physicians or one or more groups of physicians (organized on a group practice or individual practice basis);

"(D) assumes full financial risk on a prospective basis for the provision of the health care services listed in subparagraph (A), except that such entity may obtain insurance or make other arrangements—

"(i) for the cost of providing to any enrolled member health care services listed in subparagraph (A) the aggregate value of which exceeds $5,000 in any year,

"(ii) for the cost of health care service listed in subparagraph (A) provided to its enrolled members other than through the entity because medical necessity required their provision before they could be secured through the entity,

"(iii) for not more than 90 percent of the amount by which its costs for any of its fiscal years exceed 115 percent of its income for such fiscal year, and

"(iv) with physicians or other health professionals, health care institutions, or any combination of such individuals or institutions to assume all or part of the financial risk on a prospective basis for the provision of basic health services by the physicians or other health professionals or through the institutions; and

"(E) has made adequate provision against the risk of insolvency, which provision is satisfactory to the Secretary.

"(3)(A) Each competitive medical plan must provide at least the following basic health services to members enrolled under this section:

"(i) the services listed under parts A and B of this title which are available to individuals residing in the geographic area served by the plan for individuals entitled to benefits under part A and enrolled under part B; and

"(ii) the services listed under part B that are available to individuals residing in the geographic area served by the plan for individuals enrolled under part B only.

"(B) In addition, the plan (other than a plan with a cost basis contract under subsection (h)) may provide such individuals with such additional health care services either as the Secretary may approve or as such individuals may elect, at their option, to have covered. The Secretary shall approve any such additional health care services which the plan proposes to offer to such individuals, unless the Secretary determines that including such additional services will substantially discourage enrollment by covered individuals with the plan.

"(4)(A) Each competitive medical plan must have an open enrollment period, for the enrollment of individuals under this section, of at least 30 days duration every year, and must provide that at any time during which enrollments are accepted, the plan will accept up to the limits of its capacity (as determined by the Secretary) and without restrictions, except as may be authorized in regulations, individuals who are eligible to enroll under subsection (c) in the order in which they apply for enrollment, unless to do so would result in failure to meet the requirements of subsection (f) or would result in the enrollment of enrollees substantially nonrepresentative, as determined in accordance with regulations of the Secretary, of the population in the geographic area served by the plan.

"(B) An individual may enroll under this section with a competitive medical plan in such manner as may be prescribed in regulations, and may terminate his enrollment with the plan as of the beginning of the first calendar month following a full calendar month after he has requested termination.

"(C) Each competitive medical plan must provide assurances to the Secretary that it will not expel or refuse to re-enroll any such individual because of the individual's health status or requirements for health care services, and will notify each such individual of such fact at the time of the individual's enrollment.

"(5) Each competitive medical plan must provide that any individual enrolled in such plan under this section shall be reimbursed by the plan for his expenses in securing health services, which he would be entitled to receive through the plan, which he receives other than through the plan, if the services were medically necessary and immediately required because of an unforeseen illness, injury, or condition, and it was not reasonable given the circumstances to obtain the services through the plan.

"(6)(A) Each competitive medical plan must provide meaningful procedures for hearing and resolving grievances between the plan (including any entity or individual through which the plan provides health care services) and any individual member of such plan.

"(B) Any individual enrolling with a competitive medical plan under this section who is dissatisfied by reason of his failure to receive any health service to which he believes he is entitled and at no greater charge than he believes he is required to pay shall, if the amount in controversy is $100 or more, be entitled to a hearing before the Secretary to the same extent as is provided in section 205(b), and in any such hearing the Secretary shall make the competitive medical plan a party. If the amount in controversy is $1,000 or more, the individual or competitive medical plan shall, upon notifying the other party, be entitled to judicial review of the Secretary's final decision as provided in section 205(g), and both the individual and the competitive medical plan shall be entitled to be parties to that judicial review.

"(7)(A) Each competitive medical plan must have a program that defines procedures for—

"(i) review of medical care by physicians and other health care professionals;

"(ii) identification of clinical and administrative problems; and

"(iii) follow-up procedures to rectify any such problems.

"(B) Each competitive medical plan must provide adequate assurance to the Secretary that the program described in subparagraph (A)—

"(i) has been implemented and that where evidence of any such problem is found, recommended follow-up action is being taken; and

"(ii) is implemented on an ongoing basis.

"(8) Notwithstanding the requirement of paragraph (2)(A) that a competitive medical plan provide inpatient hospital services, an entity shall qualify as a competitive medical plan for purposes of this section if such entity had contracted with a single State agency administering a State plan approved under title XIX, for the provision of services other than inpatient hospital services, to individuals eligible for such services under such State plan, on a prepaid risk basis prior to 1970.

"(c) Subject to the provisions of subsection (b)(4), every individual entitled to benefits under part A and enrolled under part B or enrolled under part B only (other than an individual medically determined to have end-stage renal disease) shall be eligible to enroll under this section with any competitive medical plan with which the Secretary has entered into contract under this section and which serves the geographic area in which the individual resides.

"(d) The portion of a competitive medical plan's premium rate and the actuarial value of its other charges for individuals enrolled under this section with the plan and entitled to benefits under parts A and B, and the portion of its premium rate and the actuarial value of its other charges for individuals enrolled under this section with the plan and entitled to benefits under part B only, for services covered under parts A and B, or part B only, respectively, may not exceed the actuarial value of the coinsurance and deductibles that would be applicable on the average to individuals enrolled under this section with the plan (or, if the Secretary finds that adequate data is not available to determine that actuarial value, the actuarial value of the coinsurance and deductibles applicable on the average to individuals in the area, in the State, or in the United States, eligible to enroll under this section with a competitive medical plan) and entitled to benefits under parts A and B, or part B only, respectively, if they were not members of a competitive medical plan.

"(e) Notwithstanding any other provision of law, a competitive medical plan may, in the case of the provision of services to an individual enrolled in accordance with this section for an illness or injury for which the member is entitled to benefits under a workman's compensation law or plan of the United States or any State, or under an automobile or liability insurance policy or plan, including a self-insured plan, or under no fault insurance, charge or authorize the provider of such services to charge, in accordance with the charges allowed under such law, plan, or policy—

"(1) the insurance carrier, employer, or other entity which under such law, plan, or policy is to pay for the provision of such services, or

"(2) such member to the extent that such member has been paid under such law, plan, or policy for such services.

"(f)(1) Except as provided in paragraph (2), each competitive medical plan with which the Secretary enters into a contract under this section shall have, for the duration of such contract, an enrolled membership at least one-half of which consists of individuals who are not entitled to benefits under this title or under a State plan approved under title XIX.

"(2) The Secretary may modify or waive the requirement imposed by paragraph (1) only (A) if the Secretary determines that (i) special circumstances warrant such modification or waiver, and (ii) the plan has taken and is taking reasonable efforts to enroll individuals who are not entitled to benefits under this title or under a State plan approved under title XIX, and (B) on the condition that the plan will not have, for the duration of such contract, an enrolled membership of which one-half or more are individuals entitled to benefits under part A or enrolled under part B.

"(g)(1) The Secretary may enter into a risk sharing contract with any competitive medical plan, as defined in subsection (b)(1), which has at least 1,000 members for the purpose of carrying out this section.

"(2)(A) Each risk sharing contract under this subsection shall provide that, if the adjusted community rate for services under parts A and B (as reduced for the actuarial value of the coinsurance and deductible under those parts), for individuals enrolled under this section with the plan and entitled to benefits under those parts, or if the adjusted community rate for services under part B (as reduced for the actuarial value of the coinsurance and deductibles under that part), for individuals enrolled under this section with the plan and entitled to benefits under that part only, is less than the weighted average per capita payment to be made under subsection (a) at the beginning of an annual period for individuals who will be enrolled during the contract year under this section with the plan and entitled to benefits under parts A and B, or part B only, respectively, the competitive medical plan shall apply the difference between that average per capita payment and that adjusted community rate (as so reduced) or its equivalent in value to one or more of the following purposes:

"(i) the provision of additional benefits or services to each enrollee under parts A and B or part B only;

"(ii) reduction in premiums, deductibles, or copayments for such enrollees; or

"(iii) rebates or dividends to such enrollees.

"(B) If the competitive medical plans determines that additional benefits are to be provided as allowed under subparagraph (A)(i), such benefits shall be selected, by a group consisting of individuals enrolled under this section with such plan, from among feasible alternatives presented to such group by the plan in which such group of enrolled individuals shall be chosen shall be provided for in the contract.

"(C) For purposes of this section, the term 'adjusted community rate' for a service or services means, at the election of a competitive medical plan, either—

"(i) the rate of payment for that service or services which the Secretary annually determines based on a submission by the competitive medical plan, would apply to an individual enrolled in accordance with this section with a competitive medical plan if the rate of payment were determined under a 'community rating system' (as defined in section 1302(8) of the Public Health Service Act, other than subparagraph (C)), or

"(ii) such portion of the weighted aggregate premium, which the Secretary annually estimates would apply to an individual enrolled in accordance with this section with the competitive medical plan, as the Secretary annually estimates is attributable to that service,

but adjusted for differences between the utilization characteristics of the individuals enrolled with the competitive medical plan under this section and the utilization characteristics of the other members of the plan (or, if the Secretary finds that adequate data are not available to adjust for those differences, the differences between the utilization characteristics of individuals in other competitive medical plans, or individuals in the area, in the State, or in the United States, eligible to enroll under this section with a competitive medical plan, and the utilization characteristics of the rest of the population in the area, in the State, or in the United States, respectively).

"(h)(1) If the Secretary is not satisfied that a competitive medical plan has the capacity to bear the risk of potential losses under a risk sharing contract under this section, or if the competitive medical plan so elects, or if the plan has less than 1,000 members, the Secretary may enter into a contract with such plan pursuant to which such plan is reimbursed on the basis of its reasonable cost (as defined in section 1861(iv)) in the manner prescribed in paragraph (3), and any such contract shall be terminated on the later of—

"(A) December 31, 1986, or

"(B) the end of the sixtieth month during which such contract was in effect.

"(2) Such contract under this subsection may, at the option of such plan, provide that the Secretary (A) will reimburse hospitals and skilled nursing facilities for the reasonable cost (as determined under section 1861(v)) of services furnished to individuals enrolled with such organization pursuant to subsection (c), and (B) will deduct the amount of such reimbursement from payment which would otherwise be made to such plan. If such plan pays a hospital or skilled nursing facility directly, the amount paid shall not exceed the reasonable cost of the services (as determined under section 1861(v)) unless such organization demonstrates to the satisfaction of the Secretary that such excess payments are justified on the basis of advantages gained by the plan.

"(3) Payments made to a plan with a cost basis contract under this subsection shall be subject to suitable retroactive corrective adjustment at the end of each contract year so as to assure that such plan is paid for the reasonable cost actually incurred (excluding any part of incurred cost found to be unnecessary in the efficient delivery of health services) for the types of expenses otherwise reimbursable under this title for providing services covered under this title to individuals described in subsection (a)(1).

"(4) Any contract with a competitive medical plan under this subsection shall provide that the Secretary shall require, at such time following the expiration of each accounting period of the plan (and in such form and in such detail) as he may prescribe—

"(A) that the plan report to him in an independently certified financial statement its per capita incurred cost based on the types of components of expenses otherwise reimbursable under this title for providing services described in subsection (a)(1), including, in accordance with accounting procedures prescribed by the Secretary, its methcds of allocating costs between individuals enrolled under this section and other individuals enrolled with such plan;

"(B) that failure to report such information as may be required may be deemed to constitute evidence of likely overpayment on the basis of which appropriate collection action may be taken;

"(C) that in any case in which a plan is related to another plan by common ownership or control, a consolidated financial statement shall be filed and that the allowable costs for such plan may not include costs for the types of expense otherwise reimbursable under this title, in excess of those which would be determined to be reasonable in accordance with regulations (providing for limiting reimbursement to costs rather than charges to the plan by related plans and owners) issued by the Secretary in accordance with section 1861(v); and

"(D) that in any case in which compensation is paid by a plan substantially in excess of what is normally paid for similar services by similar practitioners (regardless of method of compensation), such compensation may as appropriate be considered to constitute a distribution of profits.

"(i)(1) Each contract under this section shall be for a term of at least one year, as determined by the Secretary, and may be made automatically renewable from term to term in the absence of notice by either party of intention to terminate at the end of the current term; except that the Secretary may terminate any such contract at any time (after such reasonable notice and opportunity for hearing to the competitive medical plan involved as he may provide in regulations), if he finds that the plan (i) has failed substantially to carry out the contract, (ii) is carrying out the contract in a manner inconsistent with the efficient and effective administration of this section, or (iii) no longer substantially meets the applicable conditions of subsection (b).

"(2) The effective date of any contract executed pursuant to this section shall be specified in the contract.

"(3) Each contract under this section—

"(A) shall provide that the Secretary, or any person or organization designated by him—

"(i) shall have the right to inspect and evaluate the facilities of such competitive medical plan when there is reasonable evidence of some need for such inspection; and

"(ii) shall have the right to audit and inspect any books and records of the competitive medical plan that pertain (I) to the ability of the plan to bear the risk of potential financial losses, or (II) to services performed or determinations of amounts payable under the contract;

"(B) shall require the plan to provide (and pay for) written notice in advance of the contract's termination, as well as a description of alternatives for obtaining benefits under this title, to each individual enrolled under this section with the plan;

"(C) shall require the plan to comply with subsections (a) and (c) of section 1318 of the Public Health Service Act; and

"(D) shall contain such other terms and conditions not inconsistent with this section as the Secretary and competitive medical plan may find necessary and appropriate.

"(4) The Secretary shall establish minimum standards to ensure that a competitive medical plan that has entered into a contract with the Secretary under this subsection will provide clear and sufficient information on a regular basis to individuals eligible to enroll under this section with the plan, about the plan and to provide for the enrollment of such individuals with the plan.

"(5) The Secretary may not enter into contract with a competitive medical plan under this section if a former contract with that plan under this section was terminated at the request of the plan within the preceding 5-year period, except in circumstances which warrant special consideration, as determined by the Secretary.

"(6) The authority vested in the Secretary by this section may be performed without regard to such provisions of law or regulations relating to the making, performance, amendment, or modification of contracts of the United States as the Secretary may determine to be inconsistent with the furtherance of the purpose of this title.".

EFFECTIVE DATE

SEC. 3. The amendments made by section 2 of this Act shall apply with respect to services furnished on or after the first day of the thirteenth month that begins after the date of the enactment of this Act, or earlier with respect to any competitive medical plan if the plan so requests and the Secretary of Health and Human Services agrees; except that such amendments shall not apply—

(1) with respect to services furnished by a competitive medical plan to any individual who is enrolled with that plan and entitled to benefits under part A, or enrolled in part B, of title XVIII of the Social Security Act at the time the plan first enters into a contract subject to the amendments made by this section, unless—

(A) the individual requests at any time that the amendments apply, or

(B) the Secretary determines at any time that the amendments should apply to all members of the plan because of administrative costs or other administrative burdens involved and so informs in advance each affected member of the plan, or

(2) with respect to services furnished by a competitive medical plan during the five-year period beginning with the date of enactment of this Act, if a contract between the plan and the Secretary of Health and Human Services under section 1876(1)(2)(A) of the Social Security Act was in effect immediately before the date of the enactment of this Act, unless the plan requests that the amendments apply earlier.

SERVICES OF PHYSICIAN ASSISTANTS AND NURSE PRACTITIONERS

SEC. 4. Section 1861(s)(2) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (F);

(2) by inserting "and" after the semicolon in subparagraph (G); and

(3) by adding after subparagraph (G) the following new subparagraph:

"(H) services furnished pursuant to a contract under section 1876 to a member of a competitive medical plan by a physician assistant or by a nurse practitioner (as defined in subsection (aa)(3)) and such services and supplies furnished as an incident to his service to such a member as would otherwise be

covered under this part if furnished by a physician or as an incident to a physician's service;".

FACTS ABOUT MAJOR PROVISIONS OF COMPETITIVE HEALTH AND MEDICAL PLAN (CHAMP) ACT OF 1981

(To be introduced by Senator JOHN HEINZ)

"To reform the method of reimbursement to health maintenance organizations and to provide Medicare reimbursement to certain prepaid health benefit plans."

What are the purposes of the Competitive Health and Medical Plan Act of 1981?

(1) To offer the elderly a wider freedom of choice in selecting a health delivery system suited to their individual needs;

(2) To encourage and stimulate competition among alternative systems of health care delivery. (Explanation: the more efficient a Competitive Medical Plan is in relation to the fee-for-service sector, the richer the benefits they can offer and therefore the more attractive the CMP will be to the elderly beneficiary);

(3) To contain health care costs through competitive market forces and through greater utilization of more efficient health care delivery systems.

What are the benefis of the CHAMP Act?

Because the payment to Competitive Medical Plans under this bill will be made on a prospective per capita, rather than a service-rendered basis, the CHAMP Act will:

(1) Provide the most appropriate care in the most appropriate settings;

(2) Enable Medicare beneficiaries to budget their total out-of-pocket health care expenses;

(3) Provide Medicare beneficiaries with a continuum of care;

(4) Be effective in holding down costs.

Who is eligible to participate in a competitive medical plan (CMP)?

Anyone entitled to benefits under Parts A and B of Medicare, except individuals medically determined to have end-stage renal disease, is entitled to participate in a CMP. Eligibility is delayed for those currently under a "spell of illness" covered under Medicare.

What is a competitive medical plan?

(1) An entity that meets the Federal definition of HMO contained in Title XIII of Public Health Service Act; or

(2) An entity licensed as a HMO by the State in which it operates; or

(3) An entity which:

(a) Assumes full financial risk on a prospective basis for the provision of health care services;

(b) Provides physicians services either directly or through contracts with physicians;

(c) Provides to enrolled members at least the medical and hospital benefits provided by Parts A and B of Medicare and out of area coverage;

(d) Is compensated for the care of enrolled members on a periodic basis, without regard to date, frequency, extent, or kind of services rendered;

(e) Has made adequate provision against risk of insolvency.

What is the difference between the CHAMP Act and current law?

At present, the only CMPs that may participate in the Medicare program are Federally qualified HMOs. Furthermore, the current Medicare reimbursement to these HMOs is inconsistent with the way HMOs are paid for all other enrollees.

Federally qualified HMOs can only choose between being reimbursed on a cost or a risk basis. Under both of these methods, the HMO receives interim monthly payments from Medicare, and adjustments for actual costs are made at the conclusion of the contract period.

Under the cost contract, efficiencies and inefficiencies are reflected only in increases or decreases in reimbursement. Under the risk contract, losses must be absorbed by the HMO, and savings are shared exclusively by the HMO and the Federal government—not the Medicare beneficiary. Thus, both of these methods ignore the principle of prospectively set (before services are rendered) payment levels inherent in the HMO concept, and oblige the HMO to calculate costs retrospectively.

What health care benefits would be provided by competitive medical plans?

At a minimum, a CMP must provide all services required under Parts A and B of Medicare.

How does the CHAMP Act ensure that savings will be passed on to the consumers?

If the Medicare reimbursement exceeds the adjusted community rate (which is the amount that would return to the CMP the same rate of profit for Medicare enrollees as for its private enrollees), the difference must be applied to additional benefits, decreased deductibles or co-payments or rebates.

The additional benefits will be selected by a group of Medicare eligible individuals enrolled in the CMP from a list of alternatives presented by the CMP.

How will the CMPs be reimbursed by medicare?

(1) On a prospective basis (in advance of actual services rendered);

(2) At a level that would be equal to 95 percent of the adjusted average per capita cost. (AAPCC means the average amount payable on a per capita basis in any contract year for medical services furnished under Parts A and B of Medicare as if the services were furnished by an entity other than a CMP. The adjustment will be made on the basis of age, sex, institutional status, disability and health status, and place of residence.);

(3) Existing CMPs and newly participating CMPs may, when this legislation is implemented, be reimbursed under the existing retrospective cost arrangement for a maximum of five years.

What else would a CMP have to do?

(1) Have an open enrollment period for at least 30 consecutive days per year;

(2) Regardless of their health status, provide basic health services to any individual eligible for Medicare benefits;

(3) Have a plan to assure quality care, and follow-through on recommendations to enhance quality of health care services;

(4) Demonstrate that the ratio of premium to benefits for Medicare enrollees will not exceed that of non-Medicare enrollees also in the plan;

(5) Meet reasonable standards of fiscal soundness;

(6) Use a community rating system;

(7) Provide Parts A and B services through qualified institutions and individuals;

(8) Permit the Secretary to inspect or evaluate the CMP if there is reasonable evidence to do so.

What restrictions are placed on CMPs?

A CMP may not:

(1) Levy premiums and other charges for Medicare enrollees that exceed those of Medicare recipients who are not enrolled in a CMP;

(2) Charge more for other services, provided in addition to the basic services, than those services would cost if their value were determined using the adjusted community rate;

(3) Participate in the CHAMP program unless at least one-half of the membership of a CMP consists of individuals not eligible for Title XIX, Medicaid, or Title XVIII, Medicare benefits.

What about emergency medical services?

A CMP is required to reimburse its members for the cost of medically necessary emergency medical services if reduced outside the area covered by the CMP, and must make arrangements for care 24 hours.

How are the rights of CMP enrollees protected?

(1) If dissatisfied, an individual may terminate enrollment in a CMP on the first day of the month following the first full month after termination is requested; and

(2) Review is mandated for any disputed service or charge if the amount in question is $100 or more. Judicial review is required for amounts equalling $1,000 or more.

How will the CHAMP Act prevent adverse selection?

(1) The Secretary of the Department of Health and Human Services will establish minimum standards under which CMPs can enroll eligible individuals and can inform them about the CMP.

(2) The Secretary may terminate contracts if significant violations are found.

How will contracts be administered?

The Health Care Financing Administration will be responsible for the administration of all contracts. Each contract:

(1) Will be drawn for at least one year terms;

(2) Will be automatically renewable, although it may be terminated at any time by the Secretary for good causes; and

(3) To be terminated by a CMP, the CMP must notify, in writing, each enrolled individual and provide a description of alternatives for obtaining benefits.

How would Medicare beneficiaries currently enrolled in HMOs be affected?

(1) Individuals already enrolled in the HMO and receiving Medicare reimbursement at the time the HMO enters into a contract with the Secretary have the option of continuing that reimbursement method or switching to the new; and

(2) The new reimbursement method would not apply for three years to HMOs already under contract with HHS at the date of enactment unless the HMO chooses otherwise.

How soon after enactment will the CHAMP Act be effective?

One year following the date of enactment, or earlier if requested by the CMP and the Secretary concurs.

By Mr. PERCY (by request):

S.J. Res. 100. Joint resolution to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel; to the Committee on Foreign Relations.

MIDEAST PEACE TREATY

Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a joint resolution to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel.

This legislation has been requested by the Department of State and I am introducing the proposed joint resolution in order that there may be specific legislation to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this joint resolution as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the joint resolution be printed in the RECORD at this point, together with a section-by-section analysis of the joint resolution and the letter from the Secretary of State to the President of the Senate dated July 18, 1981.

There being no objection, joint resolution and material were ordered to be printed in the RECORD, as follows:

S. J. RES. 100

Whereas the Treaty of Peace between Egypt and Israel signed on March 26, 1979, calls for the supervision of security arrangements to be undertaken by United Nations Forces and Observers; and

Whereas the United Nations has been unable to assume those responsibilities; and

Whereas a Protocol initialled on July 17, 1981, by the Government of the Arab Republic of Egypt and the Government of the State of Israel provides for the creation of an alternative Multinational Force and Observers to implement the Treaty of Peace; and

Whereas the Government of the Arab Republic of Egypt and the Government of the State of Israel have requested that the United States participate in the Multinational Force and Observers: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized to assign, under such terms and conditions as he may determine, personnel of the Armed Forces of the United States to participate in the Multinational Force and Observers to be established in accordance with the Protocol between Egypt and Israel initialled July 17, 1981, relating to the implementation of the security arrangements of the Treaty of Peace. The President is also authorized to provide, under such terms and conditions as he may determine, United States civilian personnel to participate as observers in the Multinational Force and Observers. The status of United States Government personnel assigned to the Multinational Force and Observers shall be as provided in Section 629 of the Foreign Assistance Act of 1961, as amended.

SEC. 2. The President is authorized to agree with Egypt and Israel that the United States will contribute a share of the costs of such Multinational Force and Observers in accordance with the Protocol, subject to the authorization and appropriation of necessary funds.

SEC. 3. There are authorized to be appropriated to the President to carry out chapter 6 of Part II of the Foreign Assistance Act of 1961, in addition to amounts otherwise available to carry out that chapter, $125 million for the fiscal year 1982 for contributions as authorized by section 2 of this Resolution. Amounts appropriated under this section are authorized to remain available until expended.

SEC. 4. Any agency of the United States Government is authorized to sell, loan, or lease property (including interests therein) to, and to perform administrative and technical services for the support of, the Multinational Force and Observers upon such terms and conditions as the President may direct. Reimbursements to agencies under this section shall be credited to the current applicable appropriation of the agency concerned.

SECTION-BY-SECTION ANALYSIS

PREAMBLE

This provision sets forth the purpose of the resolution—to authorize the participation of the United States in a Multinational Force and Observers to implement the Treaty of Peace between Egypt and Israel. It also describes the factors which have tional Force and Observers and the request led to the establishment of such Multinafor United States participation in it.

Section 1.—This portion of the resolution authorizes the President to assign, under such conditions as he may determine, personnel of the Armed Forces to participate in the Multinational Force and Observers. It is anticipated that the United States would provide one infantry battalion and a logistics support unit to participate in the multinational force.

Egypt and Israel have also requested that the United States provide the observer unit of the Multinational Force and Observers. In the negotiations both parties have further requested that United States civilian personnel of the Sinai Field Mission perform this function. This section accordingly authorizes the assignment of such civilian personnel to serve as an observer unit. (Pursuant to Public Law 94–110 of October 13, 1975, (22 U.S.C. 2441), the United States Government performed certain functions similar to some of those which will now be performed by the Multinational Force and Observers.) It is also anticipated that individual United States officers and employees may be detailed to serve in the Multinational Force and Observers in other capacities (for example, as members of the Director General's staff) pursuant to Section 628 of the Foreign Assistance Act of 1961, as amended.

The final sentence of this section makes it clear that all United States Government personnel assigned to the Multinational Force and Observers will continue to receive their normal pay, allowances and other benefits in accordance with section 629 of the Foreign Assistance Act of 1961, as amended.

Section 2.—This section authorizes the President to agree that the United States will contribute a share of the costs of the Multinational Force and Observers, subject to the authorization and appropriation of necessary funds. In light of the initial costs involved in establishing the necessary facilities for the Multinational Force and Observers, it is contemplated that the United States would contribute up to 60 per cent of the costs of the Multinational Force and Observers through September 30, 1982.

Thereafter, the United States would pay one third of annual costs. It is envisioned that these shared costs would not include the salaries and other normal costs associated with the military personnel of the developed countries that contribute troops to this peace-keeping force.

The developed countries would be reimbursed, upon request, for additional expenses associated with transporting their personnel to and maintaining them in the Sinai. In particular, the Department of Defense would receive reimbursement under this section from the Multinational Force and Observers for additional costs over and above the cost of maintaining the United States military contingent in the United States.

The developing countries will be reimbursed for all expenses associated with provision of their military contingents. The full cost of the observer contingent furnished by the United States will be reimbursed by the Multinational Force and Observers.

Section 3.—For the purpose of covering the United States share of the costs for the operation of the Multinational Force and Observers through September 30, 1982, this section authorizes the appropriation of $125 million to carry out chapter 6 of part II of the Foreign Assistance Act of 1961, as amended (Peacekeeping Operations) in addition to amounts otherwise available to carry out that chapter. The funds made available pursuant to such authorization will be provided to the Multinational Force and Observers under appropriate grant agreements.

Section 4.—This section would authorize the provisions of supplies and services to the Multinational Force and Observers by United States Government agencies upon such terms and conditions as the President may direct.

This provision is intended to provide administrative flexibility sufficient to permit the economical utilization of available United States Government resources. The authority of section 607 of the Foreign Assistance Act of 1961, as amended, will remain available.

Although agencies would normally provide goods and services to the Multinational Force and Observers on a reimbursable basis, this section of the Joint Resolution would also permit nonreimbursable administrative and technical services such as use of vacant office space, access to communications facilities and transportation on a space-available basis.

The authority provided by Section 633 of the Foreign Assistance Act of 1961, as amended, will also be exercised as appropriate to permit timely and economical furnishing of goods and services under contracts performed by the United States for the Multinational Force and Observers.

THE SECRETARY OF STATE,
Washington, D.C., July 18, 1981.

Hon. GEORGE BUSH,
President, U.S. Senate.

DEAR MR. PRESIDENT: I herewith transmit on behalf of the President a proposed Joint Resolution to authorize the participation of the United States in a Multinational Force and Observers to be established by Egypt and Israel. The United States activities to be authorized are vital to the achievement of further progress towards a just and lasting peace in the Middle East which remains one of the most important objectives of United States foreign policy.

The conclusion in 1979 of the Treaty of Peace between Egypt and Israel was a crucial step in the overall peace process, and the United States has sought to provide appropriate support and assistance to ensure the full, effective and timely implementation of its terms. The next crucial steps called for in the treaty are the establishment of effective security arrangements in the border area, including the presence of United Nations forces and observers, and the total withdrawal of Israeli forces from Egyptian territory by April 25, 1982.

Unfortunately, on May 18, 1981, the President of the United Nations Security Council indicated that the Security Council was unable to reach the necessary agreement on the proposal to establish United Nations forces and observers. This possibility was envisioned during the peace treaty negotiations, and for this reason President Carter assured the Parties that, subject to United States Constitutional processes, "[i]f the Security Council fails to establish and maintain the arrangements called for in the Treaty, the President will be prepared to take those steps necessary to ensure the establishment and maintenance of an acceptable alternative multinational force."

Egypt and Israel have now agreed to establish, under the direction of a Director General appointed by them, such a multinational force and observers to permit the implementation of those security arrangements pursuant to the Treaty of Peace. This multinational force and observers can be effective, however, only if the United States and other nations who support the cause of peace provide the needed support and participation.

Timing is a crucial factor. If the multinational force and observers are to be operational by April 25, 1982, substantial planning, procurement and construction must be initiated well in advance. Given the urgency of the situation, at the request of the parties and after consultation with appropriate members of the Congress, the Department of Defense has initiated certain planning for procurement activities with financing to be provided to the Director General by the Governments of Egypt and Israel which will be credited against those Governments' shares

of the costs of the Multinational Force and Observers.

This procedure will permit essential, initial steps to take place. Nevertheless, the prompt enactment of the proposed Joint Resolution is essential if the establishment of the multinational force and observers is to proceed in a successful and timely fashion.

We cannot allow the present obstacles which prevent United Nations participation to delay or otherwise adversely affect the peace process. The enactment of this legislation on an urgent basis is vital to the successful implementation of the Treaty of Peace between Egypt and Israel which, in turn, is essential to further progress in the overall peace process. I therefore urge its early passage.

The Office of Management and Budget has advised that enactment of this proposal would be in accord with the program of the President.

Sincerely,

AL.

ADDITIONAL COSPONSORS

S. 267

At the request of Mr. DECONCINI, the Senator from Oregon (Mr. HATFIELD), and the Senator from Massachusetts (Mr. KENNEDY) were added as cosponsors of S. 267, a bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes.

S. 672

At the request of Mr. PELL, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 672, a bill to require the Secretary of Transportation to administer a national driver register to assist State driver licensing officials in electronically exchanging information regarding the motor vehicle driving records of certain individuals.

S. 1310

At the request of Mr. BOSCHWITZ, the Senator from Wyoming (Mr. SIMPSON) was added as a cosponsor of S. 1310, a bill to amend the Internal Revenue Code of 1954 to provide certain community development, employment, and tax incentives for individuals and businesses in depressed areas.

SENATE JOINT RESOLUTION 65

At the request of Mr. PELL, the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of Senate Joint Resolution 65, a joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

SENATE JOINT RESOLUTION 78

At the request of Mr. COCHRAN, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of Senate Joint Resolution 78, a joint resolution to provide for the designation of October 2, 1981, as "American Enterprise Day."

● Mr. PELL. Mr. President, I ask unanimous consent that Senator JEPSEN be added as a cosponsor of Senate Joint Resolution 65, proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom. The addition of Senator JEPSEN brings to 55 the number of cosponsors in the Senate for this very worthy legislation.

This resolution has been approved unanimously by both the Committee on Foreign Relations and the Committee on the Judiciary, and I look forward to the day in the very near future when the measure is passed in both the Senate and the House and signed by the President.

Raoul Wallenberg's brave mission to Hungary during World War II, where he saved the lives of an estimated 100,000 innocent people who had been marked for extermination by the Nazis, was undertaken at the behest of the U.S. Government. His efforts in Hungary were financed and supported by the U.S. War Refugee Board. Consequently, the United States has a special obligation to Raoul Wallenberg and his family.

Certainly we must do everything we can to try to secure for Raoul Wallenberg the same life and liberty he saved for so many others. Honoring him by making him an honorary U.S. citizen will greatly enhance his renown as a courageous humanitarian, not only among those whose lives he saved, but among all groups and individuals who value human life and human rights. I thank my colleagues who have joined with me in this effort.●

SENATE RESOLUTION 190—ORIGINAL RESOLUTION REPORTED WAIVING THE CONGRESSIONAL ACT

Mr. WARNER, from the Committee on Energy and Natural Resources, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 190

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 859. Such waiver is necessary because the bill, as reported, would reallocate receipts after January 1, 1981 from federal leases on acquired lands used for military or naval purposes.

SENATE RESOLUTION 191—RESOLUTION REGARDING PROGRAMS FOR THE RESETTLING OF INDOCHINESE REFUGEES

Mr. HUDDLESTON (for himself and Mr. ZORINSKY) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 191

Whereas the United States terminated all active and direct military involvement in Indochina in 1975;

Whereas since that time the United States has accepted almost 500,000 Indochinese refugees for resettlement in one of the largest and most expensive resettlement efforts in our history;

Whereas United States taxpayers have been required to spend billions of dollars to resettle and assist Indochinese refugees;

Whereas the flow of individuals in Indochina claiming to be refugees is at a very high level;

Whereas reliable sources claim that liberal first asylum conditions, together, with the prospect for rapid resettlement, is expected to continue the increased flow, and that most recent arrivals are "low-risk" refugees that do not belong to harassed minority groups, do not have close family ties in the United States, and were not associated with American programs during the war;

Whereas officials of the Immigration and Naturalization Service have concluded that thousands of Indochinese individuals claiming to be refugees do not fit the definition of "refugee" in our Immigration and Nationality Act;

Whereas the compelling and paramount economic reasons which require that Federal spending be substantially reduced necessitate a reduction in many domestic Federal assistance programs;

Whereas the basic requirements of the needy and deserving citizens of the United States must be placed first;

Whereas the concentration of Indochinese refugees has placed severe strains upon the State and local governments which must deal with their social and economic impact; and

Whereas it is necessary for the United States to maintain an equitable refugee policy and demands are increasing for the resettlement of refugees from other parts of the world: Now, therefore be it

Resolved, That it is the sense of the Senate that the program for resettling Indochinese refugees shall be immediately and thoroughly investigated by the Executive and Congress to determine if the program is classifying as refugees large numbers of individuals who are migrating primarily for economic reasons, is encouraging the mass migration of individuals and is being administered in the strict manner Congress intended. Should the findings of this investigation so warrant, the program shall be phased out as soon as possible.

The investigation shall give substantial weight to the testimony and professional opinions of Immigration and Naturalization Officers who have direct experience with the Indochinese resettlement program.

RESETTLING OF INDOCHINESE REFUGEES

Mr. HUDDLESTON. Mr. President, since the fall of Vietnam, the United States has undertaken one of the largest and most expensive refugee assistance efforts in our history. Almost 500,000 refugees have been resettled in the United States and approximately $2 billion has been spent for Indochinese refugee assistance. However, even after this monumental effort, the end is not in sight for the flow of refugees from Indochina.

I believe that ample evidence exists to prove that many of the individuals claiming to be persecuted in Indochina are in reality immigrants who are seeking a better economic life and that our resettlement policies are encouraging this continuing flow of people.

Therefore, I am submitting a resolution today which would recommend that the Executive and the Congress conduct an immediate investigation into these allegations to determine if the program is being administered in accordance with the intent of Congress. Although I believe that sufficient evidence exists to justify immediate phasing out of th's program, my resolution only calls for an investigation at this time.

I do not make this recommendation lightly. No one can deny that the individuals claiming to be refugees in that area are needy people, but there is no convincing evidence that their needs are any greater than those of the 16 million

other refugees in the world today. Furthermore, at a time when we are cutting billions of dollars out of domestic assistance programs, we should not continue this expensive foreign program which is misguided and counterproductive.

There is no doubt that our well publicized resettlement program has actually made the refugee situation worse by encouraging individuals to leave their countries. A study entitled "Indochinese Refugees: The Impact of First Asylum Countries and Implications for American Policy," which was prepared for the use of the Joint Economic Committee on November 25, 1980, made basically this finding. The study states:

The success of the program for Laotians and Vietnamese has the effect of increasing the flow of refugees attracted by liberal first asylum conditions and the prospect for rapid resettlement.

This finding comes as no surprise to those of us who have followed closely the Indochinese refugee problem from its very beginning. Several years ago it was not uncommon for the "boat people" to be picked up by our Navy. Nor was it unusual for these people to know which State in our country they wanted to go because of its reputation for the best refugee resettlement program.

They learn of these generous and rapid resettlement programs from many sources. The Voice of America and the BBC are constantly broadcasting about the type of receptions these people are getting, and then there is the flow of information from friends and relatives. The South China Morning Post recently ran an article on the exodus and reported that refugees "are sent a photo of a relative standing in front of a car which probably doesn't belong to him and then telling of jobs, houses, purchases . . . The Vietnamese seem to expect that they will be welcomed wherever they go . . .".

As long as this type of advertising continues, we should not be surprised to learn that the flow of refugees is still as high as it once was. This is substantiated by the New York Times which reported on June 26, 1981 that:

The number of refugees leaving Vietnam on small boats rose in April and May to the highest level in two years, and partial statistics obtained from the United Nations High Commissioner for Refugees indicate that the rate of departure remains high this month despite heavy monsoon weather in the South China Sea.

This discouraging fact was underscored by the publication of the 1981 World Refugee Survey prepared by the U.S. Committee for Refugees. The title of one of the lead articles in this publication tells the whole story—"Indochina Refugees: No End in Sight."

It is time that the United States faces up to the fact that continuing our present policies in this area of the world will only make the problem worse in the long run. The United States is not a bottomless well from which assistance can be extracted for an indefinite time. The Joint Economic Committee study says that as many as one million more people are willing to come out of Vietnam. I do not believe that we should continue to provide the encouragement for these people to do so.

If the present flow of individuals out of Indochina truly consisted of refugees, I would have more reservations about proposing this phase-out. But the most recent evidence strongly indicates that 70 percent or more may not fit our very liberal definition of "refugee." Section 101(a)(42) of the Immigration and Nationality Act defines a refugee as the following:

Any person who is unable or unwilling to return to, and is unable or unwilling to avail himself or herself of the protection of, that country because of persecution or a well-founded fear of persecution.

Unfortunately, it appears that many of those who claim to be refugees under this section are fleeing economic hardships and do not have a fear of persecution in its true sense. The Joint Economic Committee study found that:

Most recent arrivals are 'low-risk' refugees that do not belong to harassed minority groups, do not have close family ties in the United States, and were not associated with American programs during the war (66% of those in the initial processing phase for entry into the United States in March–April 1980 fell in this category IV of "other" under the American preference criteria for Indochinese refugees).

This argument of lack of refugee status is supported from other sources. The South China Morning Post reported on June 23, 1981 that:

For about 90 percent of the people who want to leave the reasons are economic,' a diplomat said. 'Some say they want to go for their children's education future, others complain about health care.

On June 26 the New York Times reported:

An argument increasingly voiced is that more than six years after the Communist victory in Indochina the genuine political refugees have already left and those who now are risking their own lives and those of their families to escape are doing so for economic gain.

This point of view has been openly discussed in the press for a long time now. On March 24, 1981 the Christian Science Monitor ran an article which said:

A growing number of immigration officers, refugee workers, and even a few social workers are claiming that many of the refugees are not really refugees but "assisted immigrants."

Now a large percentage are young unemployed, draft dodgers, students, and many others who may find life in Vietnam hard, but are not being persecuted.

While this problem has been reported in the press, it has also been strongly debated within the Reagan administration. The Department of State has taken the position that all individuals leaving Vietnam, Laos and Cambodia are to be presumed to be refugees. After a great deal of hard infighting by the Department of State, the Attorney General agreed with the Department, although there is no provision in the law for this kind of blanket, automatic classification.

The unfortunate aspect of this capitulation by the Attorney General is not that it will continue a counterproductive foreign policy but that the Nation's chief law enforcement officer has decided that he will not enforce the immigration law as it was written by Congress last year. The order which went out to INS officers in the field from the Acting Commissioner of INS states that "INS officers will limit their findings to admissibility under Section 212(a) of the Immigration and Nationality Act." The effect of this order was to prohibit the use of section 101(a)(42), which is where "refugee" is defined.

The internal fight between INS and the Department of State was an extremely bitter one and there are files full of cables, letters, and memos which provide convincing evidence that the refugee policy in Southeast Asia is not in compliance with the law.

It should come as no surprise to anyone that the Department of Justice is trying to cover up this evidence. Although I have been trying since June 15, 1981 to secure copies of this correspondence, the Department has refused to release it. Fortunately, it has become well known within the administration that I am seeking these documents and some have begun to see the light of day through unofficial channels.

From their content, I can understand why the Attorney General does not want them released, as can be seen from the following excerpt:

An assessment of the presently arriving Vietnamese has been made by the American Consul stationed in Songkhla, Thailand and his report taken by a Consular Officer who has been at his post for approximately 2 years indicates that 72 percent of the persons arriving at that location are economic immigrants. Further that the U.S. acceptance rate is acting as a magnet to a group who are tired of being deprived of the many things available in the western world and more exactly in the U.S.

Other documents make an even stronger case for the argument that a large percentage of those claiming to be political refugees are in reality economic refugees. There is also considerable evidence that many officials from friendly governments involved in Southeast Asia believe that our overly generous refugee policy is actually encouraging the flow of refugees.

Even those few who are true refugees do not have an automatic claim to resettlement in the United States. We have done more than our share by resettling more Indochinese refugees than all the other countries combined and by expending billions of dollars for assistance. I do not believe that it is fair to the American taxpayer to continue to ask him to contribute to an endless stream of people from Southeast Asia seeking a better life. There is no light at the end of the tunnel for this program in Indochina.

It will go on as long as we are willing to fund the major portion of it, and offer the hope to every immigrant for settlement in the United States.

If the only immigration problem we faced in the United States involved the Indochinese, the argument to continue to admit them might be more convincing. But this is not the case. Last year immigration to the United States was at its highest level in our history. We admitted

over 800,000 legal immigrants and probably as many illegal immigrants. A major portion of the legal ones were refugees.

Our refugee program has grown so large that we can no longer afford to think of it outside of our total immigration policy. Refugees come to this country as permanent residents and they contribute to the economic and social problems caused by a growing population. However, because of their special needs, they also generate direct costs for taxpayers. In fiscal year 1980 we spent $2 billion for refugee assistance and will probably spend $2.5 billion in fiscal year 1981. Furthermore, State and local governments are becoming more worried about the increased cost they must shoulder for refugees. A New York Times article reported in July that, "each month, California officials estimate, from 5,000 to 6,000 Southeast Asian refugees move to their State, and more than half seek public financial assistance."

If this administration is committed to telling our elderly who have spent their lifetimes working for the good of this country that they must accept less in the way of domestic assistance programs and social security, I do not believe that we can continue a policy which admits hundreds of thousands of refugees each year who will require very expensive special assistance programs.

The United States has gone far beyond the original intent of our Southeast Asian refugee resettlement program. We have created a multi-million dollar refugee recruiting program which is spearheaded by the State Department and which contravenes our own laws. Hundreds of voluntary agencies have been created to process refugees and even though they operate on very humanitarian principles, they rely on millions of dollars of grants through the refugee program in order to exist.

We have in effect created a special interest group both within and without the Government which is programed for one purpose—to process and resettle refugees in the United States. An example of this can be seen in recent activity. Earlier this year the Department of State committed the United States to accepting several thousand African refugees, again more than the rest of the world combined.

Now it appears that the administration has agreed to double the admission level for refugees from Poland. In order to accomplish this increase, the Department of Justice is using a little deception. On the one hand, they claim to be offsetting the Polish admissions by decreasing Indochinese refugee admissions. However, since the total refugee admissions greatly exceed the statutory yearly level of 50,000 by four or five times, there is no real reduction or offset. The administration has merely played games with numbers which are already too high.

It is time that we declare that the United States cannot be the resettlement colony for all the refugees of the world. There are 16 million refugees in the world and this number will probably increase due to the uncertain and volatile political and economic situations which exist in many countries of the world today.

This does not mean that we must completely stop the admission of refugees. The United States should always stand ready to do its fair share and even more. But we can no longer afford the luxury of an unlimited, open-ended policy.

Our immigration law establishes 50,000 refugees a year as a normal flow, yet, even though this legislation is less than 2 years old, we have never adhered to its limits. We admitted about 235,000 refugees in fiscal year 1980, we will admit about 217,000 in fiscal year 1981, and the number being suggested for fiscal year 1982 is 178,000. Actions beyond our control in Cuba, Haiti, or a dozen other countries could push that total much higher. Congress did not intend that the Refugee Act be abused in this fashion. If this, or any other administration, cannot use good judgment in administering the statute, Congress should take back some of the unlimited authority given to the President.

Mr. President, we cannot continue to administer our refugee policy in an ad hoc fashion as we have in the past. The only way to gain control of our total immigration policy is to include refugees within one total ceiling. Without the one ceiling to force us to set our priorities on immigration, we will continue on the same treadmill we presently are on. There are enough present and future hot spots in the world to keep the number of refugees in the millions and there will always be special-interest groups demanding that a particular group of people be given special treatment. In the past it has been Cuba, Haiti, and Indochina. Tomorrow it will be El Salvador, Poland, or any number of other countries.

News reports on this problem have begun to surface and they are providing support for the INS contention that many of these people are not refugees. I ask unanimous consent that articles from the New York Times, the Christian Science Monitor, and the South China Morning Post be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

ECONOMIC WOES BEHIND EXODUS

(By Catherine Campbell)

There is a weary joke in the capital city of former South Vietnam that even the telephone poles are queuing up to leave.

"Almost everyone wants to get out. As soon as I am alone with someone the request for help is made," a Western diplomat said.

Diplomats are bombarded with letters, some containing months of savings, to speed their requests to the right authorities.

Visitors find pleading notes tossed into their pedal cabs or are pulled aside and told sad stories of life under communism.

Wishful recollections of salaries paid by American employers are laced with American slang of the war era.

The complaints are legion: in a recent crackdown bookstalls disappeared, and Western music was confiscated from the few remaining coffee houses. Taxes on the coffee houses were raised and they were forced to close, according to Vietnamese residents.

"There is nowhere to go but the movies—Russian, East German, Vietnamese—or sometimes the theatre," a young woman said. "There is nothing to do."

One hotel holds a Saturday night dance where Government approved girls are provided as dancing partners for foreigners, but usually the streets are silent, long before the midnight curfew.

Although there is grumbling about travel restrictions—for each trip outside Ho Chi Minh City, formerly Saigon, a person must receive formal permission—most of the complaints are about money.

"For about 90 percent of the people who want to leave the reasons are economic," a diplomat said. "Some say they want to go for their children's educational future, others complain about health care."

The Government does grant exit visas, mostly to people who can't earn their own living or whom the authorities feel will never be integrated into the new society, diplomats said. Most of those allowed to leave are of Chinese origin or are elderly.

About 6,500 people left Ho Chi Minh city legally for North America, Australia and Europe last year under orderly departure programs, the sources said.

"But twice that number sneaked out by boat last month alone."

The goal of doubling the number of orderly departures this year still puts barely a dent in the continuing flow of "boat people" to neighboring Asian countries.

Many Vietnamese make several attempts at a cost of up to US $3,000 (about HK $16,500) each in bribes to junior officials, only to face a new set of perils if they reach the open waters in often ill-equipped boats.

But people who tell of relatives lost at sea seem undeterred in their own escape plans, some having made five or six attempts only to be betrayed by someone they had paid off.

"If we are caught the women are usually set free but the men are detained," said one man who was saving his black market earnings for a seventh try.

"Even among the boat people there are few who fit the classic definition of a refugee as someone fleeing his country because of a well-founded fear for his safety," a diplomat said.

"The Vietnamese seem to feel that they have a right to resettlement and that the West, and especially America, should respect that right."

Diplomats say that their warnings of the hardships of resettlement go unheeded.

"This is the tragedy—most of the Vietnamese have no idea of life abroad," a diplomat said. "I try to warn them but their reaction is: you don't have the right to tell me to stay here. You don't understand the situation.

"My answer is that they don't know the situation abroad. They are sent a photo of a relative standing in front of a car which probably doesn't belong to him and then telling of jobs, houses, purchases. No emigrant is ever going to admit to those left behind that he made a mistake."

The Vietnamese seem to expect that they will be welcomed wherever they go, diplomatic sources said.

The unknown number of half-American children in Vietnam also provide problems for diplomats.

Some of them, curly-haired, leggy and ragged, hang around the few hotels hoping for handouts, their faces a reproach for a painful piece of recent history.

Diplomats say they get many letters asking them to find an American husband called Joe or John who left in 1972. "But sometimes even if the father is found, he doesn't want to know."—Reuter.

[From the Christian Science Monitor, July 7, 1981]

THAILAND GIVES RED LIGHT TO MORE INDOCHINA REFUGEES

(By Neil Kelly)

BANGKOK.—Thailand has cut its intake of Indochina refugees and closed one Cambodia refugee camp. It is expected to close another for Vietnamese boat people in the next few days.

These moves reflect a growing conviction in Thailand and throughout Southeast Asia that the tide of refugees must be checked. Governments in the area are concerned that they may face a growing burden as international efforts to meet the problem with financial aid and resettlement lose steam.

There is also a widespread feeling that more refugees are leaving to seek better economic conditions, rather than to escape persecution.

Cambodian, Vietnamese, and Laotian refugees in Thailand now total 250,000. This is 12,000 fewer than six months ago and more than 50,000 fewer than at this time last year.

The largest camp of all, the Khao I-Dang camp, eight miles from the Cambodian frontier, has seen its refugee population shrink from 140,000 in mid-1980 to fewer than 40,000 today.

No new Cambodian refugees have been admitted for almost a year. Like the Cambodians, Vietnamese who have trekked across Cambodia are being prevented from crossing into Thailand, and the former flood from Laos has abated.

The Thais are employing subtle persuasion, threats, and tough action to lick the refugee problem, which has plagued them since the communist victories in Indochina in 1975. There is general agreement among civilian and military authorities that the time has come to say "enough is enough," but differences remain on how to execute that policy.

Some say the tough policy is popular domestically and note that foreign governments also respond to it. Since the rumblings began in Bangkok, the United States has indicated it will remove immigration impediments which have caused a backlog of Cambodian refugees to build up, and some other countries have promised to take more.

Some of the Thai leaders even advocate enforced repatriation, but most Cabinet members favor more humanitarian policies.

Thai Premier Prem Tinsulanonda is on record as saying that no refugee would be forced to go home against his will. The United Nations High Commissioner for Refugees has said his organization would not participate in any enforced repatriation.

United Nations officials, in fact, insist that Thai policy has not changed and that Thailand will not force anyone to go back.

Nevertheless, the Thais are not prepared to regard anyone escaping from communism as a genuine refugee. They feel too many are merely economic refugees seeking better lives outside their own countries.

That feeling is behind Thai refusals to admit 358 Vietnamese refugees now stranded among Cambodian guerrillas near the Thai border.

The International Committee of the Red Cross says their lives are in danger while they remain surrounded by tens of thousands of Cambodians who have a deep-seated hostility toward the Vietnamese.

Despite ICRC pleas to the prime minister to give sanctuary to the Vietnamese, military, and security chiefs have refused to give way. They say the safety of the Vietnamese is not Thailand's responsibility.

One Thai official said the Vietnamese had left at their own risk and had bribed Vietnamese and Cambodian officials all the way along to get to Thailand. The Thais have even ignored American assurances that the Vietnamese would probably be eligible for admission to the U.S.

Meanwhile Vietnamese boat refugees are still being allowed ashore although there have been threats to push them back out to sea. A supreme command spokesman said Thailand did not want to encourage refugees to keep on coming. He added that the Vietnamese were not refugees in the true sense but discontented people seeking better economic opportunities.

Thousands of Cambodians have left Thailand in the past year. Some have gone all the way back to their home villages equipped with rice seed and farming implements to resume their old lives. But many more have stayed in the primitive border encampments hoping for something better to turn up.

Thai policy is directed at discouraging them to go away, for, according to military leaders, they are a security risk to Thailand and their own lives are in danger.

Thai and United Nations officials are planning the voluntary repatriation of 30,000 to 40,000 Cambodians still in holding centers inside Thailand. Safe roads must be found for them through areas where Khmer Rouge guerrillas and Vietnamese soldiers are fighting.

The Thais are determined to go ahead with the plan despite Vietnam's threat to attack the Thai border again if repatriation takes place without help from the Vietnamese-installed government in Phnom Penh.

BOAT PEOPLE: REDEFINING THE REFUGEES

(By Frederic A. Moritz)

SINGAPORE.—President Reagan is likely to face growing pressure for a sharp cutback in admission of refugees from Indochina.

A growing number of immigration officers, workers, and even a few social workers are claiming that many of the refugees are not really refugees but "assisted immigrants."

American quotas of some 15,000 a month of these "economic refugees" favored treatment, compared with hundreds of thousands of other deserving people around the world.

So far this view has not changed US policy. Similar legislation is being proposed to exceed the same Indochina immigration quotas the next year. The Select Commission on Immigration and Refugee Policy in its final report to the President and Congress has even filed for an overall increase in legal immigration, from 580,000 a year for the last five years to 650,000 a year for the next five years.

But advocates of a clampdown hope rising economic difficulties at home will spur President Reagan to reconsider making substantial cutbacks.

These skeptics are found within the State Department and the Immigration and Naturalization Service, and among the voluntary agencies that assist in refugee resettlement. Then they refuse to be identified. But they appear eager to use the press to help create a new climate of public opinion that will accept sharp cutbacks.

According to one source, they have already been frustrated in their efforts to petition the Reagan administration for a policy change. But they are outspoken and confident on giving their case.

Their argument is first and foremost that those coming out from Indochina today do not meet the requirement of the US Refugee Act of 1980, which defines "refugee" this way: Any person outside his country unable or unwilling to return because of persecution, or well-founded fear of persecution, on account of race, religion, nationality, or political beliefs.

Instead of applying this requirement strictly and fairly, immigration officials have met the 15,000-a-month quota by relying on certain Vietnam-era provisions. These allow entry into the United States for Indochinese who have been separated from family members now in the US, who have worked for the US military or for a US company, or who have studied in the US. But not everyone meeting these criteria qualifies as a refugee, the critics argue.

"The nature of the refugee exodus has managed markedly since the end of the Vietnam war," maintains a US Foreign Service officer, who refused to be identified.

First there were those directly involved in the fighting.

Then came the wave of ethnic Chinese in Vietnam threatened as a minority during the 1979 war with China.

Now a larger percentage are young unemployed, draft dodgers, students, and many others who may find life in Vietnam hard, but are not being persecuted.

Opponents of this view differ on the facts and in their interpretation.

"There has been some but very little change in the composition," a social worker says. "We have always had some former military, many youth, and a variety of nonskilled worker types."

Indeed, in periodically interviewing Indochinese refugees since 1976, this correspondent has found some, but relatively little, change in the types of refugees, with the exception of the 1979 Chinese exodus, and the outflowing of Cambodians fearing execution at the hands of the Khmer Rouge before it was ousted by the invading Vietnamese in early 1979. But one now meets fewer people claiming to face retaliation because of past associations with Americans.

Very few from Vietnam ever claimed they actually faced execution or imprisonment. Most said they were leaving because life was hard, because they wanted more freedom, because the state was regulating or confiscating their businesses, because the government was clamping down on Roman Catholicism, because they had relatives in the United States, or because they feared discrimination on grounds they had worked for the U.S.

Supporters of the refugees thus often maintain that from the beginning many never met the strictest definition of refugee. Rather they have always been an immense human problem which must be handled in a constructive way.

One problem is defining "constructive." As of last January there were nearly 170,000 Indochinese refugees housed in Asian camps of the United Nations Office of High Commissioner for Refugees. Some 120,000 languished in Thailand, 12,000 in Malaysia, and 9,000 in Indonesia.

The problem is that if the United States continues to apply its liberal quota, more "refugees" or "assisted immigrants" will be encouraged to take to their boats. Southeast Asian countries will have to take care of the refugees for a time, at least, as they make their way to the U.S.

Yet if the U.S. clamps down on refugee immigration, the burden of long-term responsibility for these people will fall on Southeast Asia.

Also, if anticommunist President Reagan clamped down on showing welcome to anticommunist refugees, he would be open to political charges of hypocrisy.

"The answer to that is a global policy of clampdown," says a U.S. official. "It would

apply equally to Vietnamese, Cubans, and Haitians."

"Enough is enough. Six years later we have a very limited obligation. One is to our former employees and another is in cases of assisting family reunion," this official says.

One proposal is a halfway measure demonstrating continued US responsibility but aimed at deterring a further flow and reassuring Southeast Asian allies.

Under this plan, the US would support huge transit camps holding refugees until other countries accept them. It is hoped the tide of refugees would then be stemmed, since the camps would empty more slowly than at present.

But all such proposals face a major problem: Vietnam's declining economy is a growing inducement for its citizens to leave.

In talking to refugees, as this correspondent recently did, the references to economic hardship are a droning refrain, along with vague references to questions of freedom. It is difficult to generalize, because one encounters only a spot sample and because many refugees are savvy enough not always to tell the truth.

Late last month two vessels bearing 106 Vietnamese refugees arrived in Singapore. Their roster sheets gave ample indication of the nature of the present exodus: The Oakwood, for example, carried 6 fishermen, 8 unemployed people, 9 children, 9 students, 11 workers. The roster list for the Smit Lloyd was similar.

Notable was an absence of intellectuals and businessmen. And the critics say there is a conscious strategy of getting young people out first then having the older people follow as family reunion cases.

Among them was Nguyen Tan Dung, a former air conditioner repairman who calls himself Dung Yung. The soft-spoken head of a family of 11 brought all of them out after making a deal with a fisherman.

"Why did you leave?"

"Life in Vietnam is hard. We don't have enough food and my brother is afraid he will be drafted to fight China."

The lean workman adds mention of economic hardship, rising prices, food shortages, and limitations of the religious freedom of Catholics.

And like almost all he wants to go to the United States. One reason appears to be the letters he gets from a relative already there. "They say life in America is easy, life is good," Dung Yung explains.

For those who want the refugee quotas slashed, the Nguyen Tan Dung family is living proof that refugee is no longer the proper word.

But there are also those like former schoolteacher Tu Thi Tuyet. If her words can be believed, her reasons for leaving are different.

"There is no religious freedom in Vietnam," she said.

She, too, has seen letters from the US. "They said life is hard there. That there is much race discrimination. But if that is the price of freedom, that is what we must take."

[From the New York Times, June 26, 1981]

EXODUS OF VIETNAM "BOAT PEOPLE" CLIMBING BACK TO THE 1979 LEVELS

(By Henry Kamm)

BANGKOK, THAILAND.—The number of refugees leaving Vietnam on small boats rose in April and May to the highest level in two years, and partial statistics obtained from the United Nations High Commissioner for Refugees indicate that the rate of departure remains high this month despite heavy monsoon weather in the South China Sea.

The April and May totals of 11,155 and 14,792 of Vietnamese men, women and children who survived the hazardous crossings to Malaysia, Thailand, the Philippines and Hong Kong were the highest since July 1979, when Vietnam, in the face of worldwide protests, halted the forced mass departures of citizens of Chinese origin.

The refugees who have been reaching Southeast Asian shores since then have for the most part been ethnic Vietnamese.

Last month's figures showed Malaysia receiving 5,320 refugees, Thailand 3,273 and Hong Kong 1,777. By the 15th of this month Hong Kong had already received 2,205, Malaysia 1,868 and Thailand 1,537.

NEW CONCERN IN SOUTHEAST ASIA

The rising rate of escapes has revived concern among the first-asylum nations of Southeast Asia and was a principal subject of discussion when the foreign ministers of the Philippines, Thailand, Indonesia, Malaysia and Indonesia met at their annual conference last week in Manila. They called on the Western countries that have been the ultimate destination of Indochinese refugees to increase the rate of resettlement. The officials expressed their concern to Secretary of State Alexander M. Haig Jr., who attended the conference.

A senior official in Mr. Haig's party said that the United States had assured the first-asylum nations that it intended to maintain its intake even after the present quota of 14,000 Indochinese a month expires on Sept. 30. But the official added that he expected that the quota would be lowered to 12,000 in consultation with Congress.

Despite the steady demand for resettlement in the United States and the total of 166,457 refugees now in Southeast Asian transit camps, as well as 135,562 Cambodians to whom Thailand denies refugee status, the United States is not filling its quota.

The reasons are difficulties of access to the Cambodians in Thai holding centers, the unwillingness of many refugees from Laos to leave this region and the application until recently by regional officials of the Immigration and Naturalization Service of rigid new criteria to deny refugees entry into the United States.

ONE OBSTACLE PUT ASIDE

The latter obstacle has been put aside as a result of State Department appeals to the Justice Department, including a letter from Mr. Haig to Attorney General William French Smith. But refugee officials who favor a liberal admission policy for the Indochinese as a duty imposed by the American military involvement in Indochina fear that such a policy remains contested.

They point to mounting sentiment in some Washington quarters against a more generous policy for Indochinese than for other immigrants from developing countries. An argument increasingly voiced is that more than six years after the Communist victory in Indochina the genuine political refugees have already left and those who now are risking their own lives and those of their families to escape are doing so for economic gain.

A high-level official panel, to be headed by former Assistant Secretary of State Marshall Green, will tour Southeast Asia next month and report its findings on these and related issues to the Reagan Administration. Mr. Green was chosen to replace Philip C. Habib, who is continuing his mediation mission in the Middle East.

AMENDMENTS SUBMITTED FOR PRINTING

ECONOMIC RECOVERY TAX ACT OF 1981

AMENDMENT NO. 511

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

AMENDMENT NO. 512

(Ordered to be printed and to lie on the table.)

Mr. HEINZ (for himself, Mr. PACKWOOD, and Mr. HART) submitted an amendment intended to be proposed by them to the joint resolution House Joint Resolution 266, supra.

POLLUTION CONTROL BOND FINANCING

● Mr. HEINZ. Mr. President, today I am proposing an amendment to the Economic Recovery Tax Act that might well be called the "Pollution Control Bond Regulatory Reform Act of 1981." Its passage is justified because for years the Internal Revenue Service—through regulations issued pursuant to section 103 of the Internal Revenue Code—has thwarted the intent of Congress by precluding the use of tax-exempt pollution control bonds for their intended purposes. Its passage is essential as part of the Economic Recovery Tax Act because the regulatory excesses perpetrated by the bureaucracy at IRS threaten to jeopardize the economic growth that otherwise would be generated as a result of the Senate Finance Committee tax reduction package.

Mr. President, the case for adoption of my amendment can be summarized as follows:

First, Senate Finance Committee hearings held the day after markup of the tax reduction bill had been completed demonstrated the urgency of the pollution control bond regulatory reforms contained in my amendment.

Second, compliance costs with Federal and State pollution control mandates jeopardize the success of the economic recovery program with respect to many of the Nation's basic industries—unless this amendment is adopted.

Third, Internal Revenue Service regulations have thwarted the intent of Congress as reflected in section 103 of the Internal Revenue Code and passage of various environmental control laws.

Fourth, my amendment would allow section 103 pollution control bonds to be used for their intended purposes—compliance with air and water pollution control and solid and hazardous waste management requirements—while minimizing the loss to the Federal Treasury.

Let me briefly expand on each of these points.

FINANCE HEARINGS HELD AFTER TAX BILL MARKUP DEMONSTRATED URGENCY OF POLLUTION CONTROL BOND REGULATORY REFORMS

For the benefit of my distinguished colleagues who do not serve on the Finance Committee, let me explain that hearings on this proposal were not held until June 26, the day after markup of the tax reduction bill had been completed.

But the expert witnesses who testified that day presented compelling arguments for immediate passage of the legislation on which this amendment is based—S. 169, cosponsored by Senators RANDOLPH, GLENN, LUGAR, GARN, DIXON, and ANDREWS.

To recap the testimony presented to the Finance Committee:

Wayne Nichols, director of the Ohio Environmental Protection Agency, said, that this proposal—

Would do more to help eliminate sulfur dioxide and other forms of air pollution than any other measure. It would enable Ohio to assist its utilities and industries, which are now heavily burdened by the cost of complying with pollution control laws, by increasing the availability of the single most important weapon in the fight against pollution—financing at reasonable rates.

In its testimony, the National Association of Manufacturers cited the report of the National Commission on Air Quality issued in March 1981, which cited as obstacles to improved air quality the very IRS regulations my amendment would reform. The NAM observed that in view of the combination of advanced implementation of pollution control laws and the current IRS restrictions, "It is difficult to see how many small companies will be able to weather increasing environmental regulation."

Observing the strategic importance of minerals, the American Mining Congress cited a House Committee on Interior and Insular Affairs Report, "U.S. Minerals Vulnerability: National Policy Implications," which concluded:

The very nature of mineral operations requires large capital and operating expenditures for pollution control, health and safety equipment, and mined land reclamation. Funding for achieving these worthwhile objectives has placed a heavy burden upon the already strained mining industry. McGraw-Hill studies have found that pollution control expenditures during the last nine years by the entire mining industry averaged 8 percent of their total capital expenditures (and a staggering 19 percent for the nonferrous metal industry) compared to only 6 percent for all industries.

William B. Holberg, vice president, Kidder, Peabody and Co., Inc., said:

Kidder, Peabody strongly endorses S. 169. . . . As the Committee knows from prior testimony, Kidder does not customarily take the role of an advocate but prefers to note factors Congress should consider when considering legislation. Our reversal is due to the fact that Kidder believes that it is inappropriate for the IRS to override the statute through regulations.

On behalf of the Council of Pollution Control Financing Agencies, its president, Ronald Bean, executive director of the Illinois Environmental Facilities Financing Authority, noted:

The Council's member agencies operate at the intersection of environmental goals and economic development goals.

The Council has endorsed this amendment because the proposal "* * * would make it clear that the Congress did not and does not intend to have this inequitable implementation of Section 103 by the Treasury."

The Institute of Chemical Waste Management, National Solid Wastes Management Association, testified:

We hope that you will speed approval of S. 169 to direct the Secretary of the Treasury to extend IDB financing eligibility to hazardous waste management projects and, thus, accelerate the pace of bringing these new projects into existence so that existing facilities receiving hazardous industrial wastes can be measured strictly against the yardstick of the new federal hazarous waste management regulations.

COSTS OF POLLUTION CONTROL COMPLIANCE JEOPARDIZE SUCCESS OF ECONOMIC RECOVERY PROGRAM

Without dwelling further on the testimony the Finance Committee heard on June 26, let me summarize the case for the regulatory reforms contained in my amendment: unless Section 103 regulations are revised, the massive capital expenditures mandated by Federal and State pollution control laws threaten the ability of American industry to make the job-creating investments that would otherwise be encouraged by the Economic Recovery Tax Act.

As socially desirable and necessary as many Federal and State pollution control mandates may be, the investments required for compliance generally are not productive investments in the sense of improving efficiency of operations or increasing output. In 1978, pollution abatement expenditures accounted for the following percentage of all investment in the following basic U.S. industries: Steelmaking—16.6 percent; chemicals—7.1 percent; petroleum—8.3 percent; and utilities—10 percent. As we approach the compliance deadlines for many environmental control acts, these costs can be expected to increase.

In fact, in the case of the steel industry, a report completed by Arthur D. Little, Inc., for the American Iron and Steel Institute, concluded that environmental control expenditures for the next decade may reach $7 billion. Similarly, the chemical industry and related industries face the "double whammy" of complying with the 600-plus pages of hazardous waste control regulations promulgated by the Environmental Protection Agency under the Resource Conservation and Recover Act—and paying a billion-plus dollars in additional taxes into the "Superfund" over the next 5 years. Other industries face similar mounting cost burdens for compliance.

IRS SECTION 103 REGULATIONS THWART CONGRESSIONAL INTENT

In adopting sections 103 and 169 of the Internal Revenue Code, Congress recognized that mandated pollution control investments warrant tax treatment different from that provided most other capital investments. Both of these provisions—section 103, dealing with tax-exempt industrial development bonds used for pollution control and waste disposal, and section 169, dealing with amortization of certified pollution control equipment—reflect a recognition that investment in pollution control and waste disposal facilities is necessary to attain desirable social goals and fulfill the mandates of environmental laws.

If faithfully implemented, these provisions of the tax code would provide industry with powerful economic incentives to reduce pollution in the most cost-effective way technically feasible—rather than to delay compliance, oppose standards, and litigate Federal and State requirements.

But in July 1975, the Treasury Department issued proposed regulations—which have since been employed by the IRS as if final—that do not reflect the intent of Congress as represented by section 103 of the Internal Revenue Code, the Clean Air Act, the Clean Water Act, and the Resource Conservation and Recovery Act. The deficiencies and inconsistencies in these regulations have repeatedly been brought to the attention of the IRS by the Environmental Protection Agency, by the industries affected, and by many of us in the Congress. The IRS has not responded to these concerns.

Instead, the IRS has persisted in employing section 103 regulations that thwart the intent of Congress with respect to pollution control bond financing. It has done so in the following ways:

First, the IRS through its "realized pollution" test has limited eligible financing for air and water pollution control expenditures to end-of-the-pipe, "black box" technologies, ignoring the fact that current environmental law recognizes and indeed encourages the use of process changes in abating pollution.

Second, the IRS has ignored the fact that Congress has amended the Solid Waste Disposal Act with the Resource Conservation and Recovery Act to regulate hazardous waste; instead, the IRS has kept the definition of solid waste contained in the original 1965 act.

Third, the IRS has adopted a "gross savings" test by which the amount of eligible tax-exempt financing is reduced by the extent to which pollution control expenditures result in economic benefit—but measuring economic benefit in gross rather than net terms.

AMENDMENT ALLOWS USE OF POLLUTION CONTROL BONDS FOR INTENDED PURPOSES WHILE MINIMIZING LOSS TO FEDERAL TREASURY

So that IRS regulations with respect to section 103 pollution control bonds do not continue to thwart congressional intent, my amendment would make by statute the following changes to section 103.

First, it would state explicitly that process changes that reduce air or water pollution—and that have been adopted as a result of Federal or State pollution control mandates—qualify for pollution control bond financing.

Second, it would make clear that in amending the Solid Waste Disposal Act with the Resource Conservation and Recovery Act, Congress intended that nonnuclear hazardous waste management facilities should also qualify for section 103 financing.

Third, it would provide safeguards insuring that tax-exempt pollution control bond financing is used only for legitimate pollution control expenditures.

Because of concern expressed in the past by Treasury Department officials about the revenue loss associated with the changes proposed to allow process changes and hazardous waste management expenditures to qualify, I want to spend a few minutes emphasizing the safeguards contained in the legislation.

The first safeguard is a list of the types of process changes and facilities that would be expected to qualify for pollution control bond financing under the provisions of this amendment. I ask that this list be printed in the RECORD following my remarks. Although this list is by no means exhaustive—we must avoid locking in potentially obsolete technologies by statute—it is illustrative of the intent of Congress and should provide needed guidance for the IRS.

The second safeguard is a requirement that tax-exempt financing be available only for expenditures that the Environmental Protection Agency or its State equivalent has certified would not have been made but for Federal or State pollution control requirements.

The third safeguard is a formula for reducing the amount of pollution control expenditures eligible for tax-exempt financing by the extent to which a portion of the cost of a certified pollution control facility is recoverable in the form of net economic benefit. This formula is set forth in the statutory language of the amendment.

The fourth and final safeguard is a limitation on the amount of expenditures for process changes that can qualify for section 103 financing in the case of new plant construction or major expansion of existing facilities, defined as a 35-percent increase in capacity or output. Specifically, the amount of tax-exempt financing for certified pollution control expenditures—reduced to the extent that a net economic benefit results—would be further limited to: 30 percent of the first $100 million of capital expenditures for the entire plant or site; 25 percent of the second $100 million; 20 percent of the third $100 million; and 15 percent thereafter; capital expenditures subject to the limitation would include those made 3 years before and 3 years after the date on which the bonds were issued.

Taken together, these four safeguards address concerns raised in the past that allocating the portion of process changes attributable to pollution control is not feasible and that allowing process changes to qualify would allow the entire cost of new plant construction to be financed using section 103 pollution control bonds.

Because of the safeguards contained in my amendment, the Joint Committee on Taxation estimates the revenue loss to the Treasury of this proposal as follows:

Fiscal year:	*Millions*
1981	----
1982	----
1983	$100
1984	100
1985	200
1986	200

However, during the June 26 hearings, a number of witnesses suggested that even this modest estimate may be too high.

For example, Ron Bean, president of the Council of Pollution Control Financing Agencies, testified:

I want to caution the committee about what is not included in estimates of revenue loss. The Congressional Budget Office and the Treasury have consistently refused to recognize that a company which is able to finance a pollution control facility on a tax-exempt basis is therefore relieved of interest expenditures amounting to some 3 percent of the cost of the financing, or $30,000 per $1,000,000 for each year for the life of the financing. This money is, of course, subject to taxation, and at current rates, the Treasury would increase its revenues by 46 percent of that $30,000, or nearly $14,000 per million, each year, for the life of the financing. The remainder of that $30,000 is put to work by the industry, and presumably generates a profit in later years, which is also taxed. If it is distributed to shareholders, it is also taxed. These are all revenues which do not find their way into calculations of tax expenditures to the Treasury from tax-exempt pollution control financing.

Also, we are distressed to see the assumptions of Treasury revenues on the other side of the equation, from taxable bonds. This ignores the fact that most holdings of taxable bonds are by entities which themselves are tax-exempt or which manage to effectively shield taxable bond holdings from taxation.

In addition, several witnesses agreed that the revenue loss estimates should be revised downward to reflect the marginal tax rate reductions contained in the Economic Recovery Tax Act.

To summarize, Mr. President, the overwhelming body of evidence suggests that the regulatory changes made by my amendment are essential for the overall success of the Economic Recovery Tax Act. We need not make an "either-or" choice between economic growth and environmental quality—we can have both.

I thank my distinguished colleagues for their time and strongly urge their support.

Mr. President, I ask unanimous consent that the amendment and list mentioned earlier in my remarks be printed at this point in the RECORD.

There being no objection, the amendment and list was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 512

SEC. . INDUSTRIAL DEVELOPMENT BONDS ISSUED TO FINANCE POLLUTION CONTROL OR WASTE DISPOSAL FACILITIES.

(a) IN GENERAL.—Section 103 (relating to interest on certain governmental obligations) is amended by redesignating subsection (i) as subsection (k), and by inserting after subsection (h) the following new subsections:

"(i) AIR OR WATER POLLUTION CONTROL FACILITIES.—For purposes of this section—

"(1) IN GENERAL.—The term 'air or water pollution control facility' means land or property of a character subject to depreciation under section 167—

"(A) which is acquired, constructed, reconstructed, or erected to abate or control water or atmospheric pollution or contamination by removing, altering, disposing, storing, or preventing the creation or emission of pollutants, contaminants, wastes, or heat,

"(B) which is certified by the Federal certifying authority (as defined in section 169(d)(2)) or the State certifying authority (as defined in section 169(d)(3)) as meeting or furthering Federal or State requirements for abatement or control of water or atmospheric pollution or contamination, and

"(C) all or a portion of the expenditures for the acquisition, construction, reconstruction, or erection of which would not be made except for the purpose of abating, controlling, or preventing pollution.

"(2) EXEMPT FINANCING TO BE AVAILABLE FOR EXPENDITURES FOR PURPOSES OTHER THAN POLLUTION CONTROL.—

"(A) IN GENERAL.—Subsection (b)(4)(F) of this section shall not apply with respect to any issue of obligations (otherwise qualifying under subsection (b)(4)(F)) if the portion of the proceeds of such issue which is used to provide air or water pollution control facilities exceeds (by more than an insubstantial amount) the amount by which—

"(i) the cost of acquiring, constructing, reconstructing, or erecting the facility, exceeds

"(ii) the net profit which may reasonably be expected to be derived through the recovery of wastes or otherwise in the operation of the facility over its actual useful life.

"(B) NET PROFIT.—For purposes of this paragraph, the term 'net profit' means the present value of benefits (using a discount rate of 12½ percent) to be derived from that portion of such cost properly attributable to the purpose of increasing the output or capacity, or extending the useful life, or reducing the total operating costs of the plant or other property (or any unit thereof) in connection with which such facility is to be operated, reduced by the sum of—

"(i) the total cost incurred to acquire, construct, reconstruct, or erect the property (reduced by its estimated salvage value), and

"(ii) the present value (using a discount rate of 12½ percent) of all expenses reasonably expected to be incurred in the operation and maintenance of the property, including utility and labor costs, Federal, State, and local income taxes, the cost of insurance, and interest expense.

"(C) LIMITATION ON EXPENDITURES UNDER SUBSECTION (b)(4)(f).—

"(i) IN GENERAL.—For purposes of subsection (b)(4)(F), the face amount of obligations issued for facilities preventing the creation or emission of pollutants, contaminants, waste, or heat to be installed at any new manufacturing or processing plant shall not exceed the amounts described in clause (ii) of this subparagraph after application of subparagraphs (A) and (B) of this paragraph.

"(ii) INSTALLATIONS AT NEW PLANTS, ETC.—In the case of such facilities described in subsection (b)(4)(F) to be installed at new plants as defined in clause (iii) of this subparagraph), the aggregate authorized face amount of obligations to be issued therefor shall not exceed the sum of 30 percent of the first $100,000,000 of capital expenditures paid or incurred in connection with such plants, 25 percent of the second $100,000,000 of such capital expenditures, 20 percent of the third $100,000,000 of such capital expenditures and 15 percent of such capital expenditures in excess of $300,000,000 plus the costs and expenses incurred in issuing such obligations.

"(iii) NEW PLANT.—For purposes of this subparagraph the term 'new plant' means any plant or identifiable part thereof, or other location that is or could be a source of pollution, placed in service within the 6-year period beginning 3 years before the date of any issue for the facility and ending 3 years after such date of issuance of the obligations described in clause (i). For purposes of clause (ii), all the capital expenditures during the 6-year period shall be aggregated. A major expansion of the capacity of any plant or identifiable part thereof or a major conversion in the use to which any plant (or identifiable part thereof) is devoted, shall be treated as a new plant. For purposes of this paragraph a major expansion of capacity shall mean an increase in capacity of 35 percent, and a major conversion in use shall mean a change affecting 35

percent of the output of the plant. Any plant or identifiable part thereof not described in the preceding three sentences shall be deemed an existing plant.

"(iv) CAPITAL EXPENDITURES TAKEN INTO ACCOUNT.—The capital expenditures taken into account with respect to any new plant or other source of pollution for purposes of this subparagraph are the expenditures which are properly chargeable to capital account and which are either made within 3 years before the date of the issuance of the issue or can reasonably be expected (at the time of the issuance of the issue) to be made within 3 years after the date of such assistance.

"(j) SOLID WASTE DISPOSAL FACILITIES.—For purposes of this section, the term 'hazardous waste or solid waste disposal facilities' includes land and property of a character subject to depreciation under section 167 which is acquired, constructed, reconstructed, or erected for no significant purpose other than to comply with hazardous or solid waste management requirements imposed by the Solid Waste Disposal Act.".

(b) CONFORMING AMENDMENT.—Subparagraph (E) of section 103(b)(4) is amended by inserting ", hazardous waste," after "sewage".

(c) CLARIFICATION OF REFERENCE.—For purposes of section 103(j) any reference to the Solid Waste Disposal Act means the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 and as it is, or may be, amended from time to time by other Acts. No inference shall be drawn from the preceding sentence with respect to the presence or absence of the words "as amended", by themselves or in combination with a reference to another Act, whenever reference is made in any other provision of law to an Act by its short title.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to obligations issued after the date of enactment of this Act and with respect to taxable years ending after such date.

EXHIBIT 1

Facilities and process changes to be included as report language to accompany legislation proposed by Senator John Heinz dealing with IRS definitions of pollution control facilities eligible for tax-exempt industrial development bond financing pursuant to section 103(b) of the Internal Revenue Code.

Eligible facilities and process changes shall include, but not be limited to, the following:

COAL MINING AND COMBUSTION

Coal washing and preparation to reduce sulphur emissions;

Fluidized bed boilers;

In mining operations, water diversion ditches that prevent natural water run-off from mingling with mining operations, becoming contaminated, and exiting as run-off pollution;

Cooling equipment, pipes, and pumps to recycle cooled flue gas in coal-fired boilers to reduce nitrogen oxide.

METALS

In metal "pickling" processes, equipment to convert sulphuric acid to hydrochloric acid, permitting acid regeneration and avoidance of waste treatment and sludge disposal expenses.

INDUSTRIAL PRINTING

Equipment to convert water-based paints, thereby avoiding air pollution that occurs from dried solvents dispersing through stacks.

PAPER INDUSTRY

Recovery boilers and their associated precipitators, black liquor oxidation systems, and black liquor evaporation systems.

BREWING INDUSTRY

Dust control equipment;

Spent grain liquor evaporators.

SOLID WASTE MANAGEMENT

Landfills;

Landfarms;

Transfer stations;

Incinerators without heat or energy recovery facilities;

Incinerators with heat or energy recovery facilities;

Compaction equipment (shredders, balers, and compaction equipment);

Transportation vehicles used to implement the collection and disposal functions.

HAZARDOUS WASTE MANAGEMENT

Same list as solid waste management but also:

Deep injection wells;

Storage facilities;

Treatment facilities;

Limestone flue gas desulphurization systems using feeders, storage bins, conveyors, dryers, and grinding and briquetting machines to produce gypsum.

PETROLEUM INDUSTRY

Facilities to strip sulphur from gas streams to be combusted at the refinery;

Facilities to transport waste water to regional waste control facilities;

Floating roof storage tanks.

AMENDMENT NO. 513

(Ordered to be printed and to lie on the table.)

Mr. MOYNIHAN submitted an amendment intended to be proposed by him to the joint resolution House Joint Resolution 266, supra.

AMENDMENT NO. 514

(Ordered to be printed and to lie on the table.)

Mr. PERCY submitted an amendment intended to be proposed by him to the joint resolution House Joint Resolution 266.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to have met during the session of the Senate on today to hold hearings on S. 1273, the Intelligence Reform Act of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, July 22, to hold a hearing on State Implementation of Federal Standards: The Clean Air Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations have the authority of the Senate to have met on July 20, 1981, to hold hearings on the Sinai Agreement with Israel and the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to have met during the session of the Senate on Tuesday, July 21, to vote on the following nominations:

Davis R. Robinson to be Legal Advisor, Department of State;

Gilbert A. Robinson to be Deputy Director, International Communication Agency (ICA);

Dean Fischer to be Assistant Secretary of State for Public Affairs;

Joan M. Clark to be Director General of Foreign Service;

Everett Alvarez, Jr. to be Deputy Director, Peace Corps;

Richard T. Kennedy to be U.S. Representative, International Atomic Energy Agency (IAEA) with rank of Ambassador;

Monteagle Stearns to be Ambassador to Greece;

Robert Strausz-Hupe to be Ambassador to Turkey;

David Anderson to be Ambassador to Yugoslavia;

Marshall Brement to be Ambassador to Iceland;

John R. Countryman to be Ambassador to Oman; and

Richard N. Viets to be Ambassador to Jordan.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, July 22, to hold confirmation hearings on the nomination of Arthur Hummel to be Ambassador to China.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy Conservation and Supply of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, July 22, to hold hearings on S. 506, a bill to reinstate and validate U.S. oil and gas leases numbered OCS-P-0218 and OCS-P-0226.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, July 23, to hold hearings on S. 1032, S. 1383, and S. 1484, bills to amend the Mineral Leasing Act of 1920 to promote the development of oil shale.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE COMMISSION ON MORE EFFECTIVE GOVERNMENT

● Mr. ROTH. Mr. President, earlier this year Senator EAGLETON and I introduced S. 10, to create a Commission on More Effective Government. The Commission represents an important tool for first identifying the appropriate changes in the way that our Government conducts

the public's business, and in providing the followup to help secure their implementation. These changes are needed to improve the performance of Government today and to adequately prepare our Nation to meet the challenges of the coming decade.

In an article that appeared recently in the Washington Star, James J. Kilpatrick discussed the proposed Commission and the contribution that it can make to improving governmental performance. I ask that Mr. Kilpatrick's article be printed in the RECORD.

The article follows:

FORD SHOULD LEAD REVIVAL OF HOOVER COMMISSION

(By James J. Kilpatrick)

More than a quarter of a century has passed since a blue-ribbon commission, headed by former president Herbert Hoover, brought in its recommendations for reorganization of the federal government. It's time to put another such commission on the job.

Republican Sen. Bill Roth of Delaware and Democratic Rep. Richard Bolling of Missouri are working on the idea. They have sponsored companion bills in the Senate and House calling for a bipartisan 18-member commission to undertake a two-year study of our federal government as it operates today.

If history repeats, the study should swiftly recover the anticipated $16 million investment.

The Hoover Commission that was named by President Truman in 1947 brought in its detailed report two years later. The commission found upward of 1,800 departments, bureaus, commissions, agencies, councils and committees employing 2.1 million federal workers. No fewer than 65 agencies were reporting directly to the president.

Like a cooling field of lava, this bureaucratic eruption had stifled innovation, efficiency and federalism all at the same time.

It is one of the elementary truisms of government at every level that the reports of study commissions are to be seen, not read, and certainly not to be acted upon. Such reports emerge from a strong sense of procrastination that characterizes every legislative body. It is almost always better to put off until tomorrow what is too much trouble to do today. Appoint a study commission! And forget it.

HOOVER COMMISSION'S SUCCESS

The Hoover Commission's superlative studies provided an exception to the rule. Prodded by Mr. Truman, Congress undertook a dramatic restructuring of the federal government. Dozens of agencies were eliminated or combined. The State Department was wholly reorganized. Under the Military Unification Act, some impressive savings were achieved. President Eisenhower in 1953 inherited a reasonably taut ship.

But governments are like attics, back closets and rolltop desks. Left untended, they attract a prodigious clutter.

So it is today. Just a month ago Saul Pett, one of the top reporters of the Associated Press, took a perceptive look at what has become of the house of our fathers. Once it was a simple structure, uncrowded, comfortable to live in. But now?

"What we have," said Pett, "is a big, implausible, ramshackle house, distorted by random additions, by corridors that go nowhere and rooms that don't connect, a house loosely expanded through the years for numberless children, most of them unexpected."

Back in 1800, when the nation's population was about 5.3 million, "big government" was not much of a problem.

POPULATION OUTPACED

Since then, while our population has multiplied by 42 times, government employment has grown by 500 times. Today more than 18 million persons are employed in government. They represent one of every six employees in the total labor force, and they cost us $832 billion in salaries alone. The Federal Register of 1949 carried 7,952 pages of rules and regulations. The Register of 1979 carried 77,498 pages.

Roth and Bolling envision for their new commission a broader task than the old Hoover Commission took on. It is high time that we took a long, slow look at the complex picture of government totally. What are the proper limits? What are the separate functions? How can these awesome powers best be exercised—and best be restrained?

Forty years of political reporting have left this observer deeply skeptical about study commissions and study reports.

LEADERSHIP CRUCIAL

Such labors depend for their rare success upon a dedicated membership and an obedient staff. Leadership is everything. The word is going around that former President Gerald Ford might be tapped to take personal charge of the proposed investigation. A more experienced choice could not be found.

Under the best circumstances, the Roth-Bolling commission hardly could assemble a staff and get to work before spring of next year. Given two and a half years to complete and publish its report, the commission would be reporting to Congress in 1985. If Mr. Ford would accept the chairmanship, and agree to give the task his undivided attention, the study could become the crowning achievement of a life in public service. This was true of Mr. Hoover. It could be true of Mr. Ford as well.●

CHRYSLER REPORTS A PROFIT

● Mr. RIEGLE. Mr. President, today I had the privilege to be in attendance at the National Press Club for a speech by Chrysler Corp. Board Chairman Lee A. Iacocca. In that speech, he announced that Chrysler was reporting a second quarter pretax profit of $21 million.

This is, indeed, an incredible accomplishment by Chrysler. Two years ago Chrysler refused to accept defeat; refused bankruptcy. A combination of Chrysler management and employees, the UAW, Chrysler dealers, suppliers, financial institutions and Federal, State, and local governments pulled together to keep Chrysler from a bankruptcy that would have been disastrous to our national economy and to the State of Michigan. Against seemingly insurmountable odds. Chrysler has made a comeback.

All those associated with Chrysler can stand up today and be proud—this is their day. They have shown that Americans by pulling together can reach goals that the naysayers believe are not possible.

I request that Mr. Iacocca's remarks be printed in the RECORD.

The remarks follow:

REMARKS BY LEE A. IACOCCA

It's nice to be back at the National Press Club. The last time I talked to this distinguished audience was March 7, 1974. It was two presidents ago. I remember at the time I was wearing a WIN button (Whip Inflation Now) that Jerry Ford had given me.

I went back to see what pearls of wisdom I had laid on you way back then, and quickly discovered my speech was not that memorable.

If only for nostalgic reasons, here were a couple of my opening quotes:

"1974 could still turn out to be a good year for the automotive industry." (In retrospect, it was an absolute disaster.)

"We have gutty problems which are well known—industry car sales are off 25 percent and layoffs have topped the 82,000 mark." (Compared to today, those numbers look like boom times.)

"I would like to join those who are calling for a return to a free market economy, and we should begin by removing all controls on the price and allocation of petroleum products and by burning those standby rationing coupons."

"I am convinced that if controls are lifted, the biggest part of our present problems will go away." (I've never been more convinced of anything in my life.)

"The most meaningful step Congress could take to reduce fuel consumption would be to freeze emissions standards for three years at the 1975 level.

"What we need most of all is a quick revision of the standards for oxides of nitrogen, or NO_x."

That was the message of 1974.

It sounds like an echo in here. We still have many of the same problems.

But so much for nostalgia.

We are again in the middle of a period of American discontent. The American economy is dead in its tracks. If not the whole economy, surely the car and housing business. American spirits are low. Maybe people are feeling pretty good in Houston, but not in the cities of Detroit or Pittsburgh. There is an attitude of defeatism in the air. We see strong evidence of a kind of death wish among the editorial writers of the nation's press.

The intellectual thought leaders of America are wringing their hands over what they perceive to be the total inability of American industry to compete against the genius of foreign manufacturing. They suggest that we all become a giant national service industry, prepared to sell, clean, repair, and enjoy the basic products built at cheaper labor rates in other countries.

There is no question that America has a problem with its basic industries. In the 1970's, we had the lowest growth rate in productivity of any of the world's five largest industrial powers. It's hard to believe, but our growth rate was even lower than Great Britain's.

In 1979, our level of productivity was actually lower than it was in 1978; and in 1980, it was lower yet.

The data from those two years were obviously affected by the deep recession we've just gone through. It's tough to be productive when your plants are working at 60 percent of capacity. As we turn the economy around, and the plants fill up again, productivity will increase again.

But the long-term trend is absolutely clear. The facts can't be fudged or interpreted away. Something is out of whack in this country. Our problem is real, it is serious, and it must be reversed if we are to maintain our position as a world power.

Look at what's happening to some of our most basic industries.

Steel. Since 1960, the importation of of steel into this country has gone from 3 million tons to more than 14 million tons—56 percent of it Japanese.

Machine tools. In 1960, the U.S. machine tool industry was number one in the world. Today it ranks 5th in the world—behind Japan, France, Italy, and Great Britain.

Automobiles. In 1960, 8 percent of all cars sold in America were imports—almost none of them Japanese. The Japanese actually sold 942 new cars here in 1960! Today the import share of the American car market is hovering right around 30 percent. And Japan accounts for more than 80 percent of the total import share. They've gone from selling less than 1,000 cars a

year to roughly 2 million cars a year in this country.

There are lots of other examples—TV sets, sewing machines, cameras, microwave ovens, computers, integrated circuits, motorcycles, buses, construction equipment, you name it.

Unfortunately, some people in this country see the import challenge as a fatal challenge to American industry.

They're convinced that the sun is finally setting on America's basic industries—that we're doomed to becoming a second rate industrial power. As a people, we have begun to feed on the notion that we Americans can't do anything right anymore. It's negative. It's self-defeating. And it's very dangerous.

Nowhere is this conventional wisdom more pronounced than in discussions about the automobile industry. Because our products are so visible, people have come to associate the U.S. automobile industry—more than any other industry—with the decline of America's industrial power.

Everybody knows that Detroit has just suffered through the two most devastating years in its history. The combined pre-tax losses of General Motors, Ford, and Chrysler on their North American car and truck operations in 1980 alone were just under $8 billion. More than 200,000 workers are on layoff. Over 2,000 independent automobile dealers have gone out of business. And everybody knows that the Japanese are having a field day in our domestic automobile market. But they don't know why.

There's an immediate assumption that the foreign car makers are smarter than we are, that they know how to anticipate markets better than we do, that their cars are never recalled, always perfect—and if we had any sense at all we would just wise up and imitate everything they do.

There's no denying that we can learn a few things from the Japanese, just as they have learned from us. But to suggest that we become clones of the Japanese is not the answer. It's a different culture, with different personal values, and different life styles. Not better. Just different.

What the Japanese do have that is better is a combined government, business, and labor policy that sets long range goals and provides the means to achieve them.

We don't have such a national policy in this country—not yet. But if we ever hope to give American ingenuity the chance it needs to restore the strength of this country's basic industries, we had better develop such a national policy—and I mean fast.

In the second place, to suggest that the Japanese have suddenly become the visible symbols of perfection, and that Detroit suddenly can't do anything right, is to overlook the facts. The fact is that just two years ago, the imports were taking only 17 percent of our market. We were holding our own very nicely, and the little Japanese cars were piling up on the docks of California and New York in record numbers. The reasons are simple. The United States government was pursuing a policy of cheap energy. Gasoline was price controlled at 65 cents a gallon. There was plenty of it. And American-built cars were in great demand.

Then the crisis hit. The revolution in Iran caused panic at the gas station. Lines formed. Tempers flared. Riots broke out. And the U.S. government decontrolled the price of gasoline. Virtually overnight gasoline jumped to $1.25 a gallon, 40-mile-a-gallon cars became all the rage, and the glut of imported cars sitting on the docks went on the black market at a thousand dollars over list.

Now it would be one thing to acknowledge that with gas prices in Japan hovering at $3.00 a gallon for years, the Japanese were poised and ready with small cars. But it's also a fact that a Japanese car that sells for $8,000 in Japan sells for $600 less in this country solely on the basis of a Japanese tax policy that provides them an export incentive. And we allow it to happen in the name of free trade.

It is also true that their workers were prepared to work nights and weekends to take advantage of this windfall, courtesy of the U.S. Department of Energy.

But the American public and the editorial writers don't understand that. Suddenly, as if my magic, it has become a national truism that Japanese cars are in demand because they are little jewels of perfection. No recalls, no defects, no drivetrain problems. They are perfect! The Japanese worker walks on water. He sings the company song always on key. And according to this myth, Detroit builds nothing but junk, assembled with disregard for the corporate good by American workers who never come to work on Mondays or Fridays.

Baloney!

The Japanese obviously have a temporary break in the market, supported by a system that works very well for them. But before we throw our system away, and engage in a national guilt trip over our inability to compete, let me say a few kind words on behalf of the forgotten virtue of good old Yankee ingenuity.

Maybe we've lost sight of this country's tremendous ability to compete. Maybe we've forgotten who we are. Maybe we're suffering from a kind of national amnesia about our industrial and technological past.

Well, before we give up coffee and start drinking green tea, let me jog your memory a bit. Let me list a few facts that Americans may have forgotten about their great industrial heritage.

America has forgotten that all the major advances in modern manufacturing technology were made by Americans. We developed most of the state-of-the-art manufacturing systems that are in use today all over the world. That's especially true of automatic tools and assembly systems. Next time you see a picture of a robot welder on a Japanese assembly line welding a car frame under a shower of beautiful red sparks, remember that's an American invention. And keep in mind that our assembly lines look just as impressive—right down to the shower of red sparks. Of course, the red sparks don't come cheap—about $100 million a shot to automate an assembly line.

America has forgotten how great its own products are—products built in America, by and for Americans. To this day, nobody has ever convinced me that the Japanese build better cars than we do. As far as I'm concerned, there's only one area where the Japanese beat us, and that's fits and finishes—items like the paint job and the way the trim lines up. But we're catching up fast.

In terms of overall quality and value, American cars can't be beat by anyone, anywhere. Two independent studies—one out of the University of Michigan, and one from a Congressional Subcommittee on Trade—say that American cars are just as good or better than foreign cars in the following areas:

American cars are more durable. They have more structural integrity. They're cheaper to repair, maintain, and operate, with overnight parts availability. They have better corrosion resistance. They have more room and greater comfort, and they're safer.

And here is one final analysis based on the number of recalls of foreign cars. Since the National Highway and Traffic Safety Administration was established in 1966, the foreign car makers have had to recall a higher percentage of their cars than GM, Ford, or Chrsyler. It's a fact. Check it out.

We can meet the foreign challenge head on. We can meet it our own way—the American way. If you want proof of that, you don't have to look any further than Chrysler Corporation. The company that was once on the leading edge of the worst depression the American automobile industry has seen in fifty years is now on the leading edge of the industry's recovery.

To illustrate our recovery in concrete terms, I am happy to tell you today that in the second quarter of this year, just completed, Chrysler earned a net profit of $12 million. We are releasing those results nationwide as we meet here today.

Now if we had returned to profitability in a booming car market it would have been a remarkable achievement. But to do it against all the odds, in spite of double-digit inflation and a 20 percent prime rate, and in the most depressed market in 50 years, is maybe a little miracle.

Now we've already had a few pot-shots taken at us. We've been accused of adjusting the books just a little. Let me say this is a genuine operating profit.

Somebody has said we built more cars than we could sell. Let me point out that at the beginning of the second quarter, Chrysler had 14.5 percent of the industry's field stocks, and at the end of the quarter we had reduced that to 13.4 percent.

So don't let anybody tell you our second quarter was a fluke. It was real. Chrysler has fought its way back to profitability, and everyone associated with this company has reason to be proud.

It didn't happen overnight—it's been almost two years since we first applied for federal loan guarantees.

It didn't happen without a struggle. It took a lot of hard work, patience, and sacrifice on the part of everybody with a stake in Chrysler's future.

It didn't happen without a steady stream of intellectual carpetbaggers coming to Detroit to tell us we should have "died with dignity."

But it happened.

We've got our act together, and we're on our way back. Let me tell you how we did it.

We did it by installing state-of-the-art manufacturing technology in all of our plants. We now have a string of the most modern, automated front-wheel-drive assembly plants in the world and we're in the process of adding more.

Chrysler is the industry's front-wheel-drive leader. For 1982, 87 percent of our total product line-up will be in front-wheel drive—more than Ford, and more than GM.

We did it by establishing a management system to upgrade product quality and increase productivity. We've got a series of committees—from joint management teams in our plants to our top policy committee—working on ways to improve quality and productivity.

We did it by forming a new, progressive relationship with our labor unions—a relationship that is unique in American industry. We worked out a new wage contract with our unions. We put Doug Fraser on our Board of Directors. We developed a profit-sharing plan, and an Employee Stock Ownership Program.

We did it by hammering out a new, creative financing agreement with our banks and lenders. Under the terms of the financing arrangement—and along with all the other concessions we received from our unions, salaried employees, and suppliers—we have reduced our annual expenses by $2 billion a year and cut our breakeven point almost in half.

We did it by putting together what, in my opinion, is the best management team in the industry.

Finally, we did it by introducing the best product line-up in our history at the right price. That's what clinched it for us. In 1981 our prices went up the least, and our fuel economy went up the most. That's an un-

beatable combination. As a result, our sales are up 25 percent in the worst market in my memory. For 1982 we'll have a complete new intermediate line of fuel-efficient, front-wheel drive cars—two-doors, four-doors, station wagons, and even convertibles. And over the next five years we'll introduce at least two new models each year. All front-wheel drive. And all very fuel-efficient.

I'm not trying to make it sound like we're out of the woods. Chrysler is not, and the U.S. automobile industry is not. But with the help of a lot of our fellow Americans, we've blazed our own trail this far, and we're not about to hire a Japanese trail guide for the rest of the trip. Chrysler Corporation is an American company that's solving its problems the American way.

This country can learn a lot from Chrysler's experience. Chrysler Corporation has survived the most hellish test of fire in American business history. But it's bordering on insanity to think that every American company that finds itself in trouble should have to go through what Chrysler went through in order to survive.

There is a lesson to be drawn from the so-called "Chrysler crisis." American industry can carry only so much in the way of a regulatory burden before it begins to sink under the weight. The fact is, we're looking back on a decade of almost total fixation on social and environmental goals—a fixation that all too often overlooked our critical need for the capital that's required to remain competitive in world markets. I'm not here to knock environmental goals. Many of them were very important goals and still are. But as one former White House advisor put it, "We have underinvested in the economic machine that previous generations labored to put together."

As a result of our overreaction to the "friends of the earth," by the end of the 1970's, one-tenth of all corporate investment was going directly to meet government requirements. And capital investment in productivity improvements dropped to about 10 percent of the GNP, compared to 15 percen in Germany and 20 percent in Japan.

We have to reverse that trend. America's future productivity lies in rebuilding this country's great industrial base.

The current buzz word for it is "reindustrialization."

Basically, all reindustrialization means is that we have to stop diverting money to taxation and regulation, and put it back where it can create jobs for American workers: in capital investments in modern plants and equipment.

I have told everyone who will listen what I think is required to solve the problems. And I'm going to tell you today.

First, we need to get rid of the wasteful and unnecessary regulations that are crippling America's basic industries. Keep the good ones, and throw out the bad ones. Get rid of the air bag. Belts are better. Get rid of the 5-mile an hour bumper. It has nothing to do with safety. Put some sense back into the tailpipe standards. The cars are already 95 percent clean. A return to reason on all regulations would save Chrysler alone more than $500 million in expenditures by 1985.

Second, we need a monetary policy that assures a steady supply of money at a rate the country can afford. You can't have a supply side economic policy and a demand side monetary policy at the same time. It just won't work. We need a stable monetary policy (instead of jerking interest rates from 10 to 20 percent like a yo-yo) both to encourage business investment and to give our customers the confidence and the means to buy our products.

Third, we need to give business the tax incentives it needs to make capital investments. If we really are serious about reindustrialization, we have to help American companies get on their feet. We need to provide incentives which will benefit the marginal companies, the smaller companies, the companies that are just starting out—all the companies that are traditionally hit hardest by negative events in the economy.

Fourth, we need to establish some mechanism to help companies—such as Chrysler—before their problems reach the crisis point. We at Chrysler didn't want to apply for government loan guarantees. But we had no choice. There was no other course open to us—unless you count bankruptcy. Some choice!

What Chrysler needed then, and what U.S. industry needs today, is some kind of systematic organization to provide temporary assistance to companies that have a short-term capital problem without having to go through hysterical headlines on the nightly news. Not every company should receive help. Assistance would be reserved for those companies that could show they had a good chance of recovering fully and becoming viable again; companies like Chrysler. It is a serious need, and I believe it should be addressed quickly.

And fifth, as tough as it is to say, we need a careful reexamination of our labor practices and policies in this country. Let's face it. Our labor costs are out of line with the rest of the world. And it's our own fault. In years past, we kept giving away a larger piece of an expanding pie. But now the pie is shrinking, and we have to change our ways.

The Japanese don't have automatic cost of living increases tied to the Consumer Price Index. But we do. They don't have company-paid medical benefits that cost the consumer $300 a car. But we do. The Japanese don't pay their workers to stay home. But we do. That's a good way to get unproductive in a hurry.

And without denying anybody the basic protection of decent wages and health benefits, we have to face the fact that the Japanese are mopping the floor with us on compensation packages.

Sixth, we need a new management attitude in this country. We need the flexibility to put a labor leader on the board, the foresight to develop new techniques of cooperation in the work place, and the wisdom to avoid the temptation of preaching doctrinaire free enterprise, when we know Adam Smith went out of style decades ago.

Our worldwide competition learned that lesson a long time ago. They know how to work together to meet a national goal. It's time we learned to do that here.

During the last two years I've listened to a thousand stern lectures on the virtues of free enterprise from some of my conservative business friends and from the nation's editorial writers. They were angry because we didn't have the good grace to walk away and let Chrysler die. There was just one problem with that line of thinking: a half million American jobs were at stake. And the so-called "little people" who held those jobs helped us wage the fight for survival.

Because we didn't quit, those half million people are still working.

Because we didn't quit, we have paid out $4.3 billion in wages and fringe benefits since the Loan Guarantee Act was passed.

Because we didn't quit, our employees have paid over $890 million in federal, state, and social security taxes during that same period.

Chrysler Corporation has paid direct corporate taxes to local, state, and federal governments of $316 million since the Guarantee was passed.

We have bought goods and services worth $7.3 billion from over 17,000 U.S. suppliers.

And we have made capital investments in new plants and modern equipment worth $650 million since the Bill was passed.

With that economic contribution in mind, you tell me whether or not this nation has been better served because of what we did here in Washington in the winter of 1979.

The progress Chrysler Corporation has made over the past two years is living proof of how much Americans can accomplish if they work together.

Two years ago, nobody outside of Chrysler believed that cooperative effort would ever work. But it did. We're going to continue our rebuilding efforts. We're going to continue to develop new and better manufacturing systems. We're going to continue to invest in new technology. We're going to become more productive and efficient every year. And we're going to bring out new and better products every year.

We haven't lost faith in America, in American workers, or in America's ability to compete with anybody in the world.

We don't believe we have to become a service industry for the foreign workers of the world. We want to help lead the nation back to a sense of pride in our own ability.

More is at stake than the survival of Chrysler Corporation and the other basic industries of this nation. Through our collective actions, we can shape and direct the course of America's industrial progress.

No one could ask for a greater opportunity.●

CONSERVATIVES SHOULD BE ENCOURAGED BY O'CONNOR NOMINATION

● Mr. GOLDWATER. Mr. President, I have stated repeatedly that certain single issue factions have unfairly and wrongly criticized Judge Sandra O'Connor's nomination.

Thoughtful media columnist and writers around the country have begun making their own investigations of Mrs. O'Connor's record and invariably, they reach the same conclusion I do—Judge O'Connor is a bright, efficient jurist with strong conservative convictions on the broad economic and social issues that are of enduring interest to the Nation.

One recent item that particularly stands out was written for the Seattle Journal-American by Don Feder, who himself is an attorney as well as a free lance columnist.

I recommend Mr. Feder's calm and reasoned article to my colleagues and ask that it may appear in the RECORD.

The article follows:

[From the Seattle Journal-American, July 14, 1981]

THE LINE IN SUPPORT OF O'CONNOR SHOULD FORM ON THE RIGHT

(By Don Feder)

While I expected Reagan's first Supreme Court appointment to be controversial, I hardly thought conservatives would lead the opposition. Yet from the moment Sandra Day O'Connor stepped into the limelight, the guns of the New Right have been trained on her.

A coalition of 21 conservative groups has called on the president to withdraw his nomination and, barring that, has promised to fight confirmation in the Senate. The coalition includes anti-abortion groups, the Moral Majority, the Conservative Caucus and the Committee for the Survival of a Free Congress.

Opposition to O'Connor seems to be focused on two issues. As a member of the Arizona Legislature, she cast several pro-

abortion votes. She was also a sponsor of the Equal Rights Amendment in her home state. On these two issues alone, the New Right has determined that O'Connor is utterly without redeeming judicial value.

That right-to-life groups are opposing O'Connor's nomination is understandable. After all, their raison d'etre is to slug it out in the political arena on this single issue. Everything else is irrelevant to them.

That's fair enough. If O'Connor was a right-to-lifer who opposed the ERA, the feminist banshees would be wailing their heads off. What puzzles me, though, is why certain broad-based conservative groups have zeroed in on her position on these two issues, to the exclusion of what appears to be, in general, an excellent conservative record—not to mention the right judicial temperament.

Jerry Falwell doesn't like O'Connor's position on abortion. Well, neither do I. But ultimately this issue will be settled by the people and their elected representatives, not the Supreme Court. O'Connor, in keeping with her philosophy of judicial restraint, has stated that the legality of abortion is best determined by the legislative branch.

O'Connor's position on the ERA leaves room for doubt. Her early support for the amendment seems to have cooled. Even assuming she's gung ho for the Equal Rights Amendment, is that a valid reason to oppose her? Though I've given it the Bronx cheer on more than one occasion, many reasonable people support the ERA. In my hierarchy of burning political questions, the ERA ranks somewhere between fluoridation and vivisection.

If conservatives are less than enthusiastic about her position on the aforementioned, they should find much to cheer on other issues. While in the Arizona Legislature, O'Connor voted for a resolution opposing forced busing to achieve racial integration. She voted in favor of a bill to restore the death penalty in Arizona. On the gun issue, she voted for a resolution memorializing Congress not to enact further gun control. She also supported legislation making it easier for residents of Arizona to obtain a license to carry a handgun.

Hardly sounds like a member of the radical chic, does she? Barry Goldwater, who's known the lady for over 20 years, is her most ardent supporter in the Senate.

Of far more importance than O'Connor's position on social issues is her economic philosophy. According to Goldwater's office, her court decisions show a strong regard for property rights. As majority leader of the state Senate, she spearheaded the drive for a tax and spending limitation amendment. Lewis K. Uhler, president of the National Tax Limitation Committee, speaks of her "commitment to the theory that government is getting out of hand." In a 1977 speech, O'Connor made her position quite clear, stating, it is wrong to believe that government should provide solutions for every demand. Such demands place strains on our economy and tax burdens on our citizens."

Conservatives should pay particular attention to O'Connor's judicial philosophy. Will she seek to expand the rights of criminals, or protect the rest of us from their depredations? Will she interpret the Constitution as it was written, or use it as a launching pad for flights of fancy?

I am pleased to report that O'Connor is a strict constructionist, with a genuine concern for balancing the procedural rights of the accused with the rights of victims. In her appellate opinions, she generally turned down defendants' claims that their rights had been violated. She has spoken critically of judges who acquit vicious criminals on narrow technical grounds. She's expressed frustration because, "the desire to expand citizens' civil rights has made it difficult to convict people of crimes they obviously have committed." These aren't the bleatings of a hemophilic liberal, prone to coddling criminals.

The American people should take a long hard look at Sandra O'Connor's record. If her appointment is confirmed, she could easily serve on the Supreme Court for the next two decades.

My investigation has given me much cause for encouragement. I think she'll make an excellent justice, one constitutionalists can be proud of.●

THE CARNIVALE BAG COMPANY: AN EDA SUCCESS STORY

● Mr. D'AMATO. Mr. President, in 1978 Carnivale Bag Co., located in the Bedford-Stuyvesant area of New York City at 543 Park Avenue, was on the verge of leaving Brooklyn for New Jersey, or even farther out. Competition from Japanese and other foreign companies threatened the survival of the company. Adverse conditions in Brooklyn only made matters worse. Yet, thanks to assistance from the Economic Development Administration, on May 16, 1980, a group of Japanese luggage industry officials visited the Carnivale Bag Co. to observe a successful American leather goods firm at work. How did this come about?

Three years ago Carnivale Bag Co. was fighting a losing battle with overseas competition from Korea and Taiwan. The company produced handbags, but those items could be produced much cheaper overseas. The company then applied to the Economic Development Administration for a $1 million loan which was granted. With this loan, Carnivale Bag Co., a 34-year-old, family-owned business, moved to its present location from Manhattan, modernized its equipment and shifted from its retail-oriented product, handbags, to manufacturing goods like calculator cases, cosmetic kits and the like for top business corporations.

The loan, which the company is repaying at 13.5 percent interest has enabled Carnivale Bag to pay more than $600,000 in payroll taxes to the Federal Government and has saved taxpayers $2.5 million in welfare payments to employees formerly out of work. "Most of our employees were former welfare recipients and all came from the immediate area, such as Williamsburg, Bushwick and Bedford-Stuyvesant," says Howard Greenstein, the company's vice president. The number of employees at the 60,000-square-foot plant grew from 100 in 1978 to 375 presently with a $2.5 million payroll.

According to Greenstein, Price Waterhouse, the third largest accounting firm in the Nation, was so impressed with the company's 5-percent-a-year growth rate that it recommended to EDA that it make a second $950,000 working capital loan to Carnivale Bag Co. in order to allow it to expand its production facilities. Price Waterhouse predicted that Carnivale Bag Co. would, with a second loan, be able to increase the number of employees to 700 by 1982.

Thus, what the Japanese luggage officials did not know when they visited the Carnivale Bag Co. was that they were observing, not only a successful American leather goods firm at work, but one that pulled itself up by its own bootstraps, with a little help from the Economic Development Administration.●

GIRL SCOUT COMMEMORATIVE STAMP

● Mr. MURKOWSKI. Mr. President, I am pleased to be added as a cosponsor of S. 1448, a bill to provide for the issuance of a postage stamp to commemorate the 70th anniversary of the founding of the Girl Scouts in the United States of America. I feel it is appropriate to recognize the contribution the Girl Scouts have made to local communities throughout our Nation.

In my own State of Alaska, nearly 7,000 girls organized in three different Girl Scout councils are involved in a variety of productive activities all over the State. I speak from experience when I praise the work of the Girl Scouts—my wife and two of my daughters have all been involved with Scouting.

Girl Scouting in Alaska, like Scouting across the Nation, is a strong, active movement which prepares girls for conscientious citizenship. Millions of Americans have reaped the benefits that Scouting provides—currently, there are over 3 million participants in Girl Scouting.

As such, it is the largest voluntary organization for girls in the world. I believe that the issuance of a commemorative stamp is appropriate and fitting recognition of the opportunities for community service which Scouting provides, and I am proud to lend my full support to this measure.●

PHILIP GEYELIN ON THE CONDUCT OF FOREIGN POLICY

● Mr. PELL. Mr. President, I would like to call to my colleagues' attention an excellent article by Philip Geyelin which appeared recently in the Boston Globe. Mr. Geyelin points out some of the problems in the Reagan administration's handling of foreign affairs and the deleterious effects these problems are having on our foreign policy.

In particular, Mr. Geyelin notes that the Reagan administration's handling of foreign affairs has been marked by a sense of lack of discipline and extreme defensiveness, of incoherence and smallmindedness, all around. This has been evidenced, according to Mr. Geyelin, in the criticism by White House aides of Secretary of State Alexander Haig. It was also demonstrated in the administration's complaints that former Secretary of State Cyrus Vance, in a recent appearance on "Meet the Press," provided grist for Soviet propaganda mills when he questioned the administration's sincerity on arms control and the way it handled the new arms-sales-to-China policy.

Mr. Geyelin points out that all the leaks and charges and countercharges are counterproductive to an effective American foreign policy. He adds that representatives of other nations are confused; they cannot tell who has the last word. I had hoped that one of the benefits of a change in administrations would be

more coherence and harmony in the conduct and articulation of foreign policy. So far, however, that does not appear to be the case.

Mr. President, I ask that Mr. Geyelin's article be printed in the RECORD.

The article follows:

MUDSLINGING IN HIGH PLACES

WASHINGTON.—Remember Cyrus Vance, the former Secretary of State, Deputy Secretary of Defense, Secretary of the Army; the peace negotiator and trouble-shooter in Vietnam, Cyprus, Korea, the Detroit race riots; and now the quintessential Wall Street lawyer?

Turns out he's a dupe of the Communists. It was in the papers, straight from the Reagan high command. Not for attribution, of course; that's not how mud is slung in this town. But in leaks, with an altogether authentic ring, it was said that even the President was shocked by the way Vance provided grist for Soviet propaganda mills by questioning (in a recent interview on "Meet the Press") the Administration's sincerity on arms controls, as well as the way it handled the new arms-sales-to-China policy.

That this is hogwash hardly needs saying. Vance reported his impressions, based on what the Soviets told him on a recent trip to Moscow, of their doubts that the United States is serious about arms control. He did express his own doubts about whether the Administration has "a policy yet with respect to arms control." But he did not do so nearly as categorically as did Eugene V. Rostow, the President's very own nominee to run the arms control agency, at his Senate confirmation hearings.

So much for Vance giving aid and comfort to the Soviets. That the Russians talk in propagandistic, self-serving, deceptive ways to visiting Americans, official as well as unofficial, is no reason not to report it. That Haig's clumsy handling of the China arms matter surprised even members of the Administration is no secret.

The point is not the mud (Cyrus Vance's faithful public service speaks for itself), but the mudslinging. It says quite a lot about the continuing incapacity of this Administration, six months into its first term, to deal with the natural vissicitudes—the occupational hazards—of managing almost every aspect of foreign policy.

The Vance case is a minor bit of meanmindedness. But it is a piece of the far more consequential and equally furtive White House number now being done on Secretary of State Alexander Haig.

There's no way to prove it beyond a doubt (no one steps forward to take credit in these matters), but by a process of simple elimination you have to figure that both are the work of the White House inner ring. That includes the old-time political intimates (White House aides Ed Meese, Jim Baker and Mike Deaver) with an assist from Richard Allen, the President's adviser for national security.

And both incidents reflect the same severe shortage, in the handling of foreign policy, of precisely the qualities that have distinguished the Administration's handling of domestic (chiefly economic) affairs: the Mr. Nice Guy approach, coupled with sureness of purpose, competence, tough-mindedness, and a reasonably decent respect for dissent.

Whether we are talking about the overwrought reaction to the criticisms of Cyrus Vance or the White House vendetta with Al Haig, the common denominators are of quite the opposite sort. There is a sense of lack of discipline and extreme defensiveness, of incoherence and small-mindedness, all around.

It is true that Haig has brought a lot of his troubles on himself by his reach for authority, his insistence on leaving his mark on everything, his sometimes rattled, sometimes overly contentious, attitude. All this has invited the leaks and whispers of a "Haig problem". He is not a team player; he has "alienated" the President; is it "medical"?

Whether Haig has overreached or the White House powers-that-be are being overprotective—of the President or themselves—is less important than the effect this is having in a town where rumor mills are almost the only light industry.

At best, the effect is embarrassment for the President and his Secretary of State. At worst, it is beginning to be destructive—of Haig's effectiveness and of respect for not only the President but for the performance of the US government.

When the rumor-peddlers are making book on how soon Haig may be replaced (and by whom), foreign diplomats and dignitaries are, well, confused. One veteran ambassador from a close ally already is brooding out loud about the problem of knowing where the power lies: "Who should I be talking to? Who has the last word?"

In short, there is something uncommonly rancid about the atmosphere. The high incidence of mudslinging is but one measure. White House "officials," it is said, are aware of it, and of its potential for harm to American diplomacy. But they are not sure what to do about it.

Inasmuch as they are part of the problem, that's understandable. The solution, when it comes, will have to come from the President.●

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 9:30 A.M.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order of the Senate to convene at 10 a.m. on Thursday be vitiated and that when the Senate recesses this evening, it stand in recess until 9:30 a.m., Thursday, July 23, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR THURMOND SENATOR CRANSTON

Mr. HEINZ. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order on Thursday, Senators THURMOND and CRANSTON be recognized for not to exceed 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF TAX MEASURE

Mr. HEINZ. Mr. President, I ask unanimous consent that on Thursday, July 23, no later than 10 a.m., the Senate resume consideration of the tax measure, House Joint Resolution 266.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. HEINZ. Mr. President, I move in accordance with the order just entered that the Senate stand in recess until 9:30 a.m., Thursday, July 23.

There being no objection, the Senate, at 8:04 p.m., recessed until tomorrow, Thursday, July 23, 1981, at 9:30 a.m.

EXTENSIONS OF REMARKS

SECTION 22 TESTIMONY

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. ROSE. Mr. Speaker, on June 24, 1981, the International Trade Commission held hearings in its section 22 investigation on the importation of foreign scrap tobacco and its effect on the U.S. tobacco price support program.

Among those persons testifying at this hearing was North Carolina Governor Jim Hunt. I would like to share with you his comments.

TESTIMONY BY GOVERNOR JIM HUNT—INTERNATIONAL TRADE COMMISSION HEARING ON SCRAP TOBACCO

Mr. Chairman and Members of the Commission: Thank you for allowing me to appear before you today. As Governor of the nation's largest tobacco producing and manufacturing state, I am deeply interested in matters affecting the future of the tobacco industry.

I am here today, at the request of the North Carolina Farm Bureau, to emphasize to you the importance of the tobacco industry—and the tobacco quota and support program—to the people of my state.

In 1979, tobacco provided jobs for 148,000 North Carolinians. That includes 44,000 farmers who depend on tobacco for a livelihood. It includes many small farmers.

In two recent years (1978 and 1980), the gross income from tobacco on North Carolina farms exceeded $1 billion a year.

In 1978, the latest year for which comprehensive figures are available, North Carolina farmers received gross income of $1.1 billion from tobacco. That was more than Kansas farmers received for wheat—and Kansas is the number one wheat state.

It was more than Arkansas farmers received for broilers—and Arkansas leads the nation in broiler production.

It was more than Texas farmers received for cotton—even though Texas is number one among the states in cotton production.

North Carolina's tobacco farm income was greater than California farm income for eggs—and California is number one in the nation in egg production.

I grew up on a tobacco and dairy farm near Wilson, which has the largest tobacco market in the world. My thesis for a master's degree in agricultural economics from North Carolina State University was the basis for the acreage-poundage controls for flue-cured tobacco.

Since becoming Governor nearly 4½ years ago, I have actively championed the cause of tobacco, working with the State's delegation in Congress when anti-tobacco forces have tried to eliminate or weaken the quota and price support program.

In 1979 I led the first tobacco trade mission to China in 30 years, taking with me a group of 12 farmers, industrialists and tobacco specialists for several meetings with Chinese trade and tobacco officials.

I have worked for lower tariff rates on U.S. tobacco entering the European community and other areas of the world. At my request a group of farmers went to Europe to talk with tobacco buyers and manufacturers as a follow up to preliminary discussion which I had there.

As you can see, I have a close familiarity with the tobacco program. And I fear that program is endangered today.

The flue-cured tobacco program that we have today has evolved over a period of 48 years, and it is a great success story.

Since 1965 the control program has been based on both acreage allotments and poundage marketing quotas. This means the grower is limited not only as to the acres he can plant but also the pounds he can sell. These are the tightest controls ever applied to a major farm commodity in the United States.

In referendum after referendum, flue-cured growers have voted overwhelmingly to continue their supply control and price support program. Usually the proportion of favorable votes has been between 95 and 98 percent of the total number cast.

Growers have had to make genuine sacrifices in order to keep their program. There have been many times in the past 30 years when they had to accept sharp quota reductions. Just since 1975, the basic flue-cured quota has been reduced by about one-third. A 40-acre allotment in 1975 would have shrunk to only 27 acres in 1981.

It has not been easy over the years for growers to live with these quota cutbacks, but growers know that the cutbacks were essential in order to make the program work. They have also made it work by continuous fine-tuning of various features of the program.

Under the tobacco program, growers have efficiently produced an adequate domestic and export supply of quality leaf. All segments of the industry and all sectors of the economy have benefited from the stability that the program has brought—stability of supply as well as price. Between marketing seasons, on a year-round basis, buying firms have been able to purchase tobacco from the loan inventory held by the Flue-Cured Tobacco Cooperative Stabilization Corporation. In effect, loan stocks have been used as a reserve supply available to the companies whenever needed.

Prices paid to growers for their tobacco have increased over the years, but not excessively so. Year-to-year adjustments in the support price have been based on increases in farmers' costs. Thus, most growers have been able to survive despite the soaring costs of such production items as fuel, fertilizer, pesticides, labor, machinery and others. If the price support formula had not been written so as to help growers meet today's highly inflated costs, how could the medium and smaller growers hope to survive?

No one should conclude, however, that returns to flue-cured tobacco farmers for the resources used have been excessive. That simply is not the case.

Through the North Carolina State University Electronic Farm Records Program and from other sources, data are available showing that return on investment for a flue-cured tobacco farm in Pitt County, North Carolina, over the past six years has ranged from 5.2 percent in 1975 to an average of 3.7 percent in 1978–80. For the farm owner who received one-fourth share of the crop as rent, profit as percent of tobacco sales price rose from 2.8 percent in 1975 to an all-time high of 13.0 percent in 1978 and then fell to 11.2 percent in 1979 and 4.5 percent in 1980.

These and other data available on the Pitt County farm show that by any standard of measurement used in business today, the profits have *not* been excessive.

In one respect the tobacco program occupies a unique place in the agricultural history of America. It has been in operation for more than four decades, and its cost to the federal government during that period of time has been very small. In fact, tobacco growers have received less than one percent of the federal funds spent on all types of commodity support programs over the past 50 years—or for that matter during the entire history of the country.

I submit that tobacco growers have reason to be proud of their program and of the part they have played in keeping the program on a sound basis. Despite the fact that all segments of the tobacco industry have been caught up in a "technological tornado" over the past 30 years, tobacco growers have been able to maintain the basic principle of their program—control of supply in return for fair realistic price support—even though structural modifications became necessary from time to time.

In the past few years, however, our tobacco farmers have become worried by the rising tide of imported leaf. According to the North Carolina Farm Bureau, in 1969 imports amounted to 237 million pounds, or only 18 percent of the tobacco used in cigarettes. By 1979, imports accounted for 31 percent (or 478 million pounds) of the tobacco used in cigarette production. The most alarming increases came in the "scrap" category, which increased from 10 million pounds in 1969 to 204 million pounds by 1979.

A number of factors account for the increases in imports.

The smoking and health issue has resulted in low-tar, low-nicotine, filter-tip cigarettes. Manufacturers have been able to increase the use of imported flue-cured leaf of lower quality than domestically produced flue-cured without the smoker being able to recognize the cheaper leaf.

The tobacco companies have a responsibility to their boards of directors and their stockholders to make a profit. They have become truly international companies, and they have encouraged the production of tobacco in many parts of the world.

At the same time, they have increased their exports of manufactured cigarettes from 29.15 billion cigarettes exported in 1970 to 81.99 billion in 1980, an increase of more than 250 percent.

Another factor in the increase of imports has been that United States foreign policy encourages the importation of goods from less developed countries. Many of them have the large supply of labor and limited

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

supply of land needed for tobacco production.

Foreign countries have subsidized their tobacco exports in order to earn the U.S. dollars they need for international exchange.

The Office of Monopoly in the Republic of Korea, for example, supplies farmers with fertilizer, seeds, chemicals, covers, materials for drying sheds and so on. Growers receive the equivalent of $1.64 per pound, farm sales weight, and export the tobacco through joint ventures with international leaf dealers to the United States for $1.44 per pound, processed weight. It is obvious that subsidies are involved.

All of these factors have contributed to the flood of imports.

And Stabilization loan stocks have increased despite repeated reductions in the national marketing quota, voluntary efforts to limit the harvest of lower-quality tobacco and the elimination of price supports on eight grades of lower-quality tobacco.

The U.S. Department of Agriculture estimates that, because of increased imports, about 140 million pounds of domestically grown flue-cured tobacco have been diverted into Stabilization loan stocks. This tobacco had an estimated loan value of $172 million by the end of the 1979 season. The Department estimates that 38 percent of total loan stocks in Stabilization will be under loan because of increased imports.

Recent actual realized losses to the Commodity Credit Corporation, the funding agency for Stabilization, have been small. For the 10-year period ending September 30, 1980, price support charge-offs have been $5.8 million, including a $5.2 million charge-off for fire loss. Gains to the CCC by collateral fees paid by associations have been $4 million. Thus, the net loss for the most recent 10-year period was $1.8 million.

Potential losses to the CCC could be substantial in the near future if excessive inventories are sold at prices that do not cover the value of the collateral plus accrued interest and carrying charges. The USDA estimates that there is a high probability of a CCC loss for existing stocks (1975 through 1980 crops) of at least $96 million over the 1981-85 period. For future crops, including the 1981 crop, losses associated with sales of loan stocks will depend on the level of imports as well as world and U.S. market conditions. Unless the USDA is wrong in its calculations, it is fair to project that actual taxpayer losses because of imports will be at least $96 million by 1985. Thus, it is clear that the price support program will soon be monetarily damaged by imports.

Under Section 22 of the Agriculture Act, relief is appropriate when imports "render or tend to render ineffective, or materially interfere with, any program or operation undertaken under this chapter . . . or any loan, purchase, or other program or operation undertaken by the Department of Agriculture."

We believe this is happening, and that is why we are appealing to this commission for help.

Let me conclude by summarizing my concerns this way:

We are talking about a substantial number of people in this nation—an estimated 103,000 full-time jobs in tobacco farming and another 400,000 part-time jobs during the tobacco harvest.

In the main, they make a fairly modest living. Few of them are affluent.

They have worked hard to build an effective system that costs less than other farm marketing systems.

This system is carefully balanced, depending on the cooperation and understanding of the farmers, the warehousemen, the manufacturers, the importers and exporters, the retailers and wholesalers, and local, state and federal governments.

Now, this careful balance is threatened by the high amounts of imports.

The tariff system must protect the farmers in a reasonable way, if they are producing efficiently. The growers need immediate help to deal with the problem of imports. I am here today to ask that they be given all the help possible, as quickly as possible.●

GEN. ERNEST GRAVES LEAVES THE PENTAGON

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. HAMILTON. Mr. Speaker, it is with regret that I learned recently that Lt. Gen. Ernest Graves, Deputy Assistant Secretary of Defense for Security Assistance, and Director, Defense Security Assistance Agency, will be retiring from military service at the end of this month.

During 36 years of military service, he established a reputation as a solid soldier, creative scientist, effective negotiator, and efficient innovator. A graduate of West Point, with a doctorate in physics from the Massachusetts Institute of Technology and a stint at the Harvard Business School, General Graves brought unique qualifications to his last and very important and sensitive assignment as Director of the Defense Security Assistance Agency (DSSA). In this position, he was responsible for managing and administering the multibillion-dollar security assistance program carried out by the Department of Defense.

General Graves proved a real and reliable asset in his many dealings with Congress. He established himself as a man of the highest integrity. He knew the legislative process well and demonstrated an ability for deft handling of complex legislation. He proved to be an articulate, witty, accurate, and frank congressional witness. He always had a flair for how to handle intricate issues and congressional concerns fairly. He was flexible and firm, but always forthright. You could disagree with General Graves on an issue, but you always had a feeling that he was listening and taking varying points of views into account in any given case.

Mr. Speaker, I wish to commend General Graves for his excellent handling of the DSAA assignment. He took on a highly difficult assignment at a time when there was perhaps more disagreement than agreement on several aspects of our conventional arms transfer policy. His tireless efforts and acknowledged expertise on the subject matter have made us all a little wiser and have improved the congressional authorization and oversight process. We wish him well in his next career and hope to see him soon again on the Hill, though hopefully not as a lobbyist. General Graves can be proud of his service to the Nation. Congress will miss him.●

IN SUPPORT OF HOUSE RESOLUTION 181

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. FOGLIETTA. Mr. Speaker, had I been present in Washington on July 21, 1981, I would have cast my vote in support of House Resolution 181, a resolution opposing minimum social security benefit cuts.

The following statement was to be read at the senior citizen rally on July 21, 1981:

I thank you for your presence here in Washington today. Your visit will open the eyes of the nation to the status of senior citizens in this country.

I am sorry that I am unable to be with you in person, but urgent business requires my presence in Philadelphia. However, I am with you in spirit.

When I took office last January, I had two goals: to serve the needs of the people, and to be an effective and compassionate legislator. I believe that Senior Citizens have earned the right to a dignified retirement. You should have economic security. You should have access to the medical services which you need. It is difficult to support yourselves with double-digit inflation and meager social security benefits.

I have opposed the elimination of the minimum benefit and other cuts in social security benefits which were incorporated in the President's budget proposal. I voted against both of the budget resolutions which he endorsed. Unfortunately, I was in the minority. But I have not given up the fight. I support restoration of the minimum social security benefit, and will do all I can to insure that it passes.

I thank you again for taking the time on this hot day to share your views on social security.●

A TRIBUTE TO MRS. EDNA McMASTER

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. MATSUI. Mr. Speaker, it is news to no one that one of the great problems facing our Nation is crime. The threat of being robbed or beaten has caused many Americans—particularly senior citizens—to stay off our streets, both day and night. Many have resigned themselves to living in fear.

In Sacramento, Calif., we are proud of one woman who has not given up, a

Sacramentan who has fought back against the rising tide of crime in the streets.

I am sure that every Member of this House will join me in paying tribute to a courageous and dedicated senior citizen in my district, Mrs. Edna McMaster, who has organized a highly successful crime prevention program in her neighborhood. Not only has crime been reduced in Mrs. McMaster's area of Sacramento, news reports of her efforts have galvanized the entire community into action against crime.

Mrs. McMaster lives in the Meadowview section of Sacramento, long known for its high rate of burglaries and street robberies. Two and one-half years ago, she was asked by the city police department to hold a neighborhood "home alert" party, to give police officers an opportunity to demonstrate home security and personal safety techniques to area residents.

Thanks to Mrs. McMaster's hard work, that first meeting was an overwhelming success. Through her leadership, Mrs. McMaster's neighborhood is now sticking together in the fight against crime.

Next door neighbors who were previously strangers, despite years of living on the same block, now watch out for each others' homes, property, and personal safety. Mrs. McMaster walks door to door on a regular basis, delivering police brochures and other information, and generally inspiring her neighbors to fight back against crime. As a result, crime has been significantly reduced along Wakefield Way in Sacramento.

Stories about her one-woman crusade against crime presented in the local media have encouraged other neighborhoods in Sacramento to take action. As a result, many are initiating their own home-alert programs through the police department.

I ask the House to join me in commending Mrs. McMaster for her tireless devotion to improving the safety, sense of community, and the quality of life in Sacramento, Calif.

Edna McMaster serves as an inspiring example of how a single individual can make a real difference in the life of a community.●

INTRODUCTION OF A BILL TO RECOGNIZE THE SPECIAL REQUIREMENTS OF OUR FOREIGN COMMERCE MERCHANT FLEET BY GRANTING SPECIAL TAX TREATMENT

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. JONES of North Carolina. Mr. Speaker, I am pleased to offer for consideration of the Congress a bill which may make the difference between the United States having a merchant marine or becoming even more reliant on the fleets of other nations. We are all aware of the essential but ever-weakening link in our preparedness program which is the U.S.-flag merchant marine, and there is not a soul among us who does not want to reverse this trend. The investment this country makes in our merchant fleet is paid back many times over in the form of availability for sealift support for our Armed Forces and by providing a stable and reliable ocean transportation system so necessary to this Nation's importers and exporters.

The bill I introduce today would allow carriers who acquire those capital assets necessary to provide transportation services to depreciate or "expense" those costs in years in which they have earnings sufficient to set off their sizable investments. The ocean carrier business is one of relatively low earnings to equity ratios, a condition which inhibits investment in this essential industry. The bill I introduce recognizes the special nature of this industry and without changing any present or proposed tax program grants to the merchant marine the relief necessary.

In addition, we recognize that our maritime subsidies are threatened with phaseout, and that more operators may construct or reconstruct their U.S.-flag vessels in foreign shipyards. To encourage the maintenance of a U.S.-flag fleet, and also to encourage an investment policy which will encourage operators to return to U.S. shipyards to construct vessels, the bill I introduce allows an operator to deposit earnings from a foreign-built U.S.-flag vessel in a capital construction fund, the withdrawal from which would require the construction of those vessels in U.S. shipyards.

At this time, when many seek to end direct public support for private industry, we must assume a responsibility to examine the effects such actions will have on what are, more than ever before, vitally needed industries. This bill examines one such industry and provides encouragement to maintain that industry with a minimum of Government intrusion of public cost. I ask your support.●

ILLEGAL ALIENS AND SOCIAL SERVICES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, July 22, 1981, into the CONGRESSIONAL RECORD:

ILLEGAL ALIENS AND SOCIAL SERVICES

In recent meetings with Hoosiers I have been impressed by how strongly they object to the large number of illegal aliens in the United States. These Hoosiers believe that illegal aliens are taking advantage of costly social services to which they are not entitled, and that they are responsible for budget cutbacks which will mean fewer social services for eligible Americans.

In response to these meetings I have attempted to find out whether the drain on social services caused by these illegal aliens is serious. As is often the case in such matters, strong claims have been made on both sides of the issue. Some observers explain that illegal aliens come here to work, that they are fearful of applying for any public benefits, and that the majority of them are taxpayers in any case. Other observers reject this point of view, arguing instead that illegal aliens are already straining hospitals, schools, and various programs of public assistance in many American cities. It seems that such a controversy ought to be easy to sort out, but it is not. Although information is available, it is not comprehensive enough to permit us to draw definite conclusions.

There is not much doubt that illegal aliens reside in America in great numbers. Steering clear of guesses that run as high as twelve million, the federal government has speculated that the true number is to be found somewhere between 3.5 million and six million. Records give evidence that the population of illegal aliens has been rising steadily for more than a decade. Nearly 1.1 million illegal aliens were located in 1979, more than six times the number located in 1967. There is not much doubt, either, that illegal aliens weaken social services where their concentrations are high. Conversations with some of my colleagues from southern Florida persuade me that the pressure placed on social services by Haitians and Cubans there is very nearly overwhelming. A county in California has sued the federal government for the $88 million the county has paid to cover the medical expenses of illegal aliens. Texas has denied it has a duty to school the children of illegal aliens. New York City has had to require documentation of citizenship from those who apply for welfare.

Notwithstanding these trends and events, the hard data that would reveal any widespread problem (or the lack of such a problem) are sketchy. A current government report summarizes the little we know about illegal aliens and their relationship to social services. Drawing statistics from interviews involving almost 8,000 illegal aliens, the report suggests that about 57 percent may pay social security taxes and as many as 62 percent may pay income taxes. It also suggests that only 4 percent receive jobless benefits and as few as 2 percent receive welfare.

The most recent presidential commission to study America's immigration policy reinforces the view that illegal aliens do not place a substantial burden on social services. Their use of programs of cash assistance seems to be minimal, and they appear to be straining schools and hospitals only in isolated instances, such as southern Florida.

There are several reasons why illegal aliens may not be as serious a threat to our system of social services as is sometimes thought. The population of illegal aliens is a working-age, predominantly male group whose need for welfare is not great. Illegal aliens often shun contact with public offi-

cials out of fear that they will be discovered. A major point, often overlooked, is that illegal aliens are simply not eligible for most forms of public assistance, so they draw benefits only by fraud or error. The list of federal programs closed to illegal aliens is long. On it are aid to families with dependent children, all the initiatives of the Comprehensive Employment and Training Act, all other initiatives administered by the Department of Labor, food stamps, legal services, medicaid, all six varieties of student financial aid, supplemental security income, and unemployment compensation. Social security, disability, and medicare benefits are available to all people who have worked the necessary time in covered employment, but illegal aliens have been barred from obtaining social security numbers since 1972 and thus have not been able to qualify for social security benefits. Few illegal aliens who have numbers actually receive benefits.

Even so, the problem of illegal aliens' abusing our system of social services is sufficiently acute that Congress should take steps both to diminish the abuses that exist and to prevent such abuses from becoming more serious in the future. Hoosiers are right to insist that our social services should be available only to Americans and to legal residents who have contributed to the programs. We should demand proof of citizenship or legal residence before benefits can be granted. We should encourage closer cooperation between administrators and law enforcement officials. In addition, we should enact vigorous measures to reduce the number of illegal aliens in our midst. Civil penalties for employers who hire illegal aliens and larger budgets to enforce our immigration laws are just two things we might consider.●

U.S. TRADE POLICY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. BONKER. Mr. Speaker, on July 9, the Export Task Force had the distinct pleasure of meeting with U.S. Trade Representative Bill Brock and Secretary of Commerce Malcolm Baldrige to discuss the recently announced trade policy.

As chairman of the task force, I would like to share this white paper on the administration's trade policy which was released by Ambassador Brock on July 8 at a joint hearing of the Senate Finance and Banking Committee. I commend the administration's efforts to focus on this important issue of international trade.

STATEMENT ON U.S. TRADE POLICY

A strong U.S. economy is our goal. Free trade, based on mutually acceptable trading relations, is essential to the pursuit of that goal.

International trade is, and will continue to be, a vital component of the United States' economy. The trade policy of the Reagan Administration will complement domestic economic programs which are designed to increase employment and output and reduce inflation.

One of the principal requirements of a strong U.S. economy is the maintenance of open markets both at home and abroad. The United States is more dependent on international trade than at any time in recent history. Exports generate higher real income and new jobs, and imports increase consumer choice and competition in a wide range of goods and services.

The United States is increasingly challenged not only by the ability of other countries to produce highly competitive products, but also by the growing intervention in economic affairs on the part of governments in many such countries. We should be prepared to accept the competitive challenge, and strongly oppose trade distorting interventions by government.

We will strongly resist protectionist pressures. Open trade on the basis of mutually agreed upon rules is in our own best economic interests, and is consistent with the Administration's commitment to strengthen the domestic economy.

We will give top priority to international trade. The President's Economic Recovery Program will strengthen industry and agriculture and improve the U.S. competitive position. Internationally, we will pursue policies aimed at the achievement of open trade and the reduction of trade distortions, while adhering to the principle of reciprocity in our trading relations. In seeking these fundamental objectives, we will initially focus on five central policy components. These are:

1. Restoration of strong non-inflationary growth to facilitate adjustment to changing domestic and international market conditions;
2. Reduction of self-imposed export disincentives; and better management of government export promotion programs;
3. Effective enforcement of U.S. trade laws and international agreements;
4. Effective approach to industrial adjustment problems; and
5. Reduction in government barriers to the flow of trade and investment among nations, with strong emphasis upon improvement and extension of international trade rules.

RESTORATION OF STRONG NONINFLATIONARY ECONOMIC GROWTH

Fundamental to any effective trade policy is the implementation of domestic economic programs that increase incentives to invest, raise productivity, and diminish inflation. The Administration's economic recovery plan provides the framework for achieving these objectives. The four component parts of the plan are: Reduction of the rate of growth in government expenditures, reduction of marginal tax rates for individuals coupled with accelerated cost recovery for business, regulatory reform and a consistent and predictable monetary policy. Implementation of the program will improve the competitiveness of U.S. products both at home and abroad.

Recent trends in U.S. productivity and investment have weakened our ability to compete abroad and eroded our industrial base at home. While the U.S has one of the highest levels of capital per worker and productivity in the world, the U.S. advantage in these areas is rapidly diminishing. A recent survey of 19 industrial countries indicated that the United States now ranked 17th in the rate of productivity growth and 19th in the rate of investment. Other surveys have indicated the United States has had a decline in research and development expenditures, while other developed countries are increasing theirs. The U.S. is losing its technological lead, and this is bound to have serious consequences for the international competitiveness of U.S. products.

The economic recovery program submitted by the Administration can reverse this trend by improving incentives to invest in capital equipment as well as in research and development. Stronger economic growth is also important to facilitate the adjustment to changing international market conditions.

High inflation has also had a strong negative effect on U.S. competitiveness abroad. The Administration's economic recovery plan will reduce the rate of inflation and as a result bring down interest rates, and it will provide the basic economic underpinnings essential to expanding trade opportunities.

REDUCTION OF SELF-IMPOSED EXPORT DISINCENTIVES AND IMPROVEMENT OF U.S. EXPORT PROMOTION PROGRAMS

A high priority will be assigned to the reduction or elimination of domestic export disincentives. Confusing, contradictory and unnecessarily complex laws and regulations adversely affect exports. The recent report to the Congress on Export Promotion Functions and Potential Export Disincentives identified three types of policies as the most significant export disincentives—the taxation of Americans employed abroad, the Foreign Corrupt Practices Act and export regulations and controls.

We will act to mitigate the trade-inhibiting effects of regulatory measures without undermining their legitimate objectives. Vice President Bush is chairing the Task Force on Regulatory Relief, which will review both existing regulations and future regulatory proposals.

The Administration will support remedial legislation where it is necessary. In this regard, the Administration supports the basic objectives of the Export Trading Company Bill currently before the Congress. The Administration also supports legislation to change the Foreign Corrupt Practices Act, and to reduce the income tax burden on Americans working and residing abroad.

We will make more effective use of the government's export promotion resources. The Department of Commerce is assigning a high priority to strengthening the Foreign Commercial Service and improving domestic export information efforts. Personnel in the Commerce District Offices will be spending more time in the field counseling exporters, holding "how-to-export" seminars, and developing "how-to-export" manuals. The Department of Agriculture will continue to give a high priority to overseas marketing efforts of the Foreign Agricultural Service and to domestic export-support programs.

EFFECTIVE ENFORCEMENT OF U.S. TRADE LAWS AND INTERNATIONAL TRADE AGREEMENTS

The U.S. and its trading partners have negotiated international agreements to reduce barriers to trade and to establish common ground rules to limit trade-distorting practices. These agreements are predicated on the fact that trade must be a two-way street in a genuinely open trading system. In the Multilateral Trade Negotiations, agreement was reached on new international codes of conduct covering a wide range of nontariff barriers. U.S. trade laws and international dispute settlement procedures provide the means for effective enforcement of these international trade agreements.

The Administration will strictly enforce United States laws and international agreements relating to international trade. Specifically, our antidumping, countervailing

duty, and similar structures are designed to neutralize or eliminate trade distortive practices which injure U.S. industry and agriculture. We regard these laws as essential to maintain the political support for a more open trading system.

We will insist that our trading partners live up to the spirit and the letter of international trade agreements, and that they recognize that trade is a two-way street. Accordingly, we will closely monitor the implementation of international trade agreements by all governments and we will make full use of all available channels for assuring compliance. We will need full and active support from the private sector in identifying compliance problems and in seeking solutions.

The manner in which the MTN codes are applied will determine the shape and effectiveness of the GATT agreements. We will actively pursue the implementation of the codes in a manner consistent with the goal of reducing trade barriers and trade-distorting measures. We will fully utilize the consultation and dispute settlement procedures of the GATT to assure that MTN principles are applied in practice.

One of the most difficult challenges we must face in seeking to achieve free trade is to develop appropriate responses to the growing intervention of foreign governments in international trade. The nontariff agreements negotiated in the Multilateral Trade Negotiations deal with many aspects of such intervention, and full enforcement of these agreements will help deal with this issue. We will seek new ways of dealing with forms of intervention that are not covered by these agreements.

We are currently faced by a growing subsidization of export credits by many of our trading partners. We will seek to renegotiate the existing international rules regarding official export credits. Our objective is both to substantially reduce, if not eliminate, the subsidy element, and to conform credit rates to market rates. The Export-Import Bank will target its export credits and guarantees where they are most needed to assist U.S. exporters facing subsidized foreign competitors.

EFFECTIVE APPROACH TO INDUSTRIAL ADJUSTMENT PROBLEMS

Developments in the world economy over the past few years, such as the energy crisis and the emergence of new suppliers of manufactured and agricultural products in world markets, have triggered major adjustments in the U.S. economy. Developments in the world economy over the foreseeable future will create the need for continuing adjustment.

Our policies toward the adjustment will take into account the fact that the economic vitality of certain sectors of our domestic economy is clearly essential to national security. Where other nations have a natural competitive advantage, U.S. industry must either find a way of upgrading its own capabilities or shift its resources to other activities. Where the foreign advantage is based upon government subsidies and other trade-distorting practices, U.S. policy will be to enforce U.S. trade laws and to work to eliminate such practices.

The economic program outlined by the Administration will support adjustment by encouraging non-inflationary growth and by removing obstacles to the operation of market forces. The Administration will continue taking measures, including regulatory relief and adjustment assistance, in order to further adjust in cases where severe problems exist.

Adjustment assistance and safeguard measures can ease problems of dislocation for firms and workers, but they do not of themselves effectuate adjustment. It is U.S. policy to place primary reliance on market forces to facilitate adjustment in affected industries.

Import restrictions, subsidies to domestic industries, and other market distorting measures should be avoided. A better solution to the problems associated with shifts in competitiveness is to promote positive adjustment of economies by permitting market forces to operate. It will be critical to encourage, through international negotiations, all governments to adopt adjustment policies which do not have trade and investment distorting effects.

REDUCTION IN GOVERNMENT BARRIERS TO FREE TRADE

The Multilateral Trade Negotiations achieved agreement on new codes covering a wide range of nontariff barriers and on a substantial reduction in tariffs. There are a number of issues, however, which were not adequately resolved in the Multilateral Trade Negotiations or which were not addressed in these negotiations. It is U.S. policy to deal with individual problems through bilateral negotiating efforts in the short run, and to seek to negotiate new multilateral disciplines over the longer term. Our objective will be to reduce government barriers, both in the U.S. and abroad, to the flow of trade and investment among nations. The preparations for any new initiatives must be thorough and in some cases could be quite lengthy.

CONCLUSION

Adoption and implementation of this comprehensive trade policy approach for the 1980's will strengthen U.S. economic performance and our competitiveness in world markets. To fully succeed in this area, we will need to muster a strong national determination, a will to persevere and prevail, and a commitment to rely on competition and free markets. The government can help create an environment conducive to efficient and profitable production. But it is private individuals and enterprises who have to take the initiative to seize economic opportunities.

Our trade policy is built on the close cooperative relationship with the Congress and the private sector. Our private sector advisory committees have become a fundamental element to our trade policy process. In implementing the agenda we have outlined, we will work closely with each, and increasingly with the 50 state governments in our federal system.

A strong U.S. trade position must be and will be a national priority. It is vital to our domestic well-being; it is essential to our capacity to provide leadership to the free world.●

THE PRIME CAPTIVE NATIONS IDEA

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. DERWINSKI. Mr. Speaker, after a whole generation of exposure to the "Captive Nations" concept and Public Law 86-90, many analysts both here and abroad still cling to certain myths and misconceptions beclouding both the law and the concept. If anyone has tried consistently to dispel them, it is Dr. Lev E. Dobriansky of Georgetown University and chairman of the National Captive Nations Committee.

In an article on "The Prime Captive Nations Idea," prepared for the summer issue of the international journal, the Ukrainian Quarterly, Dr. Dobriansky exposes each of the dominant myths. Because of its length, I include certain main excerpts from the article which I believe my fellow Members will find of profitable interest:

THE PRIME CAPTIVE NATIONS IDEA

(By Lev E. Dobriansky)

Our foreign policy with regard to Moscow and its global challenge will never be on an accurate and successful course until the very nature of the Soviet Union is fully comprehended and made the fixed, focal point of our manifold operations. At first sight, this observation might appear to be extreme or simplistic, but with some reflection given to its supportive grounds, both conceptual and empirical, its basic validity will be readily perceived.

How often in your life have you heard the expression "Know your enemy"? It suggests you consider his strengths and weaknesses if you seek to advantageously overcome him. Now this is a wise and simple rule of existence with the broadest field of application. Yet, strangely enough, despite the historical record of 61 years of Soviet Russian imperialism and conquests, the majority of our analysts and officials still shy from honestly recognizing Soviet Russia as a committed enemy to our national interests and the Soviet Union, in which the RSFSR is only one republic, as the primary empire of Moscow. Supposedly, the facts that we are in a nuclear age and diplomatic considerations must be observed are sufficient to alter the patently objective realities of history. Needless to say, they cannot.

In dealing with this field, there are far too many who operate with inaccurate concepts that could only contribute to poor policy results. Also, as in the case of human rights policy, one cannot but wonder about the requirement of sound logic. It took me and others almost four years to crank out of the Carter Administration an official admission of the existence of national human rights.

MOSCOW'S ACHILLES HEEL

Despite over 20 years of popular and academic education, it still is not generally understood that the Captive Nations Week Resolution, passed by Congress in July 1959, contains within itself the prime captive nations idea. The resolution was signed by President Eisenhower into Public Law 86-90, and every president since has issued annually a proclamation as called for by the resolution. Alluding to the idea, the foreword in a current congressional publication on the subject points out, "it is not generally known that on documented record since World War II no single, activist idea has produced deeper concern in the Kremlin than the composite captive nations one. From Khrushchev to Suslov to Arbatov fulminations against Public Law 86-90 have been intense, persistent and fearful. Any

thoughtful person would naturally ask 'Why?'" [1]

Indeed, why? The answer lies in the prime idea of this captive nations concept. The Soviet Russians understand it; regrettably, our people don't. And will continue to fumble and waste resources in costly consequence. Pointedly and unmistakably, the resolution taps Moscow's Achilles heel, namely the majority of captive non-Russian nations within the USSR itself. These were the first victims of Soviet Russian imperialism in the 1918–20 period; the resources of these nations have been and are continually exploited for Moscow's aggressions beyond the USSR; these nations have the longest, though still unsuccessful, record of resistance against this last, chief form of imperialism in the contemporary period; and these nations constitute the primary and inner empire of the foreign conqueror, Soviet Russia.

With intensive, detailed research a voluminous catalog of our governing illusions on these two basic points could be readily compiled. Just a few current examples here will serve to make the point. For instance, the widespread, uncritical usage of the term "the Soviets" is far more than just a case of semantic point. Our officials and non-officials wallow in it, yet fail to ask themselves why? Try it on any of them and you'll get the informative answer: everyone else does and isn't the Soviet Union "soviet." Unfortunately, this is the level of the average conception of the Soviet Union, made up of "the Soviets." By this ignorant usage we help Moscow more in its attempts at Russification within the USSR, at conveying the image of Homo Sovieticus, at displaying a unified "nation" of peoples than it can possibly succeed in realizing with its non-Russian captives in its primary empire.

Put concisely, this new empire called the USSR was carved by the conquering Soviet Russians; they dominate and control it; they call the shots directed at our national security and that of the Free World. Why then conceptually blur reality with this ludicrous usage? Aside from the basic Russian/non-Russian division in the USSR, the soviets—councils of workers and peasants—are only rubber-stamp bodies and scarcely influence the policies of Russian-based Moscow. In our American way, call a spade a spade, and act accordingly.

As another example, in a special issue in 1980, Time magazine begins its report this way: "The Union of Soviet Socialist Republics is not just a country, but an empire—the largest and probably the last in history." [2] This is progress and should serve as a hallmark for all of our media, not to mention government. However, no sooner this is said the reader is exposed to the same stereotyped concepts as "gross national product," "100 ethnic groups," "Soviet life" and other inconsistent terms that hardly support a working conception of the USSR as "an empire."

One more example, this time showing an inverse conceptual relationship to the above. The above shows a solid, overall concept but a poor support of it in the management of empirical details. This one is presented with details but fails to place them in an overall concept, which here is the primary Soviet Russian Empire. A long-term analyst of the USSR writes, "Most of the non-Russians I met protested their subjugation to the 'Russian Empire' far more openly than before. Most were far more eager to boast of anti-Russian feeling—many called it 'fury'—in their native republics." [3] Yet, despite what he heard, he writes in the same paragraph, "They are often exceeded by nationalist passion, anti-Russian by its very nature, among the Soviet minorities, from Lithuanians in the west to Kalmyks in the east—and including especially Ukrainians, Estonians, Georgians, Armenians, Uzbeks, and most of the Muslim peoples, whose birthrate is roughly five times the Russian average."

Now, who are "the Soviet minorities"? Is this supposed to mean minorities like our minorities in the USA? Sadly enough, too many of our people cling to this fanciful notion. On an overall quantitative basis the Russians have been in the minority for sometime.

SOVIET RUSSIAN IMPERIALISM

A cognitive appreciation of the USSR as a functioning primary empire presupposes some form of imperialist conquest. The historical record is abundantly clear on this. The marauding Russian Red Army under Trotsky was the determining factor in producing the first set of captive nations. As many honest Russian intellectuals, such as Fedotov, Berdyaev and others have long observed, traditional Russian imperialism was again at work, this time under the guise of Marxist-Leninist ideology. Soviet Russian imperialism is the real force, not an outmoded and theoretically irrelevant Marxist-Leninist ideology, that accounted for the recreation of the Russian Empire in the form of the USSR in the early 1920's and for its imperial extensions in the 1940's and beyond.

On this subject we shall hear more about in the period ahead. It's not a new subject the issue was met over a quarter of a century, when the Kerenskys, Nicolaveskis and other Russian emigres and friends attempted to befuddle our public regarding the Soviet Union and the mythical force of communism. This attempt is re-emerging with a new crop of Russian emigres, highlighted in particular by Solzhenitsyn. [4]

A few examples of this part of the equation (Soviet Russian Empire=Soviet Russian Imperialism) are also in order. Aleksandr Solzhenitsyn has well nigh discredited himself last year with his foolish attack against the Captive Nations Week Resolution. In this he joined Khrushchev and his successors. His discredited status was amplified by the wide chasm of thought as represented in his letter to the Kremlin in 1973, when he still was in the USSR, and his article in Foreign Affairs. [5] In basic principles and thought the latter contradicts entirely the former.

In line with this trend, another example is the concentrated attack on Dr. Richard Pipes, a renowned Harvard University professor and now with the National Security Agency in the Reagan administration. Solzhenitsyn viciously criticized Professor Pipes in his article, and this assault is continued in a similarly distorting article by a product of Moscow University's history department. The writer is concerned by asking "Doesn't the Communist ideology have something to do with the shape of Soviet foreign policy?" [6] And he then devotes his article to the implication that if anyone points to traditional Russian imperialism, now in its Soviet phase, or casts a light on the Soviet Russian Empire rather than stressing communism, he is anti-Russian. In plain logic, one can be anti-Soviet Russian imperialism, anti-Soviet Russian Empire, without being anti-Russian.

This subject of Soviet Russian imperialism as against the myth of communism or Marxist-Leninist ideology should be publicly highlighted. Following the passage of the Captive National Week Resolution, Khrushchev challenged us to discuss it in the United Nations. President Kennedy stated that "any summit meeting with the Russians would have to include discussion of the imperialism of the Soviet Union." [7] The thought is in the right direction, but how does one account for all the non-Russian nations now held captive in the USSR?

Another interesting aspect of this subject of imperialism is the propaganda mileage realized by the Kremlin in covering up its imperialism and persistently accusing "American imperialism," with impact even within our own country. For the thousandth time among utterances by the Soviet Russian leadership, Brezhnev states in a recent speech before the rubber-stamp Supreme Soviet that "bellicose-minded militaristic circles, headed by American imperialism" are responsible for a new, unprecedented arms race. [8] Pravda, of course, is replete with accusation. Recently it directed a warning to the 95-nation group of non-aligned nations meeting in India to beware of "subversive activity against the movement by international imperialism and Peking hegemonism." [9] Defense Minister Dmitri Ustinov sees peace and security being threatened by "imperialism," and Leonid Zamyatin, the international information chief of the CP Central Committee, claims that Poland's Solidarity "is backed by the imperialist forces of the West and operates in contact with subversive centers outside Poland." [10]

In these statements note the key words of "imperialsim," arms race, and subversive activity. Just turn them about in full application to Moscow and Soviet Russia, and the persistent accuser becomes the fitting accused. The Kremlin's propaganda technique of transferred blame can be easily countered, but the democracies have scarcely developed the counter-propaganda strategy.

Just one more note on this vital subject. It is refreshing to see Galbraith and others discussing "Soviet imperialism." In thinking about imperialism they seem to content themselves with what they construe to be a decline of the Soviet "Empire." [11] Facts for

the past 20 years, such as the Chinese-Russian rift, the Indonesian massacre of communists, the ouster of Russians from Egypt, the turnabout of Somalia and the like are assembled to prove their point. This isn't the place to argue each of these events. Suffice it to say, that on a scale of over 60 years Soviet Russia's imperial growth overshadows this supposed decline.

THE CNL

On a 60 year-plus scale, the picture of Soviet Russian imperial influence and power looks quite different from what Fritchey, Galbraith and others seek to portray in some short-run span.

THE CAPTIVE NATIONS LIST (CNL)—WHO'S NEXT?

[1] Countries absorbed into U.S.S.R.

WHO'S NEXT? IRAN, NICARAGUA, EL SALVADOR, NORTH YEMEN, ANGOLA, ETHIOPIA, SAUDI ARABIA, MOZAMBIQUE, REPUBLIC OF CHINA, SOUTH KOREA?

What has pained Moscow and its satraps so about the CNL? Well, the CNL has many utilities. For one, it is solidly grounded in historical fact and scholarship. . . . Had the Russians pursued communism for themselves, there would have been no objective grounds for the CNL ever.[12]

The new crop of Russian emigres should not be allowed to once again becloud the realities of the struggle. As a most perceptive analyst observed almost 30 years ago with reference to another generation of such emigres, "If Russians who claim to be anti-Communists refuse to extend the goal of freedom to non-Russians, then we must wonder whose side such Russians will be on when a showdown comes."[13]

Another utility of the CNL is the implied emphasis it places on the fundamental illegitimacy of the so-called socialist or communist governments. As President Reagan in his first Captive Nations Week proclamation strongly underscores, "governments derive their legitimacy from the consent of the peoples they govern."[14]

The CNL serves also the purpose of causing still free people to remember how others fell in the course of 60 and more years under Moscow's armed, determining power. Moscow, and its satraps and products, thrive on people forgetting the realities of history. . . .

THE 23D OBSERVANCE

As a concluding note on this 23d observance, what has been described here as a realistic framework for policy and strategy would not in any way preclude all the necessary things that must be done in inter-state relations to insure peace and also provide the beacon light of national and individual freedom. Negotiations on strategic arms, trade, cultural relations and a competitive coexistence on all levels and in all spheres can be diplomatically and deftly pursued within the framework. In short, the Soviet Russian leadership will get used to our more realistic understanding of it and respect us more for it. As all past empires, this empire overflows with weaknesses and vulnerabilities.●

CREEPING COMMERCIALISM IN PUBLIC TELEVISION

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. WAXMAN. Mr. Speaker, John Weisman, a reporter for TV Guide, has recently written a two-part article on public television's relationship with its corporate supporters. To be certain, corporate contributions have been of inestimable value to the growth of public television, and made possible some of the finest programing available in America. The Reagan administration's proposed budget cuts for public broadcasting, however, will force an ever-greater reliance on corporate largesse, and may eventually lead to the presence of commercials on what was always intended to be a noncommercial medium.

The implications of these developments are profound—especially in the area of programing. The great virtue of public television is that it has the freedom, and the mandate, to pursue the very best in programing, to present what commercial broadcasters either cannot or will not because of their captivity to the ratings race. If public broadcasting is forced to become more like its commercial counterpart because of the funding squeeze, it is important to understand that the danger lies not in which programs will be produced, but in the absence of programs we may never see. As unrestricted funding, from the Government and public television's viewers, decreases in proportion to corporate support, via grants or commercials, public broadcasting's independence—its ability to create unrestricted programing free from outside influence—may be eroded. It is this issue that must be confronted in tandem with the budget reductions the administration wants to impose on public broadcasting.

Mr. Weisman has presented a comprehensive survey of these developments. Following is the second part of this excellent article, which I commend to my colleagues:

[From TV Guide, June 27, 1981]

BIG OIL AND PUBLIC TELEVISION—HOW CREEPING COMMERCIALISM IS SNEAKING UP ON PUBLIC TV

There was quiet meeting held late last winter at the headquarters of WNET, New York City's public-television station, that could help shape the future of public broadcasting. Present were high-ranking executives of public-television stations, fund-raising experts and other representatives from some of the Nation's biggest and most powerful PTV outlets.

The man who requested the meeting is not a station executive. He is William Cameron, senior vice president for television programming of the giant Needham, Harper and Steers advertising agency. Cameron told TV Guide that he had called the meeting to discuss, among other things, the future of public television in the light of the Reagan Administration's proposed budget cuts; and the proliferation of alternative sources of high-quality cultural programming on cable and pay-cable systems.

Cameron knows about such things because, according to Lawrence Bershon, manager of advertising services of the Atlantic Richfield Co., a Needham, Harper client, Cameron has conducted informal studies for Arco about where, aside from public television, Arco's money could be spent on programming.

Cameron says he was also seeking a greater role for corporate underwriters in public broadcasting. He said that "there is an enormous opportunity to be able to put our clients in the position that corporate sponsors had 25 or 30 years ago—of control of a show, of tailoring it to your needs."

Such tailoring, Cameron feels, would probably increase corporate giving to PTV.

Cameron's opinions have been repudiated by some of the people he claims he represented. Atlantic Richfield even issued a position paper stating that they have no intention of insinuating their corporate philosophies into any public-television programs they pay for.

But what no one denied is that many major underwriters of public-television programming are beginning to look at new ways to spend the millions of dollars that in the past have produced such shows as Cosmos, Upstairs, Downstairs or The Shakespeare Plays.

For a decade, the Public Broadcasting Service has dominated high-quality cultural television programming. But this is about to change.

CBS Cable, an estimated $6 million investment in cultural, arts and musical program-

ming, is slated to begin servicing more than 2.9 million subscribers on Oct. 12, 1981.

ARTS, a cultural package put together by ABC Video Enterprises and Warner Amex Satellite Entertainment, began service in April.

Bravo, a two-night-per-week cultural cable-TV package, has been in operation since December.

RCTV, headed by former CBS president Arthur Taylor in partnership with RCA, NBC's parent corporation, says it plans sometime in 1982 to begin marketing a cultural service built around BBC programming.

PBS itself has allotted $350,000 for a study of the feasibility of creating its own pay-cable cultural service, utilizing arts organizations, such as the Metropolitan Opera, currently seen on PBS. Mobil Oil contributed $125,000 of the study's funding, and Mobil vice president Herbert Schmertz says that one addition to the PBS cable package could be the Mobil Showcase Network series, "shown on a weekly basis."

Chloe Aaron is an independent producer of high-quality cultural programming. Previously, she was PBS's senior vice president for programming and spent some of her time in Great Britain looking at PBS fare made by BBC, Granada, Thames, London Weekend Television and others. Recently back from a scouting trip to London, she reports that things have changed. "It used to be just PBS people over there. Now cable people are taking the same trips. Everybody's bidding, and it's going to drive the price up."

For a number of reasons, these developments are of tremendous interest to the corporations that underwrite public television. All the new organizations producing cultural programming are commercial. This means sponsors can become involved in selecting the subject matter of the projects they fund—and they can advertise on their shows. And, according to many PTV officials, lack of corporate advertising is one of the major reasons that PTV's $600-million system received less than $30 million in corporate donations last year.

One hundred and fifteen companies gave underwriting money to public television last year. Of those, 111 donated about 45 per cent—about $12.8 million. The other 55 per cent, roughly $15.7 million, came from Exxon, Mobil, Arco and Gulf. This quartet of hugely successful multinational corporations (their combined profits last year were $8.8 billion more than the gross national products of more than a dozen developing nations), funded wholly or in major part 72 per cent of all the shows telecast during PBS's February 1981 core schedule—public television's equivalent of prime time.

There is nothing inherently wrong with the generosity of Exxon, Mobil, Gulf and Arco, generously that has provided some of the most admired—and most watched—programs on public television. Still, critics charge that these four corporate behemoths wield so much influence over public broadcasting that they have managed to crowd out of the prime-time core schedule any public-affairs programming that might harm their corporate images, while filling the airwaves with hour after hour of ballet, opera, music and drama.

The question that executives at Mobil, Gulf, Arco and Exxon are now asking themselves is whether the investment is getting an adequate return. Until recently, an underwriter's credits where limited to a single line at the beginning and end of each program. New regulations permit the use of corporate logos and the identification of the products that underwriters produce. But advertising is forbidden, despite WNET president John Jay Iselin's claim that ads are "inevitable" on PTV. Despite the progress, corporate ad directors such as Arco's Lawrence Bershon say that, dollar for dollar. PTV underwriting is bad business when you count only the CPM—the cost-per-thousand of viewers reached that is the base on which all ad rates are figured.

On the other hand, PTV proponents are quick to say that the alternative forms of cultural programming currently available, even though they accept advertising, don't reach as many people as public television.

Stuart Sucherman, a veteran fund-raiser who has just been hired by four of the Nation's most powerful PTV outlets to help them develop new monetary sources, says that "from a cost-effective point of view, public television is still a pretty good buy." Sucherman argues that public television, in spite of its smaller audience, is watched by more intellectuals and other influential Americans than are the commercial networks.

Even so, ad agencies surveying the possibilities for their corporate clients tell companies like Arco that they cannot be myopic. "They have to take a stand in the cable business," says Needham, Harper's William Cameron.

Exactly what that stand will be is still uncertain. But sources say it is possible that companies such as Exxon, Gulf, Arco and Mobil will be financing their own cable projects.

In the meantime, public broadcasting is not standing still. Three major public-television stations have already formed profit-making subsidiaries, so that they, too, can gain a toehold in the lucrative cable and pay-cable market when it explodes.

Says Public Broadcasting Service president Lawrence K. Grossman, "Nothing's sacred about our role. Things are changing; we will change with them."

Even the concept of public television, as espoused by E. B. White in his introduction to the first Carnegie Commission report in 1967, has evolved. White, an idealist, wrote: "I think [public] television should be the visual counterpart of the literary essay; should arouse our dreams, satisfy our hunger for beauty, take us on journeys, enable us to participate in events, present great drama and music, explore the sea and the sky and the woods and hills. It should be our Lyceum, our Chautauqua, our Minsky's and our Camelot."

Today, the realists are in charge. " 'Public' television," says KCET president James Loper, "is a misnomer. It's probably the worst thing we could have."

WNET's John Jay Iselin agrees. "I had lunch with someone recently," he says, "who thought that we should not be known as public broadcasters. He told me that we should be called the Independent Broadcasting Service." Iselin, like other executives from major producing stations, thinks that public stations should emphasize the production and distribution of programs on a national scale. Money could be raised from corporations, which would become partners with the producing stations. Thus, it would be possible, for example, for Atlantic Richfield to put up $3.5 million for the production of KCET's Cosmos series—and then receive 50 percent of any profits the series might make in overseas sales, tie-in books, merchandising items and other money-raising ventures.

"What you'd probably have," says one Congressional staffer who has spent years studying the relationship between PTV and big oil, "is the complete selling of public broadcasting as we know it."

Not everyone sees things that way. Mobil Oil's Herbert Schmertz sees new programming possibilities for his firm in PBS's pay-cable venture. He hopes that his company's $125,000 support will give the idea a shot in the arm. Sources close to Exxon, the world's largest petroleum company, say it also is looking at new ways to product and to fund cultural programming. Indeed, the relationship between PTV and big oil seems to be growing closer than ever.

Part of the problem is that big oil—and other major corporations—seems to be the only direction PTV can turn to as Government funds dwindle. Two Carnegie Commission reports on alternative means to fund public broadcasting have been disregarded, most recently by the Carter Administration, which, despite promises to the contrary, never bothered to address the question of how public television would raise money in the future.

The Reagan Administration has set a new tone for public broadcasting. In a speech to a joint session of Congress, the President said that Americans have had a long history of private support for the arts. And it appears that public broadcasters will have to look there, rather than to the Government, for their future sustenance.

Following the Administration's lead, Rep. Tim Wirth (D-Colo.), chairman of the House Telecommunications Subcommittee, which oversees the authorization bill for the Corporation for Public Broadcasting, introduced legislation for a one-year panel that would suggest ways in which public broadcasting could obtain much more outside revenue.

However the problem of PTV funding is solved—and it has eluded solution for more than a decade—the inevitable result of new cultural programming possibilities and new delivery forms will be increased commercialism. Not, perhaps, as crass as much of what you see on ABC, CBS or NBC these days. But the selling of public broadcasting, whether to big oil companies or bigger audiences, means that—to use E.B. White's words—we're going to be getting a lot more Minsky's than we'll be getting Camelot.●

RELIGIOUS PERSECUTION AND SUPPRESSION OF HUMAN RIGHTS

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Ms. MIKULSKI. Mr. Speaker, I would like to submit for inclusion into the CONGRESSIONAL RECORD two outstanding articles that recently appeared in the Baltimore newspaper, Catholic Review. Both articles describe religious persecution and the suppression of human rights, but in very different parts of the world and under very different governments. In my view, the matter of religious freedom and human rights deserves much more attention today, particularly since the current administration seems

supportive of repressive, rightwing dictatorships, while rejecting a strong human rights policy.

The first article, "Catholic Lithuania—A Forgotten Plight?," was written by an outstanding and highly respected clergyman originally from Baltimore, Father Pugevicius. His article describes the systematic campaign of repression carried out by the Soviet Government against the Catholic Church as an institution in Lithuania, as well as against Lithuanian citizens who attempt to practice Catholicism. The second article, titled "Death Lists, Terror 'Lift' Guatemala's Tyranny Status," by Thomas Kavanagh, delineates the terror and violence perpetrated by the Government of Guatemala against its own people and particularly against the Catholic Church. This is especially significant since President Reagan has lifted a ban on the sale of military equipment to the Guatemalan Government.

I strongly urge my colleagues to read these excellent articles, keeping in mind the foreign policy focus the Reagan administration is espousing and its impact on the most fundamental right—freedom of religion:

CATHOLIC LITHUANIA, A FORGOTTEN PLIGHT?

(By Father Pugevicius)

A Catholic country with no parochial schools, convents, monasteries or press would seem to have its Catholic character slated for extinction.

Add the fact that this country of 3.3 million which is still 65 per cent Catholic has fewer than 700 priests (and those, with a median age of 60) and its single seminary sees an annual enrollment of 22 students, and the hope for a continued Catholic identity diminishes further.

Conclude with a government policy which prohibits members of the clergy to instruct children in the Faith—indeed forbids young people under the age of 18 to participate in the Church, and the life expectancy for the Church in this country is nonexistent.

Yet, the Catholic Church in Soviet-occupied Lithuania has endured these and many more hardships since 1940.

"Despite the obstacles they face," stated Fr. Casimir Pugevicius, a priest of the Baltimore archdiocese currently working as executive director of Lithuanian Catholic Religious Aid in Brooklyn, N.Y., "the people of Lithuania are deeply religious. However, they are waging a life or death struggle against atheism, and look to their brother and sister Catholics for help.

"The problem facing the Church in Lithuania today is not merely a Lithuanian problem, but a Catholic problem," he said.

The Catholics of Lithuania themselves realize the importance of presenting their case to the world. Since 1972, the clandestinely published *Chronicle of the Catholic Church in Lithuania* has been documenting incidents of harassment, arrests and trials of clergy and laity who cling tenaciously to the Faith.

To date, 46 issues of the *Chronicle* have reached the West.

In the publication, one can read about Nijole Sadunaite, an underground nun sentenced to three years of labor camp and three years of internal exile for disseminating the *Chronicle*. One can be present in the churchyard of the parish of Betygala, where children were photographed by antagonistic teachers and security agents on their First Communion day.

And, more and more often, one finds the trials—Gemma Stanelyte, sentenced to three years general regimen camp for leading a religious procession . . . Dr. Algirdas Statkevicius, one of the Lithuanian Helsinki Monitors, confined to a psychiatric hospital . . . Vytautas Skuodis, a hydrogeologist known to listen to Vatican Radio, and author of an uncompleted manuscript studying the effects of persecution and atheism on Catholicism in Lithuania, sentenced to seven years strict regimen camp and five years internal exile.

"Unfortunately," said Father Pugevicius, "the plight of the Lithuanian Catholic has failed to excite the imagination and concern of the rest of the Catholic world.

"Certain individuals, like Nijole Sadunaite, have gathered champions across ethnic and religious lines. The support she received, in the form of letters, and the knowledge that groups were continually working on her behalf, told her she was not alone. Although she has only been back in Lithuania since last summer at the conclusion of her sentence, she has already begun signing petitions in support of other prisoners of conscience.

"But the support received by Nijole, and a few other prisoners, is not representative of the attention given to the problem as a whole" he stressed.

And the problems are severe. In a country ecclesiastically divided into two archdioceses, four dioceses and a prelature, there are only two bishops permitted to exercise limited authority. Two other bishops are in exile under severe governmental restriction.

Candidates for the seminary are selected, not by the Church, but by civil authorities, who seek to appoint men of weak moral character willing to undermine the Church. All religious orders have been banned, with those brave individuals who have been clandestinely professed facing almost insurmountable odds in practicing their ministry.

Although freedom of the press is guaranteed by the Soviet constitution, there is no Catholic press allowed. Severely limited editions of a prayerbook, the New Testament, a book of psalms and a catechism were printed since the Soviet occupation, but these are not generally available, and many were exported for propaganda value. No religious articles are allowed to be manufactured.

Parishes are dependent on civil authorities in all things. From required registration of the parish with the local Communist Executive Committee to the actual ownership by the state of sacred Mass vessels, each aspect of religious life and activity is controlled.

Priests may not assist in neighboring parishes, even by hearing confessions. Physicians can, and often do, deny the priest the right to administer the sacraments to a dying Catholic patient in the hospital. The religious education of children is restricted to "spiritual schools"—but the only such school is the lone seminary in Kaunas.

As executive director of Lithuanian Catholic Religious aid, Father Pugevicius, working with a staff of two, represents the only agency in the free world dedicated completely to assisting Western-rite Catholics in the USSR, spiritually, morally and materially.

In recent years, indications from Lithuania have shown the need to concentrate on getting the message of the "Church of Silence" to the rest of the Catholic world. It is this message that Father Pugevicius feels is not being heard or responded to.

He cited the case of Vytautas Skuodis, sentenced on Dec. 22, 1980, for "anti-Soviet agitation and propaganda."

"Vytautas Skuodis should certainly command the attention of every Catholic bishop, priest, layman, as well as the Catholic press and the American public at large," said Father Pugevicius.

"Skuodis was born in Chicago, Ill., on March 21, 1929, and was baptised there. Although his family returned to Lithuania the following year, Mr. Skuodis, also known as Benedict Scott, still claims U.S. citizenship. He even requested an American attorney at his trial last year, but his request was ignored.

The fact that an American citizen is in a Soviet prison camp to serve seven years for writing religious literature and listening to Vatican Radio should have the entire Catholic world in an uproar. But thus far, only one member of Congress, the Hon. Cardiss Collins (7th Congressional District, Chicago), has become involved in the case."

Father Pugevicius expressed hope that the case of Vytautas Skuodis, as well as other specific violations of the rights of believers will find their way to the agendas of diocesan Peace and Justice Commissions throughout the country.

"If more people, especially influential Catholics, began to state their objections to the pattern of violation of human rights, which the Skuodis case and others represent, the Soviet government would think twice before imprisoning believers for activities which are guaranteed by the Soviet Constitution, as well as under the Universal Declaration of Human Rights, which the Soviet Union signed.

"We're ready to provide all the help and background information necessary to anyone willing to help," the priest stated.

"The Church in Lithuania has survived against tremendous odds," Father Pugevicius pointed out. "For more than 40 years it has struggled, mostly alone, just to survive. This can't continue indefinitely, however. Whole generations of young people are growing up, never having known a free Lithuania, or freedom of thought.

"Without religious materials, even the most ardent believer cannot do alone what entire school systems have been designed to do. The clergy is aging, dying, and are not being replaced. The Church in Lithuania is alive, but severely handicapped . . . it needs the support of all Catholics to survive. A struggle for souls is a struggle none of us can afford to ignore," he declared.

NOTE: Father Pugevicius, former director of communications for the Baltimore archdiocese, is now located at 351 Highland Blvd., Brooklyn, N.Y., 11207. He may be reached at 212-647-2434. Free copies of the Chronicles are available by writing to the Lithuanian Catholic Religious Aid at the above address.

DEATH LISTS, TERROR "LIFT" GUATEMALA'S TYRANNY STATUS

(By Thomas M. Kavanagh)

"There is more violence now in Guatemala than in El Salvador. Throughout the country, the body count is running about 30 to 40 per day. It is a state of permanent repression there. Anyone associated with labor unions, the Church—even students—is in jeopardy. . .

"In a nation where 70 per cent of the wealth is owned by two per cent of the population, the government has made it clear there will be no social or economic changes. People here (in the U.S.) seem to think that if you have elections you have democracy. But in Guatemala the military has absolute control. They decide who will be in power. In the last election the two opposition candidates were assassinated."

This is Frank Rafael LaRue speaking. In Baltimore last week to discuss the seldom-noticed turmoil taking place in his native land, the 28-year-old former Guatemalan labor lawyer has been in exile since early this year. Coming to the United States was literally a matter of life or death, he said.

"My name came on the 'death list' two years ago," he explained, noting that this list of people the government considers subversive is actually published in the local newspapers. "It wasn't taken too seriously then but it is now. Everyone whose name was on those lists is either dead or in exile.

"Originally, I decided to stay; that is a big problem there: that so many people must leave . . . But it got to the point where I could not move around freely. I was being followed. In January the secret police went to my relatives looking for me. I went into hiding. I realized there was no sense staying if you couldn't put a foot on the streets."

Mr. LaRue, 28, undoubtedly made a wise decision. According to estimates made by Amnesty International, there have been 5,000 political killings in Guatemala this year alone. Reports from the United Nations Commission on Human Rights and the Inter-American Commission on Human Rights of the Organization of American States (OAS) have corroborated this figure.

As in El Salvador, the murders are often brutal, the bodies showing signs of vicious torture. As in El Salvador, the victims are often abducted by what the government calls ultra-right wing "death squads" but who Mr. LaRue believes to be members of the military merely dressed in civilian clothing.

As in El Salvador, the violence is carried out against anyone remotely considered "subversive" by the government—including 10 priests and one Protestant minister. As in El Salvador, not one single arrest has followed any of the murders.

Mr. LaRue, whose work just prior to exile had been with the Peace and Justice group in the Guatemala City archdiocese, is now traveling throughout the northeastern U.S. trying to spread the word about the situation in his homeland.

Americans, he said, have been given very little information about the problems there, despite their long-term nature and the fact that media in many other nations—including Canada—took notice long ago.

Some hint of what is happening there hit the American press last week when the Reagan administration bypassed its own guidelines in deciding to sell the Guatemalan government military equipment. President Carter had cut off all aid to that nation in 1977 because of the flagrant human rights violations perpetrated by the government.

In order for aid to be renewed, Congress was to have reviewed Guatemala's record on human rights. The Reagan administration skirted this obstacle, however, by removing the equipment shipped from the list of items covered in the stipulation.

The relationship between the U.S. and Guatemalan governments is apparent, LaRue said: American companies have invested more capital there than in any other Central American nation except Panama (where, of course, exists the Panama Canal). On top of this, oil finds in Guatemala indicate reserves that could eventually supply the United States with as much as 10 per cent of its imported oil. Supporting U.S. interests, i.e., the ruling government, figures to be a Reagan priority, he said.

While the military regime of General Romeo Lucas Garcia claims communist forces are creating an insurrection against his "centrist" government, Mr. LaRue said opposition represents the large number of groups who have lived amid squalor, poverty and now repression for too long.

Noting that Guatemala's mortality, malnutrition and illiteracy rates are the highest in the world save for Haiti, Mr. LaRue said that his nation "is very rich in its resources. It's hard to explain its being so poor when everyone there could live a decent life."

He added that even the Indians—descendants of the Mayan civilization who make up 60 percent of the population—have become part of the "struggle for justice," despite being noted for their peaceful ways. ("The government sees them as passive and naive," said Mr. LaRue).

"This is not a Marxist insurrection but there are Marxists in it," he continued. "Some people struggle because they are Christians, some because they are Indians and all are struggling just to survive . . . but there is definitely no Soviet influence."

Citing one significant difference between the situation in Guatemala and El Salvador, Mr. LaRue noted that military leaders in his homeland are part of the wealthy, ruling class and thus carry out their methods of control more vigorously.

"In El Salvador, the military defends an oligarchy. In Nicaragua, they defended a dictator (General Somoza). But in Guatemala, they are the 'dictator' themselves. The members of the military are part of the broad-based oligarchy so they are not protecting somebody else's wealth but their own. It makes them much more aggressive."

He said the "grassroots Church" has been "very much aligned" with the poor in opposing this aggression but that "the official Church"—in particular Cardinal Casariego—has "remained silent."

An article published in the Passionist Missions' magazine *Sign*, (February, 1981) pointed out that the Guatemalan bishops "broke that silence (in 1976) when they issued a pastoral letter . . . which was signed by all of them except Cardinal Casariego, archbishop of Guatemala City."

A number of other pleas from the bishops seeking an end to the murder and the system of socio-economic injustices have followed.●

REGENERATION IN THE RUHR

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. BENNETT. Mr. Speaker, when I came to Congress in January 1949 there was underway in Europe a miraculous adventure. It had to do with the aftermath of World War II and the direction that victor and vanquished might pursue. Would the period be one of retribution, vengeance, and earned guilt-laden remorse; or could it be something that would bring men in the world together for the mutual benefit of all?

Communist leaders yearned to acquire the Ruhr and its industrial capability for their purposes of world conquest and subservience to their dictatorship.

Luckily for mankind in 1948 the U.S. Congress had enacted the Marshall plan which furnished the nuts and bolts for the revitalization of those who had lost the war and some who were victors. The London Economist called it "the most straightforward, generous thing any country has ever done for others."

Another helpful action in 1948 was when America and Britain called the bluff of the Soviets who threatened to take over Berlin. So there was launched the successful Berlin airlift. Three years later the Schuman plan, a third constructive initiative, helped bind the wounds between Germany and France in a constructive common purpose of recovery and partnership for survival.

Mr. Speaker, there was a fourth element of importance at work in those days. It was the catalyst of Moral Re-Armament which brought about an unlikely spiritual brotherhood among the leadership of France and Germany in politics, in labor, and in management.

Mr. Speaker, my friend Kenaston Twitchell has recently written a book "Regeneration in the Ruhr" (Princeton University Press, 1981) which tells of the dramatic events which saved the Ruhr from being gobbled up by the Communists; but even more importantly Twitchell tells of the spiritual nature of the healing of wounds between France and Germany and between labor and management in industrial Ruhr.

In the late 1920's and early 1930's while I was in college I learned of the work of Frank Buchman, the initiator of Moral Re-Armament, then called the Oxford Movement. In 1949 and the early 1950's I came to know Frank Buchman personally, as well as Ken Twitchell and others active in the movement. I found inspiration in the dedicated lives of these wonderful people who sought to improve the lot of mankind by changing all men and women for the better, stressing as they do absolute honesty, purity, unselfishness, and love.

Twitchell and his family have given much of their lives to the Moral Re-Armament movement, which is alive and well in Europe today; and vigorously growing again in America. Speaking of this movement Twitchell wrote:

It advanced the belief that the basic need of humanity was a new spirit in man himself. Only when men and women change, would nations change. God would lead them

into freedom and truth when they learned to listen and obey.

Mr. Speaker, Twitchell's epilog to "Regeneration in the Ruhr" is worthy of quotation here:

Today, three decades after the events described in these pages, West Germany has a vitality that is outstanding on the continent of Europe. Yet, like America, she risks losing the quality of life and leadership that are vital to the future of freedom.

Can she find that inner commitment that can win over the Communist world, and give humanity a lasting peace?

The Berlin Wall is a stark reminder of the war of ideas that has blanketed this savage century.

Western civilization has incubated over the centuries the secret of regeneration. The crucial question now, for us all, is whether or not we so rejuvenate our Judeo-Christian heritage that we make it the discipline and joy of our lives and the core of our societies.

That choice, above all others, will determine our future.●

TERRORISM MUST BE CHECKED

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. ASHBROOK. Mr. Speaker, people all over the world were stunned by the attempted assassination of the Pope by a convicted terrorist. Fortunately, this senseless act did not take the life of the Pope and he was able to celebrate his 61st birthday this week. I am sure I speak for all Americans in wishing the Pope a speedy recovery.

We must take a stronger stand against these violent criminals who seek to publicize their causes by harming innocent individuals. On January 5, 1981, I introduced H.R. 67, a bill to amend the Internal Security Act of 1950 to provide our country with a more effective defense against the threat of international terrorist activities.

Although I have spoken out frequently against the dangers of terrorism for many years, I often feel that the message is ignored by many with the perception that "it couldn't happen to me."

I recently read an article that may convince those who doubt the very real danger of such violence. The article is entitled "The Nightmare of Terrorism," and it was published in the April 1981 issue of "Association Management," the magazine of the American Society of Association Executives. We are a Nation of many active association groups, and this article brings all too close to home the grave reality of terrorist violence through reports of actual terrorist incidents which threatened the safety of several association conventions.

I submit for the RECORD this article which stresses the importance of recognizing the real possibility of a terrorist incident occurring and the need to implement countermeasures to prevent such a nightmare from becoming a reality.

THE NIGHTMARE OF TERRORISM

(By Margo Vanover)

The threat of terrorism should not deter your association from sponsoring international meetings. But it should make you careful when planning such events.

The warning letter came on September 30, 1980. The bomb exploded about three weeks later.

"Sunday, October 19. The date is engraved on my brain," says Curtis Nabors, president, American Society of Travel Agents, Inc., New York City. That day, a bomb planted in an association convention kit exploded during the opening meeting of the 1980 World Travel Congress in Manila, Philippines. Eighteen people were injured, 11 of whom were ASTA delegates.

The explosive device is said to have been planted by the April 6 Liberation Movement, a political group opposed to the martial law imposed by Philippines' President Ferdinand Marcos. The blast narrowly missed President Marcos and other high-level officials who were attending the convention.

"Fortunately, the explosion did not cause severe injury to anyone. It could have been much more serious," explains Mr. Nabors. "Thank goodness that it wasn't."

Even though terrorist bombings, kidnappings, and murders make newspaper headlines almost daily, few association executives ever stop to think, "It could happen to me." But as terrorist attacks continue to increase, and as more and more associations take their annual meetings and conventions to foreign destinations, international terrorist attacks on association executives become more feasible, more threatening.

"The use of terrorist tactics has increased during the last 12 years—of that, there is no doubt," said Brian M. Jenkins, program director for security and subnational conflict, Rand Corporation, Santa Monica, California, in his recent address to the American Society for Industrial Security. "Although the overall level of terrorist activity oscillates from year to year, the trend is unmistakably upward."

Mr. Jenkins also points to an escalation in deaths during terrorist attacks. "The percentage of incidents with fatalities and multiple fatalities has increased during the last decade. This rise suggests that terrorists are more willing to kill and, perhaps, also more willing to risk being killed."

There were no fatalities in the ASTA attack. But in another terrorist incident that occurred several years ago, and that involved an association, the outcome was not as fortunate.

CONVENTION CHAIRMAN MURDERED

This time the terrorist attack was not international in nature, although it did occur outside of the continental United States. Thomas J. Rouland, CAE, executive director of the Federal Bar Association, Washington, remembers it well.

"Our 1977 Puerto Rico convention was going to be the biggest and best ever. We expected a larger turnout than ever before. . . . The Thursday before the convention, Alan Randall walked out of his home in San Juan, Puerto Rico, to get into his car and was assassinated. . . . No threats were given. Nothing. We had no indication whatsoever."

Mr. Randall was a labor lawyer who had lived and worked in Puerto Rico for a number of years. At the time of his assassination, he was the FBA's convention chairman and a member of its national executive committee.

Later that September day, a note was found in Mr. Randall's briefcase. The note, explains Mr. Rouland, accused the FBA convention chairman of being an enemy of the people. "It said that he had been accused, tried, and executed for being an enemy of the working class," Mr. Rouland recalls.

Ironically, a two-day seminar on terrorism as it affects lawyers was slated for the FBA's upcoming convention. Recognized experts on terrorism from various government agencies were to address the session. In the death note, the Labor Commandos—as they were called by the press—referred to the seminar on terrorism and mentioned by name each of the scheduled speakers.

The convention was only three days away, and some of the convention delegates, already were beginning to arrive in Puerto Rico. The executive committee of the Federal Bar Association was forced to make a difficult, almost no-win decision. Should they cancel? Should they go on, full speed ahead, with the show?

WHAT WOULD YOU DO?

If you are ever faced with a similar decision, the first thing you must do is calmly and methodically begin to obtain every available fact about the situation, says Mr. Rouland. You must also seek the advice of local police officials and carefully weigh their assessment of the situation.

"You must trust the security people," he says. "they know what they are doing. They have to level with us, and we have to level with them. But, in the end, we must look out for the best interests and well-being of our members. As association executives, that's our priority."

The FBA executive committee voted to cancel the convention in Puerto Rico and hold an abbreviated meeting at the Mayflower Hotel in Washington several weeks later. Time was a critical factor in their decision since, according to the association's bylaws, the annual meeting had to be held in the month of September.

Then, in a show of confidence, the FBA rescheduled the convention in Puerto Rico two months later.

Why? In part to satisfy the desire of the Puerto Rico chapter of the FBA, which, though distressed by the death of a fellow member, did not want the original show to be cancelled. "They believed the governor of Puerto Rico would provide adequate security," Mr. Rouland says.

When asked if he had any reservations about returning to the site so soon, Mr. Rouland responded: "No. I felt it was the right thing to do . . . The terrorists didn't direct their assassination against the Federal Bar Association. They didn't like Alan Randall. It wasn't an attack of us."

Although this murder occurred almost four years ago, it is not and probably never will be forgotten. Soon after the assassination, the FBA established the Alan Randall Memorial Fund, and each year at the annual convention, the Puerto Rico chapter raises money for a scholarship to be awarded to a promising law student.

"This is very important to the chapter—to educate future lawyers in his memory," says Mr. Rouland, "so that Alan Randall will not be forgotten and so he didn't die meaninglessly."

INNOCENT VICTIMS

The purpose of a terrorist attack quite often is not to harm the actual target of the attack but to gain publicity for a cause, to make a statement to the world. And, in the process, innocent bystanders who happen to be in the wrong place at the wrong time are victimized.

This was the case in the attack on the travel agents association. The April 6 Liberation Movement did not have a personal vendetta against the American Society of Travel Agents, Inc. "The terrorists were just looking for a forum," explains a state department spokesman. "And they found one."

The truth is that the Philippines had been the site of numerous terrorist attacks prior to the ASTA convention. From late August 1980 until the convention in October, one person had been killed and 40 injured in five bombings.

The association was not the ultimate target. It was the means to achieve an end.

Why, you might ask, did ASTA go ahead with its convention after receiving a warning letter? That's difficult question. In such a situation, there are no right answers. They all appear to be wrong.

AFTER THE WARNING

When Curtis Nabors received the warning letter on September 30, he did not treat it lightly and shrug it off. It and five other copies of the same letter that were later received by ASTA members were handed over to the Federal Bureau of Investigation, The Central Intelligence Agency, the Department of State, the U.S. Ambassador to the Philippines, and the U.S. Attorney General. According to Mr. Nabors, the State Department's verdict was that a travel advisory prohibiting travel to the Philippines was not necessary in this instance.

The association did not stop there. A few of the other safety precautions taken by the ASTA included:

Sending telegrams to all of the people who had registered for the meeting, explaining what had happened and what was being done.

A personal visit to the Philippines two weeks prior to the show by Mr. Nabors for the purpose of reviewing the situation with President Marcos and other government officials. "I was satisfied that they had taken every precaution they could," he says.

Extra security at the convention.

Development of a contingency plan that included a proposal for an emergency evacuation, locations of nearby hospitals, instant communication methods, and other information necessary in the event of an explosion.

When asked what his first reaction was at the instant of the blast, Mr. Nabors replies: "To ensure that there was no panic. My second reaction was to determine the extent of the injuries sustained and to evacuate in an orderly fashion. At that point, we didn't know if there was one bomb or 10 bombs. The evacuation worked because the delegates acted very professionally."

THE AFTEREFFECT

Because the association had developed a carefully executed contingency plan, it was able to proceed with at least some of the meeting. Although the general meeting sessions were canceled, the educational programs were aired on government television for six hours on Monday and Tuesday, and some of the social functions went uninterrupted.

Praising the attitude of those in attendance, Mr. Nabors says, "Everyone had a kind of show-must-go-on type of attitude." He says that, contrary to many newspaper reports, widespread pandemonium did not break out, the delegates were not hysterical, and people did not swarm to the airport to board the next flight out.

He seems to think that, in a way, it may have helped to solidify the association and "pull it even closer together." One example of this is that the ASTA offered a 50 percent refund to all who attended the congress, but so far, he says, only one out of every six people has accepted the offer.

The results of a random survey of 234 delegates conducted by International Research Associates, Ltd., Hong Kong, after the incident, parallels Mr. Nabors' perception of the crowd as calm and orderly. According to the survey results:

Of the respondents who were at the scene of the bombing, only 30 percent said the incident upset or frightened them.

91 percent said they would recommend the Philippines as a vacation spot, and about 80 percent said they would suggest it as a convention center.

65.5 percent of the ASTA delegates polled left the Philippines favorably impressed with the convention facilities, the country's vacation potential, and the friendliness of the Filipino people.

70 percent didn't think the conference should have been canceled because of the bombing.

HOW TO AVOID TERRORISM

These two incidents indicate the potential threat of terrorism to associations and their meetings. How can you guarantee that your association will never become the victim of a terrorist attack?

You can't. There are no guarantees, only reasonable precautions that lessen the chance of an attack, explains Hugh M. Walton, program manager, Commerce Working Group on Terrorism, U.S. Department of Commerce.

Here are a few precautions you should consider:

1. Acknowledge the reality of terrorism and consider that a terrorist incident could someday affect your association. Although this might seem like an unnecessary scare tactic, being aware of the threat is essential, points out the brochure, "Sabotage—Bombs—Bomb Threats," published by the American Society for Industrial Security, Washington.

"Since daily newspapers throughout the world are a continuing chronicle of current activity, a formal program to make management and employees aware of the threat posed by the terrorist would seem unnecessary," the brochure says. "Unfortunately, some managers persistently hold the opinion that, 'It won't happen to us.'

"The challenge then, is to convince management not only that attacks can happen to them, but that over a period of time, attacks will probably happen to them. Terrorism countermeasures require more lead time to institute effectively than any other security program because of the scope of the threat and the diversity of targets at which a threat may be aimed. No preventive program is effective on a reaction basis, and a suitable response can seldom be developed in the midst of crisis."

2. Select the site of a foreign meeting carefully. Look not only at the availability of hotels, appeal of the city, and size of the convention hall; look also at the incidents of terrorism. Call the Commerce Working Group on Terrorism and other appropriate authorities to find out the number of previous terrorist attacks, know terrorist groups active in the country, and, most importantly, the capability of the host government to help you with security.

Hugh Walton, of the Commerce Working Group on Terrorism, says that some governments have so many political problems that they cannot protect their own people, let alone a visiting group. A spokesman for the State Department rightly points out that once you are in a foreign country, the ability of U.S. officials to help you is limited. "Our role must be constrained if we're operating outside the U.S. We can't infringe on the foreign country's sovereignty," the spokesman says.

3. Become familiar with the U.S. policy on terrorism, for instance, you should know that it is this country's policy not to accede to terrorist demands. Although U.S. officials will not prevent you from paying a ransom in a case of kidnapping, they do not encourage it and will not act as your middleman, says a State Department spokesman.

"Gist," a reference aid published by the bureau of public affairs, Department of State, summarizes the U.S. policy on terrorism as follows: "The U.S. Government has made clear that it will make no concessions to terrorist blackmail. We will not pay ransom or release prisoners. We support other governments that take a similar stance.

"When Americans are abducted, we look to the host government to exercise its responsibility under international law to protect all persons within its territory. We maintain close and continuous contact with the host government during an incident, providing whatever support and assistance we can."

4. If you are sponsoring a meeting in a country that has been troubled by terrorism, consider keeping publicity to a minimum—especially press releases that would be picked up by the host country's media. "Terrorism is an international threat which requires some advance knowledge about the victim (or association), the itinerary, and the location," reads the American Society for Industrial Security's booklet, "Reducing the Risks of Terrorism."

"Unless absolutely necessary, restrict advance announcement of travel plans and withhold information about company affiliations and titles when registering in an overseas hotel," warns the booklet.

Mr. Walton of the Commerce Department agrees, advising association executives to do without "a lot of publicity and fanfare . . . or you're just inviting trouble."

5. If you have any idea that you will run into problems, develop a comprehensive contingency plan. When a bomb explodes, or a member is murdered, or a board member is kidnapped, you probably will be so stunned that ordinary thinking will be difficult. A contingency plan will alleviate some of your decision making and help you and your members cope with the event.

6. Contact the American embassy before your meeting and once you arrive in the host country. Embassy officials can be a valuable source of information for you. (For specific details on information provided by American embassies, see the accompanying box.)

7. If the host country has a record of terrorist incidents, consider hiring extra security for your meeting. That doesn't mean, of course, that you need guards armed with machine guns standing at every doorway, or that meeting participants need be intimidated by obvious security measures. "You can

take precautionary measures without building a fortress," Mr. Walton emphasizes.

When you are hiring security guards, "Don't take pot luck," Mr. Walton cautions. Instead, he says, find out what major U.S. corporations have offices in the country of your meeting; then call the company's U.S. headquarters and ask the security department what firms they have used. He says that businesses quite frequently trade names of good security firms. "Even competitors are sharing security information with each other to protect American life," Mr. Walton adds.

NOT A DETERRENT

When Curtis Nabors asked if the terrorist blast in the Philippines would deter the American Society of Travel Agents, Inc., from holding additional foreign meetings, his response was negative. "We're an association of travel agents. For us not to travel worldwide, when we are sending clients around the world, would put us in a ridiculous situation."

He also says that, personally, he would go back to the Philippines tomorrow without fear, and "I am not a foolhardy type of person." In fact, he is highly complimentary of the Filipinos, the country, and the convention facilities, saying that the government "did everything it could, before and after the event."

Mario Payawal, tourism attache for the Philippines Consulate, Los Angeles, says he has received numerous letters that express similar sentiments from the ASTA delegates who were at the convention.

"It was just an isolated case," Mr. Payawal explains. "The Philippine government condemns all forms of terrorism." He says that the people responsible for the ASTA bombing are now in custody and "proper charges will be filed against them."

Thomas Rouland is just as complimentary of Puerto Rico as a convention site. He says that after the assassination several people came up to him and said, "Oh, Puerto Rico. I would never have a meeting there."

"You miss the point," was his standard reply. "It's not Puerto Rico." He says that a terrorist incident could just as likely have occurred in New York City, Chicago, or Washington, D.C.

Pedro deAldrey, executive director, Tourism Company of the Government of Puerto Rico, San Juan, agrees. "It is probably safer here than in many places on the mainland. This is a relatively peaceful place to live and visit. . . . We are facing the same problems that are being faced throughout the industrialized world."

The threat of terrorism should not deter your association from sponsoring a foreign meeting—especially with the recent passage of bill H.R. 5973 allowing tax deductions for attendance at foreign meetings. This makes international meetings more attractive than ever before, and your members should not be kept from attending.

But the threat of terrorism should make you cautious and careful. Take adequate precautions, says Hugh Walton, to "make your organization a hard target, rather than an invitation to a terrorist group."●

A PENSION FOR OUR WORLD WAR I VETERANS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. LEHMAN. Mr. Speaker, the Subcommittee on Compensation, Pension, and Insurance has just completed its hearings on H.R. 1918, a World War I pension bill.

I am a cosponsor of this legislation, because I believe that our Nation should finally recognize the dedicated service of these men who fought so bravely during the First World War. Following is a copy of the testimony which I submitted to the subcommittee in support of the early passage of this bill.

TESTIMONY OF THE HONORABLE WILLIAM LEHMAN ON H.R. 1918

Mr. Chairman, I would like to take this opportunity to express my strong support for H.R. 1918, legislation to give a service pension of up to $150 per month to our World War I veterans.

During the 95th Congress, this subcommittee held hearings on a similar World War I pension bill, and at that time I also submitted testimony in support of its passage. Unfortunately, during the 95th Congress and again during the 96th Congress, this legislation so desperately needed by our World War I veterans failed to be enacted into law. I will once again repeat the reasons why I am in favor of a bill to help our neglected World War I veterans, and hope that during this Congress it will at last be signed into law.

Our World War I veterans failed to receive the same benefits and consideration that our Nation has consistently given to other veterans. When these veterans were discharged they were not given any job preference classifications or other assistance to enable them to more easily find a job. These veterans did not even receive educational benefits to allow them to continue their education or to learn a new skill so that they could better make the difficult transition to civilian life.

Our World War I veterans did not have the opportunity to participate in any GI home loan programs to assist them in finding affordable housing for themselves and their families. These veterans did not receive hospital care, because veterans hospitals like those of today did not exist. The social security system did not aid most World War I veterans, as they were already too old to build up maximum benefits when it was created in 1935.

Passage of H.R. 1918 is long overdue, and it would serve to at least partially compensate our elderly veterans who were not eligible for the wide range of benefits available to our veterans from later wars. The sacrifices made by our World War I veterans were certainly not any less, and therefore the recognition of their contributions should not be any less.

There are so few World War I veterans that I am hopeful the 97th Congress will pass H.R. 1918 so that our Nation can finally say thank you to these brave and deserving men.

Inflation has imposed a special burden on our elderly who are living on fixed incomes, and passage of this bill would help our World War I veterans to better take care of themselves and their families. We cannot let any more congresses pass without first assisting these worthly veterans.●

EXCELLENT APPOINTMENT BY PRESIDENT REAGAN

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. SIMON. Mr. Speaker, I applaud President Reagan's nomination of Arthur Hummel, Jr., as Ambassador to China. Mr. Hummel is a career Foreign Service officer who speaks fluent Chinese. He was born in China, has studied and taught in Peking and even spent a year during World War II fighting against the Japanese with a group of Chinese guerrillas.

I cannot think of a better way to show the Chinese that we are truly interested in talking to them, and in listening to what they have to say, than by appointing an Ambassador who speaks their language. Too often, our representatives overseas cannot speak the language of the country they are stationed in. Too often, foreign leaders are given the impression that nobody in the American Government cares enough about their country to learn their language. I hope this excellent appointment is a sign that we are finally recognizing the importance of foreign language skills in our diplomatic corps and that we are starting to bridge the language gap.●

NEW YORK ASSEMBLY OPPOSES DOMESTIC SWEATSHOPS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. MILLER of California. Mr. Speaker, over 140 Members of the House of Representatives, the State Legislature of California, and the City Council of Los Angeles have joined in urging Secretary of Labor Raymond Donovan to abandon his proposal to eliminate the prohibition on industrial homework in the garment industry.

Today, I want to introduce into the RECORD a resolution recently passed by the New York State Assembly which also calls upon Secretary Donovan to abandon this ill-advised plan. Like others in the garment industry—manufacturers, workers, contractors, and regulators—the assembly has recognized that elimination of the restriction would make enforcement of fair labor standards impossible, and would severely undermine the legitimate

manufacturer and States with such restrictions.

The comment period on the Secretary's plan has now closed. The overwhelming percentage of comments, like the testimony of every witness who testified before two hearings by the Subcommittee on Labor Standards, opposed lifting the ban.

I again call for joint action by the Congress and the administration to accept the Secretary's challenge to enact tougher penalties for violators of the Fair Labor Standards Act. Those tougher penalties, however, will be effective only if we retain the ability to enforce the law in the first place. The homework ban, which prevents the proliferation of sweatshops, is an essential part of the effort to eradicate unsafe workplaces and unconscionably poor working conditions.

The resolution follows:

RESOLUTION

Whereas approximately forty years ago, the Wage and Hour Administration, concerned about enforcing the minimum wage and maximum hour and child labor standards, provided for in the Fair Labor Standards Act, researched and concluded that there were seven industries in which it was impossible to enforce these standards under industrial homework conditions, and as a result homework was banned in the following industries: jewelry, gloves and mittens, knitted outerwear, women's apparel, buttons and buckles, handkerchiefs and embroidery; and

Whereas, Secretary of Labor Raymond J. Donovan has now proposed to repeal Part 530 of Title 29 of the Code of Federal Regulations, thereby abolishing these much needed regulations covering industrial homework; and

Whereas New York State has more extensive regulations specifying the conditions under which homework will and will not be permitted; and

Whereas a system of state by state regulation of industrial homework would cause a competitive disadvantage to those states such as New York which are more concerned about guarding against abuses in the areas of child labor, pay below minimum wage and poor health and safety conditions; Now, therefore, be it

Resolved, That this Legislative Body hereby respectfully memorializes United States Labor Secretary Raymond J. Donovan to withdraw his proposed repeal of federal industrial homework regulations; and be it further

Resolved, That copies of this Resolution, suitably engrossed, be transmitted to the Honorable Raymond J. Donovan, United States Secretary of Labor and each Member of Congress from the State of New York.●

SCIENCE AND ENGINEERING EDUCATION IN NSF BUDGET

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. FUQUA. Mr. Speaker, yesterday the House, in its action on the National Science Foundation's appropriation, spoke out clearly on the importance of continuing the Foundation's programs in research and in science and engineering education. By a strong vote, the House upheld the position of the Appropriations Committee to restore $70 million in NSF's budget, $25.1 million of which is added for science and engineering education.

I would like to call my colleagues' attention to a letter I received from Dr. Frank Press, president of the National Academy of Sciences. His letter, and resolutions adopted by the Academy, articulate the value of the National Science Foundation's role in maintaining a strong base of education in science and engineering in this country, and the Academy's concern lest this role be lost.

NATIONAL ACADEMY OF SCIENCES,
Washington, D.C., July 16, 1981.

Hon. DON FUQUA,
Chairman, Committee on Science and Technology, U.S. House of Representatives, Washington, D.C.

DEAR MR. FUQUA: The direction of Congressional action on the proposed 1981 National Science Foundation budget for science education programs in recent weeks has been heartening to those who are most aware of the importance of a strong base of education in science and engineering to this country and who were dismayed by the cuts proposed in President Reagan's earlier budget proposal. There is still reason to be concerned, however, and I am writing to ask that the Congress give careful attention to this part of the NSF budget in taking final action.

As you know, the 1981 level for these programs, which include research fellowships as well as science course-content improvement projects and other programs to strengthen education, was $85.7 million, reduced to $67.6 million for the current year. The 1982 budget proposed by President Reagan was $9.9 million, which the Congress has increased to $35 million (House version) and $20 million (Senate version). The intent of the Congress to maintain a reasonable level of effort in this area, to the extent possible under the general retrenchment in the federal budget, is manifest; one must hope it will prevail.

It seems very important that the catalytic, supportive, and quality-setting role of the federal government in education in science and engineering not be lost. Not only the numbers and competency of our future scientists and engineers, but the public's understanding of the complex scientific and technological issues before our society depend on the nation's educational strength. In turn, the adequacy of these resources will determine how successful we are in national programs such as those for a stronger economy, national defense, and a more secure energy future.

About 8 months ago, a report by the National Science Foundation and the Department of Education, entitled "Science and Engineering Education for the 1980's and Beyond," presented evidence that our nation has reason to be concerned about deterioration in science and engineering education. The problems are pervasive and complex and will require determined and concerted effort by all sectors of society for their solution. The Federal Government must assume its fair share of the burden by enabling the Federal agencies with experience in science education—especially the National Science Foundation—to continue educational programs that prove to be effective.

At its annual meeting on April 28, 1981, the National Academy of Sciences passed a resolution expressing its concern about the selective cuts then under consideration for the National Science Foundation budget for science education programs. More recently, our Commission on Human Resources, at its meeting of June 12, reviewed this matter and passed a resolution affirming its support of continued federal efforts to strengthen science education at all levels, not overlooking research fellowships. I am enclosing copies of the two resolutions.

I thought you would like to know about these views. A retreat by the Federal Government at this time from its modest investment in this area would, in my opinion, be most unwise. I hope the Congress will look closely at the NSF education budget in taking final action and will maintain a strong federal emphasis on science education.

Yours sincerely,

FRANK PRESS, *President.*

Enclosures.

RESOLUTION

Whereas, the future of this country depends, in good measure, on its scientific and technological competence, and

Whereas, the future will depend on the scientific education of our young people, the National Academy of Sciences looks with disfavor on the selective cuts in the proposed NSF budget for its scientific education program and hopes that these funds will be restored, or that a reprogramming of the NSF budget will insure the continuance of its science education program.

Passed on April 28, 1981, during the 118th annual meeting of the National Academy of Sciences.

RESOLUTION

The Commission on Human Resources notes with pleasure and concurs with the resolution of the National Academy of Sciences dated April 28, 1981, regarding funding of science education. We believe strongly that there is a national need for substantial and consistent Federal support of all aspects of science education, including research fellowships. We wish to register our serious concern at the recent acceleration of the continuing decline in the availability of competitive open research fellowships for American scientists in the fields coming under the purview of the National Science Foundation. An integrated approach toward the support of these fellowships is needed; this may lead to new forms of support.

Immediate attention should be focussed on this problem to ensure that independent fellowships do not fall through the cracks. The Commission on Human Resources urges the Council and Officers of the National Academy of Sciences to take actions to serve the national need by instilling new vigor and substance in all science education, including research fellowships. We stand ready to help.

Approved by the Commission on Human Resources, National Research Council, June 12, 1981.●

A SOUR DEAL ON SUGAR

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. PEYSER. Mr. Speaker, as we all know, the recent backroom bartering by the administration for votes on their version of the budget reconciliation package could saddle the consumer with an $8 billion tab. Unless the sugar support program is eliminated from the Food and Agriculture Act of 1981, Americans will end up paying more for every kind of processed food, from cookies to cornflakes.

As we get closer to the date when the House will have the opportunity to consider and vote on the 1981 farm bill, more newspapers weigh in with an editorial against the sugar provision.

A recent editorial column in the Wall Street Journal, entitled "Sugar Prices and the U.S., How Sweet It Is," concludes that while the sugar lobby clamors for ever-increasing support from the Federal Government, close examination shows that an intricate system of duties, tariffs, import fees, and quotas exist to protect their interest. Feeding the sugar lobby's collective sweet tooth will undoubtedly cause massive cavities in a person's household budget.

Today, I offer to my colleagues' attention a lead editorial from another one of our Nation's major newspapers, the Chicago Tribune, which finds the sugar provision to be "an inflationary assault on the consumer's pocketbook." I trust my colleagues will follow the advice of the Chicago Tribune and vote down the sugar provision.

[From the Chicago Tribune, July 9, 1981]

A SOUR DEAL ON SUGAR

In its eagerness to get its budget passed by the House, the White House made unfortunate concessions to conservative Democrats. Four Louisiana Democrats, for example, voted with the President only after he promised not to oppose higher price supports for sugar, which is important to that state's economy. Well, a commitment is a commitment, and this one was probably worth it to get the budget cut. But the President's commitment does not commit Congress, and the sugar bill is an inflationary assault on the consumer's pocketbook which Congress should vote down even without White House encouragement.

Domestic sugar growers and processors want the federal government to hold sugar prices up. This, they say, will prevent instability in the sugar market. Their definition of an unstable market is one in which sugar growers and processors aren't making enough money to keep them happy. When sugar prices were soaring last year, we didn't hear the industry lobbying Congress to stabilize them downward. Right now, however, prices are low—about 18 cents per pound, or less than half the level last year. All of a sudden instability is a problem.

The administration is quick to point out that raising the sugar support price would not directly inflate the federal budget. Under the farm bills approved by the House and Senate Agriculture Committees a farmer growing sugar would be able to get a loan from the Agriculture Department at 19.6 cents per pound. If the market price rises to a satisfactory level, he sells his crop and repays the loan; if not, he keeps the loan and lets the government keep the crop. As long as the market price stays well above the support price, farmers will prefer to sell, which means the government will lose no money.

Consumers, however, will lose. To hold the price up and thus minimize its own outlays, the government will probably have to use tariffs or quotas to keep U.S. producers from being undercut by imported sugar. Each penny added to the price of raw sugar costs consumers about $300 million.

Sugar growers say the market price would have to be at least 22 cents to induce farmers to sell on the market rather than let the government keep the sugar at 19.6 cents. That's about 4 cents above the current price, which translates into a $1.2 billion bill to consumers. Opponents of the legislation say the price would have to be at least 25 cents per pound, which would raise costs by more than $2 billion. Either way it's a bad deal. If the market price falls below what farmers need to make it profitable to sell, then consumers would lose less, but the government would have to cover a lot of defaulted loans.

No one doubts that the low prices are squeezing many sugar producers. But that is part of the normal cycle of sugar prices. Producers get rich when prices rise and suffer when they drop. In the long run, things even out for most producers. The growers and processors who can't make up their losses in the good years are those whose costs are too high, and who should be producing something else.

Sugar producers think the government should preserve their right to make money in good times and guarantee them a reasonable income in bad. But as the steel and shoe industries have shown, firms protected from competition soon lose the ability to serve their customers or to make money.●

IN HONOR OF JAYNE MUIR ZBOROWSKY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Ms. OAKAR. Mr. Speaker, it is with combined respect and pride that I am pleased to cosponsor a reception at the Women's City Club, Cleveland, Ohio, honoring Jayne Muir Zborowsky for her recent appointment as deputy director of economic development for Cuyahoga County.

Jayne Zborowsky has been a longtime personal friend to me and an equally loyal ally to the Greater Cleveland community. Her appointment as deputy director for economic development is but another example of her aptitude for success.

For the past two decades, Jayne Zborowsky has ably served the people in our community as a counselor in the Family Service Association, a child therapist for the Children's Aid Society, a city councilwoman, a professor and administrator at Cleveland State University, and currently serves as president of the Cuyahoga Women's Political Caucus.

Her untiring efforts in service-oriented occupations targeted at bettering the lot of hundreds of people deserves praise and applause. There is no question that her seasoned art of listening and advising, underlined with a sincere sense of caring, has provided the passport to progress for all those with whom she comes into contact.

Each of us honoring Jayne Muir Zborowsky here today has every confidence that she shall approach her new appointment with the same grace and integrity and vision that she has exercised in her past endeavors. Cuyahoga County is proud and fortunate to have such a woman, to have such a leader. We extend to her every good wish in her new venture and look toward her future and ours with great expectations.●

REAGAN TAX CUT PROMISES DISASTER

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. WEISS. Mr. Speaker, supply-side economics was once called voodoo economics by GEORGE BUSH, who now supports the concept as Vice President of the United States; yet the wisdom of his original position keeps returning to us.

As columnist Sylvia Porter points out, the Reagan tax cut is almost certain to increase—not reduce—the annual Federal budget deficits. To widen the deficit is to risk the sobering experience of Great Britain, where riots have followed high interest rates, high unemployment, and negative industrial growth. And though Ms. Porter does not mention it, I must observe that the President's plan to boost defense spending by $1.635 trillion over 5 years will also help to doom his goal of a balanced budget, controlled inflation, and a resurgent economy.

I do not share all of Ms. Porter's assumptions. Yet she has written an insightful column on our Nation's financial prospects that I commend to the attention of my colleagues.

[From the Daily News, July 15, 1981]

DEFICITS WILL DOOM SUPPLY-SIDE PLAN

(By Sylvia Porter)

Unless the United States under this administration and this Congress gains, and then fights relentlessly to retain, control over our horrendous federal budget deficits, President Reagan's noble experiment with supply-side economics will fail.

And its failure will drag us all down with it.

Every other part of this economic policy, which has dominated U.S. domestic policy-making since Reagan took office, may be put properly in place (quite an assumption of its own, but let's assume it).

This means our destructively steep tax rates on investment would be reduced to encourage business to take more risks on building new plants and equipment and thereby to spur our productivity. It means our taxes on earnings would be so revised that they would discourage devil-may-care spending by us, as individuals, on things and non-things of temporary value. It means the growth in our money supply would be curtailed to force cutbacks in extension of credit for wasteful projects.

Even nature would get on our side by turning out huge crops and thriving cattle herds to curb food price increases. And geopolitics would throw a couple of aces our way by producing oil surpluses.

None of it would be enough to give supply-side economics a chance to work and send us into another era of sustained prosperity—unless there also are great slashes in our huge annual federal budget deficits. The reductions must be spectacular enough to quash the expectations of inflation, which are self-fulfilling prophecies. The balanced budgets can be postponed.

This is the sobering lesson being shouted to us by our ally Britain, under Prime Minister Thatcher.

Thatcher took office in May 1979 with the goals of cutting British government spending, reducing high tax rates on investment and earnings, curbing the growth in the money supply, revitalizing productivity, and bringing down the rate of inflation. That's "us," isn't it?

At that time, the index of government spending (1975-76 equals 100) was 90.5; in 1980-81 (latest figure), it was 98.5. As a percent of gross domestic product (Britain's total output), government spending then was 38.5 percent, today 40 percent. Government borrowing then was 5.67 billion pounds; today it's 13.5 billion pounds. Government borrowing as a percent of gross domestic product has soared from 3.8 to 6 percent. "Progress?"

In this same span, the rate of rise in consumer prices has sped up from 10.5 percent a year to 12 percent. The unemployment rate soared from 5.4 percent in May 1979 to 10.4 percent this May. Annual growth in industrial production plunged from plus 3.5 percent in May 1979 to minus 9 percent in 1980-81!

About her only achievement has been slowing the rate of growth in the money supply—from an annual 13 percent when she took office to an annual 11.5 percent now.

No wonder the labor riots in Liverpool, the high level of interest on British bonds, the demoralized securities markets in general.

Thatcher has not gained control over British government spending and the British deficit. She has slowed the growth in Britain's money supply, but the entire burden of adjusting to this slower growth has fallen on the private sector.

This, says Dr. William C. Freund, chief economist of the New York Stock Exchange, has caused "an unnecessary and costly contraction in jobs and output. . . . (It) underscores the importance of accompanying large and extended tax cuts with assured reductions in federal spending and deficits."

Don't shrug off Mrs. Thatcher as a bungler, Mr. President! What she has tried we are trying, too. Retreat on your tax cuts, concentrate on slashing our budget deficits—or your economics will fail, Sir.

That's what our own markets are warning you, too.●

OTTO A. TENNANT

HON. NEAL SMITH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. SMITH of Iowa. Mr. Speaker, it is with great pleasure that I take this opportunity to congratulate Otto A. Tennant, P.E., of Des Moines, Iowa, who was recently elected president of the National Society of Professional Engineers. NSPE is a nationwide organization representing 80,000 indiviudal members involved in all aspects of engineering.

Before taking on this most prestigious position, Otto served as vice chairman of NSPE's north-central region and Professional Engineers in Industry. He also served as chairman of the NSPE Legislative and Government Affairs Committee.

Otto holds a B.S. degree in general engineering from Iowa State University and an M.A. in economics from Drake University.

Currently, Otto is manager of industrial marketing and technical services of Iowa Power & Light Co.

It is an honor for me to congratulate Otto on his recent election and to wish him the best of luck.●

CHIEF JUSTICE NOTES SERIOUS PRISON PROBLEM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. SIMON. Mr. Speaker, Chief Justice Warren Burger gave a commencement address at the George Washington University School of Law that talks about the state of our corrections system in the United States.

I commend the Chief Justice for speaking out candidly on a problem we are fundamentally ducking.

He calls for the establishment of a national academy to train corrections personnel just as we have had the police academy established by the FBI for police personnel.

Second, he calls for a sensible education/rehabilitation program.

The Chief Justice speaks good—and I am afraid not so common—sense in his discussion.

I urge my colleagues to read it.

REMARKS OF WARREN E. BURGER, CHIEF JUSTICE OF THE UNITED STATES, AT THE COMMENCEMENT EXERCISES FOR GEORGE WASHINGTON UNIVERSITY SCHOOL OF LAW

The ancient American custom of commencement speeches is an innocuous one that has done very little harm to graduates and may have the benefit of teaching them the virtue of patience. And parents, now released from paying the inflated rate of keeping a student in college, are bound to be in such a happy mood today that no speech could depress them!

I have no talent in framing cosmic remarks about the future which terminate with a "handing of the torch" to the survivors of three years of the rigors of a law school. My training as a lawyer is to try to identify problems and seek solutions. That will now be your role.

If there is a "torch" in the problem I discuss today, it is one that will singe your hands and burn your pocketbooks in the years ahead—probably for the rest of your lives. Not serious burns, but some.

Now let me tell you why it is important.

In my annual report to the American Bar Association recently, I discussed the appalling and increasing rate of crime and our apparent inability to cope with it. Since then, two particularly gross criminal acts have shocked the entire world, and underscored the point.

I reminded the American bar that governments were instituted by people primarily for their collective protection. Our own system of government, established 200 years ago—as it has envolved—affords more safeguards, more protections, and more benefits for a person accused of crime than any other system of justice in the world. The resolution of guilt is marked by characteristics which make our system unique in the world:

(A) It extends over a longer period of time than in any other judicial system;

(B) It allows for more appeals and more retrials than any other system in the world;

(C) After all appeals are fully exercised, it allows—in fact, it encourages—continued attacks on the conviction even though that conviction has become presumptively final;

(D) But in the final step—the correctional stage—we seem to lose interest and our performance must be judged a failure.

No one questions that a criminal conviction should always be open to correct a miscarriage of justice. But no other system in the world invites our kind of never-ending warfare with society, continuing long after criminal guilt has been established, beyond reasonable doubt, with all the safeguards of due process. Our system has moved thoughtful, sensitive observers who are dedicated to individual liberty to ask: "Is guilt irrelevant?"

On a number of occasions over the past 25 years since I have been a member of the judiciary, I have undertaken to discuss the subject of corrections, correctional practices, and correctional institutions.

That is my subject today. My concern on this subject has led me to visit many such institutions in the United States and even more in the countries of Europe.

Looking back, we see that over the past half century, we have indulged in a certain amount of self-deception with euphemisms, sometimes to sugarcoat the acid pills of reality, and sometimes to express our humane aspirations for those who break our laws: "Prisons" became "penitentiaries"—places of penitence—juvenile prisons became

"reform schools," and more recently, we have begun "halfway houses," without being quite sure halfway from what to what.

None of this is bad. I do not refer to these terms to disparage them or to question the humane impulses that led us to substitute them for the harsh term "prison." Yet it is now beginning to emerge that these terms may reveal our own confusion, and our own lack of direction to achieve the universally accepted objective to lend a helping hand to those who are confined for breaking the law. That we are confused, that we lack direction, is not surprising for we deal here with an intractable problem that has plagued the human race for thousands for years.

I cannot qualify as a professional or as an expert in the field of penology or corrections, but close observations of criminal justice and correctional practices for 25 years have left me with certain impressions. Some of those impressions have changed as reality overtook early hopes and aspirations which I had shared with penologists and judges.

I have long believed—and said—that when society places a person behind walls and bars, it has a moral obligation to take reasonable steps to try to render him or her better equipped to return to a useful life as a member of society. Note, I say "try," and I use the term moral obligation, not legal, not constitutional. The Constitution properly mandates due process; it mandates many protective guarantees, but it mandates nothing concerning the subject of punishments except that they be not "cruel and unusual." The laws aside, to make these people good citizens is also for our own proper self-interest—not just theirs.

Even as recently as 20 or 25 years ago, I shared the hopes of great penologists like James V. Bennett, Torsten Eriksson of Sweden, and Dr. George Sturup of Denmark, and many others that enlightened correctional programs would change and rehabilitate prisoners. With many others, I have had to recognize—to my sorrow—that, broadly speaking, prospects for rehabilitating convicted persons is a great deal less promising than the presumed experts had thought.

To do all the things that might have some chance of changing persons convicted of serious crimes will cost a great deal of money and 1981 is hardly the year in which to propose large public expenditures for new programs to change the physical plants and internal programs of penal institutions. So what I am about to propose our programs of relatively modest fiscal dimensions which I believe will help—but with no guaranteed results.

Estimates on the cost of criminal activity are necessarily speculative. How should we measure murder, rape, or assault? But those who have studied it give estimates as high as over $100 billion—billion—not million. This is reflected in a range of ways:

The direct loss suffered by the victims,

Increased insurance rates,

Increased security by home-owners and businesses,

Increased police departments,

Increased court facilities, and

Increased public assistance to victims and their families.

To approximate ideal solutions would cost a great deal of money and require a very long-term program. But we should not wait until we can do the whole job—the ideal—however that may be defined. We should begin where we can, at a level we can afford. Small steps are better than none.

Two steps could reasonably be taken within the range of affordable expenditures. I relate them chiefly because they are affordable in an economic sense—and affordable in terms of the psychology and the political and economic realities of 1981. These proposals are closely related, both bearing on training and education—training of the inmates and training of the keepers.

In 25 years on the bench, I have observed and dealt with more criminal cases, and cases dealing with conditions inside prisons, than I can estimate. I have visited many penal institutions and I assure you a prison is not a pleasant place; it is not even a comfortable place. It probably can never be made either comfortable or pleasant; but neither pleasure nor comfort is the primary object of the enterprise. At its best, it is barely tolerable and even at that level, a penal system is enormously costly—and it is paid for partly by the crime victims on the outside.

In all too many State penal institutions, the personnel—the attendants and guards—are poorly trained and some are not trained at all for the difficult and sensitive role they should perform. There is an astonishing rate of turnover of guards and correctional personnel. One State, widely regarded as having an enlightened correctional system, has a 40-percent annual turnover. One State has 54 percent, one 60 percent, another 65 percent, and another 75-percent turnover.

How can any human enterprise be effective with that rate of turnover of key personnel? The turnover reflects, in part, the appallingly low salaries paid. And I venture to say that there is a correlation between the low salary, the rapid turnover and the amount of training.

Long ago, I observed the marked contrast between the security personnel in the prisons of northern European countries and the prisons in our country. In northern Europe, guards are carefully screened and highly trained; that is as it should be for they are dealing with abnormal people in a very demanding setting. Without special training, prison personnel can become part of the problem rather than part of the solution.

An important and lasting consequence of lack of trained personnel is the impact on the inmate—the individual inmate—who continues his hostility toward society, toward fellow inmates and toward prison personnel. The "keepers" come to be the immediate symbols of the society that keep them confined. Unfortunately, judicial holdings have not always discouraged this warfare. More often than not, inmates go back into society worse for their confinement. Our dreams and hopes concerning rehabilitation have not been realized.

I begin with step one.

At present, there is no single, central facility for the training of prison and correctional personnel, particularly those at the lower and middle levels who work with prisoners on a one-to-one basis. I discussed this subject in 1971 at the Williamsburg Conference on Corrections and this led to the creation of the National Institute of Corrections which has conducted regional seminars to train middle- and upper-echelon prison personnel since 1972.

The operation of a correctional or penal institution is no place for amateurs. It calls for substantial professional training and the highest order of sensitivity, beginning at the guard level. We need look only to the volume of complaints, the disorders, and riots in these institutions over the past decade to find abundant evidence of this. If the only problem were the control of disorders it might be manageable, even if only by use of raw force, but force is not the solution. In a limited sense, these institutions can be compared with the production lines of Detroit: Recidivism is the penologists' word for "product recall." When prisons turn out "products" with a high rate of recall, we have disaster. And our current rate of recall—recidivist offenders is a disaster. And you will inherit that disaster.

Under the leadership of Norman Carlson, of the Federal Bureau of Prisons, and Allen Breed, Director of the National Institute of Corrections, much has been done to improve conditions. But more is needed.

The best of prison administrators cannot change some of the negative conditions unless those in the high-turnover, lower echelons are carefully screened, well-trained, and reasonably paid. Psychological testing of applicants is imperative to screen out people with latent tendencies of hostility. The existing statutory prohibitions on psychological screening must be reexamined. Today, those lower positions in most of the States are generally not paid adequately enough to get minimally qualified people.

One of the great, and perhaps most lasting, contributions of the Federal Bureau of Investigation was the founding of the National Police Academy by J. Edgar Hoover. For over 45 years, the FBI has given advanced training to thousands of State and local police personnel. That training has vastly improved the quality of law enforcement in America, both in terms of efficiency and the kind of law enforcement a decent society should achieve. A sheriff, constable, or policeman on the street cannot avoid errors under the fourth amendment, for example, if he or she has not been trained to appreciate the sensitive and elusive nuances of that rule of law. The cost of creating and maintaining the FBI Academy is but a tiny fraction of the benefits it has conferred.

The time is ripe to extend the fine work begun in 1972 by the National Institute of Corrections, and we should proceed at once to create a National Academy of Corrections to train personnel much as the FBI has trained State and local police. This is especially needed for the States which have no real training resources available. The academy should also provide technical assistance to State and local institutions on a continuing basis.

The cost of establishing such an institution, particularly if it could be made as an adjunct at the FBI Academy at Quantico is not great. The physical facilities of classrooms and dormitories could be used interchangeably by both the FBI police training program and the correctional academy. I am reliably informed that the faculty of such an institution could be made up of not more than a dozen permanent staff with the balance of the training conducted by an ad hoc faculty of specialists drawn from the State and Federal systems. Alternatively, the United States could acquire the facilities of a small, centrally located college which is closing its operations. Such a facility could readily be adapted to this purpose.

Now, step two.

The second step for which I would urge consideration is one that would need to be phased over a longer period. We should introduce or expand two kinds of educational programs:

The first would be to make certain that every inmate who cannot read, write, spell, and do simple arithmetic would be given that training—not as an optional matter but as a mandatory requirement. The number of young, functional illiterates in our institutions is appalling. Without these basic skills, what chance does any person have of securing a gainful occupation when that person is released and begins the search for employment—with the built-in handicap of a criminal conviction? To those who view the mandatory aspect as harsh—and some will—I suggest that the total work and study hours of inmates be no greater than we demand of the 15,000 young Americans who are cadets at our service academies—or law students!

Focusing on the longer term prisoner, the second phase of this educational program would require a large expansion of vocational training in the skilled and semiskilled crafts. So that a prisoner would not leave the institution without some qualifications for employment in the construction, manufacturing or service industries, these vocational training programs should also be mandatory. An inmate who declines to cooperate must be motivated to do so by incentives, including shortening the sentence. Just as good behavior credit is now allowed to reduce sentences, we should allow credit on sentences for those who cooperate. We should help them to learn their way out of prison. Rewards and penalties accompany the lives of the cadets I spoke of—and of law students. Why should this not apply to prisoners?

A few days ago I visited with W. Clement Stone, a fine American business leader, who has devoted much of his time and money to improve the lot of prison inmates. He has written and lectured on the crucial role of motivation in the lives of people. Prisoners are people and we must try to motivate them, try to train them, try to instill the self-esteem that is essential to any kind of normal life. We may succeed with only a small percentage, but we must try.

One of the institutions which impressed me in my visits to correctional facilities over the last 25 years was a juvenile prison in Europe. It had on its walls in the main entry lobby four statements which added up to a carrot and a stick. Here is the first thing the new inmate sees when he arrives to begin his term:

First: "You are here because you need help";

Second: "We are here to help you";

Third: "We cannot help you unless you cooperate";

Fourth: "If you don't cooperate, we will make you."

Someone may say that this is a harsh proposition to put to the people who are unfortunate enough to be in prison. But I suggest to you that among the factors which would explain the presence of that person at that place at that time, is that he or she has not been subject to the discipline calling for adherence to certain standards of work and learning. Motivation is absent, but even small successes can spark motivation, and that kind of carrot and stick program provides motivation.

We know that people who have neither learned to learn nor learned to work have little basis for the self-esteem or the esteem for others that is so essential to the human existence.

There is nothing novel in what I am proposing. There are skilled people who have thought about these problems for a long time who stand ready, willing, and able to implement them if only the Government will act in the areas in which only a National Government can act efficiently.

These are two very small steps in the whole scheme of this melancholy picture of crime in America. They are not necessarily logical starting points, but they are a beginning. The way to get started on any solution is to face the problem and take one or two steps—however small.

Even in this day of necessary budget austerity, I hope that the President and the Congress, in whose hands such matters must rest, will be willing to consider these two modest, but important steps. No one can guarantee results, but if we accept the moral proposition that we are our brothers' keepers and that there is a divine spark in every human being—hard as that is to believe at times—we must try.

For those who are reluctant to finance moral propositions, the hard economics of the cost of crime may offer greater inducement. For yet others, these programs offer the combined appeal of Christian charity and New England frugality.

The "Torch" is now yours. I hope it singes you enough while you earn large fees from affluent clients, to assure your support for these steps, because the consequences of the present system will fall on you and on your children.●

WATT MUST GO

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. DELLUMS. Mr. Speaker, rather than serving as steward of the Nation's natural resources, the new Secretary of the Interior seems to have embarked on a campaign to infuriate my constituents. A recent editorial in the Oakland Tribune, a major bay area newspaper of reliably moderate inclinations, had this to say about James Watt's activities:

* * * therein lies the basic problem with Watt. He seems to be picking issues on the basis of the outrage they are likely to provoke from environmental groups rather than on their merits.

No government decision should be above review. But there is a difference between orderly review of policies and the sort of crash program Watt has started to undo years of effort aimed at protecting the environment.

The full text of this editorial follows for the entertainment and edification of my colleagues:

[From the Oakland Tribune, Apr. 21, 1981]

WATT: HARDLY IN MAINSTREAM

Last Wednesday the National Park Service announced that it will consider letting snowmobiles roar through the now quiet winter landscapes of Yosemite, Lassen and Kings Canyon National Parks.

Last Thursday Interior Secretary James G. Watt said he will take a second look at the California Desert Plan which protects 2 million acres of wilderness.

And on Thursday the Sierra Club launched a campaign to remove Watt from the office, saying he is "at war" with the fundamental idea of environmental protection.

It is an understandable conclusion.

In the three months he has been in office Watt has also abolished the Interior Department office which acquires land for national parks, authorized a study of whether some national parks should be turned over to local areas, proposed canceling of marine sanctuaries, moved to reconsider measures which protect Northern California's wild rivers, solicited proposals from western governors for federally subsidized water projects and reopened debate on the ban on oil and gas drilling off the Northern California coast.

Even some officials of major oil companies are privately critical of Watt's stance on offshore drilling, Sara Terry of the Christian Science Monitor reported last Friday.

According to her story, some oil company officials say that if Watt wanted a showdown with environmentalists, he should have picked an area expected to have larger reserves of oil.

And therein lies the basic problem with Watt. He seems to be picking issues on the basis of the outrage they are likely to provoke from environmental groups rather than on their merits.

In virtually every case the decisions he has reversed or agreed to reconsider were made only after careful study. Take the two possible policy changes announced last week.

The California Desert Plan was adopted after four years of study and the receipt of 40,000 comments. The debate over whether to allow snowmobiles is not merely a question of personal preference. If snowmobiles are allowed to travel over fragile meadows, their weight can compress the snowpack, making it so much colder that it harms fragile plants.

In a statement released in Washington in response to the Sierra Club petition drive, Watt said he "strongly believes he is in the mainstream of the environmental movement." We hope the recall petitions will put him on notice that he is not.

No government decision should be above review. But there is a difference between orderly review of policies and the sort of crash program Watt has started to undo years of effort aimed at protecting the environment.●

COAL SLURRY LEGISLATION

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. HOWARD. Mr. Speaker, today I cosponsored legislation that, if enacted, would facilitate the construction of coal slurry pipelines. The bill is essentially in a form proposed by the slurry transport industry, and it will act as a starting point for hearings on this important issue. In many aspects, the bill differs from previous legislation. These differences and other points contained in the legislation will be examined closely during the course of the hearings. After committee hearings and after review of the testimony received at those hearings, the Committee on Public Works and Transportation will reach a final position on the type of legislative solution that we

believe will best facilitate the construction of coal slurry pipelines.

Coal is an important natural resource, and the transportation of coal both for domestic and foreign use needs to be reviewed in order to ascertain whether or not the Nation's transportation facilities are adequate to move the coal to domestic and foreign markets. Quite simply, this bill is a transportation bill, nothing less and nothing more—one that will facilitate the construction of coal pipelines across Federal and non-Federal lands. I must add, however, that the committee has conducted hearings on port development and is preparing legislation aimed at developing ports so that the Nation can better transport its goods in foreign markets. The ability of the ports to handle coal traffic is one of the major points that was discussed at those hearings. Thus, the committee has the opportunity to consider the overall transportation policies that exist in the coal transportation marketplace and to take major steps to improve and to increase the ability of this country to move its coal in a better manner.●

JAPAN TAKES LONG-RANGE VIEW ON SPACE: INCREASES EFFORTS TO COMPETE WITH THE UNITED STATES

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. FLIPPO. Mr. Speaker, the Wall Street Journal has published an article on the Japanese space program which I believe all Members should read. The article makes two points which I feel are particularly salient. First, Japan has decided space is important to their future and they are getting organized to give it commensurate attention. They are aiming at the world market, and expect it will generate business worth $4.5 billion to Japan in the mid-1990's. Japanese Government and industry are beginning to work together to make this expectation a reality. Second, the Japanese are contemplating building a space shuttle. That is an eerie thing to learn—it sounds just like Datsun/Honda/Toyota all over again. We do it first and big and make all the mistakes. They do it second and small and learn from our mistakes and pretty soon we are importing from them.

I have always heard that imitation is the sincerest form of flattery. I think we had better start imitating the Japanese and get our space program organized. The Journal quotes a spokesman of the Japanese space agency as saying "If we decide to save money now, our descendants may have a grudge against us." We should flatter the Japanese and incorporate such thinking into our space planning. To do otherwise is extremely shortsighted.

Mr. Speaker, I am including the Wall Street Journal article for the benefit of other Members, and commend it to their attention.

[From the Wall Street Journal, July 20, 1981]

JAPAN SETS MINI-ENTRY IN SPACE RACE

(By Masayoshi Kanabayashi)

TOKYO.—Now that the U.S. has successfully flown its space shuttle, it's just a matter of time before the Japanese launch their own, smaller "Columbia" and begin exporting it to the U.S.

So went a joke that made the rounds here recently. As it happens, though, the joke contains at least a kernel of truth. It's still a sketch on a drawing board, and it isn't likely to take off until the 1990s, but Japan is indeed mulling a possible "mini" space shuttle.

"Just as we need a bus, we also need a mini-car," says a spokesman for Japan's National Space Development Agency, or NASDA, a government-sponsored corporation charged with putting Japan's budding space program into effect.

The mini-shuttle, which hasn't been officially authorized by the government yet, is just one part of that program. Since 1970, Japan has put 22 satellites into orbit, but three of them had to be launched for Japan by the U.S. National Aeronautics and Space Administration, or NASA, because Japan lacks rockets with sufficient power for heavy satellites.

So one thrust of Japan's space program is building bigger rockets. It's developing one capable of carrying a 1,100 pound satellite into orbit and last February it launched one that can carry 770 pounds.

Another project is the mini-shuttle. Although smaller than Columbia, it would have most of the U.S. shuttle's basic functions, including jet engines that would enable it to land in Japan for reuse. On the blueprints, the mini-shuttle measures 46 feet long and 24.5 feet wide, weighs 10 tons and can carry a crew of four plus 1,100 pounds of cargo.

Why does Japan need a space program in the first place? The answer seems to be part national pride, part a calculation that the technology developed by a space program will be critical to Japan's economic future. There is a feeling here that Japan, with its almost total lack of natural resources, has staked its future on high technology to such an extent that it can't afford to fall behind in critical technological areas. What supports the feeling is the realization that in downgrading its military as it has, Japan already lags in weapons technology.

"The present outer space is just like a virgin land in the sailing ship era," declares a pamphlet issued by NASDA. "If other countries get a patent license on new materials made in space or obtain medicine which is good enough to meet the world demand in small quantity, the impact on Japan will be great."

Moved by sentiments like those, Japan's Ministry of International Trade and Industry, or MITI, has begun taking steps to transform Japan's space program from a loosely organized network of research projects into an industry. Its first step, taken last fall, was to set up an advisory body to study the prospects for such an industry.

And the advisory body recently concluded: Space will be a $4.5 billion industry for Japanese manufacturers by the mid-1990s, comparable in size to today's radio and television manufacturing industry.

Moreover, the advisory body recommended that the Japanese space industry "aim at the world market," and urged that the government "provide active assistance." Regarding satellites specifically, the advisory body said that for the time being, "one way to win orders" would be to develop products jointly with foreign firms. "But in the long term," the advisory body said, "it is desirable for a group of Japanese companies to obtain the ability to enter the world market solely on their own."

A SMALL INDUSTRY

If the Japanese space industry accomplishes all that, it will have come a long way indeed. Today, although some 70 Japanese companies do space work, sales are less than $480 million—about the size of Japan's underwear industry. Exports constitute about 20% of the industry's current sales, but most of that is ground-station equipment, such as antenna systems. The rest is sales to the Japanese government for use in broadcasting, weather forecasting, resource surveying and other programs.

Of the 70 companies, six account for two-thirds of the annual business and are likely to be among the mainstays of the industry's future. They're Mitsubishi Heavy Industries Ltd., Nippon Electric Co., Ishikawajima-Harima Heavy Industries Ltd., Nissan Motor Co., Mitsubishi Electric Corp. and Toshiba Corp.

Company officials say none of the Japanese concerns is currently making money on its space business. They say the main priority is to increase technological prowess by taking part in the space program.

Launching rockets, for example, isn't a commercial business today, but when it does become one, says Yoshihide Hiraiwa, senior manager of Mitsubishi Electric, Japan will bring a great strength to the international competition—its ability to make high-quality products. "If Japan had manufactured the Columbia, the tiles would never have fallen off." Mr. Hiraiwa says.

In the future, Mr. Hiraiwa believes, the U.S. will continue to lead the free world in developing new space technology. But a good deal of the manufacturing, he hopes, will take place in Japan.

HOLES IN THE NET

Everyone, to be sure, isn't as optimistic about the Japanese space industry's future as the advisory body and Mr. Hiraiwa. Many company officials insist that it will be more difficult for Japan to excel in an industry that, unlike auto and television manufacture, isn't geared toward mass-production. Only two or three rockets are launched in Japan each year.

But other space industry proponents dismiss such pessimism. Someday, space could be a mass-production industry, they maintain. And although Japan is currently five to ten years behind in the space race, a NASDA official notes that "Japan has come through holes in the net of American technology in the past (in such sectors as automobiles and electronics), so there could be similar holes in the future as well."

But the way some Japanese talk, it seems likely that Japan will pursue its space program if only for the technological spin-off. "It's a high added-value industry," notes the advisory body, but more importantly it is necessary "for the realization of a desirable

industrial structure in Japan . . . As unilateral introduction of technologies from foreign countries is getting more difficult, it is necessary to strengthen Japan's own bargaining power through accumulation of necessary technological know-how."

Or, as the NASDA spokesman puts it, "if we decide to save money now, our descendants may have a grudge against us."●

A TRIBUTE TO ROSE FITZGERALD KENNEDY ON HER 91ST BIRTHDAY

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. GUARINI. Mr. Speaker, today is the 91st birthday of Rose Fitzgerald Kennedy, truly one of America's grand ladies. To my knowledge she is the only American woman who has raised three of her sons to become U.S. Senators and has seen one of them become the President of our country.

Born July 22, 1890, as the oldest of the six children of John Francis Fitzgerald and his wife, Josephine Mary, Rose Kennedy indeed has shown the world that home is where character is built and where sacrifices are made to assure the happiness of others and where love is deeply lavished.

As the daughter of a father who served as the mayor of Boston in 1906 and as a Member of the U.S. House of Representatives, Rose Fitzgerald developed her charismatic sense of community and political life while cherishing her devotion to home and church. She was selected as the prettiest girl in Boston when she graduated with honors from high school at the age of 15. Her love for music was nurtured by her attendance at the New England Conservatory and her deep sense of commitment to her Nation and fellow man blossomed while she attended the Convent of the Sacred Heart in Boston and Manhattanville College of the Sacred Heart in Purchase, N.Y.

Her fondness for the French and German languages and the opera grew while she attended Blumenthal Academy, a German convent in the Netherlands.

Upon her return she dutifully performed as a cosmopolitan hostess for the mayor of Boston, a job she found "boring." She served as a volunteer in many areas teaching catechism and working in the library in the North End of Boston. She developed an organization aimed at the study of national and international affairs.

On October 7, 1914, she married Joseph Patrick Kennedy who became Ambassador to Great Britain. While absorbed by her duties as a wife and mother she never lost interest in community life.

They were the parents of nine children, including Joseph, Jr., who was killed in action serving with the U.S. forces in Great Britain in 1944; John Fitzgerald Kennedy, who became a U.S. Senator and was assassinated while President of the United States in 1963; Rosemary, Kathleen, Eunice, Patricia, Robert F. Kennedy, who also served as a U.S. Senator and was killed by an assassin's bullet in 1968; Jean, and Edward M. Kennedy, who now serves in the U.S. Senate.

The grief over the loss of three sons was compounded by the lengthy illness and death of her husband in 1969. Through it all, Rose Kennedy has held her head high, proclaiming "God never sends us a cross too heavy for us to bear."

There is no question in the minds of persons throughout the world that her religious faith has helped her greatly in her refusal to be conquered by her grief. Her leadership is proof positive that the Nation is proudest and noblest which has the greatest number of outstanding women, wives and mothers.

In recognition for her work in the Roman Catholic Church Rose Kennedy was made a papal countess by Pope Pius XII.

In 1970 she traveled to Ethiopia where she dedicated a library in memory of the late John F. Kennedy at Haile Selassie University.

Rose Kennedy has been described as "91 years young" by her son Senator TED KENNEDY and is reported in excellent health, attending Mass every day, enjoying golf and long walks at Hyannis port beach and swimming whenever possible in the chilly Atlantic Ocean. In her more recent years Rose F. Kennedy has worked raising funds for those who are mentally retarded, expressing "I have benefited a good many people in this fight."

I salute Rose F. Kennedy as a symbol of hope and courage. She has shown that hope indeed awakens courage and that those who can implant courage in the human soul are among the world's best physicians.

I am certain that my colleagues will want to join with me today in this tribute to Rose F. Kennedy who has given the world the gift of consideration, the gift of gratitude, the gift of courage, and the gift of inspiration.●

JOHNSTON SHOWS WHAT THE REAGAN ECONOMIC RECOVERY PROGRAM IS ALL ABOUT

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. LENT. Mr. Speaker, I rise to call to the attention of my colleagues an event which took place this past week in the Fourth Congressional District of New York, which I have the honor to represent. It was an event which demonstrated an essential truth about our great country and its future if President Reagan's economic recovery program is fully implemented.

On July 17, a Nassau County businessman, Mr. Robert Johnston broke ground for a new 80,000-square-foot refrigerated warehouse for his Harbor Distributing Corp. in Hicksville, N.Y. He is investing some $3,500,000 in this new warehouse, which will nearly double the company's storage capacity.

Mr. Speaker, $3,500,000 is a huge sum for a small businessman to invest at any time. In the light of current economic conditions, it requires great courage to make such a substantial investment. It also requires firm confidence in future economic growth. And that is why, Mr. Speaker, I feel my colleagues should be aware of this event. For Bob Johnston's investment is, in fact, a microcosm of what the Reagan economic recovery program is all about. And it demonstrates how the Reagan economic recovery program will work to revitalize our economy.

As the primary wholesaler for Anheuser-Busch products in Nassau County, N.Y., and nearby areas, the Harbor Distributing Corp. provides employment for 125 persons. The new storage facility is being built because sales are expected to increase. If sales increase by as much as $4,000,000 during the next 2 years, Bob tells me that would mean 25 additional jobs with his company. And, of course, the increased sales would also mean many thousands of dollars in additional tax revenues flowing into local, State, and Federal governments.

Mr. Speaker, imagine small businessmen all over the country making similar investments in new or expanded business facilities. Think of the thousands of jobs that would be created by such activity. Think of the millions of dollars in additional tax revenues pouring in to local, State, and Federal governments from these business activities.

Mr. Speaker, that is precisely what President Reagan's economic recovery program is designed to accomplish. The President's plan curbs inflation by limiting Federal spending; it encourages investment in new business activity through a 25-percent reduction in individual income tax rates and through increased business depreciation allowances. The President's program, by helping businesses to modernize and expand, will revitalize the American economy. And every one of us benefits from a prosperous, growing economy.

So, Mr. Speaker, Bob Johnston's decision to build a new warehouse in Nassau County provides us with a demonstration of the benefits our

Nation can expect from President Reagan's economic recovery program. The spending ceilings Congress voted on the fiscal year 1982 budget have provided the foundation for the program. Now, the Congress must complete the task by approving the President's simple, but effective, tax reduction program. I call upon my colleagues to support the President's tax reduction plan, and thereby help Bob Johnston and the thousands upon thousands of businessmen like him across our Nation. Give them the power to revitalize our economy.

I congratulate Bob for his courage and enterprise in forging ahead with this new project, and I know my colleagues will join me in wishing him every success.●

CLOSE THE LOG EXPORT LOOPHOLE

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. BONKER. Mr. Speaker, Congress has restricted the export of Federal timber ever since the national forest system was created more than 80 years ago.

Unfortunately, a loophole in this policy allows significant volumes of public logs to enter the log export trade in indirect fashion. This practice threatens the survival of many small- and medium-sized mills. It robs American workers of jobs that would otherwise be created to process that timber domestically, and it raises the cost of wood and wood products within the United States.

The House today can close that loophole by adopting Congressman WEAVER'S amendment to H.R. 4035, the fiscal year 1982 Interior appropriations bill. I strongly support this amendment and urge its adoption.

The loophole exists because, under current regulations, private timber companies can export their own logs and then buy Federal timber from third parties for processing in their mills. The practice is known as third-party substitution and continues despite clear congressional intent to the contrary.

An 1897 statute first prescribed procedures for selling Federal timber. Such sales were subject to a proviso that timber sold from a national forest reservation shall "be used in the State or territory in which such timber reservation may be situated but not for export therefrom."

In 1926, that restriction was relaxed to permit Federal timber exports upon determination that the timber was not needed locally. By the 1960's, this proved to be a mistake. The Japanese substantially increased their purchases of logs from public forests. The demand drove up prices; a shortage of Federal timber developed in the Pacific Northwest. Many local processing mills were forced to curtail or to shut down operations.

In April 1968, the Department of Agriculture placed a 1-year ceiling on export sales from Federal forests in western Washington and Oregon. Senator Wayne Morse also introduced legislation to extend the ceiling to slightly higher levels for 5 years throughout the Western States. The legislation, which was enacted, authorized "rules and regulations to carry out its purposes, including the prevention of substitution of timber restricted from export by this section for exported non-Federal timber."

During floor debate, Senator Morse said that,

> Public confidence in the use of Federal timber must be maintained by taking all possible steps to assure that substitution does not occur. That is why the appropriate Secretaries are specifically authorized to prevent it. . . .

Congress extended the log export ceiling in 1970. It expired in 1973, but Congress then adopted appropriations language designed to cause the Agriculture and Interior Departments to take more vigorous action to prevent national forest log exports. That language remains in effect today.

The language states that no appropriations shall be made for use for any sale of unprocessed timber from Federal lands in the West which will be "exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchasers."

The Weaver amendment would strike the last three words. There are those who believe that the inclusion of the words "by the purchasers" was intended by Congress to give industry a loophole. There is not one shred of evidence to support that assertion.

Congressman Dellenbach said on the floor in 1973 that the committee expected the Secretaries to:

> Publish regulations to implement this legislation. The power to do so has been on the books for some time. The Secretaries have failed to use that power, and I am delighted to see that the committee is speaking strongly and that the Secretaries of Agriculture and Interior are warned that this is something they are to do.

And the report accompanying the 1974 appropriations act said:

> In the future sales (of unprocessed timber), the committee expects the Secretaries to take steps to include provisions in timber sales contracts that the timber involved will not be exported, or used by the purchaser as a substitute for timber he exports, or sells for export. The committee expects the Secretaries to publish regulations to implement this limitation and the act of 1926 . . . so as to control substitution of Federal timber for private timber sold for export.

The Forest Service thereafter adopted regulations restricting the export of unprocessed Federal timber or its use as a substitute for timber from private lands exported by the purchaser. These regulations, however, deal only with direct substitution by the Federal timber purchaser. They do not restrict the replacement of exported private timber with unprocessed Federal timber purchased from a third party. The Weaver amendment would close the third-party loophole.

An analyst for the Northwest Independent Forest Manufacturers, which represents many mills whose future depends upon a continuing supply of Federal timber for domestic processing, calculates that substitution is a 200 million board-foot a year problem in western Washington State and along the Columbia River.

The high volume of log exports and the dwindling supply of logs available to small independent mills continues to tilt the balance in favor of the larger companies. Closing the substitution loophole will simply permit all companies—large and small—to compete effectively.

In log export areas, there are two very distinct log markets—export and domestic. Export log prices are higher than domestic log prices. Exporters of private logs can take a portion of their profits from log exports and pay more for logs purchased from Federal lands than those sawmills that are completely dependent on Federal timber.

The effect of substitution on small, timber-dependent communities is obvious. When Federal logs are drawn away, local employment dries up. The intrusion of log exporters into the Federal timber market also tends to increase prices that the homebuilding and construction industries must pay for wood products.

Under current law, companies owning private timber are free to do what they wish with those logs. The Weaver amendment would not change that situation, but it would reassert congressional intent that unprocessed Federal timber should not be funneled indirectly into the log export trade.●

THE MIDDLE EAST CONFLICT

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Ms. OAKAR. Mr. Speaker, today I am introducing a resolution which supports the call of the President for a cease-fire on the part of all parties involved in the Middle East conflict currently.

The country of Lebanon, which has always been our ally, continues to be exploited. Hundreds of people were recently killed and wounded by the recent Israeli air strike on Beirut. Most of these people were civilians, including women and children. In addition, countless bridges and buildings were destroyed, resulting in millions of dollars of devastation.

Israelis have in return experienced civilian loss by Palestinian retaliation. This violence must end. It is only

through dialog and a cease-fire that peace can be achieved. At this time, in nonpartisan resolution, we should support the President in calling for a cease-fire. The following is the text of the resolution.

H. RES. 192

Resolution expressing the sense of the House of Representatives that the President continue to call for a cease fire along the Lebanese-Israeli border and to provide strong leadership to help insure peace and stability in Lebanon and Israel and the entire Middle East region

Whereas, the Middle East is once again the object of intense and fierce fighting;

Whereas, hundreds of victims have been killed in recent attacks in the region and hundreds of civilians wounded;

Whereas, the diplomatic mission of Philip C. Habib is working under difficult circumstances to prevent another war from occurring in the Middle East;

Resolved, that it is the sense of the House of Representatives to urge the President of the United States to continue to press for a cease fire along the Lebanese-Israeli border and to provide strong leadership to help insure peace and stability in the countries of Lebanon and Israel and in the entire Middle East region.●

AMERICA'S FUTURE IS IN SPACE

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. GINGRICH. Mr. Speaker, today I want to talk about two different ways of viewing the future.

One way says we face a future of diminishing resources and increasing chaos as we fight over those diminishing resources. Those who hold this view think that mankind has reached the limit not only of physical resources but of mental and spiritual resources as well.

The other view is of a future filled not with despair but with hope; not with problems but with opportunities; not with diminishing resources but with increasing knowledge to develop new resources. This is the historical view, for as we look at the history of mankind on this planet, we see a series of critical periods when one group of people wanted to give up because they couldn't see beyond the problems in the context of the past, and another group kept its minds open and found new ways around old problems and made the breakthroughs that brought us to where we are today, both technologically and sociologically.

We're at one of those critical periods now. The people who believe in the future are calmly and methodically going about working on the solutions while the doomsayers prepare for the end.

The bill I'm introducing today provides the framework for the technological developments that will overcome the hurdles mankind faces into the next century.

Research and development of new technology takes place only in pursuit of a specific goal. The goal which we are coming closer and closer to reaching is the exploration and development of resources in space.

Last April, two U.S. astronauts and their space vehicle were guided out of orbit and entered Earth's atmosphere at an incredible speed. Crossing whole countries in a matter of minutes, with absolutely no source of power in case of a mistake, they cruised to a perfect landing on a tiny piece of real estate.

The success of the maiden voyage of the Space Shuttle *Columbia* caused Americans to swell up with pride and brought a renewed patriotism. But more importantly, it reminded us that the only limits to the future are in the human mind and its ability to bridge the gap between belief and unbelief.

That is why I am introducing the National Space and Aeronautics Policy Act of 1981. The legislation sets clear goals for America in space. And so that freedom follows wherever we go, it also provides for the government of Americans in space.

To do this, I have reached into history and taken a few paragraphs from Thomas Jefferson's "Northwest Ordinance of 1784." Jefferson provided for Americans as they explored the Northwest Territory, "* * * for their constitutional protection, the establishment of territorial governments and their eventual statehood."

I would like to borrow a few more words from another famous U.S. President, John F. Kennedy. He said:

Now is the time to take longer strides * * * time for a great new American enterprise * * * time for this Nation to take a clearly leading role in space achievement which, in many ways, holds the key to our future on Earth.

Jefferson and Kennedy both knew that advancing into a new region isn't foreign to Americans. It is a natural part of our history.

There's another reason to move ahead with a national policy for space exploration and development. The rest of the world understands that space is the next frontier, and they are preparing.

Both our allies and our adversaries are setting clear, long-range goals for their own national space programs.

The United Nations has scheduled a conference for July 1982, in Vienna to discuss how the resources and benefits of space shall be allocated. The United States must address these international issues of space now, or we will be caught off guard.

If America does not compete in space, we abandon world leadership to those who do.●

TRANSPORTATION NEEDS

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. EDGAR. Mr. Speaker, the Surface Transportation Subcommittee of the House Committee on Public Works heard some important testimony today on transportation needs by Thomas D. Larson, secretary of the Pennsylvania Department of Transportation. I share his statement for consideration by the entire Congress. As we begin to plan for the future and prepare for greater local responsibility and creativity, we need to act with care. Secretary Larson's statement follows:

STATEMENT OF THOMAS D. LARSON, SECRETARY OF TRANSPORTATION, COMMONWEALTH OF PENNSYLVANIA

I. INTRODUCTION

Thank you, Mr. Chairman. My name is Thomas D. Larson. I am Secretary of Transportation for the Commonwealth of Pennsylvania. I am pleased to have this opportunity to testify before you today on transportation needs.

I have structured my remarks to first address highways, specifically capital needs for the Interstate system and bridges. I would then like to turn to mass transit, focusing mainly on non-capital requirements.

Today, each of the fifty states has a well-developed transportation system, made possible through a massive investment of public funds. But the decade of the 80's, already marked by new demographic realities and severely constrained budgets, causes us to reassess where we are and where we are going. In particular, the 80's must be the decade in which we face up to the enormous task of providing proper maintenance on our now crumbling transportation system.

II. COMPLETION OF THE INTERSTATE SYSTEM

We all agree that the time has come to complete the Interstate system. But, what is completion? Under the present definition, completion will cost $54 billion, and at that level is simply unattainable by 1990—if ever! Consequently, several proposals have been developed which redefine the cost to complete. For example, Pennsylvania has worked within the American Association of State Highway and Transportation Officials (AASHTO) and the National Governors' Association (NGA) to scale down the cost to complete. The NGA/AASHTO position redefines the cost to complete at approximately $42 billion. Both houses of Congress, as you are aware, and the Administration have also redefined completion. Costs range from $37 billion (H.R. 3210) to $31.5 billion (Administration S. 841) to $26 billion (S. 1024).

If completion were limited to the cost of closing remaining gaps of national significance, the cost to complete comes down to $12 billion—a readily achievable objective by 1990. In fact, this approach enables completion by 1990 at an annual program level of $1.5 billion.

The problems of apportionment and lapse of funds could be eliminated by moving directly to a national schedule for completion. The states, in conjunction with the Federal Highway Administration, would jointly de-

velop a schedule for completing nationally significant gaps by 1990. Congress would review and approve this multi-year obligation plan biennially in much the same way that the Interstate Cost Estimate is now reviewed and approved by Congress. The situation where, in the last three years, the Northeastern states have "donated" over $1.7 billion to an Interstate Discretionary Fund could be avoided through this approach. The growing need to restore, preserve and enhance the existing Interstate System—now recognized as perhaps the most urgent national highway problem—could be financed through a greatly expanded 4R program.

III. RESTORATION, PRESERVATION AND ENHANCEMENT

The NGA/AASHTO position recognizes that preservation of the existing Interstate system is equally important to completing it. The national consensus is to address Interstate preservation through an Interstate 4R (resurfacing, restoration, rehabilitation, and reconstruction) program. Implicit in the proposed 4R program is the concept of enhancement. That is, the amenities now included in the cost to complete would be eligible under the new 4R program.

The keys to a successful 4R program are adequate funding and a fair and equitable apportionment formula which still addresses needs. By redefining cost to complete so that it can be funded at $1.5 billion per year, Interstate 4R could be funded as high as $3.5 billion per year.

Why $3.5 billion a year? Allow me to give you an example from Pennsylvania. We feel that the Interstate Highway System is so important to the economic revitalization of the Northeast that we have made restoration and preservation of the Interstate System our number one priority. To demonstrate our commitment, we have already invested $13 million in Primary funds (since July of 1979) for restoration work on Interstate 80. This fiscal year, we plan to spend another $23 million (in Primary funds) for additional restoration work on Interstate 80. At the same time, our 10,000-mile Primary system also has massive and urgent restoration requirements.

Other states like Florida are struggling to add capacity to their Interstate System to keep pace with the additional traffic generated by a more than 40 percent increase in population over the past decade. The new Interstate 4R program must be both adequately funded and sufficiently flexible to enable such divergent needs to be addressed.

Because the Interstate 4R program will eventually become the highest priority national program, apportionment is extremely critical. Apportionment must be fair and equitable and at the same time reflect those factors which add to the cost of restoring, preserving and enhancing the system. As you know, the current parameters for Interstate 3R apportionment are Interstate lane miles and vehicles miles. All current proposals—H.R. 3210, S. 1024 and S. 841 (Administration)—have recommended the continuation of these two parameters with the only variation being in the weighting.

In the NGA/AASHTO position, factors other than lane miles and vehicle miles that contribute to pavement deterioration are recommended (such as weather, truck traffic and terrain). We have been working in conjunction with the AASHTO Task Force on Highway Legislation on a formula which would consider such factors.

Building upon the 4R concept, I would like to take a moment and briefly discuss a program option which, when taken together with a $12 billion Interstate completion program, would provide what we consider to be a "Balanced Approach" to the Interstate program. In effect, I would expand the 4R program to include the construction of locally significant gaps, since only nationally significant gaps would be eligible under a $12 billion Interstate completion program. The completion of locally significant gaps is estimated to cost $13 billion. Under this new program, which is designed to support the restoration, preservation and enhancement of the Interstate system, states would be given the additional flexibility to complete all other work which would be defined out of the Interstate Cost Estimate. This is precisely the kind of flexibility that's needed to bridge regional differences in Interstate needs at a time when resources are severely limited and costs continue to escalate at unreasonably rapid rates.

To further broaden the scope of this program, I would also propose the option of transferring apportionments to other Federal-aid highway categories in those states where Interstate highways were being adequately maintained and certified as such by the Federal Highway Administration. By including the transferability option, we preclude the need for a future Interstate Transfer program as presently structured. All prior Interstate Transfer approvals would continue to receive annual appropriations as they now do. A $3.5 billion program level has been assumed, since under this "Balanced Approach", Interstate completion would require only $1.5 billion.

IV. BRIDGES

Bridges are of extreme importance to Pennsylvania. Many local and regional economies depend heavily on the access afforded by key river and stream crossings. Remove that access, through weight restrictions or closings, and total system disruption occurs. Nationwide, bridge needs are estimated to be in excess of $30 billion.

The NGA/AASHTO position supports the bridge program as a categorical element of the Federal-aid highway program. In Pennsylvania, we endorse that position. We further support a strong bridge discretionary program to help finance "big ticket" projects.

V. MASS TRANSIT

I'll now turn to mass transit. Pennsylvania has proven its commitment to public transportation. We rank fourth in the nation with respect to state-financed operating assistance. Last fiscal year, Pennsylvania spent $112 million in state funds. For this current state fiscal year, we plan to make $140 million in operating assistance payments to the Commonwealth's transit agencies. In view of our commitment, we are doing all that we can to encourage greater local participation in public transportation, particularly now that we are facing the possible elimination of Federal operating assistance. We are working with members of the Pennsylvania General Assembly toward the enactment of local tax enabling legislation, a local tax option which presently does not exist.

We support the proposal to place increased emphasis on the modernization of existing rail and bus systems. Pennsylvania now contributes approximately $25 million per year in state funds toward the capital requirements of our transit systems. This program would be enhanced if capital assistance were made available for heavy maintenance as well as new facilities.

We believe that there is much more that the Federal government can do to encourage transit usage. For example, Federal tax credits could be established for employers who pay all or a portion of employee transit costs through prepaid weekly, monthly or even yearly transit passes. Tax credits could also be offered to employers who offer direct financial assistance or subsidy to transit operating agencies. In the area of regulatory reform and other cost reduction opportunities, we support the steps now underway to provide a local option on how best to meet the transportation needs of the handicapped. Section 13(c) labor sign-off requirements have become overly burdensome and need immediate attention. Relaxation of Federally-imposed specifications and procurement requirements are in order as well.

VI. SUMMARY AND CONCLUSION

In conclusion, I would like to commend both the Administration and the members of this committee on the progress made in addressing key areas of national need in the transportation sector. Concerning highways, I would encourage a central focus on removing the irrationality that the Interstate program increasingly poses by defining an equitable, achievable completion. Further, I urge that we move quickly to restore, preserve and enhance the nation's existing Interstate system with a Federal program complimentary to the varying needs of the states. The basic elements of our future Federal/state partnership have been identified in the legislative proposals advanced thus far but resolving details is now the key to final resolution. Where complete data was available, we have done some additional analyses of the highway proposals.

Greater local responsibility and creativity in the Federal role must attend future transit funding. Pennsylvania now carries a major transit support role. We believe local interests are willing to do more.

Again, I thank you for this opportunity.●

SOIL SAVING INCENTIVE THROUGH FAIR TAX TREATMENT

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. EVANS of Iowa. Mr. Speaker, today, I am introducing with cosponsors the Soil and Water Conservation Act of 1981, H.R. 2515, which was earlier introduced on March 13. This is identical legislation with S. 569 as introduced in the Senate by Senator JEPSEN.

This act would allow investment tax credit on those expenditures incurred by a landowner or operator related to the application of soil and water conservation practices on their land. It is the purpose of this act to encourage the application of these measures in an effort to preserve our Nation's most vital resource—our land.

By providing this incentive to farmers, this measure will encourage more serious consideration of wise stewardship of the Nation's soil and water resources.

H.R. 2515 provides a choice to those who incur conservation-related expenses by permitting them to take either a deduction of up to 25 percent of their gross income in the year the expense is incurred, or, if they prefer, to take a 10-percent investment tax credit for the year of the initial investment. Depreciation deductions for those improvements which are deductible would apply according to the standard depreciation schedule.

Since the initial introduction of this bill, Senator JEPSEN and I sought and have received a revenue estimate from the Joint Committee on Taxation. That committee has replied with its estimate of Treasury exposure. In fiscal year 1981 the revenue loss to the U.S. Treasury as a result of this bill would be about $9 million due to claims of either type. In fiscal year 1982, $25 million; fiscal year 1983, $27 million; fiscal year 1984, $30 million; fiscal year 1985, $31 million; and in fiscal year 1986, approximately $34 million would be lost to the U.S. Treasury as a result of this bill once approved.

Surely these are minute losses of Federal funds when compared with the potential soil which could be saved as a result of putting in place the practices which are thoroughly proved as savers of our soil and water. In addition to farmland benefits, there are sizable additional benefits to the entire Nation in the form of cleaner, silt-free lakes and streams when these practices are in place on lands feeding into those bodies of water.

Mr. Speaker, I urge my colleagues to join our colleagues Mr. STANGELAND of Minnesota; Mr. EMERSON of Missouri; Mr. BEDELL of Iowa; Mr. WEBER of Minnesota; Mr. JEFFRIES of Kansas; Mr. KOGOVSEK of Colorado; Mr. BARNARD of Georgia, in encouraging early hearings on this legislation in order that it might be approved during this session of Congress.●

HUMAN RIGHTS IN NORTHERN IRELAND

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. OTTINGER. Mr. Speaker, as a member of the Ad Hoc Congressional Committee for Irish Affairs, I would like to bring to the attention of my colleagues some of the efforts of the committee to make a positive contribution to the cause of peace, justice, and human rights in Northern Ireland.

Clearly, Ireland has seen too much violence and turmoil. I believe it is vital for Congress to speak out on this critical issue.

Here are just a few of the efforts of our committee to further the cause of human rights in Northern Ireland:

I. ARMS TO THE ROYAL ULSTER CONSTABULARY (RUC)

In 1979, the U.S. State Department announced a suspension of arms sales to the Royal Ulster Constabulary (RUC), the main police force in Northern Ireland. The RUC has been cited by the European Commission and Court on Human Rights and Amnesty International for various forms of inhumane treatment of prisoners and suspects under their control. The British Government appointed a special commission to investigate the Amnesty charges and this panel confirmed their findings.

Many members of the Ad Hoc Committee on Irish Affairs were concerned that President Reagan would lift this suspension of arms sales. I joined several of my colleagues in writing a letter to the President, urging that the embargo be maintained. We were subsequently assured by the White House that:

> The administration is holding to the policy of not approving licensing for sale of handguns to the RUC.

II. U.S. TRAINING OF BRITISH TROOPS

Concerned about reports that British troops are being trained at U.S. military facilities for later stationing in Northern Ireland, the ad hoc committee requested that Secretary of Defense Weinberger investigate these reports. In a letter to the ad hoc committee's chairman, Congressman MARIO BIAGGI, the Under Secretary of Defense noted that the training of British military personnel is authorized under the Arms Export Control Act and is an integral part of our mutual obligations under the North Atlantic Treaty. Under Secretary Fred Ikle wrote:

> Our cooperation with the United Kingdom is solely for the purposes of our NATO mission * * * not for internal police functions.

I consider this response interim in nature, and have been assured by my good friend, Mr. BIAGGI, that this issue will be pursued by the ad hoc committee.

III. HOUSE RESOLUTION 158

I am pleased to be a cosponsor of House Resolution 158, which calls on Great Britain to "exercise greater urgency and flexibility in finding a humanitarian solution to the hunger strike crisis." This bill is vital to demonstrate congressional concern for the British Government's intransigence in resolving the hunger strikes, and I urge my colleagues to join me in cosponsoring this measure.

IV. ECONOMIC SUMMIT IN OTTAWA

I joined several of my colleagues in an appeal to President Reagan to speak directly with Prime Minister Thatcher in Ottawa to urge her to initiate all possible steps to bring about a humanitarian resolution to the hunger strikes. I believe that a personal communication from the President would have served as a dramatic illustration to Mrs. Thatcher that this matter is of profound national concern.

Mr. Speaker, these are just a few of the efforts of the ad hoc congressional committee to contribute to the search for peace and justice in Northern Ireland. Our efforts will continue in the hopes of ending violence on all sides of this conflict. I urge my colleagues in the House to join the Ad Hoc Congressional Committee for Irish Affairs and thus demonstrate their commitment to the cause of peace in Northern Ireland.●

PROTECTING THE CIVIL SERVICE FROM POLITICAL RETALIATION

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. MARKEY. Mr. Speaker, I wish to thank the chairman of the committee for the fine report accompanying the Interior appropriations bill. This report documents all the ways in which Secretary Watt has recognized offices within the Interior Department to suit his own ideological purposes. Along with many of my colleagues here, I fear justifiably that Secretary Watt's reorganization of two such offices, the Office of Aircraft Services and the Office of Surface Mining, would destroy completely their effectiveness.

In carrying out his reorganization of the Interior Department, Watt has attempted to subvert not only environmental regulations legislated by Congress, but also the work of nonpolitical employees who see that those regulations are carried out. On March 20, the Secretary announced that due to budgetary constraints caused by the "waste, fraud, and mismanagement" of the previous administration, he had to release 51 employees under a reduction in force; 14 of the 51 employees released has been specially recruited from the finest law schools around the country to participate in the annual honors attorney program. At that time, the attorneys who were released claimed that Watt was using a "budget smokescreen to purge employees not considered politically reliable by the new administration."

As chairman of Oversight and Investigations I have looked closely at this reduction in force. Along with Chairman SCHROEDER and Chairman DINGELL, I asked the Secretary to defer the reduction in force until he could show us that budgetary constraints were indeed the cause. The Secretary responded in a letter to us on June 2 that there was so little money in the budget of the Office of the Solicitor that he had no other choice. On June

15, however, less that 2 weeks later, he advertised six positions in this very same office, positions for which the honors attorneys were certainly eligible.

The Office of the Solicitor has assured us that they had taken attrition into account before they decided to carry out the reduction in force. But GAO has recently informed us that in going over the budget figures of this office, attrition was not taken into consideration. That certainly sounds like mismanagement to me. As for waste, what about the wasted talent of 14 honors attorneys released from their work, some of whom have not found jobs yet?

Mr. Speaker, we, here in Congress, must protect the civil service from political retaliation by Secretary Watt. We did away with the spoils approach to Government over 100 years ago by establishing the civil service system. We should not allow Secretary Watt to reinstitute the spoils system now. We must continue to take congressional action to block this kind of political abuse of the civil service system.●

A GLITTERING ECONOMY

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. SHUMWAY. Mr. Speaker, yesterday Federal Reserve Board Chairman Paul Volcker testified before the House Banking Committee, on which I serve. It should come as no surprise that the discussion focused on interest rates—the reasons for current near record levels, the impact of high rates on businesses, large and small, and on individuals, and the effect Fed policy is having on inflation.

While I have not been as critical of Chairman Volcker as many of our colleagues, primarily because I feel the Fed is committed to reducing inflation, the fact remains that high interest rates are having an increasingly negative impact on important sectors of our economy, such as housing, automobiles, and small businesses.

I therefore think it is essential that we begin to seriously consider alternatives to our present monetary policy. One proposal that is receiving increasing attention is a return to the gold standard in some form. In this regard, I commend the following editorial by Lewis Lehrman to the attention of our colleagues.

A GLITTERING ECONOMY

President Reagan was elected to end inflation and restore the economy. He is moving in that direction by slowing down monetary growth, reducing federal spending increases, cutting tax increases and eliminating some costly government regulations.

But the economic program will not work without a balanced budget and the gold standard. Without these, interest rates will come down only slowly from 20 percent, and demoralized financial markets will not recover.

Some presidential advisers and the Federal Reserve may try to force a recession and higher unemployment to bring down interest rates more quickly. But no compassionate person can really want to cure inflation and high interest rates with worklessness.

By itself, gradually reducing the rate of growth in the money supply will not work. We need something other than austerity and monetarism. Thatcherism will work no better here than it has in England.

Together, a balanced budget and a monetary reform based on gold will quickly reduce interest rates. The currency would be stabilized, along with the market for government securities, and inflationary expectations would evaporate.

Such a policy, with economic expansion as its goal, is clearly implied in the 1980 Republican platform, which stated: "One of the most urgent tasks in the period ahead will be the restoration of a dependable monetary standard—that is, an end to inflation."

Last year, Congress established a commission to study the gold standard. Its task is to examine an institution ridiculed by most academic economists and almost all politicians. Their feelings are natural, because the gold standard would end political and bureaucratic manipulation of the money supply. So would an annually balanced federal budget.

A gold standard puts control over money in the hands of the people. A balanced budget would return savings to the marketplace for growth and new jobs. In a free market, the people could decide between a gold and a paper dollar.

I believe, given a true choice, that Americans will choose the gold dollar as their money, just as they will choose a balanced budget, at the present level of tax receipts, as the basis for financial order. A true gold standard and a balanced budget will give us 4 percent interest rates, and there is no other way to get them.

For most of our life as a nation, we had stable prices and low interest rates under the gold standard. After mercantilist trade wars had wrecked the world economy and the international monetary system, President Roosevelt abandoned the gold standard domestically in 1934. President Johnson abandoned international convertibility in 1968, and President Nixon officially ended it in 1971.

The economic situation we have faced since 1971 is not unique. It is all too similar to the inflations of the Revolutionary and Civil wars. During the Revolution, the Continental Congress reduced the value of its currency to a pittance. But in 1792, after the inauguration of President Washington, Congress established the gold and silver standard. During the Civil War, the U.S. government issued Greenbacks that were not convertible into gold, and the price level doubled.

Inflation was a problem until Congress began the transition to a gold standard in 1875, completing it in 1879. For more than a generation, the price level was stable, because the dollar was as good as gold.

Today, with the right leadership, our transition could be even smoother, because we know more about monetary theory, and we can learn from past mistakes.

After the disastrous paper money experiments of the Revolutionary War and Civil War periods, America rediscovered that gold is the natural monetary standard. Gold is found in limited quantities. Its production cannot be quickly increased. It once took centuries, and even today takes a generation, to improve the technology of gold production significantly. As a result, over the long term, the gold supply increases only about two percent a year, equal to the long-term rate of economic growth in the industrialized world.

Uniquely, the decline in the real cost of producing gold over the long run is about the same as the gain in productivity. That is, the gold standard is the natural regulator of monetary growth that the monetarists seek, and fail to find, in the Federal Reserve.

Gold is also unique as a stable yardstick of economic value. It takes a relatively constant amount of capital and labor to produce an ounce of gold. So gold is the best measuring rod for the value of all other products. Over the long run, the value of gold is far more stable than any other commodity that might be used as a standard. It is certainly better than paper.

To achieve the enduring financial order that President Reagan wants, we must have the gold standard and a balanced budget. Together they establish the necessary stable legal framework, the monetary constitution for that order.

Under the gold standard, authorities must maintain the convertibility of the currency. Together with a balanced budget, this means balance in our international payments, and a much increased rate of savings by the people.

These savings under the gold standard will allow American industry once again to plan for long-range growth, knowing that it could count on permanently low interest rates for borrowing. And all this new investment would vastly increase the demand for labor.

The long night of austerity and unemployment would end.●

ADM. FRANK HIGBEE, A MARINER'S MARINER

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. ANDERSON. Mr. Speaker, San Pedro, Calif., is honoring Adm. Frank Higbee today by naming a street for him. I'd like to add my own congratulations to Admiral Higbee and thank him for all the good things he has done for the South Bay area, the State of California, and the Nation down through the years.

Admiral Higbee has just recently celebrated his 87th birthday and his 61st wedding anniversary. In my opinion, those two accomplishments alone are sufficient to have a street named after one, but Admiral Higbee has a life history of accomplishments. The admiral is, to put it mildly, a seagoing man. He enlisted in the U.S. Navy in 1913, rose through the ranks of warrant officer and ensign during World War I, and left the Navy in 1920, shortly after he married his wife, Joan, in Wales. Incidentally, I imagine

that the two got along well together right off the bat, as she came from a long line of English merchant mariners.

In 1921, he tried his hand at wheat farming in Oregon, but the lure of the sea proved irresistible, and in 1926, he was at sea again as a U.S. Coast Guard lieutenant in the BEAR.

Lieutenant Commander Higbee became captain of the Port of Los Angeles in 1940, a position he held during the trying years of World War II—retiring in 1946 as a captain. He was promoted to the rank of rear admiral on the retired list. But he remained active in marine affairs as port warden for the Port of Los Angeles until he retired again in 1964. He currently lends his nautical expertise to the California State Lands Commission, serving as their consultant for maritime affairs.

My wife, Lee, and I thank the admiral for his many long years of service to the country, and wish him and his wife, Joan, many more years of happiness.●

PRO FOOTBALL AND THE L.A. COLISEUM—MORE FACTS TO REMEMBER

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. DIXON. Mr. Speaker, last week, the House Judiciary Subcommittee on Monopolies and Commercial Law held an instructive 3-day hearing on the antitrust aspects of professional sports. Included in the subcommittee's consideration is a bill I have cosponsored, H.R. 3287, which would prohibit a sports franchise in a market in which over 2 million persons reside from arbitrarily vetoing the entry of a second franchise into that area.

The need for this legislation was dramatically demonstrated last week by professional football box office figures obtained by a reporter for the Riverside (Calif.) Press-Enterprise. The data, based on a study by the National Football League's assistant treasurer's office, showed among other things that the Los Angeles Rams topped all of the other 27 franchises in net revenue from the sale of game tickets. The Rams earned a total of $7.78 million during their first season at Anaheim Stadium, over $1 million more than the runner-up Dallas Cowboys. Moreover, this amount must be regarded as pure profit, as it does not include each club's share of broadcasting revenues, estimated to reach $12 to $14 million per team under the league's next TV contract, which are thought to insure, in and of itself, the profitability of a pro football franchise.

These figures further indicate the outrageousness and indefensibility of actions taken by the Rams' management, first in abandoning the fans and taxpayers of Los Angeles County, owners of the Los Angeles Coliseum, and then in taking steps to prevent another franchise from entering the area.

The move of the Rams to Anaheim is of course a fait accompli, but the circumstances of the case bear repeating. In leaving the Los Angeles Coliseum, their home for 34 years and the only stadium in the world to host two separate Olympic competitions, the Rams abandoned a market which was generally accepted as one of the five or six most profitable in the NFL. So it was not a case of a struggling franchise seeking to salvage its profitability. Rather, when one considers the well-publicized enticements, including land deals, dangled in front of the Rams, one can only conclude that their move to Anaheim was motivated by the single factor of greed.

But what is even more outrageous—and what must continue to concern us, as elected representatives—has been the steadfast intransigence of the Rams and the NFL in allowing a replacement franchise—by expansion or transfer—to come to the coliseum. Such opposition cannot be defended by reason or precedent, but can only be explained by the Rams' desire to retain monopoly control over what is obviously a very lucrative market.

Though the Judiciary subcommittee strove to avoid discussion of the pending litigation which seeks to effect such a transfer, the subject, as one might expect, did enter the hearing room. In view of this, it is instructive to remember that the present crisis—which has cost the coliseum commission, and in turn the taxpayers of Los Angeles County, over $200,000 in legal expenses—was not of the county's, nor of any of the other plaintiffs' making.

In order that my colleagues and the general public might keep this in mind, I am enclosing a Los Angeles Times article, reporting on the data obtained by the Riverside Press-Enterprise.

The article follows:

[From the Los Angeles Times, July 17, 1981]

NOW NFL PLAYERS HAVE THE OWNERS' NUMBERS

(By Ted Green)

When National Football League owners and players try to hash out a new collective bargaining agreement probably early next spring, the key issue in complex negotiations is really quite simple:

How big will the players' slice be from the money pie?

According to Ed Garvey, the Washington, D.C. attorney who heads the NFL Players Assn., the players' take of total team revenues is 28%.

The owners claim it is substantially higher—say, 45%.

At any rate, either figure puts NFL players in the poorhouse compared to the athletes' estimated takes in other major sports. By most accounts, it is 48% in hockey, 50% in baseball and 60-65% in basketball.

Garvey, NFLPA executive director, says NFL players will shoot for 55% next year, or roughly twice what he says their current take is.

A 1982 strike is a real possibility. Many current contract squabbles reflect the players' near unanimous view that they are getting a raw deal.

Meanwhile, NFL players seemingly got more ammunition for their argument, with the revelation of each team's net ticket revenues last season. The figures had never before been public knowledge, and the best the players' association could do was guess.

They were uncovered by John Czarnecki, a sports writer for the Riverside Press-Enterprise. The figures were compiled by Tom Sullivan, the NFL's assistant treasurer. Czarnecki, protecting his sources, won't say how he discovered the document.

According to the 38-page document, which amounted to a detailed attendance and financial summary of the 1980 season, the Rams led all 28 teams with net ticket revenue of $7,784,766 for 20 games, counting exhibitions.

It simply means that the Rams may have a healthier profit situation than any NFL team.

Thus their critics may wonder why they didn't meet the contract demands of three star players they lost this past offseason, Vince Ferragamo, Bob Brudzinski and Jack Reynolds. The Rams, free to spend (or not spend) as they please, say the demands were too steep.

Incidentally, Garvey said the Rams traditionally have been among "the top five or six" paying teams. He added that he doesn't think that has changed significantly under owner Georgia Frontiere, who inherited the club in April, 1979, after her former husband, Carrol Rosenbloom, drowned in a swimming accident.

The Dallas Cowboys were next in ticket revenues with $6,774,925, the document said. Last were the Kansas City Chiefs at $4,149,931. (See accompanying chart for complete list.) The range between the Rams and Chiefs was $3.6 million.

Asked what this document might mean to the players, Garvey said:

"In every labor negotiation, one of the key elements is to have a lot of information. The more you have, the better your chance for success. Now we have a much better idea of how much the owners are actually making."

Speaking by phone from his Washington, office, Garvey said: "We say the players' current cut is 28%. The owners say 45% and shut up. We say, 'Open your books.' They say, 'Trust us.'

"Trust me, it's about 28%.

"The bottom line is, it's an inequitable situation. The league's next TV contract will bring in between $12 million and $14 million a year for each team. If that's true, and if the average player salary, which was $78,500 last year, creeps up to near $100,000, the players' take will drop to near 20%."

So?

"So," Garvey said, "this becomes the No. 1 collective bargaining issue."

And?

"And a strike sure is possible. Obviously we don't want to strike. But we have to be prepared. We have to have the ability to shut it (pro football) down."

Garvey said the NFL's new labor negotiator, New York attorney Jack Donion, is

eyeing next February or March as a target date to begin talks.

"I think we ought to start right now," Garvey said, "to avoid the kind of thing baseball is going through."

HOW CLUBS RANK

Team:	Net ticket revenue
1. Los Angeles	$7,784,766
2. Dallas	6,774,925
3. Seattle	6,444,885
4. Tampa Bay	6,291,002
5. San Diego	6,197,078
6. New England	6,119,155
7. Oakland	5,978,503
8. Philadelphia	5,975,192
9. Atlanta	5,867,498
10. Washington	5,716,097
11. Cleveland	5,705,878
12. Buffalo	5,658,641
13. Detroit	5,525,683
14. Houston	5,443,542
15. Denver	5,436,502
16. New Orleans	5,396,227
17. San Francisco	5,320,768
18. New York Jets	5,248,577
19. Miami	5,203,739
20. New York Giants	5,165,546
21. Pittsburgh	5,128,506
22. Chicago	5,124,586
23. St. Louis	5,106,640
24. Minnesota	5,053,038
25. Green Bay	4,969,186
26. Cincinnati	4,365,678
27. Baltimore	4,319,760
28. Kansas City	4,149,931

●

IN RECOGNITION OF ALLEN PEARSON, RETIRING DIRECTOR OF THE NATIONAL WEATHER SERVICE CENTRAL REGION

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. WINN. Mr. Speaker, on June 3, 1981, Mr. Allen Pearson, Director of the National Weather Service central region retired from Federal service. I want to take this opportunity to recognize the exemplary service that he has provided to the American public. In these times, when so much attention is focused on the bad aspects of the bureaucracy, it is refreshing to work with someone who epitomizes everything that is good. Allen has been honest, forthright, creative, and dedicated to the mission of the National Weather Service.

My affiliation with Allen has been through my interest in severe storms forecasting; a field in which Allen has achieved international acclaim. Prior to becoming the Director of the National Weather Service central region, Allen was the Director of the National Severe Storms Forecast Center. During his tenure, because of the creative and innovative new techniques he introduced, major improvements were made in the quality of severe storm and tornado forecasting, thereby reducing death and injury to the public. I can think of no better tribute to a man's dedication to his work.

In addition to being a master of the weather forecasting profession, Allen has also been an outstanding public spokesman. His ability to relate the very complex phenomena of weather has contributed immensely to the education of the public. On several occasions, I have had the distinct pleasure of having Allen appear before the Science and Technology Committee to testify on various weather issues. He has never failed to bring a vast wealth of knowledge and wisdom as well as a fresh breath of life to the proceedings.

Mr. Speaker, the Federal Government and the American public will suffer a great loss with the retirement of Allen Pearson. But I am sure you and my colleagues will join me in wishing him the very best of luck in his new endeavors.●

COMMEMORATION OF HARRY CHAPIN'S DEDICATION TO ENDING HUNGER

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mrs. SCHNEIDER. Mr. Speaker, hunger and malnutrition are two of our planet's best kept secrets, secrets that have devastating consequences. Harry Chapin was a man who was not afraid of revealing the human suffering and degradation of these secrets. He devoted a great deal of energy and gift working toward the eradication of world hunger and malnutrition and today we pay tribute to his vision.

Harry recognized what so many others have failed to: That we live in a very fragile world with limited and finite resources. He knew that only through the cooperation of the global community would all the inhabitants of our planet be fed.

We must share Harry's commitment. The monumental task of overcoming world hunger will take a concerted effort on behalf of the developing countries that suffer the most as well as by the large international community. The problem in front of us is one of making sure that the limited resources we have are put to the best possible use. We must learn to save what we do not use, and to use what we need sparingly. As a world leader, the United States must recognize its responsibility in resolving the problem of global hunger and encourage countries suffering the most, to manage food production on its own. We can do this in part through assistance programs and policies that will increase technical know-how, income, and productivity in poverty-stricken areas. But what can be just as crucial is a continuous dialog between the countries that have and those that have not. An open dialog will go just as far as economic aid, if not further, in promoting the global cooperation needed to resolve this problem.

There is no absolute solution to the world hunger problem, no magic potion that will produce nutritious, affordable food ad infinitum. But there are some practical tactics that we can take to improve the situation. The most important thing that we can do is learn to share the resources that we have.

We must understand that different countries have different needs, and that it is up to the entire industrial world—not just the United States—to help these countries meet their needs. We will all benefit in the long run if we can understand the interconnectedness of the Earth and learn to nurture its resources.

Harry understood this. We must learn a lesson from Harry Chapin's life and pursue his dream. I grieve at his death but I celebrate his life.●

H.R. 4083—CONTROVERSIAL BILL

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. CHAPPIE. Mr. Speaker, on Friday afternoon, July 17, this body passed a controversial bill by unanimous consent, with no more than a handful of Members present. The bill, H.R. 4083, sets aside more than 2 million acres of California national forest land as wilderness preserves. The bill's sponsor was my colleague from California, PHILLIP BURTON.

The entire process of handling this legislation—in subcommittee, full committee, and in bringing it to the House floor—involved, to my way of thinking, highly unusual tactics.

H.R. 4083 had been scheduled to come before the House on Monday, July 20, under suspension of the rules. I was prepared to object on the floor because the bill is highly controversial and will have an enormous impact in my district, as well as in other areas of California and southern Oregon. Perhaps advocates of the bill anticipated opposition, and were prompted to steamroll the bill through late Friday under consent procedures.

The upshot is, the House has made this bill appear noncontroversial by approving it under unanimous consent. In committee, H.R. 4083 was opposed by the administration. There was no agreement among the California delegation to consent consideration, since others also had serious objections to the bill. The word that seemed to go out was that the minority Members of the California delegation, whose districts are most affected

by H.R. 4083, had signed off on the bill. This was certainly not the case.

This wilderness proposal was highly controversial in this, and the last, Congress. There are widely divergent views as to what constitutes the most acceptable acreage for wilderness preservation and what lands should be open for multiple-use management. By a single action, H.R. 4083 would double existing California wilderness by adding more than 2.1 million acres from the State's national forest lands to the wilderness system.

Under the Carter administration, the second roadless area review and evaluation (RARE II) recommended 1.3 million acres for wilderness in California. The Reagan administration, however, favors California RARE II wilderness additions of 1.2 million acres, which are also endorsed by the forestry professionals at the U.S. Forest Service. Objections to the wilderness acreage in the Burton proposal have been raised by many groups, among them recreation, timber, mining, ranchers, farmers, labor, homebuilders, and county officials. The people in California who depend on access to these resource-rich lands for jobs and recreation are concerned that they and their interests are being locked out.

At hearings last May in Weaverville, Calif., all attendance records were broken. Views expressed at the Weaverville hearings were highly charged, both for and against the Burton proposal, as were the views expressed in this body over the last 2 years. Yet, no one would have guessed it, in light of the way H.R. 4083 virtually flew off the House floor.

One of the mainstays of northern California is the forest products industry. H.R. 4083 would substantially reduce the volume of national forest timber available to mills in northern California. Such reductions will critically affect the economies of scores of communities where the timber industry is the major economic activity.

The bill would also substantially reduce the number and quality of services many northern California counties now fund from national forest timber sale receipts. And, of course, designations as wilderness impose severe restraints on geological exploration for mineral and energy resource development.

Yet, in a matter of 4 days, this bill sailed through subcommittee, full committee, and was passed by the House. This is incredible to me. Certainly my constituents will be appalled that, with 900,000 acres of wilderness proposed in my district, their concerns were not represented due to the legislative maneuverings of this Chamber.

The manner in which this bill was reported from the House Interior Committee was very clever. Under Mr. BURTON's leadership, the committee reported two almost identical bills, H.R. 4083 and H.R. 4043, but filed a report on only one, H.R. 4083. The strategy, I suspect, was to either circumvent, or permit only minimal attention by, the House Agriculture Committee on which I serve. On the floor, Mr. BURTON then added an amendment from H.R. 4043 providing only short-term release for lands determined best suited for nonwilderness use. This amendment was the only difference between the two Burton bills reported by the Interior Committee.

I think the minority leadership should be aware of the short shrift certain minority Members of the California delegation received throughout this entire process. I sincerely hope that the Senate will see through the events of July 17 and give every aspect of this legislation the careful consideration it deserves.●

OLIVER VICKERY: SOUTH BAY HISTORIAN

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. ANDERSON. Mr. Speaker, I would like to take a few minutes today to discuss one of my longtime friends, Oliver Vickery. San Pedro, Calif., is naming a street in honor of Mr. Vickery today, and I want to add my own personal congratulations and thanks to him.

Mr. Vickery was born in Kentucky, but headed west to attend and graduate from the University of California. After his schooling, Oliver entered the marine supply business in San Pedro. He was a stalwart member of the business community for many years, but he is remembered for much more than his business successes. He is one of the South Bay's leading historians and has, over the years, devoted countless hours to preserving for future generations the history, lore, and artifacts of the area's past. He served as the curator of the Banning Mansion for a long period of time, and is remembered for his many excellent articles on Phineas Banning, a pioneer in southern California's early history. He has also authored a book about the harbor area entitled "Harbor Heritage," and is a regular contributor to the News Pilot, our local daily newspaper.

I, for one, will never forget Mr. Vickery's trip to the Soviet Union during the 1950's, at the height of the cold war, when he courageously espoused the cause of capitalism and free enterprise to what was perhaps not the most receptive of audiences. A national magazine did a feature story on his trip to Russia and his stunning comments.

My wife, Lee, and I want Oliver Vickery to know how much we, and all the people of San Pedro, appreciate his good work through the years, and we wish him many more years in the future so that we may all benefit from his continuing efforts on behalf of his community.●

CONGRESSIONAL TEXTILE CAUCUS FINANCIAL REPORT OF THE CONGRESSIONAL TEXTILE CAUCUS QUARTERLY STATEMENT OF EXPENSES AND FUND BALANCE

HON. KEN HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. HOLLAND. Mr. Speaker, the chairman, vice chairman, and secretary-treasurer of the Congressional Textile Caucus have approved the quarterly financial statement for the quarter ending June 30, 1981. I am herewith submitting the statement for insertion into the CONGRESSIONAL RECORD so that all Members of Congress may review it.

The statement follows:

CONGRESSIONAL TEXTILE CAUCUS

FINANCIAL REPORT OF THE CONGRESSIONAL TEXTILE CAUCUS QUARTERLY STATEMENT OF EXPENSES AND FUND BALANCE

[For the period ending June 30, 1981]

Expenditures:	
Telephone	$81.39
Do	90.96
Do	94.90
Office supplies	181.55
Do	121.32
Do	20.00
Do	23.68
Typewriter	684.40
Do	174.00
Copy machine	135.00
Do	135.00
Postage	3.00
Do	18.00
Subscriptions	25.50
Do	12.40
Total expenditures	1,801.10
Fund balance:	
Fund balance Mar. 31, 1981	8,641.60
Total dues deposited this quarter	6,800.00
Interest on account	133.26
Total	15,574.86
Less expenditures	1,801.10
Balance—June 30, 1981	13,773.76

●

GREAT LAKES DILEMMA

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. DINGELL. Mr. Speaker, the Great Lakes once supported major and valuable renewable fishery resources. However, the decline of these resources in this century has been dra-

matic and well documented. At the turn of the century, Great Lakes commercial fishermen landed about 110 million pounds of fish per year; by 1975, landings had dropped to 61 million pounds per year. In the 1940's and 1950's lake trout, a major game fish, virtually disappeared from many areas of the Great Lakes, and these fish populations have never recovered. The contributing causes to the decline of the Great Lakes fisheries include habitat alterations, changes in forage fish supply, deterioration of water quality, the invasion of the parasitic sea lamprey, and overfishing.

Great strides have been made in the improvement of fishery management, particularly the eradication of the parasitic sea lamprey, which has appreciably restored fish populations. Advances in cleaning up the Great Lakes significantly improved fishery resource habitats.

However, overfishing in the Great Lakes now poses an ominous threat to the future survivability of fish species. A longstanding conflict between the State of Michigan, which contends it has the right to manage fish species for conservation purposes, and Indian fishermen, who feel, by virtue of their treaty rights, they should be unencumbered in their right, manner, and place of harvesting fish species, has been resolved in favor of the Indians by the U.S. Sixth Circuit Court of Appeals.

On this issue, I insert for the RECORD a July 21 editorial in the Detroit News, which presents a number of options which must be carefully considered in order to resolve this resource crisis. These options should be taken seriously and with great haste if we are to save the fishery resources in our Great Lakes:

A THREATENED FISHERY

The Indians won and Michigan lost when the U.S. Circuit Court of Appeals in Cincinnati upheld Federal Judge Noel Fox's ruling that states have no right to regulate Indian fishing.

The decision, if it stands, is the death knell for sport fishing in the Great Lakes, and the perpetuation of an injustice done to all sport fishermen.

At the core of the argument are two ancient treaties which conveyed rights to Indians in northern Michigan. The "treaty waters" are in Lake Michigan, north of Grand Haven and Lake Huron north of South Point, and in Lake Superior's Whitefish Bay.

Overfishing, plus the infestations of lamprey eels and the alewife trash fish, all but destroyed the whitefish and lake trout populations of lakes Michigan and Huron two decades ago. There weren't enough fish in them to argue over.

Since then, Michigan has operated a remarkable restocking program, financed with the license fees of sport fishermen. The lamprey eel was controlled. Two species of salmon were established and they gorged themselves on alewives. Further, plantings of lake trout thrived and grew to boasting size.

Indians vacuumed White Fish Bay with gill nets, which are illegal under state law. Having no fish near their reservations, they moved south to lakes Huron and Michigan and began an assault that alarmed and angered sport fishermen.

Gill nets ensnare all fish that swim into their coarse mesh, where they suffocate as their gills become tangled. Indians who net commerical whitefish also kill lake trout and salmon.

When the treaties were written in the 1800s, Indians fished for their own needs and put little pressure on the resource. Today, with whitefish going for more than $4 a pound, Indians or those who claim falsely to be members of a tribe, take every fish they can find.

The Michigan Department of Natural Resources (DNR) monitored Indian fishing in Grand Traverse Bay in 1980, and said gillnetting took 350,000 pounds of lake trout and 70,000 pounds of whitefish in two months.

No fishery can withstand such pressure for long.

Further, profligate harvesting of lake trout is occurring at the very point in the program when lake trout populations are becoming large enough to reproduce naturally.

What's to be done?

First, because the resource is so important in terms of food and tourist dollars, the state is obliged to appeal the judgment to the U.S. Supreme Court. Every legal recourse must be exhausted.

Second, it would be wasteful to spend additional dollars stocking lake trout in the disputed waters. Since the fish hatcheries are financed with anglers' fees, the fingerlings should go to waters that are controlled and where there is some hope of achieving natural regeneration.

Third, since salmon are more migratory than lake trout, there should be a slowdown in the salmon planting program.

If the state loses in the U.S. Supreme Court, the next step must be negotiation with the tribes. The DNR must make it clear that there will be no plantings unless the Indians accept—indeed, help write—rules that will control fishing pressures so the resource will be maintained perpetually.

There are sensible ways to develop Indian commercial fishing. Pound nets trap fish but don't kill them. When they are used, game fish can be returned to the water alive when the whitefish are harvested.

Once that's accomplished, the DNR can get back to the business of restoring the fishery in the "treaty waters," a feat that we know is scientifically possible.

Should this effort fail, Congress must then deal with the issue. The state, indeed the country, can't accept treaties, laws, or interpretations of either that condemn lakes Michigan and Huron to sterility.●

TO INCREASE ALTERNATIVES TO INSTITUTIONALIZATION

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mrs. FENWICK. Mr. Speaker, over 1 million elderly Americans—5 percent of those who are over 65 years of age—live in nursing homes, and many of them will spend the rest of their lives there, isolated from family and from friends. Although many of these people need the nursing care which can be provided only by an institution, a 1977 Congressional Budget Office study estimated that 20 to 40 percent of them could be cared for at home if help were available. In this Congress I have, again, introduced a proposal to provide an alternative to institutionalization for these people—an alternative that could save a good deal of money.

Existing health programs for the aged have a strong institutional bias. Medicaid supports the vast bulk of federally subsidized long-term care, $20.7 billion was the 1979 Federal and State total for medicaid, $8.8 billion of this was for nursing home care alone, and only $264 million for home health care. Part of the problem is that eligibility for medicaid is determined more by income than by medical need. For example, in New Jersey, one's income cannot exceed $261 per month in order to qualify for home health care, yet for nursing home care one's monthly income may be as high as $716. Under present medicare law, the institutional bias continues; home health visits are limited and not designed for long-term needs.

If some of the money currently used for institutional care could be made available to those individuals or to their families, many could avoid institutionalization altogether. We now have between 260,000 and 520,000 elderly people sustained in nursing homes at high expense, despite the fact that they could be cared for at home for little more than half of the cost and—even more importantly—at far greater happiness and comfort. The Government should be encouraging family unity rather than discouraging it.

My bill would provide the groundwork for alternatives to institutionalization by authorizing demonstration projects wherein those people eligible for tax-paid nursing home care would be paid a tax-free stipend equal to 50 percent of the average nursing home cost. This stipend could finance care in a home situation which would suit their needs—with their family, or a foster family, or with friends in a cooperative living arrangement, pooling their resources. The living situation would be reviewed periodically by a competent health official to determine whether the stipend was being used properly, to the person's satisfaction and happiness.

A somewhat similar project is in progress in Maryland on a small scale. The study involves two groups; in one, the elderly person's family was given a stipend of up to $2,000 per year to help with the cost of health supplies, housing, food, and other necessities. Health care is paid for separately, in

addition to the stipend. The other group received no subsidy of any kind. The preliminary report indicates that without a stipend, only minimal support is available to families who provide care for an elderly relative. Because of the heavy drain on financial and emotional resources, even the most loving and caring family will admit their elderly parent into a nursing home, where public support is finally available. On the other hand, it appears that the stipend, although small, was enough of a help to enable the elderly person to remain at home.

I have introduced H.R. 2833 with the expectation that although saving a considerable amount of money, it can provide independence and dignity for a great number of elderly people in this country. Separation from one's family ought not to be required or encouraged by government regulations and incentives. Institutionalization ought, rather, to be an option of last resort.

For the RECORD, a complete text of the bill follows:

H.R. 2833

A bill to provide alternatives to institutionalization

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of Health and Human Services (hereinafter referred to as the "Secretary") may provide, through demonstration projects payments to individuals who are receiving, or are eligible to receive, benefits with respect to post-hospital extended care services under title XVIII of the Social Security Act or intermediate care facility services or skilled nursing facility services under title XIX of such Act, who do not require twenty-four hour nursing care or supervision, and who desire to establish a noninstitutional living arrangement which will meet their medical and other needs.

(b) The amount of any payment made to any individual under this Act shall be an amount determined by multiplying—

(1) the number of days in the period for which the payment is made, by

(2) 50 per centum of the average daily benefit paid for the services described in subsection (a), in the State in which such individual resides, on behalf of an individual under titles XVIII and XIX of the Social Security Act.

(c) Any payment received by an individual under this Act shall be used for the purpose of financing an appropriate noninstitutional living arrangement which meets the medical and other needs of the individual. The Secretary shall provide that such living arrangement will be reviewed periodically by a registered nurse or other appropriate health official for the purpose of determining whether the individual is satisfied with the care as a result of such arrangement.

(d) Any payment made under this Act shall be made on such terms and conditions, in advance or by reimbursement, in such installments, and for such length of time as the Secretary determines will best meet the medical and other needs of the individual receiving the payments.

(e) Such payments shall not be includable in gross income under the Internal Revenue Code of 1954.

(f)(1) The Secretary shall design demonstration projects established under this Act for the purpose of determining—

(A) the economic, medical, psychological, and sociological feasibility of transferring inpatients of skilled nursing and intermediate care facilities to noninstitutional living arrangements;

(B) the types and percentage of such inpatients who could live effectively in a noninstitutional living arrangement; and

(C) the types and percentages of such inpatients who would benefit economically and qualitatively from transferring to a noninstitutional living arrangement.

(2) The Secretary shall, within two years after the date of the enactment of this Act, transmit a report to each House of the Congress concerning the findings and conclusions which have been made with respect to the matters described in paragraph (1). In addition, such report shall contain recommendations, if any, by the Secretary for legislative action with respect to such matters.

(g) Funds made available under this Act shall be made in appropriate part, as determined by the Secretary, from the Federal Hospital Insurance Trust Fund (established by section 1817 of the Social Security Act) and from funds appropriated to carry out title XIX of the Social Security Act.●

IN SUPPORT OF THE PRITCHARD-EDGAR AMENDMENT ON THE TENNESSEE-TOMBIGBEE WATERWAY PROJECT

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 22, 1981

● Mr. EDGAR. Mr. Speaker, there are six good reasons to support the Pritchard-Edgar amendment on the Tennessee-Tombigbee waterway project.

First, the vast majority of the project has been halted by the fifth circuit court of appeals.

Second, the project will cost another $2 billion to complete—$200 million a year for the next 10 years.

Third, in March 1981, the Senate Environment and Public Works Committee voted 9 to 5 to recommend termination of the project.

Fourth, the project is only 33 percent complete, and will be a dismal economic failure even if finished because it will move negligible amounts of coal or other traffic.

Fifth, as stated in the July 22, 1981, New York Times editorial:

The economic case against both projects was forcefully stated by President Reagan's own Budget Director, David Stockman, while he was still a Congressman. * * * He suggested that if Congress paid for marginal enterprises like Tenn-Tom, it ought to "go whole hog and build a pyramid in every State."

Sixth, as stated in the July 22, 1981, Philadelphia Inquirer editorial:

The court enjoined further construction of a major portion of the waterway, ruling that The corps had "blatantly" violated Federal environmental requirements and intentionally used outdated financial statistics to make the project appear economically viable.

Both editorials follow:

[From the New York Times, July 22, 1981]

DISPENSABLE PORK

After cutting funds for food stamps, youth employment, Medicaid and a host of other social programs, the Reagan Administration endorsed two highly questionable multibillion-dollar construction projects of particular interest to powerful legislators—the Clinch River breeder reactor and the Tennessee-Tombigbee Waterway.

This week the House has a chance to derail both of them. It should. An Administration and Congress asking everyone to make do with less have no right to cling to such blatant pork barrels.

The Clinch River breeder reactor, which is to be built in Tennessee, is championed by that state's Senator Baker, the majority leader. It is supposed to demonstrate the breeder's potential for using nuclear fuel more efficiently than conventional reactors. But this $3.2 billion project is apt to wind up a technological turkey. Some consider the relatively small reactor obsolescent; it might also fall short of Federal safety and environmental requirements. A House subcommittee staff recently concluded that projected costs are soaring because of lax management. And the need for even a well-conceived breeder is diminishing as demand for electricity falls and estimates of uranium supplies rise.

The Tennessee-Tombigbee Waterway, in Mississippi and Alabama, would link the Tennessee River with an existing waterway that leads south to the Gulf of Mexico. It has powerful supporters on the Appropriations Committee in two Mississippians, Jamie Whitten and Tom Bevill. About $1.1 billion has already been spent on construction over the last decade, more than half the total estimated cost.

Even so, there may be good reason to halt the project. Tenn-Tom will create a bottleneck on the waterway to the south, and easing *that* problem would cost another $1 billion. Moreover, both the General Accounting Office and the Congressional Research Service question predictions that enough barge traffic will materialize to justify the linkup.

The economic case against both projects was forcefully stated by President Reagan's own budget director, David Stockman, while he was still a Congressman. Financing Clinch River, he warned, would encourage "a never-ending stream of outstretched palms" for Federal subsidies. He suggested that if Congress paid for marginal enterprises like Tenn-Tom, it ought to "go whole hog and build a pyramid in every state." The House should give both projects a pharaoh's burial.

[From the Philadelphia Inquirer, July 22, 1981]

SAYING NO TO PORK-BARRELISM

This week the House of Representatives will have an opportunity to commit the federal government to pay for a $3 billion water project and a $3.2 billion breeder reactor. For that $6.2 billion, the American taxpayer will receive a 232-mile waterway which has almost no economic justification and an energy project that, when completed, probably will be mothballed because it is useless.

The Tennessee-Tombigbee Waterway and the Clinch River Breeder Reactor represent

pork-barrell politics at their most outrageous. They have survived close votes in Congress in past years, because they are favorites of a powerful group of Southern members of Congress. This year, which has brought drastic reductions in social and economic programs vital to millions of Americans, the House must put cronyism aside and reject more money for the two projects.

House members will be asked to approve fiscal year 1982 appropriations of $189 million for Tenn-Tom and $250 million for Clinch River. That money will go toward projects that can make the following claims:

Clinch River. The cost overruns for the Breeder reactor already amount to 450 percent, making it the most expensive power project ever. A House oversight and investigations subcommittee has labeled the project a management fiasco marked by "unbelievably loose," unenforceable contracts. The plant may produce electricity by 1990, 11 years behind schedule at a cost so high that the government will have to sell it at a loss, or shut down the plant. When the Carter administration tried to kill the Clinch River project, it won an ally in the Congress. David A. Stockman, who maintained that "no further subsidization of the Clinch River program . . . can be justified." Mr. Stockman, now President Reagan's budget director, has backed away from that position in light of the administration's support for Clinch River.

Tenn-Tom. Known as the "clone of the Mississippi River," the Tenn-Tom waterway will link the Tennessee River with the Gulf of Mexico. The General Accounting Office and the U.S. Fifth Circuit Court of Appeals recently challenged the data used by the Army Corps of Engineers to justify construction of the largest public works project currently under way in the United States. The court enjoined further construction of a major portion of the waterway, ruling that the corps had "blatantly" violated federal environmental requirements and intentionally used out-dated financial statistics to make the project appear economically viable.

Rep. Robert W. Edgar (D., Pa.) long has led the fight in the House against funding Tenn-Tom, claiming that the amount earmarked to complete the waterway is more than double the federal funds allocated for all public works projects in Northeastern states. He and Rep. Joel Pritchard (R., Wash.) last year came close to winning that fight in Congress, and will mount a spirited effort again this year. The Clinch River Breeder Reactor vote also will be close.

The House has busied itself during the budget process in ferreting out waste and excess in a wide range of federal programs. It cannot allow the appropriations for two of the most wasteful and excessive to be approved.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, July 23, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 24

9:30 a.m.

Armed Services

Closed business meeting, to mark up S. 846, authorizing funds for fiscal years 1982 and 1983 for national security programs of the Department of Energy, and to consider pending routine military nominations.

212 Russell Building

Commerce, Science, and Transportation

To hold hearings on the nomination of James C. Miller III, of the District of Columbia, to be a Federal Trade Commissioner.

235 Russell Building

Finance

Taxation and Debt Management Subcommittee

To hold hearings on miscellaneous tax proposals, including S. 805, S. 1214, S. 1304, S. 1320, S. 1369, and S. 531.

2221 Dirksen Building

10:00 a.m.

Armed Services

To resume hearings on arms control issues.

212 Russell Building

Conferees

Senate Committee on Small Business conferees and House Committee on Small Business conferees on the Small Business Administration provisions of H.R. 3982, providing for reconciliation pursuant to section 301 of H. Con. Res. 115, the First Concurrent Resolution of the Congressional Budget.

Room S-146, Capitol

Energy and Natural Resources

To hold hearings on the nominations of Anthony G. Sousa, of Hawaii, to be a member of the Federal Energy Regulatory Commission, J. Robinson West, of Pennsylvania, to be an Assistant Secretary of Interior for Policy, Budget and Administration, Jan W. Mares, of Connecticut, to be an Assistant Secretary of Energy for Fossil Energy, and Alvin W. Trivelpiece, of California, to be director of the Office of Energy Research, Department of Energy.

3110 Dirksen Building

Environment and Public Works

* Water Resources Subcommittee

To hold hearings on S. 1493, deauthorizing certain water resources projects within the jurisdiction of the U.S. Army Corps of Engineers, and on other related issues.

4200 Dirksen Building

Foreign Relations

To hold hearings on S. 854, establishing an Office of Foreign Missions responsible for providing benefits for foreign missions on terms approved by the Secretary of State.

4221 Dirksen Building

Judiciary

To continue hearings on monopolization and competition in the telecommunications industry.

2228 Dirksen Building

Select Committee on Indian Affairs

Business meeting, to further discuss S. 1088, promoting the goal of economic and social self-sufficiency for American Indians, Hawaiian Natives, and Alaskan Natives, and to discuss a proposed committee report on the adequacy of Federal supervision and monitoring of oil theft on Indian and Federal lease lands.

1224 Dirksen Building

1:30 p.m.

Judiciary

Immigration and Refugee Policy Subcommittee

To hold hearings to examine the enforcement of U.S. immigration laws.

412 Russell Building

JULY 27

9:30 a.m.

Finance

International Trade Subcommittee

To hold hearings on proposed legislation extending the President's authority to waive the freedom of immigration provision of the Trade Act.

2221 Dirksen Building

Labor and Human Resources

Alcoholism and Drug Abuse Subcommittee

To hold oversight hearings on research activities of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse.

4232 Dirksen Building

10:00 a.m.

Agriculture, Nutrition, and Forestry

Agricultural Research and General Research Subcommittee

To hold hearings on proposed revisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Public Law 96-539.

324 Russell Building

*Environment and Public Works

Business meeting, to consider pending calendar business.

4200 Dirksen Building

Foreign Relations

To hold hearings on the nominations of Jose M. Casanova, of Florida, to be Executive Director of the Inter-American Development Bank, and Abraham Katz, of Florida, to be the Representative to the Organization for Economic Cooperation and Development, with the rank of Ambassador.

4221 Dirksen Building

Governmental Affairs

Business meeting, to mark up S. 678, expanding the present ZIP code system to a 9-digit ZIP code, and S. 1080, improving and modifying the Federal regulatory process.

3302 Dirksen Building

2:00 p.m.
Agriculture, Nutrition, and Forestry
Agricultural Research and General Research Subcommittee
To continue hearings on proposed revisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Public Law 96-539.
324 Russell Building
Foreign Relations
To hold hearings on the nomination of Frederick L. Chapin, of New Jersey, to be Ambassador to Guatemala.
4221 Dirksen Building
3:00 p.m.
Foreign Relations
To receive testimony from Assistant Secretary of Defense-Designate Richard N. Perle on international security policy issues.
4221 Dirksen Building

JULY 28

9:00 a.m.
*Select on Ethics
To resume hearings on matters involving Senator Williams.
6226 Dirksen Building
9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed legislation to provide title to contractors receiving Federal research and development funds.
235 Russell Building
10:00 a.m.
Banking, Housing, and Urban Affairs
Business meeting, to mark up S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977, and S. 868, directing the Export-Import Bank to adopt export finance programs comparable in structure to those measures of official export credits offered by competing countries.
5302 Dirksen Building
Finance
International Trade Subcommittee
To resume hearings on U.S. trade policy.
2221 Dirksen Building
Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building
10:30 a.m.
Energy and Natural Resources
To hold hearings on S. 1503, authorizing the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage, S. 1476, S. 1354, and S. 409, bills providing standby authority to deal with petroleum supply disruptions, and S. 445, establishing a State set-aside system for propane, middle distillates, motor gasoline, residual fuel oil, and aviation fuels.
3110 Dirksen Building
2:00 p.m.
*Governmental Affairs
Intergovernmental Relations Subcommittee
To discuss alternatives for delivering public services, focusing on certain private sector involvement in social services.
Room to be announced
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building
Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building

JULY 29

9:00 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
235 Russell Building
Governmental Affairs
Intergovernmental Relations Subcommittee
To continue discussion of alternatives for delivering public services, focusing on certain private sector involvement in social services.
357 Russell Building
*Labor and Human Resources
To resume oversight hearings on the activities of the Office of Federal Contract Compliance Programs of the Department of Labor, focusing on Executive Order 11246, regulations relating to affirmative action.
4232 Dirksen Building
*Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building
10:00 a.m.
Banking, Housing, and Urban Affairs
Business meeting, to continue mark up of S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977, and S. 868, directing the Export-Import Bank to adopt export finance programs comparable in structure to those measures of official export credits offered by competing countries.
5302 Dirksen Building
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building
*Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building
Judiciary
To hold oversight hearings on the implementation of the Copyright Act of 1976, focusing on section 101 relative to cable TV policy.
2228 Dirksen Building
Select on Indian Affairs
To hold hearings on S. 792, establishing a National Institute of Native American Culture and Arts Development.
5110 Dirksen Building
1:00 p.m.
Judiciary
To resume hearings on monopolization and competition in the telecommunications industry.
2228 Dirksen Building
2:00 p.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To continue discussion of alternatives for delivering public services, focusing on certain private sector involvement in social services.
357 Russell Building
Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building
Special on Aging
To hold hearings on proposals relating to medicare reimbursement to competitive medical plans.
5110 Dirksen Building

JULY 30

9:00 a.m.
*Governmental Affairs
Intergovernmental Relations Subcommittee
To continue discussion of alternatives for delivering public services, focusing on certain private sector involvement in social services.
318 Russell Building
*Labor and Human Resources
To continue oversight hearings on the activities of the Office of Federal Contract Compliance Programs of the Department of Labor, focusing on Executive Order 11246, regulations relating to affirmative action.
4232 Dirksen Building
*Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building
9:30 a.m.
Energy and Natural Resources
To resume hearings on S. 1503, authorizing the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage, S. 1476, S. 1354, and S. 409, bills providing standby authority to deal with petroleum supply disruptions, and S. 445, establishing a State set-aside system for propane, middle distillates, motor gasoline, residual fuel oil, and aviation fuels.
3110 Dirksen Building
Select on Indian Affairs
To hold hearings on S. 159, authorizing the exchange of certain land held by the Navajo Tribe and the Bureau of Land Management, Department of the Interior, and S. 1340, providing for the use and distribution of judgment funds awarded to the Clallam Tribe of Indians, State of Washington.
3110 Dirksen Building
10:00 a.m.
Judiciary
To hold hearings on S. 326, prohibiting a refiner, other than an independent or small refiner, from operating a gas station in the United States, and making it unlawful for a supplier to practice price discrimination in the sale of motor fuel.
2228 Dirksen Building
Judiciary
Immigration and Refugee Policy Subcommittee
To hold joint hearings with the House Subcommittee on Immigration, Refugees, and International Law of the Judiciary to examine the administration's policy relative to immigration and refugees.
412 Russell Building
2:00 p.m.
Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building
2:30 p.m.
Armed Services
To meet in closed session to discuss the role of military power in foreign policy

objectives and specific foreign policy initiatives of the administration.
212 Russell Building

JULY 31

9:00 a.m.
*Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume oversight hearings on the implementation of the Freedom of Information Act, and on S. 1247, S. 1235, and S. 587, bills providing for the protection of certain confidential information from the disclosure requirements of the Freedom of Information Act.
2228 Dirksen Building

10:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on employer sanctions.
2228 Dirksen Building

2:00 p.m.
Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building

AUGUST 24

9:30 a.m.
Select on Ethics
Closed meeting, to discuss committee procedures in its investigation of Senator Williams.
6228 Dirksen Building

SEPTEMBER 10

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 41, proposed constitutional amendment prohibiting the United States or any State from making or enforcing any law which makes distinctions on account of race, color, or national origin.
2228 Dirksen Building

SEPTEMBER 15

9:30 a.m.
Labor and Human Resources
Aging, Family and Human Services Subcommittee
To hold hearings on primary intervention in addressing societal problems.
4232 Dirksen Building

SEPTEMBER 16

9:30 a.m.
*Veterans' Affairs
Business meeting, to markup S. 5, S. 7, S. 25, S. 26, S. 48, S. 105, S. 248, S. 417, and S. 742, bills providing educational assistance to members of the Armed Forces, and S. 266 and amendment No. 62 of S. 636 (Veterans' Administration Health Care Amendments), measures implementing procedures and guidelines for the interagency sharing of health resources between the Department of Defense and the Veterans' Administration.
412 Russell Building

SEPTEMBER 22

10:00 a.m.
Veterans' Affairs
To hold hearings on fiscal year 1982 legislative recommendations of the American Legion.
318 Russell Building

SEPTEMBER 23

10:00 a.m.
Labor and Human Resources
Investigations and General Oversight Subcommittee
To hold oversight hearings on the activities of the Occupational Safety and Health Administration.
4232 Dirksen Building

SEPTEMBER 24

10:00 a.m.
Labor and Human Resources
Investigations and General Oversight Subcommittee
To continue oversight hearings on the activities of the Occupational Safety and Health Administration.
4232 Dirksen Building

SEPTEMBER 30

9:30 a.m.
*Veterans' Affairs
Business meeting, to markup S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans.
412 Russell Building

CANCELLATIONS

JULY 23

9:30 a.m.
Select on Ethics
To continue hearings on matters involving Senator Williams.

HOUSE OF REPRESENTATIVES—*Thursday, July 23, 1981*

The House met at 10 a.m.

The Reverend Edward L. Foggs, Church of God, Anderson, Ind., offered the following prayer:

Eternal and all-wise God, Creator and Sustainer of Life: We pause to acknowledge Your gracious love and to give You thanks for Your constant and bountiful blessings.

Be present today, we pray, to give insight and wisdom to these elected representatives who grapple with momentous issues confronting our Nation and our world. Keep them ever mindful of the heritage and trust committed to them. Make them keenly sensitive to hurts of the human spirit and boldly responsive to the healing promptings of Your spirit.

As all of us seek to exercise responsible citizenship, enable us to understand and embrace Your will for our lives. Make us instruments of Your peace, love, mercy, and justice so that our journey here will please You and touch the lives of others in ways that ennoble their living.

Hear our prayer, O God, and uphold us by Your eternal spirit. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that Mr. MATSUNAGA has been appointed a conferee, on the part of the Senate, on the bill (H.R. 3982) entitled "An act to provide for reconciliation pursuant to section 301 of the first concurrent resolution on the budget for the fiscal year 1982," for section 1302 of Senate amendment and section 14003 of the House bill, vice Mr. RANDOLPH, excused.

THE REVEREND EDWARD L. FOGGS

(Mr. HILLIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HILLIS. Mr. Speaker, we have been honored this morning in hearing the inspiring words of a guest chaplain who is one of my distinguished constituents. He is Edward L. Foggs, an executive officer of the Church of God, which has its national offices in Anderson, Ind., in my congressional district.

Mr. Foggs, an ordained minister, served 10 years as pastor of the Sherman Street Church of God in Anderson, beginning in 1959. He led the church in a major expansion program, at the same time being active as a civic leader in the Anderson community. He later became director of Urban Ministries for the Church of God under its Board of Church Extensions and Home Missions.

Mr. Foggs' ministry has extended beyond his own denomination to other significant endeavors. He has served as a member of the board of directors of the National Conference of Black Churchmen, Operation PUSH, and the Urban Training Center for Christian Missions. He is currently a member of the National Religious Advisory Council of the National Urban League, and is chaplain of the local Rotary Club. For the past 13 years he has taught Afro-American culture as an adjunct faculty member of Anderson College.

I would like to add that Mr. Foggs is a man who is not entirely unknown on Capitol Hill. He is the father of a son, and four daughters—two of whom have served as interns in my Washington office. Both are now employed on Capitol Hill, in the offices of my Hoosier colleagues, Congressman SHARP and Congressman DECKARD.

It is a pleasure for me to welcome him here today, and to renew my acquaintance with him and with his outstanding family.

THE REVEREND EDWARD L. FOGGS

(Mr. SHARP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHARP. Mr. Speaker, I am delighted to join my Hoosier colleague, Mr. HILLIS, in welcoming Pastor Foggs here this morning.

As my colleague has pointed out, he has a distinguished career and has provided outstanding leadership in communities in Indiana. I want to particularly comment on his good Christian family. His daughter, Miss Lynette Foggs, has been an exceptional public servant in my office, and I just want to say that these are the kinds of citizens, Mr. Speaker, that I think make America great.

U.S. AIR DEFENSE

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, yesterday the House Armed Services Committee began the first in a series of hearings on the need for air defense in our Nation. I commend Chairman PRICE for initiating these hearings which I suggested.

I have a concern for America's air defense system. The air defense system that I speak of is simply the protection of the United States from enemy bombers.

The causes of our frail air defense program go back some 20 years. In the 1960's our military strategy adopted the policy of deterrence and, accordingly, we began to gradually dismantle our strategic or active defense system. Air defense was one of those victims.

In the 1960's, air defense had about 2,600 interceptor fighter planes. Today, we have less than 300. In the 1960's we had over 1,000 surface-to-air or SAM missiles assigned a role of guarding our key military installations. Today, we have none. In the 1960's the United States had a formidable air defense radar system. Today, that tier of radar systems known as the DEW line—or Distant Early Warning line—has gaps in it that allow an enemy aircraft to go through it without detection.

Mr. Speaker, I commend the Armed Services Committee for its initiation of these hearings, and I certainly hope that something substantial in the way of positive air defense will come about as a result.

FITTING MEMORIAL TO FRANKLIN DELANO ROOSEVELT

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, yesterday this House debated what to do about a memorial for Franklin Delano Roosevelt. I would like to make a proposal that I think is the kind of memorial F. D. R. would want more than anything made of concrete, or another statue or monument.

When he created social security, he truly cared about the elderly in America. F. D. R. insisted social security be kept separate from the rest of the budget. We allowed that to be changed under Nixon and I think that was

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

wrong. Social security was created and it was separated from the budget. In 1969, under President Nixon, we moved it into the unified budget.

The best monument to Franklin Delano Roosevelt would be to get social security out from under the unified budget so no more political and budget games will be played with it. People need to know what is really going on. We must make social security separate. We must know what is really happening. We must keep separate books. That is the way F. D. R. envisioned social security and it worked very well until 1969.

Let us give a real monument to F. D. R. I think the elderly are tired of having games played with them and F. D. R. would be shocked by this body treating social security as a bailout fund for the rest of the budget.

UPDATE ON RECONCILIATION CONFERENCE

(Mr. PANETTA asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. PANETTA. Mr. Speaker, this is a continuing update on the reconciliation conference.

Yesterday we had a number of conference meetings. In agriculture the issues related to Public Law 480 and a 9-percent cut in administration were resolved. They are continuing today on the food stamp issue and dairy cuts.

The Banking Committee completed its conference.

Energy and Commerce met on the health issues and will continue to meet today. The energy issues in that conference were largely resolved yesterday afternoon.

Education and Labor met on employment issues and resolved the CETA area and vocational education and today will be meeting on poverty programs and older Americans.

□ 1010

The Public Works Committee resolved late last night and completed its work on reconciliation.

The Government Operations Committee expects to resolve today.

For today, the following committees are meeting in conference: Agriculture, Armed Services, Education and Labor, Government Operations, Merchant Marine, and Ways and Means.

Mr. Speaker, all of us, very frankly, ought to be very proud of the process and the way it is going and the performance of the chairmen and Members on both sides of the Hill. There are some difficult challenges left, but I have every confidence that we will complete reconciliation within our timeframe.

DAILY REPORT ON CONFERENCE ACTIVITY—JULY 22, 1981, 6 P.M.

SUBCONFERENCE COMPLETED

[Dollars in millions]

Committees: House/Senate	Date completed	Savings achieved	
		Budget authority	Outlays
Foreign Affairs/Foreign Relations (37)	July 16, 1981	−$244	−$158

Mr. REGULA. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Ohio.

Mr. REGULA. I want to compliment the gentleman on his excellent leadership and the work he has done on the reconciliation conference. The gentleman has really done a superb job, and I particularly want to compliment the gentleman on keeping all the Members of the House fully informed as to what is happening in the conference.

Mr. PANETTA. I thank the gentleman.

SOCIAL SECURITY CUTS

(Mr. DASCHLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DASCHLE. Mr. Speaker, this House is now on record in opposition to the Reagan administration's intent to terminate the minimum benefit for social security recipients. Though it appears the administration is reconsidering its increased penalties for early retirement scheme, those currently receiving the minimum benefit will not

likely receive the courtesy of such a retrospective analysis.

Over 10,000 persons in my State will likely lose their minimum benefit should this cutback remain in the reconciliation bill. Most of these people are farmers or schoolteachers, in other words, those who are prevented by law from participating in social security until only recently. I consider this effort particularly a callous affront to the dignity of these older Americans. I feel that the President has been ill-advised on both of these proposals and I remain hopeful that the benefits of current social security beneficiaries will not be further tampered with.

Mr. Speaker, I received what I believe to be an excellent letter from a constituent of mine the other day stating his feelings about the proposed social security cuts. Mr. Leggett's statements echo a number of letters and calls my office has received in recent weeks since the social security changes were first proposed. Following is the text of the letter:

JULY 14, 1981.

DEAR MR. DASCHLE: There are a few things in President Reagan's budget, and tax cuts that bother me quite a bit. I am a senior citizen, having retired in 1974, at the age of 62 years old. I believe the age limits for retirement should be left as they are. Many men develop some kind of physical problems that force them to retire early, or at least by age 65. In these times I see very little reason to tamper with Social Security. When we were working the Social Security deductions were just as hard on us, as it is on present day workers, because we were making considerably less.

There are many other things that he, and I, don't agree on. I believe these issues should be non-partisan in scope, and a lot of common sense should be used in deciding the final outcome. I am one small voice among many. I do know that most of the tax money that is collected, comes from the little people, because there are so many of us around the country. I still pay at least half as much income tax, as I did before I retired. Other than a small private pension, my income is from interest on money I saved over the years, for the purpose of being able to live comfortably when I did retire. I also get a Social Security check. Inflation has sure bit into us retirees.

You probably get lots of letters like this one, but I feel that many people were in the same boat that I am, so I would vent my feelings for myself, and all the rest.

Sincerely yours,

EVERETT E. LEGGETT,
Aberdeen, S. Dak.

WALL STREET EXPECTS HIGH INTEREST RATES

(Mr. PEASE asked and was given permission to address the House for 1 minute.)

Mr. PEASE. Mr. Speaker, I am sending out a dear colleague letter today I would like to call to the attention of my colleagues which shows a cartoon of President Reagan trying to pull a bull out of a hat for Wall Street, but actually it is a bear that comes out instead. For all of the talk about balanced budgets and the new economic program, Wall Street simply is not buying it. It expects to have high interest rates fueled by the big deficits built into the Reagan budget over the next 3 years.

Larry Chimerine, chairman and chief economist of Chase Econometrics, is the latest to predict a budget deficit as high as $75 billion by 1984, in contrast with the balanced budget predicted by the President. Independent economists are unanimous in predicting budget deficits of that size in fiscal year 1984.

I think we need to be careful about building in a large tax cut for 1984.

SUBSIDIZED BOY SCOUTS?

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, when I was a Boy Scout, the small troop I was in used to scrape together enough money, either by donation or fundraising events, and plan for a modest little camping outing that we took every month or so. This activity was part of what it meant to be a Boy Scout.

Recently, I was shocked to learn of a tax-supported Boy Scout program set up by the Cook County Juvenile Court System in Illinois, which places repeat juvenile offenders in two specially crafted troops, all expenses paid. I was told that all of the juveniles in this program have been involved in serious or violent crimes, averaging almost five previous arrests with court referrals, and that 40 percent of those chosen do not even complete the program. These special Scouts are run by paid, full-time scoutmasters who make court appearances for the Scouts, take extravagant outings three weekends out of every four during the summer to places like Michigan, Wisconsin, West Point, and New Mexico. A large part of the funding from this program is subgranted down to the Boy Scouts from the Law Enforcement Assistance Administration, which contributes about $1,600 per participant, in addition to other State and local sources. These LEAA Federal grants alone have added up to $110,628 for the first year of the experimental program in 1979, $82,971 in 1980, and $58,387 for this year—all for two Boy Scout troops with a total of 50 members.

This program totally distorts what it means to be a Boy Scout—that is, taking part in a volunteer organization which stresses the principles of honesty, hard work, and thriftiness, among other attributes. I do not think we should be using Federal tax dollars for questionable programs like this, especially when there is need for help in more essential services to the public.

You can be sure I have written to LEAA for an explanation.

SPECIAL INTEREST BOONDOGGLE

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, the Ways and Means Committee has adopted a $3.3 billion bailout for some big businesses as a part of its tax bill. I will be seeking authorization under the rule to offer an amendment to strike this provision from the bill when it reaches the floor.

The bailout provision allows only certain select "distressed industries" to carry back unused investment credits all the way to 1962, when ITC's were created, while the rest of business and industry can only go back 3 years. I have contacted the major business organizations and not one of them supports this provision. The Chamber of Commerce, Business Roundtable, National Association of Manufacturers, American Council for Capital Formation, and National Federation of Independent Business all have refused to endorse this special interest boondoggle.

Only this new class of superindustries which intend to slip into the Treasury unnoticed to raid it for $3.3 billion evidently support it and few of them do so publicly. Since there were no hearings on it, these business organizations have not considered or endorsed it, and it is special interest legislation, Members should have the right to debate and vote on it separately through the amendment I will offer.

□ 1020

THE TAX BILL

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, let me say in the beginning, it is always a delightful thing to see a colleague from Atlanta sitting in the chair.

Mr. Speaker, next week, this House will vote on a historic tax bill. President Reagan will offer us an opportunity to genuinely cut spending and cut taxes, fight high interest rates and create jobs.

Mr. Speaker, the bill which has been reported out by the Committee on Ways and Means, which is supported by the liberal Democratic leadership, is, in the long run, a tax increase bill. Any Member who votes for it should realize full well in 1982 his taxpayers or her taxpayers will have an opportunity to decide whether or not they wish to be represented by someone

who is in fact voting for a tax increase bill which will lead to higher taxes by 1984.

REAGAN TAX CUT IS NEEDED NOW

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, there is really only one reason why the majority wants to limit the tax cut to 2 years. They are doing it because they want to have the extra money to spend in 1984.

Can anybody who has been here more than 2 years doubt that Congress will spend every last dime of the money it takes in through taxes, and then some?

The only way to cut Government spending and bring inflation under control is to enact a meaningful cut in taxes. The American people understand this. They know the way to discipline a free-spending son or daughter is to cut their allowance. The way to discipline a free-spending Congress is to limit its revenues and then require that it live within its means.

A 2-year tax cut is not good enough. At best it will mean a momentary pause in the race to spend every dollar in the Treasury. We need the Reagan tax cut now.

URGENT SUPPLEMENTAL APPROPRIATION FOR THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

Mr. NATCHER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the joint resolution (H.J. Res. 308) making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981; and I would like to state at this time, Mr. Speaker, that this meets with the approval of the Committee on Appropriations, the President, the Office of Budget and Management and the Department of Health and Human Services. There is no controversy about this matter at all, Mr. Speaker.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. WALKER. Mr. Speaker, reserving the right to object, I would like to inquire of the gentleman from Kentucky (Mr. NATCHER), if I could, why in this language, which is general language going to health services, that the language that the House has regularly adopted referring to abortion under the so-called Hyde amendment, is not included in this particular legislation?

It seems to me that we are providing an additional amount for health services with no restrictions and that there is no language in here which would keep the health services bureaucracy of the Department of Health and Human Services from performing abortions with this money.

Mr. NATCHER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Kentucky.

Mr. NATCHER. In answer to the gentleman's inquiry, this request is for the Department of Health and Human Services in the operation of the 8 Public Health Service hospitals, the 27 clinics, and for that reason, the language that the gentleman refers to is not necessary in this supplemental request.

Mr. WALKER. Further reserving the right to object, Mr. Speaker.

Mr. NATCHER. If the gentleman would pardon me for interrupting, on the regular bill for fiscal year 1982, for the Department of Education, the Department of Health and Human Services, and the Department of Labor, the provisions concerning abortion in this regular bill would apply to the operation of the Public Health Service hospitals and the clinics until they are phased out and to all supplemental bills.

This is a phasing out proposition whereby they will go out of existence and it is not necessary to have that language at this time.

The gentleman from Pennsylvania knows the position of the gentleman from Kentucky and the gentleman from Massachusetts, in regard to the abortion language. That has been established all down through the years and the gentleman can take the word of the gentleman from Massachusetts and my word that the gentleman's interest will be fully protected.

Mr. WALKER. I thank the gentleman. The problem that I have, and the gentleman can correct me if I am wrong, is that this is for closedown costs for a particular public service hospital that is not specified in the legislation and neither is there any specification that this additional money over and above the supplemental that was previously passed by the House has the antiabortion protections in it.

I know, for instance, when we passed the previous supplemental we had the protection language in it with regard to abortions. This supplemental would seem to fall into the same category as that legislation and I am wondering why that language could not be included in this particular bill.

Mr. NATCHER. If the gentleman will yield further, I would like to say to the gentleman from Pennsylvania that any language in the regular bill for these three Departments would apply for any supplemental appropriation request and that is the major reason why it is not necessary at this time.

The language in the regular bill and under the continuing resolution, would apply to the urgent supplemental request now before the House, and to all such bills for these three Departments.

Mr. WALKER. Further reserving the right to object, and I ask the gentleman because I have the greatest respect for him, but, I ask the gentleman, why in that case did we include the abortion language in the previous supplemental if in fact the overall law applies without regard to the supplementals.

Mr. NATCHER. If the gentleman will continue to yield, the gentleman will recall that at that time we changed the language somewhat and it was in the continuing resolution. The gentleman is correct and the matter that he has called up at this time is proper in every respect and his interest will be fully protected.

To extend the continuing resolution was the reason why we placed the language back at that time.

□ 1030

Mr. WALKER. Mr. Speaker, further reserving the right to object, I would ask the gentleman, could we not include the language in this legislation just to provide that protection and thereby assure the Members of this House there is no problem?

Mr. NATCHER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Kentucky.

Mr. NATCHER. It is not necessary. The language that the gentleman is concerned about applies to this supplemental request like it would apply to any other supplemental request until we pass the regular bill for fiscal year 1982, and the gentleman has a good idea now about the language that will be in that bill. We would hope that the gentleman would not object. This is an urgent matter pertaining to 4,000 employees of the Public Health Service hospitals. It applies to these eight hospitals that are of great concern to a great many Members in the House.

This is a request direct from the President, sent up here on July 16. We held meetings on the 17th, marked it up the same day. We would hope that the gentleman would not object to the action that we request at this time.

Mr. WALKER. Further reserving the right to object, just let me clarify for the record, if this bill were to pass the House, is the gentleman saying for the legislative record and stating to the gentleman from Pennsylvania that all present language with regard to abortion would apply to every dime that is in this bill and that, therefore, the Hyde amendment would apply to

this bill just as it applies to every other dollar which is in the budget of the Department of Health and Human Services?

Mr. NATCHER. Mr. Speaker, will the gentleman yield further at this point?

Mr. WALKER. I yield to the gentleman.

Mr. NATCHER. I would like to say to the gentleman from Pennsylvania (Mr. WALKER) that the gentleman is correct. Every word the gentleman uttered is correct. It will apply. We will see to it on this committee that every word of it applies.

The gentleman is correct.

Mr. WALKER. I thank the gentleman.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, here is what happened. The administration asked for a $36 million rescission. We went along with the administration. They now realize that they do not have enough money to carry on until October 1 for these hospitals. These eight hospitals are going to close.

This has nothing to do with abortion. We do not need the gentleman prodding us. The gentleman and I have always put the Hyde language in our appropriations bill. The Hyde language is in there. This is merely a little bookkeeping item to keep 3,800 Public Health Service employees on the payroll who otherwise will be furloughed August 15. And, 497 temporary employees will be furloughed August 1 unless we provide this money.

We are not repealing any law that we passed in this Congress in the supplemental rescissions bills. The terms of that bill apply to these funds as well. I give you my word on that.

Mr. Speaker, let me further say that none of us on the subcommittee were pleased at this request for a supplemental appropriation on the Public Health Service hospitals.

We were displeased because little more than a month ago this committee approved a $36 million rescission requested by the administration to be taken from the hospitals. Now, less than 60 days later, we are asked to provide an additional $16.8 million to keep the hospitals and clinics open through the end of the fiscal year. Clearly poor planning and faulty estimates of potential revenues have been badly handled.

In spite of my displeasure with the way the Public Health Service has estimated its operating costs and needs, I do support the supplemental request before us at this time.

I support this supplemental because if we fail to make the $16.8 million available, more than 3,800 Public Health Service employees will be furloughed on August 15. And, even prior to that on August 1, 497 temporary civil service employees will be laid off. They will lose their jobs and their livelihood with very little advanced notice. Further, I am concerned that adequate plans have not been made to accommodate needy patients that may be displaced by a rushed closing.

And, if we look at the slightly longer term picture for the hospitals and the communities they serve, it also does not make good sense to allow them to close prematurely. Right now four communities have submitted preliminary plans to take over the hospitals in their areas. Other communities are expected to draw up plans before long. If the hospitals are forced to close and then reopen, the cost to these communities would be prohibitively high. In addition, the loss of staff from premature closure would make restaffing by the communities particularly difficult.

For these reasons I urge my colleagues to support this supplemental.

Mr. WALKER. Further reserving the right to object, I think the gentleman from Massachusetts (Mr. CONTE), because of his long involvement with this issue, knows this is a matter of great concern to many Members of this House and many people in the body politic. I am very, very concerned about general language with regard to health services. I am pleased to get the assurances of both the gentleman from Massachusetts (Mr. CONTE) and the gentleman from Kentucky (Mr. NATCHER) that we are not, in fact, changing anything with regard to the law, that every penny of this money—the $16,800,000—would be covered by the Hyde amendment in this bill; and with those assurances, I shall not object, but I would make the point that we are extremely concerned about any language in general with regard to health services that might in any way whatsoever begin to impact on the abortion question.

I know the gentleman shares that concern, and the gentleman from Kentucky shares that concern.

Mr. CONTE. We are with you 100 percent.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. MILLER of Ohio. Mr. Speaker, reserving the right to object, I do this just to clarify a point and see if there is a lesson in this particular legislation.

I am not opposing the legislation, but I see where the total budget for these facilities is comprised of appropriated funds plus reimbursement from patients who do not qualify for free care.

Unfortunately, reimbursements have fallen substantially below the level anticipated earlier in the year, leaving a critical deficit in operating funds. My question is: Why did the reimbursements fall? Are these people covered by other Federal programs and, therefore, they could go to a hospital and not be charged at all, and then the Federal Government would not have the reimbursement coming back to the Treasury?

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, there are two basic reasons why there is a shortfall in revenues for the operation of the Public Health Service hospitals. New York is holding back on the payment of medicaid reimbursements to the Staten Island Public Health Hospital in New York. More critical is the fact that because the hospitals are slated to close, patients are already going elsewhere for care and therefore needed revenues to operate the hospitals have fallen way off.

Mr. MILLER of Ohio. The State is holding back?

Mr. CONTE. On medicaid payments.

Mr. MILLER of Ohio. Will those payments be forthcoming in the future?

Mr. CONTE. We asked that of the witness who represented the Health and Human Services Agency before us last week, and what happened, really, is that once they found out that these hospitals were going to be closed, then they started foot dragging. Efforts are being made to collect past due revenues. As I said, the other problem is there are not as many patients in the hospitals right now. So there are fewer revenues coming into the hospitals.

Mr. MILLER of Ohio. That is part of my question. There are not as many patients in the hospital, but have they found other ways in order to enter a hospital through other Federal programs and, therefore, they would not have to pay anything? I am just trying to clarify the record as to why the reimbursements are not coming into the Federal Treasury.

Mr. CONTE. They are negotiating. I think they have four of these hospitals now that the States or communities will take over. The one in New Orleans, they are negotiating with the Veterans' Administration; the one in Seattle, they are negotiating with the Veterans' Adminstration. They hope to have them take over these hospitals. And I should add that the patients who use these facilities will be provided with proper and adequate care through contract arrangements with other providers or through care provided by their branch of the military.

Mr. MILLER of Ohio. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 308

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sum is appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 1981, namely:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES ADMINISTRATION

HEALTH SERVICES

For an additional amount for "Health Services", $16,800,000: *Provided,* That not more than $145,199,000 shall be available under this head for operation of Public Health Service hospitals and clinics.

Mr. NATCHER. Mr. Speaker, the bill which we bring to the House today, House Joint Resolution 308, provides for an urgent supplemental of $16.8 million for the Public Health Service hospitals and clinics of the Department of Health and Human Services. These funds will be used to augment the operating budget of these health care facilities in order to avoid the premature closure of the system approximately 6 weeks from today. This supplemental was proposed by the President on Thursday, July 16. The Subcommittee on Labor, Health, and Human Services and Education held a hearing on July 17. Immediately following the hearing, the subcommittee recommended unanimously that the full amount of the President's request be approved.

As most Members know, there are currently 8 hospitals and 27 clinics in the PHS system. The hospitals are located in Boston, Staten Island, Baltimore, Norfolk, New Orleans, Nassau Bay (Texas), San Francisco, and Seattle. On March 10 the President submitted a budget to Congress which included a proposal to close the last of these hospitals or transfer them to local communities in fiscal year 1982. The Congress has approved the basic provision of the closure proposal in its action on the 1981 rescission bill and in its action in the reconciliation bill which is currently in conference. Approval of this supplemental does not alter this decision. Additional funds are required in 1981, however, if this closure is to be conducted in an orderly and responsible fashion and if local communities are to be given a chance to take over hospitals as proposed by the President and agreed to by the Congress.

When the President submitted his proposal in March it was estimated by the administration that $234.3 million would be required to run the hospital system in 1981. The 1981 rescission/supplemental bill put this budget in place by approving a rescission of $36 million in the general operating budget of the hospitals. In addition a supplemental of $40 million was approved in the same bill to begin implementation of the closure plans. Of the $234.3 million required in 1981, $168.4 million was to come from appropriated funds and $65.9 million from fees paid into the system by nonentitled users, principally active duty and retired military and their families. Unfortunately, nonappropriated revenue to the system has fallen short of expectations as military and other paying patients have begun to find alternative sources of care. In addition the Federal court in San Francisco temporarily delayed the Department's plans to limit contract care to emergencies. The result is that the system is short $16.8 million in its 1981 operating budget. Without this supplemental, the hospitals will have to close by September 1 rather than during 1982 as originally planned. Furlough notices have already been sent to its 4,000 employees.

Some persons may ask why we do not let the system close early if it is going out of business anyway. The answer is twofold. First, I believe there is a responsibility to carry out closure in an orderly fashion which is fair both to employees of the system and to patients who have not yet found alternative sources of care. Second, the Congress has made a commitment to give local communities a reasonable opportunity to take over these facilities in 1982 if they want them. Takeover proposals have already been submitted by five of the communities and these would all be seriously jeopardized by premature closure. The Congress commitment to helping these communities is clearly stated in the House report and conference report accompanying Public Law 97-12 and I quote:

Page 207 of House Report 97-29: "The Committee has heard testimony from the Administration indicating that several communities are considering takeover of a particular facility . . . The Committee will seriously consider a request to add funds to upgrade such a facility for community use."

Page 69 of House Report 97-124: "The conferees are agreed that any community may submit a plan for community use of these facilities and that no hospitals should be closed prior to October 1, 1981."

I believe that we have the responsibility to honor this commitment and I strongly urge my colleagues to approve this supplemental.

Mr. LIVINGSTON. Mr. Speaker, I support House Joint Resolution 308, making urgent supplemental appropriations for the Department of Health and Human Services. The $16.8 million in this unusual and very urgent request is vital to keep the 8 Public Health hospitals and 27 satellite clinics open until the end of the fiscal year. Most importantly, approval of this request will prevent the premature furlough of almost 4,000 employees of the hospital system on August 15.

The Department of Health and Human Services notified Congress that this shortfall in funding became apparent only after we had already passed the 1981 supplemental/rescission bill. It is unfortunate and beyond my comprehension why the Public Health Service was not able to accurately estimate the actual costs necessary to keep the hospitals and clinics open until October. In any event the shortfall exists and we must act before the recess to avoid additional hardship being laid on approximately 4,000 employees of the Public Health Service system.

The administration and Congress in moving ahead with the closure of these hospitals have made a commitment to affected communities and employees to keep these facilities open until the end of the fiscal year. The 1981 supplemental/rescission bill approved in June allows Congress to consider future appropriations in the event affected communities or private or public entities express interest in taking over a hospital in their area. Both the House and the Senate reconciliation bills now pending before Congress contain language allowing interested parties to submit proposals to the Secretary of HHS for takeover of facilities. In addition, the Secretary is given discretion under both bills to keep hospitals open into 1982 in order to facilitate orderly transfers to those parties who have submitted a takeover proposal. With these commitments in mind, it is incumbent upon us to act favorably and as quickly as possible on a solution to this funding shortfall for the Public Health hospitals. This supplemental provides us with a quick solution. Hopefully the Senate will follow the House lead and expedite this urgent matter. If not, the House report to House Joint Resolution 308 clearly states that the Appropriations Committee would be willing to consider a reprograming request as an alternate solution to this problem and would do so on an expedited basis.

I concur with this language and support any effort, including House Joint Resolution 308, which will resolve this issue favorably and quickly.

Mrs. BOGGS. Mr. Speaker, I rise in support of House Joint Resolution 308, a bill making an urgent supplemental appropriation for the fiscal year ending September 30, 1981, for the Department of Health and Human Services in an amount of $16,800,000. I want to thank Chairman NATCHER and the subcommittee members and of course, Chairman WHITTEN and the full committee members, with whom I have the privilege of serving, for their

prompt consideration of this emergency supplemental request.

This $16.8 million needed to achieve the fiscal year 1981 transition is well within the realm of possibility and well within the contemplation of both the administration and the Congress as they both dealt with the possibility of local control. Without the additional money, about 4,000 Public Health Service employees, including doctors and nurses, will be furloughed for about 6 weeks beginning on August 15, and as many of my colleagues know, about 400 of these employees are employed at the New Orleans PHS Hospital.

Mr. Chairman, although the PHS system is scheduled to close September 30, there is a provision in the supplemental appropriations and rescissions for 1981, on page 207 which incorporates the following language and I quote:

> The committee has heard testimony from the administration indicating that several of the communities in which these hospitals are located are considering the possibility of taking over operation of a particular facility.
>
> Should any of these communities make a firm commitment to take over one of the hospitals, the committee will seriously consider a request to add funds to the 1982 appropriations bill to upgrade the facility for community use.

I urge you to support the promise Congress has made to these communities. The transfer of control of the hospital to community control would necessitate the hospital carrying out the tentative plans regarding current employees. This would have a significant effect on facilitating such a transfer.

While I have strong concerns regarding the closing of the PHS system, one of the many side effects of the drastic budget action the Congress has chosen to take this year, the least we can do is to see that the termination of this system is carried out in a rational, sympathetic manner.

Mr. Chairman, I urge the passage of the supplemental appropriations for the Department of Health and Human Services for fiscal year 1981.

● Mr. DICKS. Mr. Speaker, I rise in support of this emergency supplemental appropriation and urge my colleagues to support this vital measure.

As my good friend from Kentucky has explained, this emergency supplemental is absolutely essential because the Public Health Service hospitals and clinics are providing necessary and valuable health care to thousands of Americans.

Additionally, if this supplemental is not approved, communities that want to take over these hospitals and continue their operations will be denied the opportunity to do so.

Both Congress and the administration support allowing communities to take over these hospitals. The Assistant Secretary for Health at the Department of Health and Human Services recently reiterated the administration's commitment to community takeover on July 17, and Congress expressed their support for this approach in the report accompanying the fiscal year 1981 appropriations/rescission bill and in the Omnibus Reconciliation Act.

At this time, many communities have expressed serious interest in assuming control over their PHS Hospital. All have submitted plans for community takeover to the Secretary of HHS, who is now reviewing them. If these plans are viable, the Secretary will approve the transfer of these facilities to the communities.

In my view, to close these facilities prior to the end of this fiscal year would be extremely unfair—especially to cities like Seattle, Wash., which has worked diligently and at considerable expense for community takeover of its hospital.

The city of Seattle has submitted a plan for community takeover of the Seattle PHS hospital because the hospital serves a vital role in the local health-care delivery system. The hospital has no surplus beds, serves over 100,000 persons through its facilities and clinics, and is a major research and training center in the Pacific Northwest.

If this supplemental appropriation is not approved, all temporary civil service employees at his hospital will be terminated on August 1, and all civil service employees, with the exception of caretaker personnel, are to be furloughed on August 15.

If these employees are furloughed, all PHS hospitals will close and the possibility for community takeover of the hospitals will end.

In my view, this would be interpreted as a demonstration of extreme insensitivity to local health-care needs by the Congress.

Mr. Speaker, by its action on the fiscal year 1981 appropriations and rescission bill and on the Omnibus Reconciliation Act, this Congress made a commitment to communities, like Seattle, to continue the service and operations of PHS hospitals while the Secretary of HHS reviewed their plans for a community takeover and arranged for viable transfers to local control of these hospitals.

This Congress also made a commitment to provide quality, effective health care to this Nation's citizens.

My good friends, Chairman NATCHER and Mr. CONTE, and the other members of the Appropriations Committee have worked hard to meet these commitments by approving this legislation.

These individuals must be commended for their diligence and efforts over the past week and for their commitment to the citizens and communities of this Nation.

Mr. Speaker, for these reasons, I strongly urge my colleagues to support this necessary appropriation.●

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the House Joint Resolution 308 just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4241, MAKING APPROPRIATIONS FOR MILITARY CONSTRUCTION FOR DEPARTMENT OF DEFENSE FOR FISCAL YEAR ENDING SEPTEMBER 30, 1982

Mr. GINN, from the Committee on Appropriations, submitted a privileged report (Rept. No. 97-193) on the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

Mr. REGULA reserved all points of order on the bill.

NATIONAL CHILDREN'S DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 191) designating August 8, 1982, as "National Children's Day," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. WALKER. Mr. Speaker, reserving the right to object—and I shall not object—it certainly seems like worthwhile legislation that the gentleman is bringing to the floor, but I would like to give the gentleman an opportunity to explain the bill for the membership of the House.

I yield to the gentleman for that purpose.

Mr. GARCIA. I thank the gentleman for yielding.

Mr. Speaker, what is significant about this bill, besides the fact that it

does honor children, this resolution was introduced by a late Member of this body from the Ohio delegation, Congressman Tennyson Guyer; and this was one of the last acts that he introduced in Congress. I think it is fitting and appropriate that today this Congress act not only because of the real significance of the resolution but also for the gentleman himself, Mr. Guyer, of Ohio.

House Joint Resolution 191 designates August 8, 1982, as "National Children's Day." America's children represent new life and hope for the future of the Nation and the world and should be regarded as this Nation's most precious resource. This Nation should affirm its commitment to focus on the joys, the rights, and the needs of children so as to create a better life for them.

Mr. WALKER. I thank the gentleman for that explanation. We appreciate the gentleman from New York bringing this to the floor. It is a fitting tribute and a memorial to Tenny Guyer, who served this body and his constituents so well, to have this National Children's Day approved.

Further reserving the right to object, I yield to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Speaker, I want to commend the gentleman from New York and the committee for bringing this resolution to the floor. I served with our former colleague Tenny Guyer as a member of the Ohio Senate and also here.

□ 1040

Mr. Speaker, I know that Tenny Guyer had a long-time dedication to legislation that would improve the quality of life for children in this Nation. I think it is very appropriate that this type of resolution be brought before us, and that his name be associated with it. This is a fitting legislative tribute to his compassion and concern for the youth of our Nation.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from New York under my reservation.

Mr. GARCIA. Mr. Speaker, I would like to make just one additional point as it relates to this resolution.

A group of youngsters from the district that was represented by Mr. Guyer of Ohio came to my office and visited with me. We talked about this resolution, and I think probably what triggered it as far as I am concerned and the committee is concerned was the enthusiasm that these children expressed as it related to this resolution because it came out of an eighth grade class in Mr. Guyer's congressional district.

They had made some suggestions that because Mr. Guyer had passed away, his replacement would be able to introduce this resolution, but I felt, after checking with the Parliamentarian and finding that it was appropriate to introduce it and to pass it in Mr. Guyer's name, that we should go forward, and so we did.

Mr. Speaker, I thank the gentleman for yielding.

Mr. WALKER. Mr. Speaker, again I thank the gentleman from New York (Mr. GARCIA) for his interest in this matter. It appears that he has indeed helped in memorializing Tenny Guyer in a way that Tenny himself, I think, would have liked.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 191

Whereas America's children represent new life and new hope for the future of the Nation and the world;

Whereas children should be regarded as this Nation's most precious resource, and be assured of proper productive citizens and responsible leaders of tomorrow;

Whereas children have a right to quality education, freedom from hunger, freedom from poverty, freedom from discrimination, and the legacy of a world at peace;

Whereas the Nation's adults have an obligation to create a better world which is conducive to the well-being of the children of the United States, a world in which children can feel secure in the knowledge that they will have the opportunity to achieve their maximum potential as adults; and

Whereas the Nation should affirm its commitment to focus on the joys, the rights, and the needs of children so as to create a better life for them: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That August 8, 1982, is designated as "National Children's Day" and the President is requested to issue a proclamation commemorating the occasion and calling upon the people of the United States to observe that day with appropriate ceremonies and activities.

Mr. WEBER of Ohio. Mr. Speaker, today the House adopted House Joint Resolution 191 which designated August 8, 1982, as National Children's Day. This bill was introduced by our late Member Tennyson Guyer on February 25, 1981, and I am sure that we all agree with Mr. Guyer that children should be regarded as this Nation's most precious resource.

Honoring the Nation's children in this way also serves to honor the memory of Congressman Guyer.

I wish to commend my colleague, the gentleman from New York (Mr. GARCIA), for bringing this bill to the floor for passage. I was deeply saddened by the untimely death this year of our colleague in Congress and fellow Ohioan, Tenny Guyer. He will be missed by his family and friends, his colleagues in Congress, and by the many people in western Ohio, who knew and loved him well.

When I came to the House this year, as a freshman Member, I was looking forward to joining with Tenny to work for Ohio and the country. I was hoping to take advantage of his experience and his wisdom in order to make the work of a newcomer to Washington in these critical times that much easier.

Now, with his passing I hope that I can gain some inspiration from his memory and pursue my duties in Congress with the same spirit and love of the job that he brought to the office.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1982

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 185 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 185

Resolved, That during the consideration of the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI are hereby waived: beginning on page 4, line 11 through page 5, line 2; beginning on page 6, line 1 through page 7, line 23; beginning on page 15, line 21 through page 16, line 6; beginning on page 16, line 8 through page 27, line 2; beginning on page 28, line 22 through page 30, line 3; and beginning on page 30, line 22 through page 31, line 4. It shall be in order to consider en bloc amendments to the bill printed in the Congressional Record of July 17, 1981, by Representative Derrick of South Carolina, and said amendments shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole.

The SPEAKER pro tempore (Mr. TRAXLER). The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes for the minority to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 185 is a rule to facilitate consideration of H.R. 4144, making appropriations for energy and water development for the fiscal year ending September, 30, 1982, and for other purposes. This resolution waives points of order against designated sections of the bill for failure to comply with clause 2 of rule 21 of the rules of the House. The bill is, of course, open for amendment and the time of general debate will be determined by unanimous consent.

Clause 2 of rule XXI prohibits both unauthorized appropriations and legislation in an appropriations bill. The waiver applies only to sections of the bill that are specified in the rule, and is primarily necessary due to the fact that appropriations are provided in this bill for several programs whose authorizations have reached some stage of the legislative process, but have not yet been enacted into law. The bill also contains provisions that constitute legislation and which require waivers for their consideration. I submit for the CONGRESSIONAL RECORD a copy of the letter from the chairman of the Committee on Appropriations outlining the need for this waiver.

In addition, the resolution provides that the amendments printed in the CONGRESSIONAL RECORD of July 17, 1981, by Representative DERRICK, shall be considered en bloc and that this amendment shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole. This provision enables the two amendments which address important and related issues within the State of South Carolina to be considered at the same time even though they appear in different paragraphs within title 3 of the bill.

Mr. Speaker, H.R. 4144 provides appropriations of $3.1 billion for Army Corps of Engineers civilian projects, $838 million for the Bureau of Reclamation in the Department of the Interior, $8.3 billion for the Department of Energy, and $821 million for seven independent agencies, including the Nuclear Regulatory Agency and the Appalachian Regional Commission.

The total new budget authority provided by this legislation is $13.1 billion which is $232 million below what the President requested.

Mr. Speaker, I urge the adoption of House Resolution 185 so that we may proceed to the consideration of this very important appropriations bill.

Mr. Speaker, at this point in the RECORD I include a copy of a letter dated July 14, 1981, from the chairman of the Committee on Appropriations to the chairman of the Committee on Rules, as follows:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., July 14, 1981.

Hon. RICHARD BOLLING,
Chairman, Committee on Rules, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The Committee on Appropriations on July 14 reported the Energy and Water Development Appropriation Bill for fiscal year 1982. A number of paragraphs in the bill are lacking completed legislative authorization. In addition, bill language which might be considered as legislative in nature is required for certain accounts to continue the efficient execution of ongoing programs and projects. Therefore, we request a rule waiving points of order against the following sections of the bill for possible failure to comply with the provisions of Clause 2 of Rule XXI.

In Title I of the bill, under Special Recreation Use Fees, language is included to continue the availability of funding from the special account established by the Land and Water Conservation Act of 1965, as amended (16 U.S.C. 4601) for the Corps of Engineers. This language is necessary to ensure that certain provisions of P.L. 96-514, Department of the Interior and Related Agencies Appropriation Act, 1981, are not applied to Corps of Engineers programs funded in this appropriation bill.

Titles I and II also contain certain general provisions which may constitute legislation in an appropriation bill. These provisions have been reviewed with the appropriate legislative committees and are considered necessary in this bill to permit timely actions required for the efficient execution of ongoing public works programs and projects of the Corps of Engineers and the Bureau of Reclamation.

For Title III, Public Law 95-91, along with other legislation, provides generic authority for Department of Energy programs funded in the bill. However, the annual authorizing legislation contemplated in section 660 of P.L. 95-91 is in various stages of the legislative process. Differing versions of authorization legislation pertinent to this title have been reported in H.R. 3505 by the Interior and Insular Affairs Committee and in H.R. 3146 and H.R. 3447 by the Science and Technology Committee; H.R. 3505 and H.R. 3447 are presently pending before the Energy and Commerce Committee. H.R. 3413 was reported by the Armed Services Committee and passed by the House on June 11. Each bill contains portions of the FY 1982 authorization for DOE programs. Two general provisions are included in Title III to permit account consolidations for more efficient management of authorized programs.

In Title IV, the Nuclear Regulatory Commission and Water Resources Council programs for FY 1982 are not yet authorized. Differing versions of the NRC annual authorization were reported in H.R. 2330 by the Interior and Insular Affairs Committee on April 10 and the Energy and Commerce Committee on June 9. Authorization for the Water Resources Council was reported by the Public Works and Transportation Committee in H.R. 3432.

We should also note that the Omnibus Budget Reconciliation Act of 1982, H.R. 3982, contains several provisions which may constitute authorization for, or limitations on, certain programs funded in the bill. To the extent we can determine, the bill is within the provisions of H.R. 3982.

It is unlikely that authorizing legislation for those sections of the bill mentioned above will be enacted before House consideration of this bill is necessary. Under the circumstances and in the interest of orderly procedure, we respectfully request a hearing before your Committee to seek a rule waiving all points of order under Clause 2 of Rule XXI for the following:

Title I—Special Recreation Use Fees and General Provisions
Title II—General Provisions
Title III—Department of Energy
Title IV—Independent Agencies—Nuclear Regulatory Commission and Water Resources Council

We greatly appreciate your continued support.

Sincerely,
JAMIE WHITTEN, *Chairman.*

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 185 is a rule to facilitate consideration of H.R. 4144, the Energy and Water Development Appropriations bill for fiscal 1982. The resolution waives points of order that would otherwise lie against specified provisions of the bill for failure to comply with clause 2 of rule XXI.

Clause 2 of rule XXI prohibits appropriations for any expenditure not previously authorized by law as well as prohibits legislation in an appropriations bill, and the waiver provided by this rule is necessary because 35 paragraphs of H.R. 4144 have either not yet been authorized or do constitute legislation.

The 35 paragraphs are specified in the resolution, and at the appropriate time I will ask unanimous consent to place in the RECORD a brief summary of the provisions of the bill for which waivers of points of order are provided for in this resolution.

Mr. Speaker, in addition to granting the waivers as requested by the Committee on Appropriations, the Committee on Rules provides for the en bloc consideration of amendments printed in the RECORD of July 17 by Representative DERRICK. These amendments shall not be subject to division either in the House or in the Committee of the Whole. It should be pointed out to the Members, I think, that when the Committee on Rules met on July 16 we did not have the amendments to be offered by Mr. DERRICK before us nor were we given an explanation of them. Other than that, we were told, the amendments are related to South Carolina.

In essence, this rule provides for orderly consideration of a very important appropriations bill, where we once again find ourselves taking up the bill before the authorization bills have been passed.

As to the bill itself, H.R. 4144 appropriations $13.1 billion for the Energy and Water Development functions of the Corps of Engineers, the Department of Energy, the Department of

the Interior Bureau of Reclamation and several related agencies in fiscal 1982.

The amount provided in the bill is $232,313,000 less than the budget estimate in the administration request, and the Appropriations Committee report notes that the bill is $533 million under the new budget authority target set forth in the first concurrent resolution on the budget.

Mr. Speaker, the bill continues the downward trend of recent years in funding for the Army Corps of Engineers and the Department of the Interior Bureau of Reclamation and due to our general economic conditions, no new construction starts are contained in H.R. 4144, even though 30 critically needed projects are authorized, engineered and ready to be started.

There was no disagreement about the necessity for providing these waivers in the Committee on Rules, and I urge the adoption of the resolution.

At this point in the RECORD, Mr. Speaker, I include a brief summary of the provisions of H.R. 4144 for which the waivers contained in the rule apply.

PROVISIONS OF H.R. 4144 FOR WHICH WAIVERS OF POINTS OF ORDER ARE PROVIDED FOR IN HOUSE RESOLUTION 183

In Title I, *Special Recreation Use Fees.* The provision states that notwithstanding certain language in the fiscal year 1981 Interior Appropriations Act, recreation use fees deposited into the Land and Water Conservation Fund shall be available for appropriation to the Corps of Engineers.

General Provisions. Contains provisions dealing with seven current water projects or waterways and a provision changing the name of a lake in Oklahoma.

In Title II, *Department of Interior General Provisions.* Contains a provision dealing with the availability of funds appropriated to the Colorado Salinity Control Project for pumping capacity at the Yuma Mesa Pumping Plant.

In Title III, *Department of Energy.* None of the funds appropriated in this title have yet been authorized in law. Differing versions of authorization legislation pertinent to this title have been reported in H.R. 3505 by the Interior and Insular Affairs Committee and in H.R. 3146 and H.R. 3447 by the Science and Technology Committee; H.R. 3503 and H.R. 3447 are pending before the Energy and Commerce Committee. H.R. 3413 was reported by the Armed Service Committee and passed by the House in June 11. Each bill contains portions of the fiscal year 1982 authorization for DOE programs.

In Title IV, *Nuclear Regulatory Commission.* The authorizing legislation for this agency, H.R. 2330, has been reported in differing versions by the Interior and Insular Affairs Committee and the Energy and Commerce Committee.

Water Resources Council. Legislation authorizing the activities of this agency, H.R. 3432, has been reported from the Public Works and Transportation Committee.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I am somewhat concerned about these waivers of points of order in this bill.

□ 1050

It seems to me in going through the overall legislation that a number of these waivers speak to appropriating sections where without authorizing legislation we are going above budget figures, Gramm-Latta budget figures, on the outlay side.

I am somewhat concerned about the fact that those waivers seem to track an outlay problem that the Office of Management and Budget has indicated exists in the appropriation bills.

Is the gentleman familiar with that particular problem?

Mr. TAYLOR. I would simply say to the gentleman from Pennsylvania that the Rules Committee was assured that these did not exceed those budget figures.

Now, as to whether or not they do, I am not privy to that information. I do not have all the budget figures.

I would certainly suggest that inquiry be made at the proper time under the debate.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I will be happy to yield to the ranking member, the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. We have all seen those figures presented to us by the Office of Management and Budget. Of course, they are speculative figures in that they refer beyond this year. What will happen in 1983 and 1984 is, of course, subject to what this Congress will enact in the future as far as appropriations are concerned; as far as rescissions and deferrals considered and acted upon by Congress. No one can today project what will happen in 1983, of the Office of Management and Budget, the Rules Committee, or any Member of this Congress.

I think it is the understanding here that all Members working on this bill and all appropriations are concerned about outlays and getting our economic house in order.

It is purely speculative when you consider that in future years we would rescind or defer funds that are not needed; so those figures that the gentleman is using with OMB are completely speculative for 1983 and 1984 because we do not know what action Congress will take in the future.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. TAYLOR. I would be happy to yield.

Mr. WALKER. Mr. Speaker, I think the point, however, is that on these particular sections that we are, in fact, in this bill committing to outlays for the future which, indeed, would have to be rescinded and that in the sections that are being waived, where no present authorizations exist, we are, in fact, exceeding what the Office of Management and Budget sees as appropiate outlay figures in the upcoming years and, indeed, this may prevent us from arriving at a balanced budget by 1984 in the opinion of the Office of Management and Budget. That is the key question here. Whether or not we should be granting rules waiving those provisions where no authorizations exist and where the authorizing committees have yet to make their determinations is, I think, a very serious question in this House that goes not only to this appropriation bill, but goes to appropriation bills that may follow.

Mr. MYERS. Mr. Speaker, will the gentleman from Missouri yield further?

Mr. TAYLOR. I yield to the gentleman from Indiana.

Mr. MYERS. Using the analogy that our colleague from Pennsylvania is using, there would be very few appropriations get out of here before Christmas. I do not think we could do much between Christmas and New Year's, assuming we would have all the authorizations completed.

Again, I do not know how anyone in OMB or anyplace else can say what Congress is going to do. We are all concerned about the same objective and we share our concern with Mr. Stockman that we are going to try to hold the line. We have done this.

According to the Congressional Budget Office, we are $150 million under the outlay figure laid down by Gramm-Latta. In the outyears, again I do not know what is going to happen in the future. No one here can predict that.

Assuming what OMB assumes that there would be no action by Congress to hold the line in the future, well, you could use that figure any way you want to, you can bounce that back and forth; but again we are under for 1982 and I am quite sure that the Committee on Appropriation is just as concerned about inflation and high interest rates and we will hold the line in the future, too. We all share the same concern the gentleman from Pennsylvania has.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. TAYLOR. I would be happy to yield.

Mr. WALKER. The problem is that what we are doing here is that we are waiving the rules of the House. We are saying that the rules of the House should not apply because we are taking certain actions that are basically in violation of the rules of the House. When you do that, it seems to me you have an obligation to assure us that we are also then complying with what the House has previously determined.

In Gramm-Latta we made some projections toward the future as well as toward the next year that we are committing ourselves as a Congress to a balanced budget in 1984. When we are waiving the rules of the House here in order to achieve a particular end in violation of previous determinations of this House, I think it is a concern. That is the concern I am expressing with regard to this rule.

Mr. TAYLOR. I would say to the gentleman that I certainly think we all agree that we have a concern in granting these waivers on appropriations before authorization; but by the same token, I think the gentleman from Indiana makes a very valid point that if we are going to get this work done this year, it is important that we move forward.

I have received no communication from Mr. Stockman relative to his position on this.

I would say to the gentleman from Pennsylvania that the letter of the chairman, the gentleman from Mississippi (Mr. WHITTEN) to the Rules Committee agrees with the gentleman from Indiana (Mr. MYERS), the ranking member, that it does comply, in fact, with Gramm-Latta II, the reconciliation bill, and with the assurance on the part of the chairman of the Appropriations Committee and the ranking member on the subcommittee dealing with energy and water, we felt constrained to at least vote out the bill.

I would suggest that in the future consideration of the bill on the floor that the gentleman from Pennsylvania would make the proper inquiry at that time.

Mr. WALKER. Mr. Speaker, will the gentleman yield further? I have another provision of the rule that concerns me.

Mr. TAYLOR. Yes.

Mr. WALKER. The rule also talks about block amendments to be printed in the CONGRESSIONAL RECORD of July 17, 1981, by Representative DERRICK of South Carolina and the amendments are not subject to a demand for division of the question in the House or the Committee of the Whole.

Now, this rule somewhat concerns me in that regard, because here we are on July 23 considering the rule. Nobody in the House has probably focused on it. Already we have gone past the date in which those particular amendments could go into the RECORD, and as I understand it, this rule came out of the committee on July 16. The amendments were to be printed in the RECORD July 17.

I am just concerned about the fact that over the period of the last few weeks we have had the chairman of the Rules Committee, for example, on the House floor talking about how there is a need for Members to have access to amendments and have access to bills well in advance and now we get a rule that all happened in a 1-day period, where the Members have had no chance really to examine it and where the Rules Committee had not seen the amendment before acting on it.

I would ask the gentleman whether or not there was any discussion of this particular provision in the Rules Committee.

Mr. TAYLOR. Well, I would say to the gentleman from Pennsylvania that he is correct in that it does violate the new regulations that I understood are provisions that have been implemented by the Rules Committee; however, because it was not printed in the RECORD prior to the time that the rule was granted, the amendment was subsequently printed in the RECORD on the 17th. I had no idea of what it related to until that time.

My colleague on the committee, the gentleman from South Carolina, is interested in this amendment. Perhaps the gentleman would like to respond to the question.

Mr. DERRICK. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I would be happy to yield.

Mr. DERRICK. The chairman of the committee, the gentleman from Missouri (Mr. BOLLING) in his letter of July 9, and I will read the paragraph that is pertinent:

> I wish to advise all Members of the House about some of the procedures I propose to follow in the future, except under the most unusual and/or critical circumstances on very complex matters such as budget resolutions, reconciliation bills, tax bills, to name three.
>
> Complex "rules" on such matters usually provide that the bill or resolution reported from the appropriate committee be made in order for consideration and that a limited number of amendments, including substitutes, may be offered.

I direct the gentleman's attention to the chairman's letter. His letter speaks to the procedure to be followed on complex rules and further the chairman defines "complex" rules. The rule we are now considering is not a complex rule. All germane amendments can be offered.

Further, my amendments do not require waivers of points of order for their consideration. The provision in the rule just allows for me to offer them together when considering title III of the bill. Therefore, this provision is not pertinent to the matter of complex rules.

As a matter of fact, the Rules Committee had my proposed amendment before it the day before we considered it.

I thank the gentleman for yielding.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. TAYLOR. I would be happy to yield.

Mr. WALKER. The problem for some of us is that it appears as though we are getting a double set of standards here with regard to how we are going to operate and that it is a standard then where the judgment is made in the Rules Committee and perhaps by the chairman of the Rules Committee as to what is complex and what is not complex, what some Members can do and what other Members cannot do.

I am very concerned that we are not meeting the mandates as laid down by the chairman himself.

I would hope that as we go through the process that we assure that everyone is treated the same way. You know, if we are adopting new processes around here, they should all meet similar standards.

All the gentleman from Pennsylvania is attempting to do is say that I think that there should be some fundamental fairness in this process, particularly when we see rules coming on to the floor which basically make the parameters of the debate on the substantive issues very, very narrow.

Mr. DERRICK. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I would be happy to yield.

Mr. DERRICK. One thing the gentleman should understand is that there are no restrictions on amendments in this rule and that Chairman BOLLING's letter is only concerned with the procedure to be followed for rules which limit amendments.

□ 1100

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. TAYLOR. I am happy to yield.

Mr. WALKER. It is my understanding, for instance, we are going to be required on the tax bill to have our amendments printed by I think it is 3 o'clock this afternoon or tomorrow afternoon. All I am saying is I think the principle should be the same, that we are not following the same principles on this bill that we are evidently following with regard to the tax bill.

Mr. DERRICK. If the gentleman will yield further to me, the principles have not been deviated from. Chairman BOLLING's letter is concerned with complex rules. This is not a rule, as I just said a minute ago, that *restricts* amendments, so it is not applicable.

I think we are arguing about something that is really not germane to this particular rule.

Mr. WALKER. If the gentleman will yield further to me at this point?

Mr. TAYLOR. I yield to the gentleman.

Mr. WALKER. I thank the gentleman. The point here is that this particular rule did make in order an amendment which had not been printed in the RECORD, and that is the principle we are discussing here. It is a principle that I think, in fundamental

fairness, should apply across the board. That is the only point I wish to make, I thank the gentleman for yielding.

Mr. TAYLOR. The gentleman is correct. It does make in order an amendment that had not been printed in the RECORD prior to the committee meeting, which was a part of the new regulations by the chairman, which did describe such a situation as being a complex rule. But the gentleman that wrote the book interprets the rules, and he interprets that this is not a complex rule. So I suppose that the pattern could be cut to fit the cloth, but that is life as it is.

So this is the situation that we have before us. The Rules Committee does report out this rule, and I think that further criticisms, and perhaps suggestions, and perhaps debate can occur on the bill itself.

Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR) for purposes of debate only.

Ms. OAKAR. Mr. Speaker, I thank the gentleman for yielding. I rise in support of the rule, and I want to publicly thank the Rules Committee for the waiver that they did allow which permits a very small item to be inserted in the bill. Thus our project related to flood control for our Cleveland zoo is included in this bill.

I thank the gentleman.

Mr. DERRICK. We thank the gentlewoman for her kind remarks.

Mr. Speaker, I yield 7 minutes to the gentleman from Pennsylvania, (Mr. EDGAR), for purposes of debate only.

Mr. EDGAR. Mr. Speaker, we are about to begin today a very interesting and, I hope, creative process of looking at water policy and energy policy for our Nation as it relates to the appropriation bill. We have in this bill a number of important water projects and a number of important energy projects.

In these very few minutes, we are looking at a rule that waives points of order. If I could have the attention of the gentleman from Missouri (Mr. TAYLOR), the ranking minority member of the Rules Committee, as well as the gentleman from South Carolina (Mr. DERRICK), the majority member of the Rules Committee managing this bill, I have some specific questions that I would like to ask on the rule.

Over the last several years, we have seen in this House the failure of the authorizing committee to pass a water bill, an omnibus water bill. It has been my fear that because of the inability to come up with a merit water policy out of the Public Works and Transportation Committee that can receive the endorsement of both the House and the Senate that we would begin to place within a bill such as these authorizations that have never seen the light of day of the Public Works and Transportation Committee. There are a number of points of order waived against particular sections, and I would like to draw the attention of both gentlemen to pages 6 and 7, which will be the focus of my questions.

On pages 6 and 7, we have all points of order waived on these projects, and I wonder if the gentleman could indicate whether or not on pages 6 and 7 all of these projects have received clearance from the appropriate Federal agency; namely, the Corps of Engineers?

Mr. DERRICK. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from South Carolina.

Mr. DERRICK. I would like to defer that question to the Appropriations Committee for their answer.

Mr. EDGAR. Let me repeat the question. On pages 6 and 7 of the bill, we authorize a project in Ohio at full Federal expense on the Cuyahoga River, and we authorize for Beverly Shores, Ind., a project, and I am asking whether or not these projects have received the final approval of the Army Corps of Engineers, and whether or not each of these projects have met the minimal water standards that the Army Corps of Engineers has?

Mr. BEVILL. Mr. Speaker, will the gentleman yeild?

Mr. EDGAR. I yield to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. I would ask the gentleman to yield to our colleague from Ohio (Ms. OAKAR), who can answer the question on her project. I understand one of the projects in question is in the district of the gentlewoman from Ohio, and I would ask the gentleman to yield to her.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I would say to the gentleman with reference to section 102, the project for the Cuyahoga River Basin, this has received approval and it was an oversight.

Mr. EDGAR. From the Army Corps of Engineers?

Ms. OAKAR. Yes. And it was an oversight initially by an arbitrary administrative decision in April 1980, which they have corrected, and also it has White House support in addition.

Mr. EDGAR. I thank the gentlewoman.

Could the gentlewoman answer further, is there any reason why this is at full Federal expense?

Ms. OAKAR. The reason is that this project involves simply the removal of some lions to another area and to allow for flood control because our animals have been drowning in our Cleveland Zoo every time there is a substantial rainfall. The local authority, however, does make a substantial contribution, so I would not want the gentleman to think that my area of Cleveland is not making a substantial contribution to the project also.

Mr. EDGAR. If the gentleman would respond to several other questions, we talk about the Saginaw River in Michigan, and we have the Mississippi River and Tributaries project, the Illinois Waterway project, and the Clayton Lake project. I wonder if the gentleman might indicate whether or not these projects have passed the full House and the Senate in an authorization bill, or whether or not that legislation is still pending in the House and in the other body.

Mr. BEVILL. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. All except one of these projects are authorized but they all have received waivers from the Rules Committee. These provisions are needed to perfect the authorizations.

Mr. EDGAR. I appreciate that. I have just one final question. Can anyone tell me the total number of projects and the cost of those projects that have not been authorized by the full House and Senate and are subject to the waivers in the water section of this legislation?

Mr. BEVILL. As I stated earlier, all the projects except one are authorized. The cost is difficult to estimate, but I do not believe the cost is excessive.

Mr. ALBOSTA. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman.

Mr. ALBOSTA. I am glad to try to answer that question on the Saginaw River project. There is no cost currently in the appropriations for anything on the Saginaw River project.

Mr. EDGAR. I thank the gentleman. If the gentleman from Alabama (Mr. BEVILL) would submit that for the record, I would appreciate it.

Let me make one final comment.

In asking the questions that I have asked, Mr. Speaker, I simply want to draw attention to the fact that we need a merit water policy in this House. We need the Government of the United States to set out minimal standards for flood control, for dams, for rivers, for navigation, for dredging projects throughout the Nation.

A lot of people have looked at BOB EDGAR as though I am the one who is opposed to all water projects in all parts of the Nation. It is not true. What I simply want to do in suggesting that we ought not to be authorizing in an appropriation bill is to put pressure on the House Public Works

and Transportation Committee to come up with a merit water policy for the Nation.

□ 1110

I think water is our next crisis, and I think to nickel-and-dime the Nation in a large appropriation bill by slipping in those projects that gain the favor of the chairman of the full committee or a chairman of a subcommittee is an inappropriate way to legislate. And given the pressure that we have heard from many Members, particularly the conservative Members of the House, concerning limited Federal dollars, we have got to begin to spend those dollars wisely, make sure that when we authorize projects we have a certain amount of cost-sharing, when we authorize projects, we have looked at their full engineering and environmental constraints, and we stand behind those projects.

I am afraid that what we are doing in waiving points of order on this legislation—not that the projects do not have merit—is, we are simply saying that in Cleveland or in Illinois or in Washington, if you can get to the chairman of the committee, you can have your project. But those of us who cannot get to them, those of us who come from other States and other regions fail to have a merit process on which projects can be selected and, therefore, we have to simply sit back and wait.

I think it is incumbent upon the House to have a national omnibus water policy based on merit so that New York, Michigan, California, Washington, Texas, Oklahoma, and Louisiana, can all be dealt with in an equitable manner.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SMITH of Oregon. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 233, nays 178, not voting 22, as follows:

The Clerk announced the following pairs:

Mr. Danielson with Mr. Hansen of Utah.
Mr. Dymally with Mr. Oxley.
Mr. Mattox with Mr. Dougherty.
Mr. Neal with Mr. Dornan of California.
Mr. Rosenthal with Mr. Lewis.
Mr. Gaydos with Mr. Latta.
Mr. Frost with Mr. Burgener.
Mr. Bonker with Mr. Chappie.
Mr. Savage with Mr. Roberts of South Dakota.
Mr. Hance with Mr. Gramm.

Mrs. FENWICK, Messrs. SCHUMER, WILLIAMS of Montana, DECKARD, FORSYTHE, and MAVROULES changed their votes from "yea" to "nay."

Mr. YATES and Mr. CLAUSEN changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate disagrees to the amendments of the House to the bill (S. 815) entitled "An act to authorize appropriations for fiscal year 1982 for procurement of aircraft, missiles,

naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test, and evaluation for the Armed Forces, to authorize appropriations for fiscal year 1982 for operations and maintenance expenses of the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for fiscal year 1982 for civil defense, and for other purposes," and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. TOWER, Mr. THURMOND, Mr. GOLDWATER, Mr. WARNER, Mr. HUMPHREY, Mr. COHEN, Mr. JEPSEN, Mr. QUAYLE, Mr. DENTON, Mr. STENNIS, Mr. JACKSON, Mr. CANNON, Mr. HARRY F. BYRD, JR., Mr. NUNN, Mr. HART, Mr. EXON, and Mr. LEVIN to be the conferees on the part of the Senate.

WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 4119, AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 178 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 178

Resolved, That during the consideration of the bill (H.R. 4119) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI are hereby waived: beginning on page 5, lines 10 through 14; beginning on page 19, lines 7 through 11; beginning on page 22, lines 19 through 23, line 16; beginning on page 25, line 23 through page 27, line 3; beginning on page 28, line 19 through page 29, line 12; beginning on page 31, line 15 through page 32, line 6; beginning on page 41, lines 20 through 24; beginning on page 42, line 9 through page 44, line 7; beginning on page 47, lines 1 through 21; and beginning on page 50, line 19 through page 51, line 2; and all points of order against the following provisions in said bill for failure to comply with the provisions of clause 6, XXI are hereby waived: beginning on page 47, lines 1 through 21.

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 178 provides for the consideration of H.R. 4119, the 1982 agriculture, rural development and related agencies appropriations by waiving points of order against certain provisions in the bill for failure to comply with the provisions of clause 2 and clause 6 of rule XXI.

Clause 2, rule XXI prohibits the consideration of appropriations that are unauthorized and prohibits the consideration of legislation in an appropriations bill. The provisions covered by the waiver included: in title I, the dairy indemnity program; in title II, rural housing programs and rural telephone bank; in title III, the commodity supplemental food program, the food donations program and the food stamp program; and in title IV, Public Law 480, the food for peace program. In addition, the waiver is required for section 608 of the bill which extends the availability of funds beyond a single fiscal year and for four rescissions which include the child nutrition program, the special milk program, the Federal Grain Inspection Service and the Agriculture Marketing Service.

Clause 6, rule XXI, prohibits reappropriations of unexpended balances. This waiver is necessary because the bill provides appropriations for the food for peace program including use of certain carryover balances from prior years' appropriations and thus, constitutes a reappropriation.

Mr. Speaker, H.R. 4119 provides appropriations of $22.7 billion for fiscal year 1982 for the Department of Agriculture, the Food and Drug Administration, the Farm Credit Administration, and the Commodity Futures Trading Commission. This appropriation is $1.06 billion less than the President's request and $2.8 billion less than provided in the 1981 appropriation. Included in this appropriation is $9.7 billion for the food stamp program, which is the level requested by the President, and the bill provides that these appropriations shall be available between October 1, 1981, and August 15, 1982.

Mr. Speaker, I am sure my colleagues are well aware that the programs requiring waivers are contained in either the 1982 farm bill or the Reconciliation Act, neither of which have been enacted into law. In order that we may proceed in an orderly fashion and finish the 1982 appropriations in a timely manner, I urge my colleagues to adopt this rule so that the House may take up the matter of the 1982 agriculture appropriations.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 178 is a rule to facilitate consideration on H.R. 4119, the agriculture, rural development and related agencies appropriations bill for fiscal 1982. The resolution waives points of order that would otherwise lie against specified provisions of the bill for failure to comply with clause 2 or clause 6 of rule XXI.

Clause 2 of rule XXI prohibits appropriations for any expenditure not previously authorized by law as well as prohibiting legislation in an appropriation bill, and the waiver provided by the rule is made necessary because 15 provisions of H.R. 4119 have not yet been authorized and 4 of those do technically constitute legislation. In addition, clause 6 of rule XXI prohibits reappropriating unexpended balances of appropriations, and the waiver provided by this rule is made necessary because one provision does constitute a reappropriation.

Mr. Speaker, H.R. 4119 provides appropriations of $22.7 billion for fiscal 1982 for the Department of Agriculture, the Farm Credit Administration and the Commodity Futures Trading Commission.

This appropriation is over $1 billion less than the President's request and is some $2.8 billion less than was provided in fiscal 1981. In addition, the appropriation is almost $2 billion less than the target set by the first concurrent resolution on the budget.

Because of the time constraints imposed on the authorization and appropriation process and the fact that we are fast approaching the beginning of the new fiscal year, we often find ourselves in the position of needing to take up an appropriation bill prior to the time that all of the bills authorizing certain parts of it have been passed into law.

This is not a new situation, and for this reason there was no controversy about the necessity for the waivers provided in this rule in the Committee on Rules.

Mr. Speaker, at this point in the RECORD I include a brief summary of the provisions for which the waivers contained in the rule apply:

PROVISIONS OF H.R. 4119 FOR WHICH WAIVERS OF POINTS OF ORDER ARE PROVIDED FOR IN HOUSE RESOLUTION 178

In title I, the dairy indemnity program is not yet authorized. The necessary authorization for this program is contained in H.R. 3982 and H.R. 3603.

In title II, the rural housing programs are not yet authorized. These program authorizations are contained in both H.R. 3982 and H.R. 3534, and include loans under the Rural Housing Insurance Fund, Very Low-Income Housing Repair Grants, Rural Housing for Domestic Farm Labor Grants, Mutual Self-Help Housing Grants, Self-Help Housing Land Development Fund, and the Rural Telephone Bank.

In title III, the Commodity Supplemental Food Program, the Food Stamp Program, and the Food Donations Program are not yet authorized. The authorization for these programs is contained in H.R. 3603.

In title IV, titles II and III of the Public Law 480 Food-for-Peace program are not yet authorized. The authorization for this program is contained in H.R. 3603.

79-059 O - 85 - 18 (Vol. 127) Pt. 13

Section 608 of H.R. 4119 provides that the new obligational authority for certain appropriations items shall remain available until expended.

In addition, the bill contains four rescissions of budget authority contingent upon passage of the Omnibus Reconciliation Act of 1981 (H.R. 3982) as follows: In title I, a $24,101,000 rescission for the Federal Grain Inspection Service and a $20,820,000 rescission for the Agriculture Marketing Service; in title II, a $1,115,700,000 rescission in child nutrition program levels and a $95,000,000 rescission in special milk program levels.

□ 1140

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, my concerns about this rule are similar to the concerns that I expressed about the previous rule, and that is that as we look through the rule, we see that it consists of a series of waivers. If we take a look at the bill itself, we see that those waivers we talk about begin to red line sections of the bill that are waived. Under this provision we find that a goodly portion of this bill is waived.

The problem with that is that what we are waiving is the concept that we ought to have an authorization before an appropriation. And why that is important in our process here is because up until now in the budgetary process we have been dealing with authorizations. We have been dealing in the budget process essentially with an authorization process. Now we come down to the appropriation bills, and where we have no authorizations that exist, we are beginning to waive all the points of order against the rule that says there has to be an authorization before an appropriation.

What is happening is, if we look down the road a little way, we are beginning to impact upon the outyears in the budget process, and what we are beginning to do with these rules that are permitting that kind of waiver is that we are beginning to say in fiscal years 1983 and 1984 we are going to find it impossible to achieve a balanced budget because we have appropriated ahead more money than the Office of Management and Budget says we can in order to meet that balanced budget criteria.

So in the two-track finance process around here, on one track the House is making determinations in the authorization process in regard to Gramm-Latta, and we are looking forward through the years and saying that by 1984 we want to achieve a balanced budget, but on the appropriation track we are waiving the authorization and going ahead and appropriating toward the outyears more money than we should in order to achieve that balanced budget.

I am concerned about that kind of a rule. The point I am making here is that we cannot simply use these rules any longer as a parliamentary mechanism. It has become more than a parliamentary mechanism; it has become a way around the whole Gramm-Latta proposal toward a balanced budget in those outyears.

What I am hopeful of is that the Members of this House will begin to reflect on these rules and begin to realize that the waivers therein granted not only commit funds in 1982 but commit in the years ahead, and in committing toward the years ahead they have brought us to a point where we may not be able to achieve that balanced budget that most of the Members of the House have on repeated occasions said they want to achieve.

Mr. Speaker, I thank the gentleman very much for yielding.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the distinguished chairman of the Committee on Appropriations.

Mr. WHITTEN. Mr. Speaker, I say to my friend, the gentleman from Pennsylvania (Mr. WALKER), that this is the second time in 30 years that we have asked for a rule on agriculture. May I say that all this came about because authorizing legislation has not yet been enacted.

The Budget Act calls for budget targets to be set in the first budget resolution. You cannot fix firm figures for the various programs before you have hearings, before you find out what is needed.

The Committee on Appropriations has worked very closely with the Committee on the Budget as they came out with all the proposed budget targets.

So the problem we have here is that the end of the fiscal year is coming up, and unless the Committee on Rules waives points of order on our appropriation bills we would have our whole Government closing down by the first of October. So we either want to do this or close down the whole Government.

May I point out that the gentleman talked about the rules of the House, but part of the rules of the House provides that we can waive the rules when certain situations require it. That is provided in the rules, too. We are faced with a situation where we are between a rock and a hard place. I think we are going to be voting for a continuing resolution in the near future, not because of this, but because there is not enough time left to complete the appropriation business, the authorizing committees have been busy dealing with the reconciliation matters and the tax issue must be settled.

So, Mr. Speaker, we just have not gotten any authorizations, and we either keep the Government running or we do not. This is the only way I know how to do it.

Mr. TAYLOR. Mr. Speaker, I would say that within this appropriation bill there are some definite cuts below the administration's request, and in the bill there is a cutback in the $24.1 million that reflects a shift to the private sector of functions in respect to grain.

So there have been some definite cutbacks made by the Committee on Appropriations, even below what the administration request was. I will ask the committee chairman, is that not true?

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, that is certainly true. I might say that if the current situation changes and we have to take additional action, we will take action, but right now we have to act on the information that we have.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 274, nays 131, not voting 28, as follows:

Dougherty	Lundine	
Dymally	Martin (IL)	

□ 1200

The Clerk announced the following pairs:

Mr. Mattox with Mr. Chappie.
Mr. Waxman with Mr. Oxley.
Mr. Dymally with Mr. Roberts of South Dakota.
Mr. Gaydos with Mr. Latta.
Mr. Frost with Mr. Lee.
Mr. Rosenthal with Mr. Burgener.
Mr. St Germain with Mr. Lewis.
Mr. Savage with Mr. Ralph M. Hall.
Mr. Udall with Mrs. Martin of Illinois.
Mr. Lundine with Mr. Erdahl.
Mr. Brown of California with Mr. Dougherty.
Mr. Dicks with Mr. Bailey of Missouri.
Mr. Bonker with Mr. Dornan of California.

Mr. MARTIN of New York changed his vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4144, making appropriations for energy and water development for 1982, and that I be permitted to include extraneous matter.

The SPEAKER pro tempore (Mr. BONIOR of Michigan). Is there objection to the request of the gentleman from Alabama?

There was no objection.

ENERGY AND WATER DEVELOPMENT APPROPRIATION, 1982

Mr. BEVILL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Indiana (Mr. MYERS) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama (Mr. BEVILL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4144, with Mr. BEILENSON in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous consent agreement, the gentleman from Alabama (Mr. BEVILL) will be recognized for 30 minutes, and the gentleman from Indiana (Mr. MYERS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, I ask unanimous consent that the debate on the amendments by the gentleman from Washington (Mr. PRITCHARD) and the gentleman from Pennsylvania (Mr. EDGAR) in title I to the paragraph entitled "Construction, General" on page 2, be limited to 2 hours, one-half of the time to be controlled equally by the gentleman from Washington and one-half by myself.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BEVILL. Mr. Chairman, I ask unanimous consent that the debate on the amendments by the gentleman from Pennsylvania (Mr. COUGHLIN) in title III to the paragraph entitled "Energy Supply, Research and Development Activities" on page 16, be limited to 2 hours, one-half of the time to be controlled equally by the gentleman from Pennsylvania and one-half by myself.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BEVILL. Mr. Chairman, I yield myself 14 minutes.

Mr. Chairman, we bring to you today for your favorable consideration the energy and water development appropriation bill for 1982. I am joined in this effort by my colleagues on the Energy and Water Development Subcommittee who have worked long and hard to bring this legislation to the floor, including the gentleman from Massachusetts (Mr. BOLAND), the gentlelady from Louisiana (Mrs. BOGGS), the gentleman from Florida (Mr.

CHAPPELL), the gentleman from California (Mr. FAZIO), the gentleman from California (Mr. BURGENER), and the gentlelady from Nebraska (Mrs. SMITH). Let me also make special mention of our new subcommittee members, the gentleman from Oklahoma (Mr. WATKINS), the gentleman from Indiana (Mr. BENJAMIN) and the gentleman from Arizona (Mr. RUDD). Our subcommittee has greatly benefited from the enthusiasm and interest of its members in all aspects of this bill. Let me also express my special appreciation to our ranking minority member, the gentleman from Indiana (Mr. MYERS). As in years past, he and I and the entire subcommittee have worked together without any trace of partisanship to fashion a bill that meets the present and future needs of our entire country.

Mr. Chairman, the bill before the committee today would provide $13,177,974,000 in new budget authority to the Army Corps of Engineers, the Bureau of Reclamation, the Department of Energy, and six independent agencies and commissions. This $868,876,000 more than was provided in last year's appropriation legislation but it is $232,313,000 less than the amounts requested in the President's revised 1982 budget. The increase over fiscal year 1981 consists of an increase totaling $1,029,378,000 for atomic energy defense activities offset by a decrease of $160,502,000 for other activities in the bill. The bill is also $533,026,000 below the subcommittee's section 302 allocation under the first concurrent resolution on the 1982 budget. We believe the outlays associated with this bill meet the estimated outlay targets established by CBO for the programs funded in the bill.

WATER RESOURCE DEVELOPMENT

Mr. Chairman, in fiscal year 1982 and in the years ahead, our Nation must continue to face an issue that has been with the American Republic since it was founded over 200 years ago. Indeed, it is an issue that every civilization has had to deal with all throughout recorded history—the wise and prudent development of our water resources.

As shown on the top of page 3 of the report, title I includes $3,154,502,000 for the Corps of Engineers, which provides for 284 water resource projects in the planning or construction phases. This includes two new planning starts but no new construction starts.

Title II includes $838,588,000 for the Bureau of Reclamation, which provides for 95 water resources projects in the planning or construction phases. This title contains no new planning or construction starts.

Titles I and II provide for continuation of ongoing construction projects and operation and maintenance programs. Within the available funds, the subcommittee has attempted to accommodate the most critical needs identified through the extensive hearings conducted with administration witnesses, the public, State and local officials, and Members of Congress.

Due to the budget constraints facing the Nation for fiscal year 1982, the committee is not proposing any new construction starts for water projects. There are many projects pending at the Water Resources Council which require authorizing legislation by the Congress before funding can be considered. In addition, there are many worthy projects that have been fully authorized by the Congress and require only to be funded before construction can begin.

The current administration has presented testimony indicating that as soon as the economic conditions improve they will be recommending new construction starts. The committee wants to emphasize that while the administration's proposals are always given every consideration, the Congress will determine which programs and projects will be funded.

The committee will review each project that is eligible for a new construction start in fiscal year 1983 and will recommend such funding for them as the economic situation dictates at that time.

TITLE III—DEPARTMENT OF ENERGY

The bill contains $8,363,425,000 in new budget authority for the Department of Energy. This includes $3,665,409,000 for energy and general science programs and $4,698,018,000 for atomic energy defense activities.

The amount recommended for energy programs reflects numerous changes in the request to reflect the testimony received and committee's assessment of funding needs. For example in solar, geothermal, and hydropower, the committee has added $125,041,000 to the request of $241,675,000. The evidence is that the reductions proposed by the administration from the fiscal year 1981 program levels were too drastic and would not maintain the momentum developed to date in the use of renewable energy.

As explained in the committee report, the committee has serious concerns relating to the administration's proposals for solar energy, principally as they relate to the termination of support for near-term efforts. For example, in passive solar and biomass, the paramount need of both potential customers and suppliers is the need for accurate and reliable information from the Federal program. However, the administration proposes to drastically curtail this effort. For that reason, the committee recommendation includes a reserve account which the committee expects the Department to use with the committee's agreement where necessary to support near-term efforts of the private sector.

The recommendation of nuclear fission programs is $883,757,000, exclusive of the Clinch River breeder reactor. We have included $228,000,000 for that project. Nuclear power now provides the energy to produce 12 percent of the Nation's electricity. To extend this capability for future generations requires development of advanced reactors including breeders. The Clinch River project will provide a bridge from the developed technology to possible commercial system applications near the turn of the century.

Impressive progress is being made in developing and demonstrating the technological basis for the safe disposal of nuclear waste. On a pilot scale, the program has demonstrated the technology to solidify nuclear wastes, to provide suitable overpack containers and to provide suitable casks for transporting the containers to a disposal site. Test emplacements in geologic storage are beginning to confirm the ability to engineer and utilize stable geologic formations for long-term isolation. There remain the confirmatory programs and resolution of political and institutional barriers to put this problem behind us.

The bill also includes $465,530,000 for fusion energy research and development which is $5,530,000 over the budget request and $89,913,000 over last year's level of $375,617,000. Fusion energy is recognized to be one of the most significant potential sources of energy for the future. Impressive progress is being made. However, practical fusion energy is still a long-term effort available to us hopefully around the turn of the century.

The committee has recommended revised bill language for the uranium supply and enrichment accounts. This language is necessary to provide for continuity of operations because of revenue fluctuations. The committee fully expects the Department to manage this program so as to stay within the final appropriation, either through collection of sufficient revenues or withholding of obligations as necessary to stay at or under the final amounts appropriated in the bill.

For general science and research, the committee recommendation provides a total of $559,360,000, compared to $504,415,000 in fiscal year 1981. There continue to be exciting and important discoveries on the frontiers of basic knowledge concerning the structure and nature of matter from this program. The application of nuclear science for medical purposes also has provided some important new discoveries and potential breakthroughs in the treatment of cancer and other medical disabilities. The committee recommendation continues our strong support for this program.

ATOMIC ENERGY DEFENSE ACTIVITIES

The committee recommendation provides $4,698,018,000 for atomic energy defense activities, an increase of $1,029,378,000, or 27 percent, over the amount provided in fiscal year 1981. The increase results from the introduction of new weapon systems, renovation and rehabilitation of existing production facilities, inflation increases and the employment of about 3,400 additional personnel in R. & D., testing, and production of warheads. This is the largest single-year increase in the history of the weapons program and represents a milestone in our efforts to upgrade the weapons complex, increase the level of testing activities so essential to a viable program. I am encouraged that the Department and the administration are following the lead of this committee in reinvigorating the weapons program. I personally took the opportunity last year to meet with then-President Carter to encourage him to provide adequate funding for these activities. The administration responded with two supplemental requests which the Congress approved, and substantially increased the fiscal year 1982 request to provide for necessary activities. The record of the committee clearly has been one of strong and continued support for the atomic energy defense activities and it will continue to be so.

In the revised request for fiscal year 1982 funding there were a number of items that appeared to the committee to be either premature or in excess of what can reasonably be obligated during the course of the fiscal year. Several projects, in addition, were not fully justified and in the view of the committee could not be supported without additional evidence or data.

The committee was concerned that the Department may not have sufficient resources to manage adequately the very large increases requested in weapons production activities, particularly in construction of additional production facilities. The recommended reductions in this area are made partly to reduce the level of activity and number of individuals which must be supervised to manageable proportions. Reductions made in specific weapons systems are within the prerogative of the committee to fund only those activities that can be demonstrated to be fully ready for production, capable of being deployed and essential for the national defense. The specific weapons systems addressed and reduced by the committee did not meet these three criteria.

The recommendation of $4.7 billion, with an increase of more than $1 billion over fiscal year 1981, reflects the continued support of the committee for defense atomic energy activities.

FEDERAL ENERGY REGULATORY COMMISSION

The committee recommendation provides $78,677,000 for the Federal Energy Regulatory Commission instead of $82,173,000 as requested, in the following object class control accounts:

	Fiscal year 1981 estimate	Fiscal year 1982 budget request	Committee bill
Salaries and benefits	$50,083	$52,064	$50,064
Travel; transportation of things; rents, communications, and utilities	10,116	11,227	11,227
Printing and reproduction; other services; supplies and materials; equipment	15,175	18,882	17,386
Total Federal Energy Regulatory Commission	75,374	82,173	78,677

TITLE IV—INDEPENDENT AGENCIES

Title IV of the bill includes $821,459,000 for six independent agencies. This is $147,651,000 or 15 percent below last year's level.

We have provided $202,900,000 for the Appalachian Regional Commission; $477,534,000 for the Nuclear Regulatory Commission; $137,743,000 for the Tennessee Valley Authority, and $2,500,000 for the Water Resources Council salaries and related expenses. The funding for the Appalachian Regional Commission continues the phasedown of this program started in the fiscal year 1981 supplemental and rescission bill. The following specific programs warrant additional comment beyond what is in the committee report.

APPALACHIAN REGIONAL COMMISSION

The committee's action provides a total of $202,900,000 for the Appalachian Regional Commission in fiscal year 1982. The administration had proposed to terminate the ARC as of October 1, 1981, and had therefore not requested funding for fiscal year 1982. The Congress agreed in the Fiscal Year 1981 Supplemental/Rescission Act (Public Law 97-12) that the ARC would be phased down because much has been accomplished in Appalachia as a result of the Commission's programs. It was also the consensus at the time Public Law 97-12 was enacted that much was yet to be done, and for this reason it would be premature to simply terminate the ARC, leaving hundreds of planned projects undone and leaving to already fiscally strapped States the need to pick up the operating costs of activities now funded through the ARC. In the view of the House, this would result in undue suffering in a region that has suffered more than most of the rest of the country and would leave unfinished the efforts begun 16 years ago to bring Appalachia up to the level of the rest of the country. In such areas as employment, education, health care, governmental services, natural resource development, and transportation, Appalachia has lagged far behind the country as a whole.

It is for these reasons that the committee has chosen to include funding for the ARC in fiscal 1982. These funds would be used to finance high priority projects and activities approved by the Commission. The committee directed that no area development projects be started that cannot be completed with available funds and that the Commission prepare a report for the consideration of the Congress. This report should include, in addition to those items identified in the committee report, an analysis of the potential for exporting Appalachian coal in furtherance of the economic development objective of the Commission.

The committee anticipates that the Congress will support continued authorization for the ARC beyond fiscal year 1982, and expects the ARC to prepare a fiscal year 1983 budget request consistent with authorization committee actions and in accord with the plan required by the Appropriations Committees.

NUCLEAR REGULATORY COMMISSION

The recommendation provides $477,534,000 for the Nuclear Regulatory Commission in fiscal year 1982, an increase of more than $35 million over fiscal year 1981. The committee continues to be concerned about the Commission's progress in licensing of nuclear powerplants. Although some progress has been made this year in the review of operating license requests, estimates still indicate that delays totaling 49 months in seven 1981 plants will result in increased costs to consumers of $1.6 billion. Of the 11 plants scheduled for operation in 1982, 3 are currently impacted a total of 6 months, which will cost consumers $283 million, and 2 plants planned to operate in 1983 will be delayed a total of 21 months by licensing delays at a total cost of $504 million. So in spite of what has been done to date, 12 nuclear powerplants will be ready for operation before the end of 1983 but will not be licensed for a total of 76 months beyond the point when they should be generating electricity. This will cost electric ratepayers $2.4 billion more than they would have spent had the NRC properly exercised its responsibilities to license these plants.

I am of the opinion that these delays are avoidable if the Commission takes steps now to improve its procedures and assure timely staff preparation and hearings. If the Commission is unable to do this, additional legislative action will certainly be required.

The House may soon consider authorization proposals for the NRC in fiscal year 1982. I endorse the interim licensing provisions that will assure the most expeditious licensing of nuclear powerplants without redundant public hearings or unnecessary opportunities for delay or judicial review.

The committee will continue to monitor the activities of the NRC and its

Commissioners to be certain everything possible is being done to eliminate needless delays in licensing. Any steps necessary to this end will be carefully considered in future legislative actions of the committee.

On pages 151-152 of the report, we discuss the NRC program to establish a safety goal for nuclear power reactors. Such goals would be in the form of quantitative criteria against which various Commission rules changes or safety objectives could be measured. Because this is the first time the Commission has attempted to establish safety goals, the committee believes they should be initially proposed on an interim basis for trial use so that the Commission can have the benefit of experience in their application. Accordingly, it would appear to us that the Commission should initially issue any proposed safety goals as a policy statement which could be used by the Commission staff in assessing the effectiveness of rules, regulations, and criteria. After experience is gained in application of the safety goal technique it may then be appropriate to promulgate the safety goals in some more formal manner.

TENNESSEE-TOMBIGBEE WATERWAY

An amendment will be offered to the bill deleting the funding for the Tennessee-Tombigbee Waterway. I think it is important to note the following facts about the project:

The navigation features of the project are 63 percent physically completed and are projected to be 69 percent complete at the end of fiscal year 1981.

Eighty-one percent of the project funds have been committed to date and it is estimated 85 percent will be committed through fiscal year 1981.

States and localities have invested millions of dollars in anticipation of project completion.

It is estimated that only $12 million in average annual benefits will be achieved if the project is stopped compared with $137 million if the project is completed.

The remaining benefit to cost ratio for the project is 3 to 1.

The users of the Tennessee-Tombigbee project will be expected to pay the same fee as are paid on other waterways.

The last six Presidents, including President Reagan, have supported the Tennessee-Tombigbee project.

The recent court decision brought to your attention by the opponents does not stop construction of the entire waterway. The Fifth Circuit Court of Appeals directed the district court to issue a temporary injunction halting further construction of a portion of the project only until a supplemental environmental impact statement can be completed on this portion. The court is expected to rescind the injunction as soon as the supplemental EIS is satisfactorily completed. The court did not rule against the merits of the project.

The court decision had nothing to do with the merits of the project. In fact, the decision affirms the project. It merely requires the filing of a supplemental EIS on a portion of the project because the corps did not follow its own regulations.

I repeat, the court has not stopped construction on the Tennessee-Tombigbee. That small portion of the waterway which may be stopped is the very section that the corps changed to improve the environmental aspects of the project. The court said, "A beneficial impact must nevertheless be discussed in an EIS, so long as it is significant. NEPA is concerned with all significant environmental effects, not merely adverse ones." The court reaffirmed the sufficiency of the EIS written prior to the start of the project.

The divide cut where half of the construction occurs continues to move along toward timely completion.

It is a good project and all of the Members and Governors from the States affected strongly support it.

CLINCH RIVER BREEDER REACTOR PROJECT

We also expect an amendment to delete funding for the Clinch River breeder reactor demonstration project.

My colleagues, amid the conflicting statements you are receiving on this project, let me summarize briefly the broader considerations and the weight of the evidence presented to the subcommittee which led to our recommendation to continue this project.

First, it is clear that the Nation will need substantial additional nuclear electric generating capacity in the next several decades, even assuming that all the goals for additional coal production, conservation, solar and renewable energies are met. The evidence is that nuclear-generated electricity will continue to be one of the most economical sources of the increased energy the country will need for future growth.

Second, despite varying estimates, the Nation's supply of energy resources is finite. We must use these resources prudently and with an eye to the needs of future generations. It makes no sense to use up all our uranium resources if we can preserve and extend these resources through use of breeder reactors.

Breeder reactors make use of the "tails" or byproduct materials from the fuel for present reactors. The energy available from the uranium already mined—the "tails" now in storage—provide an energy resource for electricity production that is equivalent to all the Nation's unmined coal, and three times the energy from OPEC oil.

Breeder reactors systems are more advanced than today's reactors. Besides using the uranium fuel much more efficiently—30 to 50 times as efficient—the breeder reactor systems offer the potential for significant technical, economic, and safety advantages over today's reactors.

The Clinch River project is a unique research and development project. It is needed to demonstrate the Nation's ability to bridge from the technology program to a safe, economical, and licensable breeder power system. It is not an effort to build a commercial breeder reactor.

GAO has confirmed the need for a project such as Clinch River to focus our development efforts, obtain utility experience, and maintain U.S. influence on worldwide nuclear development.

Clinch River is the most economical means of determining whether or not breeder technology is viable and economic for commercial appliction. Clinch River will cost an additional $1.7 billion over the $1.1 billion invested to date; but its revenues over a 30-year life will repay $3 to $4 billion toward the Federal investment.

There is extensive utility and industry involvement in and support for the CRBR project. Utility contributions with interest will total over $360 million.

Terminating the project losses the Federal investment to date, probably foreclosing a breeder energy option if needed in this century.

The committee long has supported a balanced energy development program, including solar and renewable energy, increased use of coal, and development of nuclear fission and fusion. The overwhelming weight of the testimony and data we have is that the breeder energy option should be demonstrated through the Clinch River breeder reactor project.

As President Reagan stated:

> It (nuclear energy) could supply electricity for thousands of industries and millions of jobs and homes. It must not be thwarted by a tiny minority opposed to economic growth which often finds friendly ears in regulatory agencies for its obstructionist campaigns.

I urge you to reject the amendment.

OTHER AMENDMENTS

There may be other amendments offered to the bill. We have worked hard to balance this bill on an equitable basis. We believe it merits your support and hope that you will vote with the committee.

COMMITTEE REPORT

The report accompanying the bill provides a good explanation of the recommendations reflected in the bill. I would encourage the Members to look through it.

This is a good bill and report. It is under the President's budget. It is under our committee allocation. I recommend its adoption by the committee.

Mr. Chairman, I would like to call the Members' attention to several printing errors in the committee report (H. Rept. 97-177).

On page 7, the third line in the table under California should read: "Coast of Northern California (Harbors for Light Draft Vessels.)"

On page 8, the first line in the table should be deleted.

On page 9, "Juniper" Inlet, Fla., should be "Jupiter" Inlet.

On page 13, "Hannibal, Missouri" should be in the "planning" column rather than under "general investigations."

Also on page 13, the St. Johns and New Madrid Floodway, Mo., project should be shown on page 34 under "Flood Control, Mississippi River and tributaries."

On page 26, the total cost for the Beverly Shores, Ind., project should be $600,000 and the total cost for the Big South Fork National River and Recreation Area, Ky. and Tenn., should be $278 million.

On page 29, the entire "subtotal" line should be deleted as it is meaningless.

On page 116 of the report, project 82-D-109 should read "155 MM AFAP," not "105 MM AFAP."

On page 142 of the report, the item identified as "MX-RES" should be identified as "Program Support."

In addition, the pagination of the bill in the index on page 2 of the report is out of sequence in some instances.

□ 1220

Mr. MYERS. Mr. Chairman, I yield myself 8 minutes.

Mr. Chairman, our chairman, as always, has done an excellent job in presenting what is in this bill.

I join the chairman in showing our appreciation and thanks to the other colleagues on the Subcommittee on Energy and Water of the Committee on Appropriations, as well as the very hard working staff. This is a hard working committee and I am not here today to offer accolades or thank yous but the staff does work particularly hard and we brought to the floor what we believe to be one of the better bills that we have written. There are some differences; some Members will be offering amendments to make some changes.

With one or two exceptions the bill cannot be improved upon. We ask our colleagues to vote with the committee.

This is the bill that used to be referred to as the "all American" bill. A former Member, who was chairman of this subcommittee for many, many years, stood in the well and said, "We bring to you today the 'all American' bill." It truly is an all American bill, just as it was back then.

It is somewhat more controversial today for a variety of reasons. I am sure the opponents of various sections of the bill and the proponents of changes will describe those and I need not take the Members' time at this time.

But it is an all-American bill because this is the bill that provides for the research, for alternate sources of energy for our children and grandchildren if they are to find new sources of energy.

This is the bill that provides the needed water resources, the enhancement, the development, the access, that our children and grandchildren shall have if they are to have an adequate water supply.

This is the bill that contains the funds that will provide this.

Now, the chairman has told us of the modest increases that we have this year, not as much as some Members would like to have had. As the chairman has told this body, we had a great many Members come before our committee making requests for additions in funding or new starts.

Again this year, contrary to what has been suggested during the discussion and debate on the rule, there are no new starts in this bill. There is nothing in this bill for water development that is not authorized except one locality that is being washed away at an unbelievable rate by erosion from the lake, and the community is losing not only its roads and beach, but also losing houses today.

Now we could sit here today and we as a committee could say, we are sorry, we have no authorization to do something about this, but in compassion for those who are losing their property, and for the environment that is being destroyed, not only by storms, but everyday, just by natural wave reaction and actions of the waves, the committee saw fit to add a small sum here to start resolving and doing something about this erosion that is brought about by natural causes.

The committee has made some minor changes from the President's recommendations. In most instances we are below what the President has recommended.

Again, there are some differences from OMB as it was discussed in the discussion on the rule, and I might add here that this is in all fairness to Mr. Stockman. We all agree he has a tremendous job to do and we are trying to cooperate with the Office of Management and Budget, to halt higher interest rates and to reverse this trend to stop inflation.

We share that concern with the Office of Management and Budget, with the President, with the other body, and we are working together trying to do just that; but we do have some differences about priorities, what programs shall be funded and how much.

Now we can argue about the outyears. Those are the years 1983, 1984, and 1985.

The Office of Management has taken the figures that we have this year and fully funded what we have appropriated in existing projects this year if we carried them out to those years.

It is true that if we took no restraint by this body we bust the budget, but that is not any different than we had 3 or 4 years ago when some of these were started.

If we fully funded those we would exceed the budget today. The committee and Congress has done something about it. We have said "no" on many occasions. We have exercised restraint and we will continue to do that, but it is not within the power, nor the authority of this Congress, seated today, to exercise the future will of Congress that we will not spend or that we shall spend. We all know we cannot obligate future Congresses, so it is unfair to say that the outlays, the outyears, will exceed the budget.

I am sure that future Congresses using the good judgment and exercise restraint in funding new starts when they do finally come around once again as well as restraining how much money we spend on the existing programs.

Now specifically in the water resource development, once again this year the committee has seen a downward trend in the development of our water resources. I am not at all sure this is wise. But again, understanding that we must hold the line on expenditures, we have selected this area to once again exercise more restraint than we have in the Department of Energy, and some of the other agencies that we are charged with the responsibility of funding.

The only increase we have in the water resource development is in operation and maintenance.

Recognizing that some of the projects that are in operation around the country, the dams and the waterway locks, are deteriorating, we have increased over last year the amount of money for operation and management and the running of these operations by $143 million.

If we had not increased this operation and maintenance we would not be fulfilling our responsibility and we would be costing our taxpayers more in the future.

□ 1230

This is the big increase in operation of water resource projects.

In the Bureau of Reclamation, we have increased by $22 million the amount requested for operation and maintenance.

In the Department of Energy, the largest increase is in weapons systems, but again, not nearly as high as the administration requested. We feel we have put in what can reasonably be

spent and that we are meeting needs of Defense in nuclear weapons.

In closing, Mr. Chairman, we are going to have some disagreement today.

I compliment our colleague, the gentleman from Pennsylvania (Mr. EDGAR), as well as the gentleman from Washington (Mr. PRITCHARD), and the other gentleman from Pennsylvania (Mr. COUGHLIN), in exercising some restraint in the time consumed. These issues they are going to be discussing, the two amendments they are offering, are not new to those of us who served in previous Congresses, but in order that the newer Members may have the opportunity to hear what is at stake, we voluntarily have agreed under a previous unanimous consent that we will limit the debate on each of those amendments to 2 hours. Both the proponents as well as the opponents feel this is ample time for Members who are concerned and will take the time to listen on the floor to what is involved.

Mr. Chairman, on behalf of the hardworking subcommittee and the full Appropriations Committee, we recommend passage of the bill with two or three technical amendments we will be making for the committee.

The CHAIRMAN. The gentleman from Alabama (Mr. BEVILL) has consumed 13 minutes of his time. The gentleman from Indiana (Mr. MYERS) has consumed 8 minutes of his time.

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to the gentleman from Mississippi (Mr. WHITTEN), our distinguished chairman of the Appropriations Committee.

Mr. WHITTEN. Mr. Chairman, it is a pleasure for me to take this floor today to speak to what I believe is something we must keep in sight. That is the protection and development of our own country.

I do not question the attitude or the reasons behind those that might differ in particular matters, particular projects. That has existed throughout our history. I do say the reason we have the standard of living today and the reason we have the rich country we have—even with its many financial problems—is because our forefathers had the foresight and the nerve, if I might say so, to develop the St. Lawrence Seaway, the New York Harbor, the San Francisco Harbor, our rail system back in the early days, navigation on the Red and the Arkansas Rivers, the irrigation in the West, the Bonneville Power Administration and other undertakings that have contributed to development and vitality of our Nation.

Where would we be today if we did not have the Bonneville Power Administration to serve the business interests as well as the people of the Northwestern part of the United States? Do the Members know if we did not have the power facilities there, we would have to furnish it from other sections?

I made a motion to override the recommendations of the President on the veto of the public works bill some years ago. He said because of the financial problems existing at that time we could not afford new starts on developing our own country. In my argument, which the Congress approved and accepted, I said the more problems we have, the more imperative it is that we do develop our own country. History has proved this correct.

I say that about 18 percent of our income goes for food and clothing, because we have developed our country. Just think of the United States when you first remember it and how it is today. We have a rich country in real resources because our people have worked at developing and improving it.

I am not going to go into the many things which my good friend, the gentleman from Indiana (Mr. MYERS), and my friend, the gentleman from Alabama (Mr. BEVILL), have gone into. There are many things in this bill. We all recognize one fight is going to be made on a project that means not only a whole lot to the Southeastern part of the United States but to the entire Nation. Let me tell the Members, whatever the reasoning of the Members might have been at the beginning of this project to stop a project that is over 60-percent complete, to stop a project which will contribute greatly to the development of the whole United States would be a grave mistake. Now that it is not raining, are we going to neglect our roof? Are we going to neglect the chance to get the coal in the biggest coal section of the United States out for the use of the world and at great benefit to the United States?

Now is the time to do it. Think about this: We are committed to a policy that mining and other activities by private industry must return the area to an environmentally satisfactory condition. In my own district, I have a big gash across two counties. My State gave up six highways and six bridges. They are gone. So if we stop this project now, not only will it cost us a whole lot more than we have spent up to now, but under the policy that we are following everywhere, we will spend many times what we spent restoring conditions to about what they were.

As Congressmen, we come from various districts. We represent our districts, we represent our people; but our title is Representative in the Congress of the United States. This is a big country. I want to tell the Members in my experience here, I am proud to say that I have supported every section of the United States because of how the United States goes, so will my area go and so will the area of each Member.

When we go along with the Bonneville Power Administration, with irrigation in the West, and with programs and projects to benefit every section of country we strengthen and protect the entire Nation. Now we have all the problems in California with the Medfly and we do not hesitate. When we had the tragic Hurricane Agnes and flood problems in Pennsylvania some years ago and we did not hesitate. We provided $1 billion almost overnight. We did not hesitate. We were here meeting the needs of our associates. I am proud last year to have had the foresight when we had this terrible tragedy in the State of Washington—Mount St. Helens—to help provide funds promptly for relief. I had already, as chairman of this committee, reported a major appropriation bill. I canceled it and introduced a new one so my colleagues in the House could be in on taking care of this great problem in the Pacific Northwest.

So I say to the Members today, whatever one may feel about my section or any other section, please look at this thing in perspective and look at it carefully. If Members will do this they will find that having gone this far, it is a very different question from what one might have been confronted with, at the outset. I have been telling Members that the entire project is close to completion and, according to my best information, the project will benefit 26 States directly and help the economy of the entire Nation. It will open up water transportation to our biggest coal deposits and, locally, will aid the development of this low-income area. The navigation features of the project will be over 69 percent complete by the end of fiscal year 1981. At least 85 percent of the total Federal cost will be committed by the end of the current fiscal year.

I point out that if you stopped the project now, annual benefits available would only be $12 million—when the total project is completed, annual benefits will be $125 million. If the project is halted now, we will have a partly finished canal; some locks and dams in various stages of completion. If the waterway is completed, we will have an important navigation system.

The cost to stop the project and to restore the project area to an environmentally acceptable condition would certainly exceed the cost to complete the project many times over, for all 232 miles are in some phase of construction.

Mr. Chairman, I beg the Members to take the position that with all the problems we have in the United States today, at home and abroad, the one thing we cannot neglect is to look after our own country.

This is a project that helps the United States. If we compare this investment with what we do with our

money in many other countries in the world, without any cost-benefit ratio test, it is at the top of the list as a wise investment.

□ 1240

Mr. Chairman, I ask the Members—and I do not do it often—to remember that I have been busy trying to look after every want that anybody has asked me for. But I say to the Members, "Do not be shortsighted and stop that which is good and wreck that which is absolutely essential if we are going to look after the country for the future."

I appreciate the Members' support through the years. I assure them of my support, and because I have done these other things, they do not owe me or our people or our area anything. But again, we are doing something good for the whole United States, and I call on the Members to support us.

Mr. MYERS. Mr. Chairman, I yield 5 minutes to a very outstanding member of the subcommittee, the gentleman from Arizona (Mr. RUDD).

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, I rise in support of the bill. I would also like to briefly comment on the Hansen Dam project, which is located in my congressional district in the city of Los Angeles, and is one of the projects recommended by the California Water Commission. The Appropriations Committee has recommended $100,000 be appropriated in fiscal year 1982 for the U.S. Corps of Engineers to complete a feasibility study to determine the best means of desilting Hansen Dam and restoring the water conservation and recreation operation as well as meeting the needed flood control requirements. I am in full agreement with this recommendation.

Hansen Dam was authorized by the Flood Control Act of 1936, and completed in 1940. For 4 decades it has provided important benefits to the residents of southern California by controlling floods, conserving storm runoff and local rainfall that add to the city's water supply, and by serving as a source of water-oriented recreation. Recreation at the project was authorized by the Flood Control Act of 1944.

However, since 1969 the reservoir behind the dam has been filling up with silt—estimated in excess of 20 million cubic yards of mineral debris—primarily due to fire-related erosion originating from the local canyon hills. As a result, the total storage capacity of the reservoir has been reduced from a 1940 figure at 35,000 acre-feet to a present estimate of 26,000 acre-feet, a volume reduction of 27 percent. According to the Corps of Engineers, the present capacity exceeds the flood control storage required for safe operation by 1,000 acre-feet; however, additional inflows of silt will eliminate this margin of safety in the near future.

Moreover, this situation has resulted in the loss of water supply to the city and virtual elimination of the water recreation benefits once realized. Spreading basins of recharge of the local water table are operated downstream of the dam by the Los Angeles County Flood Control District, and by the Los Angeles Department of Water and Power. In the past, the Corps of Engineers, in coordination with these two agencies, had a part of the dam operation, has impounded water behind the dam for controlled release into these spreading grounds. However, due to the significant reduction in reservoir immediately after the floods, this has caused increased siltation of the downstream grounds.

Furthermore, the recreational use of the reservoir has been seriously curtailed by the silt accumulation. The surface area of the reservoir has been significantly reduced from 140± to 30 acres, a surface area reduction of approximately 79 percent. In the past, the reservoir was used for water skiing, boating, swimming, fishing, and other activities under the supervision of the Los Angeles Department of Recreation and Parks. This reservoir is the only water-oriented recreation in the San Fernando Valley and is very important to residents. The local community is now forced to go without water-oriented recreation, or travel significant distances.

The Corps of Engineers is presently conducting a limited $10,000 alternatives study, initiated in November 1980, to determine possible methods to alleviate solely the short-term flood control problem of the dam. Among some of the alternatives under study include, first, trucking part of the debris from the dam; second, raising the dam's embankment; and, third, increasing the water outflow capability of the dam. The corps estimates that the study will be completed in November 1981. The corps has also indicated that the modification of the project to provide water conservation is being examined under the Los Angeles County drainage area review study scheduled for completion in October 1985.

Under the corps' current study plan, the residents of the city would not realize the potential water conservation and recreation benefits of Hansen Dam until about 1987.

Both the city of Los Angeles and the Appropriations Committee of the House believe that the Hansen Dam project warrants a separate study and that the current study scope should be expanded to include all three project purposes—flood control, recreation, and water conservation. Various alternatives, which consider all three project purposes in an integrated manner, should be identified and assessed including the preparation of comparative cost estimates.

In closing, let me say that I am confident that if this study is completed promptly, we will be able to act in time to protect Los Angeles from incurring the cost, both in dollars and human lives, that would result if Hansen Dam were not upgraded to protect the public from floods and the high cost of importing water to our citizens.

Thank you Mr. Chairman.

Mr. RUDD. Mr. Chairman, I thank the gentleman from Indiana (Mr. MYERS) for yielding me this time, and I would like to take this opportunity to commend the very distinguished chairman of this subcommittee, the gentleman from Alabama (Mr. BEVILL), and the very distinguished ranking minority member, the gentleman from Indiana (Mr. MYERS), as well as all of the members of this subcommittee. I commend my colleagues who have worked so diligently and so hard, and also the staff who have paid great attention to detail, in order that we can put this bill together and bring it to the floor. This is a bill that anybody can be proud of.

Mr. Chairman, the measure we consider today, the energy and water development appropriations bill, 1982, is representative of the kind of work this body can produce when the best interests of all the people are kept foremost in mind.

This bill provides the means by which our country can meet its energy requirements next year. Without a constant and dependable flow of energy and without a constant and dependable attention to water development, the economic activity of the United States would quickly grind to a halt.

As a member of the Energy and Water Development Subcommittee, I know the work that went into the preparation of this bill. The hearings fill 12,442 pages, and our witnesses came from Members of Congress, officials of the executive branch, several Governors and other State and local government officials, and many private citizens.

All possible views were heard, and all possible consideration was given to these views. These were balanced with the constraints of the administration's budget goals, and the result is before us today.

The bill provides funding for the Army Corps of Engineers, the Interior Department's Bureau of Reclamation, the Department of Energy, and a host of independent agencies.

These departments and agencies provide individual parts of a total picture.

And it is that total picture that we must concentrate upon as we debate the bill.

There will be temptations to attempt to put a little something extra in here, or take a little something out there, or even to cut out major items here and there.

This bill, perhaps more than any other we will consider this year, requires national statesmanship rather than regional bickering. We have a national water problem that requires a national policy. We have a national nuclear energy program that requires a national understanding.

Let me say, Mr. Chairman, that I support this bill. It meets the requirements of our Nation's needs for energy and for development of our precious water and it does so in a careful and thoughtful and economical manner.

Our environment will be safe with this bill, our resources will be wisely husbanded, and our economic health will be preserved.

I thank the chairman, Mr. BEVILL, and our ranking member, Mr. MYERS, for an outstanding leadership performance, and I urge the adoption of this bill.

Mr. MYERS. Mr. Chairman, I yield 5 minutes to the gentleman from Washington (Mr. MORRISON).

Mr. MORRISON. Mr. Chairman, I thank the distinguished ranking minority member for yielding me this time, and I would ask if the distinguished chairman of the committee, the gentleman from Alabama (Mr. BEVILL), would enter into a colloquy with me for the purpose of establishing a few facts for the record.

First of all, Mr. Chairman, I would like to compliment the subcommittee chairman and the subcommittee for their work on the energy and water development appropriations. I would especially like to commend the subcommittee for its foresight in the area of magnetic fusion.

Perhaps the lynchpin, Mr. Chairman, of this program is the Mike McCormack Fusion Materials Irradiation Test Facility, named in honor of my predecessor, more commonly known as FMIT. Without the ability to test materials, the fusion program could not move ahead in a logical manner.

Construction in terms of site preparation for FMIT began at the Hanford Nuclear Reservation in 1980. In the Report of H.R. 6796 in the 95th Congress, which became Public Law 95-238, FMIT, Project 78-3-B, was sited at the Hanford Energy Development Laboratory, Washington. I would like to reconfirm that it was the intention of the committee in fiscal year 1978, when FMIT was first appropriated, to have the project sited at Hanford. That is correct; is it not?

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the subcommittee chairman.

Mr. BEVILL. Mr. Chairman, I thank the gentleman for yielding.

The gentleman from Washington (Mr. MORRISON) is correct, and that is what was authorized.

Mr. MORRISON. Mr. Chairman, I thank the gentleman.

It is also my understanding that the committee has directed the Department of Energy to move ahead with FMIT in a timely manner. In this bill the committee appropriated $14 million which was deferred from fiscal year 1981, and it is the consideration of the committee that up to an additional $12 million in operating expenses could be provided in support of this effort. Is that correct, Mr. Chairman?

Mr. BEVILL. Mr. Chairman, the gentleman is correct.

Mr. Chairman, I thank the gentleman, and I appreciate those responses.

Mr. Chairman, I include herewith the following material:

WASHINGTON, D.C.,
July 20, 1981.

Hon. JAMES B. EDWARDS,
Secretary, Department of Energy,
Washington, D.C.

DEAR MR. SECRETARY: This letter is to suggest a method of accelerating the pace of the magnetic fusion engineering and materials development program, consistent with the funding levels authorized by the House and Senate conferees on the reconciliation and authorization legislation for Fiscal Year 1982.

As you are probably aware, the conferees have agreed on a budget figure of $476.2 million for magnetic fusion for Fiscal Year 1982, along with $16 million of deferred funds for construction.

Within these numbers, the following funding is provided for the FMIT for Fiscal 1982: $12.7 million for operations, $1.0 million for capital equipment (at Los Alamos), $14.0 million for construction (deferred from fiscal year 1981).

In addition, the conferees agree on $5 million for the Center for Fusion Engineering.

These figures indicate an insistence on the part of the Congress to move ahead with aggressive implementation of the programs established in the Magnetic Fusion Energy Engineering Act of 1980, to continue work on the FMIT, and to bring into being the Center for Fusion Engineering as a management entity during Fiscal Year 1982.

At the same time, the Report of the European Fusion Review Panel, which was released in June, calls on pages 40 and 41 and on page 50 for early completion of the FMIT with possible support from the European community. Similar suggestions have originated with leaders and spokesmen of the Japanese fusion program.

I know that you will, on reflection, consider it significant that the Western European community and the Japanese each initiated a review of their fusion programs immediately following enactment of the Magnetic Fusion Energy Engineering Act of 1980 in this country, and that both the Japanese and the European communities have now undertaken aggressive fusion enginering, development, and materials testing programs similar to the one set forth in the new U.S. law. It is obvious that passage of the 1980 act stimulated these reviews. Unless the U.S. meets the goals set forth in the 1980 act, both the Japanese and the European communities will move ahead of the United States in fusion engineering development and with the demonstration of magnetic fusion electric energy production.

However, there is a strong tendency in both Japan and Western Europe to cooperate with the United States in fusion engineering and development. Since the FMIT is the only machine of its type being considered in the free world, and since it is already under construction (about $63 million has been spent on plant and capital equipment and operations), it seems altogether appropriate that both the European nations and the Japanese could reasonably be expected to join in funding the FMIT.

I am informed that the FMIT can be brought into operation (under its present schedule) in Fiscal Year 1986 and that the total cost, including operational costs for shakedown and standardization, will be about $240 million. This could be reduced somewhat by speeding up the program and bringing the FMIT on line closer to the original completion date.

It seems logical to me that the Japanese and Western European nations could be invited to each contribute $60 million (of 25% of the total cost) of the FMIT over the next three or four fiscal years and that they could be brought into joint operations of the FMIT in quite the same way as the Japanese are now participating in research with Doublet III. It is especially important to recognize that if such a program were initiated during the remaining months of this calendar year, it might be possible to speed up the program, bring the FMIT onto line at an earlier date, and reduce the total cost.

I cannot overemphasize the importance of the fusion program or the importance of maintaining the momentum that was established by the passage of the law. I would appreciate your thoughts on this matter, and I stand ready to provide any assistance in any way that I can.

Sincerely,

MIKE MCCORMACK.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. FAZIO), who is a distinguished and very outstanding member of this subcommittee.

Mr. FAZIO. Mr. Chairman, my purpose for taking this time is, first of all, to congratulate the gentleman from Alabama (Mr. BEVILL) and the gentleman from Indiana (Mr. MYERS) for the fair and comprehensive job they have done in shepherding this bill to the floor, a bill that is full of so many different approaches toward the solution of our water resource and energy-related problems.

I would like to focus on some aspects of the bill that may not get a great deal of attention today. We know that the bill is somewhat controversial in some areas. We are going to fight about the Clinch River project, and we are going to fight about the Tennessee-Tombigbee, but I think many Members of this body are not aware of the fact that this committee has done an outstanding job in a number of areas to try to right some of the im-

balances in the administration's approach to energy development.

We are in an era when we had anticipated deriving a tremendous amount of money from the passage of the windfall profit tax on decontrolled oil. My constituents anticipated, as I am sure many of us on this floor did, that some of this revenue would be spent on the development of alternative energy forms in this country to help us find a way out of the yoke of OPEC. In lieu of that we find this administration cutting back on the energy budget across the board, particularly in areas other than nuclear fission. At the same time, it is proposing to spend—and I am not sure this is inappropriate, but it is ironic—$20 billion on a rapid deployment force in order to develop the kind of protection for an OPEC pipeline which we all had hoped to be free of in the future.

So this committee, in prudently restoring energy forms which have been so unnecessarily cut by the administration—areas like solar energy, wind energy, photovoltaics, ocean thermal technology, and geothermal technology—has, I think, fulfilled its responsibility to those who supported decontrol not only because they knew it would have a positive effect on energy conservation in this country but also because they anticipated that we would use some of the revenue to find ways to develop renewable alternatives to the overseas supply which has been so detrimental to our economy which is so ridden with energy price-driven-inflation.

I am proud of the fact that this bill moves us back in the direction of a broader and, I think, fairer and more comprehensive energy policy, and I would like to commend the subcommittee chairman and the members of the subcommittee for having made that wise decision.

In addition, I would also say that in the water development area we have found, particularly in the West, that we have many, many environmentally sound, carefully planned, and conservative water projects with a very positive cost benefit ratio in this bill. I think the committee deserves credit for that.

I would particularly like to thank the chairman and the ranking minority member for their pursuit of a balanced water policy for the West. This is something that has been consistent with the past history of the committee, and I think it is too often overlooked.

□ 1250

So in conclusion, Mr. Chairman, I think there are many aspects of this bill that a broad majority of this House can support. I am proud to be associated with it.

Mr. MYERS. Mr. Chairman, I yield 4 minutes to the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. If the chairman would enter into a colloquy with me, I would just like to make a couple points and ask a question.

It is my understanding that the radioactive mill tailings appropriations were reduced in this legislation from $30 million to $13 million in fiscal year 1982; is that correct?

Mr. BEVILL. Mr. Chairman, if the gentleman will yield, the gentleman is correct.

Mr. MARRIOTT. Again, it is my understanding that the reason that the committee cut that back was because of continuous bureaucratic delays in getting the regulations in line. I take it that the EPA again is way behind in terms of their regulations. Is that the reason why this has been cut?

Mr. BEVILL. That is exactly right. The gentleman is correct.

Mr. MARRIOTT. It is not the intent of the committee, as I understand it, to set a precedent here. It is the intent under the appropriations bill to fund these mill tailings removal as time arrives; is that correct?

Mr. BEVILL. The gentleman is correct.

Mr. MARRIOTT. I thank the chairman.

I would like to just make one point that is very frustrating to me. In 1978 in the Interior Committee we passed legislation to begin removing these tailings. We gave the EPA, as I recall, some 1½ years to complete the regulations. They are now 1½ years delinquent.

Now we understand they want another 1½ years to complete the regulations. To me, this is unreasonable and it now means that legislation that was passed in 1978 will not go into effect until 1990. It will be 1990 before we move these hazardous waste materials from some 25 cities around the United States.

I would urge all the Members of this House, my friend, the ranking minority member of the committee, the chairman, and everyone else involved, to see if they could not stick a pin in the EPA and these other agencies to get busy and do the job they are being paid to do.

To pass legislation in 1978 and still to be fiddle-faddling some 3 or 4 years later on regulations to remove the tailings, to me is just an example of the ineffective bureaucracy.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I would be happy to yield.

Mr. MYERS. I certainly concur with what our chairman has told the gentleman, but it is not quite as simple as just authorizing it and sending some people out to remove it. There are some safety factors in handling these tailings that will have to be resolved.

We will certainly give every effort to make sure this happens, but it is not just such a simple thing as loading it on a boxcar or on a flatcar or on a truck and hauling it away. There are some safety factors that have to be worked out.

We will certainly work with the gentleman from Utah on that.

Mr. MARRIOTT. I understand those safety factors, but in a process that should take a year and a half to solve and now we are talking about 4 years seems to be a bit ridiculous.

Mr. MYERS. We will do our part to expedite it.

Mr. MARRIOTT. I thank my good friend.

Mr. MYERS. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. GOODLING).

Mr. GOODLING. Mr. Chairman, I thank the gentleman for yielding.

I would merely like to say that I appreciate the $29 million that is in here earmarked for Three Mile Island. I would hope that it would be $37 or $39 million. That was the understanding that I had.

I would ask that you not be too restrictive with that money. We have a situation that could be 100,000 times worse than anything that could ever happen at Mount St. Helens. No one knows, we have never had this kind of situation.

The same Government who refuses to permit the company to raise the money in order to clean up is also the same Government who refuses to offer any money to help clean up, and there we sit. No one knows with all that radioactive water, with that damaged core, no one knows how much time we have; we cannot get any support from anyone. It is the Federal Government who authorized it. It is the Federal Government who started the research and the development. It is the Federal Government who in turn determined how well those people should be trained, and they were trained better than the Federal Government asked them to be trained, and at the same time that Federal Government costs my ratepayers $14 million more every month because they refuse to let them operate unit 1, which operated beautifully for 7 years. They authorized every other unit to go back into operation, but not this one; so there is no way the company can ever raise any money to clean up.

Then at the same time to say we will not allow you to raise money, but we will not give you any, I just do not understand. It is a health and safety factor that we are faced with up there.

I appreciate the money that is there now. I would certainly hope that we could somehow make the rest of the Congress understand it is a health and

safety factor. It has nothing to do with whether you are for or against nuclear energy.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. GOODLING. I yield to the chairman.

Mr. BEVILL. I thank the gentleman for yielding.

I agree with what the gentleman says. There is one error, though. We do have $37 million in this bill, $29 million for operation and $8 million for equipment.

Mr. GOODLING. I appreciate that. I am asking for all the help we can get before we blow, and then you come and give us help after we are already destroyed, either economically or physically.

Mr. BEVILL. Mr. Chairman, I yield 2 minutes to my colleague, the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, we will have adequate time to discuss the Tennessee-Tombigbee Waterway and its implications for our future.

I would commend to my colleagues some of the many editorials that have been printed throughout the country, in the Los Angeles Times, in papers from Connecticut to Florida, talking about the inappropriateness of moving on construction of the Tennessee-Tombigbee Waterway.

Let me read just two quotes from two of those editorials; first from the New York Times of yesterday:

> The economic case against both projects was forcefully stated by President Reagan's own Budget Director, David Stockman, while he was still a Congressman. * * * He suggested that if Congress paid for marginal enterprises like Tenn-Tom, it ought to "go whole hog and build a pyramid in every State."

That is a direct quote from David Stockman.

Second, in yesterday's Philadelphia Inquirer an editorial states:

> The court enjoined further construction of a major portion of the waterway, ruling that the Corps had "blatantly" violated Federal environmental requirements and intentionally used outdated financial statistics to make the project appear economically viable.

That is just a selection of two quotes from many that implicate the problems of this project, but let me just close by talking about some equity issues.

The funding for the Tennessee-Tombigbee Waterway, $189 million in this bill, equals the subsidy for the public service postal subsidy. It is nearly as much as the subsidy for Conrail. It is almost equal to the funding for the National Endowment for the Arts and Humanities. It would provide for 189,000 minimum student loans. It would provide nearly 2,000 units of subsidized housing.

If you cut $100 million out of the Tennessee-Tombigbee Waterway, you would still fund it at $100 million more money than any other water project in the Nation.

I think there is a matter of equity here. I urge my colleagues to look at the details and the facts of this issue.

Mr. MYERS. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. Mr. Chairman, I rise in general support of H.R. 4144, the energy and water development appropriations bill for fiscal year 1982. It hardly needs to be said that a different set of priorities and guidelines will govern the actions of this Congress during its fiscal year 1982 appropriations debates. In short, we must follow through on the overriding need to reduce the rate of growth in Federal spending and to provide serious tax relief to all Americans. By appropriating $232 million less than requested by the administration and allowed under section 302 of the Budget Act, H.R. 4144 meets the objectives of the President's economic recovery program, while still providing Federal assistance to essential public works projects across the country.

As my colleagues know, H.R. 4144 provides $13.2 billion in funding for programs administered by the Department of Energy, the Army Corps of Engineers, the Bureau of Reclamation, and other related agencies. This measure touches on nearly every facet of our Nation's water and energy needs by assisting the construction of facilities, dredging harbors, hydropower licensing, recreation, research and development, and defense activities. Although there is hardly a congressional district which would not benefit from the passage of H.R. 4144, there are also very few areas which have not absorbed necessary funding reductions this year. The cuts proposed by the President and recommended by the Appropriations Committee will eliminate more than $2.5 million in funding for water- and energy-related projects of immediate interest to my constituents in northern California. And yet, Mr. Chairman, I am convinced that our long-range interests—namely, a healthy and prosperous economy—will only be served if we in Congress have the resolve to make these necessary cuts now.

Mr. Chairman, we hear a great deal here in the Congress about so-called pork barrel public works projects. But I would like to make clear that such sentiments are shortsighted and do not focus on the real and lasting benefits which accrue from providing Federal assistance to essential projects whose costs would normally preclude their construction. To illustrate this, my colleagues will be interested to know that J. Gordon Milliken, a senior research economist at the Denver Institute recently spoke on the subject of whether water projects pay their way. My friend, the distinguished gentleman from California (Mr. COELHO) has already inserted the bulk of Mr. Milliken's address into the RECORD. I would just like to highlight Mr. Milliken's conclusions:

> Nationally, the Federal reclamation program activities brought about $2.75 billion in Federal revenues during 1979, and another $1.24 billion in State and local revenues. Jobs were provided for 815,000 full time equivalent workers. Valued agricultural crops, hydroelectric power, municipal water supplies, recreation and flood control were provided by project lands and structures. And, as usual, a substantial portion of the Nation's investment in the Reclamation program was repaid to the Treasury by water and power users.
>
> From an economic viewpoint, there is good evidence that water projects do pay their pay. The Nation is richer because of them.

As we vote hereafter on a series of amendments to H.R. 4144, many of them directed toward deleting funds from projects which have already been cutback, I urge the consideration of these long-range benefits, that the costs and benefits of each project must be integrated into those of the entire program, and that Federal assistance, as recommended by H.R. 4144, will be a responsible step forward in our effort to utilize the Nation's water and energy resources.

□ 1300

Mr. MYERS. Mr. Chairman, I yield 2 minutes to the distinguished member of the Public Works Authorization Committee, the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Chairman, I rise to commend this committee for their diligent effort in bringing to the floor a bill under the most difficult of circumstances, that being recognition of the fact that there are budget constraints that all of us have to deal with. I think they have presented us with a product that represents an investment in the public facility infrastructure of this country that is in very sad shape.

As my colleague from California (Mr. SHUMWAY), who preceded me stated, there is a tendency to label this legislation as "pork barrel legislation." Yet those of us that are dealing with both the authorizing committee and the appropriation committee responsibilities and actually track these projects that are funded, through the appropriation process and under consideration today, can provide or present a record of an extraordinary return on the investment to benefit the people in the areas involved. So it is to that end that I rise momentarily to offer my commendation to the committee and to express my sincere appreciation for the kind of cooperation they have extended to me and other members who have specific project interests in the legislation before us.

In addition, Mr. Chairman, I want to extend some well deserved recognition to the gentleman from Alabama (Mr. BEVILL) and the gentleman from Indiana (Mr. MYERS). Both of these gentlemen must be commended for their willingness to address a number of key issues and reestablish priorities which we in the Congress believe represent a sound investment in our natural resources. Dollars spent wisely and cautiously today in developing alternate sources of energy will assist us in addressing one of the most critical challenges confronting this Nation in the remainder of the 20th century—restoration of energy security. Until this country regains control over its energy future, U.S. industrial productivity, economic growth and national security will remain vulnerable to "energy blackmail."

In this bill, the committee has continued and extended its efforts toward the need for fiscal restraint in accordance with the President's budget revisions for fiscal year 1982. The bill provides increased funding for solar, biomass, wind, and photovoltaic energy systems. I applaud these committee recommendations and urge my colleagues to keep in mind as we debate this bill and amendments, that these programs are designed to address the development of longer term energy supply options to provide the energy resources needed for restoration of our energy security, national growth, and alleviate our dependence on fossil fuels. As you may know, I have always, and will continue to strongly support legislation which I feel is a positive step in the direction of our national goal of energy independence—this bill meets that criteria.

In particular, I support this bill for the committee recommendations in the area of geothermal energy development which appear to be more in line with accelerating the development of geothermal technology. If there is one natural energy resource which is under-utilized today, it is geothermal. Experts believe that within the next 20 years, there is the geological opportunity to supply 20,000 megawatts of generating capacity. This is equal to 700,000 barrels of oil per day or 8.5 percent of today's crude oil production in the United States. Geothermal energy has several ecological advantages—it produces neither atmospheric pollution nor solid waste. The use of geothermal resources is environmentally sound when compared to present fossil fuel pollutants. Continued funding of the Geothermal Resources Development Fund has been provided at a level which will continue to assist the private sector in commercial development of geothermal energy. In representing the district in which there is the largest commercial power generating plant driven by geothermal energy, I am especially pleased to see this continued funding.

Mr. Chairman, the Nation faces some hard choices regarding its energy future. The committee has given careful consideration to all the facts and details made available to them and, I believe that the end product of their work is a balanced and responsive bill. I urge my colleagues to support its passage.

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to my colleague, the gentleman from Alabama (Mr. FLIPPO).

Mr. FLIPPO. I thank the chairman for yielding.

Mr. Chairman, I want to commend the gentleman from Alabama (Mr. BEVILL) and the gentleman from Indiana (Mr. MYERS) for bringing this bill to the floor, and the members of the gentleman's committee for all of the hours of study they have placed in it.

Mr. Chairman, I will speak again when we get to the amendment process, but I think it is important to point out two or three points at this time. I am not surprised that we have had editorials from Pennsylvania and New York opposing the projects taking place in the Tenn-Tom Canal. I am not surprised because all of us know that editorials are matters that can be assisted in, in so many areas and, indeed, those people are entitled to their opinions.

But the other issues that have been raised against this project relate to the environment. I think we certainly have to consider the type of environmental problems that it will cause if this project is stopped at the present time.

I think it has been mentioned about the GAO studies. The part of the GAO studies that has not been emphasized is they say that in the neighborhood of $125 million a year will be lost in annual benefits if the project is stopped.

Not only that, I think it is important to remember that the State of Alabama has invested more than $200 million in public improvements, in bridges and facilities, in port facilities, and others anticipating the completion of the Tennessee-Tombigbee.

I believe it is a wise expenditure of funds. There are more than 5,000 people employed in various aspects of this project at the present time.

If one opposes this based upon misallocation of funds, or some idea that funds are not being fairly allocated to the various regions of the Nation, then I think that those who offer those kinds of arguments ought to remember that when this body allocated funds for energy assistance there were those in this body who did not think they were fair allocations. When this body looks at mass transit funds and many other projects, any kind of allocation of funds into formulas, there can be honest disagreement about how they ought to be allocated.

We should certainly strive for an equitable allocation of funds, but as Lincoln said when he was questioned about the fairness of collecting taxes, he said if we must wait until we have absolute equity, we shall never collect any taxes. Again, if we must wait until we have absolute fairness in the allocation of all projects, we will probably not have any projects if we must have unanimous agreement.

I urge adoption of the gentleman's bill.

Mr. MYERS. Mr. Chairman, I yield 1 minute to the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. Mr. Chairman, I thank the gentleman from Indiana. Before we start the debate on the Tennessee-Tombigbee Canal. I would just like to say that I want to thank the chairman, TOM BEVILL, for his courteousness and for the fact that we have been able to arrive at an arrangement today which I think can fully get out the feelings on both sides. The gentleman from Alabama (Mr. BEVILL) arranged for all of us to go down and look at the canal. I want to compliment him and thank him for his courtesy and the level of this debate taking place.

I also want to say, to assure him and other Members that feel strongly, that I did not take this amendment lightly. As a matter of fact, I had serious reservations about taking it up until I got into both the GAO report, which I had asked for in the last meeting, and also the study of coal movements.

But I did just want to take this minute to thank the chairman for his kindness and his courtesy. I think the debate can go forward, even though we do have very fundamental differences and approaches on this subject.

Mr. BEDELL. Mr. Chairman, I rise to explain and clarify my position with respect to the O'Neill project in Nebraska.

My position and commitment remain unchanged. I will continue to oppose what I consider to be wasteful Government spending such as the O'Neill project. This is a project whose costs have excalated to $335 million from the $113 million authorized level. It would take 30,000 acres to irrigate 77,000 acres—half of which are already privately irrigated—at a cost of $4,100 per acre for land worth $550 an acre. O'Neill would benefit less than 1 percent of Nebraska's farmers who would be required to pay back less than 15 percent of the cost. Additionally, the Bureau of Reclamation's cost/benefit analysis used to justify the project is seriously flawed and exaggerates the benefits in three instances in order to produce a ratio barely above unity.

Mr. Chairman, my intention was to offer an amendment to delete the $3.3

million funding request for 1982. However, since the gentlewoman from Nebraska has, along with her fellow Nebraskans, agreed to reduce funding to $500,000 while a study is undertaken for project alternatives, I will not pursue the amendment. For my purpose is not to deprive the State of Nebraska of water development, but rather to insure that it is done on a cost-effective basis with our taxpayers' money.

● Mr. FAZIO. Mr. Chairman, I am an enthusiastic supporter of this bill for a number of reasons. It represents, I think, a substantial improvement over the bill that was proposed to us by the administration. It gives us reason to hope that with the Federal Government's essential role carefully refined, we will once again be independent of foreign oil—and soon. Time is really the key to our energy dilemma. It is not whether we can devise the technologies and adjust our habits to achieve independence sooner or later but whether we can do so quickly, quickly enough to help the economy, quickly enough to avoid an energy-related conflict.

This bill is in a delicate political balance. It is made up of hundreds of separate projects. The vast majority are noncontroversial. A few are very controversial. I would ask my colleagues to step back from the controversies and look at the bill as a whole. Is it better? Is it not about as good as we are going to be able to get?

For my own State of California this bill contains studies for several new water projects which I think will result in more efficient water use at lower cost to the Federal Government and water users. I am also hopeful that these projects—including the sites pump storage reservoir and the relocation of the Contra Costa Canal intake—will help resolve some of California's statewide water problems in an environmentally sensitive manner.

I want also to call attention to one small item, $154,000 for the completion of a study into ways to preserve the Sacramento-San Joaquin Delta. The delta is a rich agricultural resource and of great ecological importance in California. It is also the hub of California's water delivery system. The delta is in grave danger of collapsing, and of leaving California's delivery system broken in two. Complex arrangements must be worked out between local, State, and National Governments to protect the vital interest each has in the delta's continued functioning. Completion of the corps study is an essential first step to that process.

This is a good and important energy bill, at a time when the country's energy policy is taking a radical turn. I happen to believe that we have an energy crisis still, and that the fears of three previous President's did not become moot on election day in November.

The worldwide oil glut has given the appearance of calm to our situation. Prices are not rising; gas lines are receding into memory. The stabilization of prices has contributed to reductions in the inflation rates.

However, the glut is in fact another bit of evidence of the extraordinary control Mideastern nations wield over us. We are only fortunate that the most powerful among them, the Saudis, are moderately disposed toward us. Nonetheless anyone who looks at our national security situation will quickly conclude that our reliance on the Middle East and on the beneficience of the Saudi leadership in particular is clearly our point of greatest vulnerability. It is for this reason that we are spending $20 billion to sustain a rapid deployment capability. I do not dispute the necessity of that expenditure, for Europe's and Japan's sake as well as our own. I do think, however, that the $20 billion plus should be seen as an index of just how severe our energy crisis continues to be.

Another index, of course, is the state of our economy. Inflation has tracked the rise in oil prices. In fact, energy cost increases are a substantial factor in the inflation rate increases. Further, energy costs are a substantial impediment to the reindustrialization of America. A new study by the Solar Energy Research Institute notes that investments in energy production currently constitute fully 40 percent of all the Nation's investment in plant and capital.

It is ironic that in order to save $350 million by cutting solar and geothermal energy programs by 54 percent, the administration proposes to delay indefinitely, and in some cases kill altogether, near-term solutions to problems that are costing us $20 billion in defense, percentage points on the inflation rate, and 40 percent of our industrial capital outlay. Against this backdrop, the administration's posture seems irresponsible.

There are good elements in this administration's approach. DOE has grown enormously fast and problems have developed that require cutting back. Cutting back is not all DOE needs—improved management would be even more constructive—but DOE is misshapen. The hard look this administration is forcing can be constructive.

It is also proper that the Nation should pay the real cost of energy. President Carter decontrolled the price of oil and this administration was correct in speeding the process up by a year. It is important that we pay the true cost of energy. All subsidies, primary, secondary, or tertiary, should be accounted for in our setting of national priorities.

The administration has a point when it says that the marketplace can best make decisions about which energy sources are the best for the long run. Politicians and bureaucrats cannot choose as impartially and in as much fine detail as the marketplace.

However, there are some truths which the proposed energy program—described in the media now as doing nothing at all—fails to recognize. With OPEC raising and lowering prices, with the Saudi's playing us like fish on a hook, it is clear that there is no free market. It is also clear that OPEC not only wants to sustain control of the energy market by manipulating prices, but that from time to time it cannot resist trying to achieve a political objective as well. Thus true energy independence and foreign policy independence are going to require assertive U.S. policy to drive other energy options forward, until oil becomes just another one in its rightful place. Since the market is not free, and since it is being manipulated precisely to maintain our dependence, reliance on the market is tantamount to having OPEC make our energy policy—better we do it ourselves.

Second, the energy policy fails to recognize that not only is energy independence key to fighting inflation, inflation is particularly hard on efforts to achieve energy independence. It is a vicious circle. Utilities are among the most strapped of corporate entities. Conservative lending institutions are less inclined than ever to venture into new areas. Cash-hungry stockholders are going to demand dividends that could have been investments in new energy forms.

Because the private sector is weak the Federal Government needs to deliver viable options to the marketplace. It needs a coherent policy by which each option is to be delivered. The private sector must know what is being delivered and when. The cuts proposed however, were done without this sort of planning and care for the needs of the private sector.

For instance, this administration proposed cutting the photovoltaic budget from $132 million to $55 million, 55 percent. Since passage of the Photovoltaics Act of 1978, arrays have dropped from $25 per peak watt to only $7 to $12. The act set a $1 goal by 1988. The program itself has established a 70-cent goal by 1986, 30 percent less 2 years sooner. This dramatic reduction would not have been possible without the Federal program for applied research and market development. That is the way costs come down. However, the administration wants photovoltaic work to recede into the indefinite future with long-term research and development. R. & D. is fine, but we need to push on below 70

cents. Dropping the ball now is not to foster energy independence.

Precisely in order to draw private industry quickly into this field of enormous promise, the Government also needs to help with utility scale demonstrations to show us how photovolatics work in the grid, and to give industry incentive to perform the research and invest in the facilities to make technological breakthroughs and mass production economies of scale possible.

I am happy to report that this bill now contains $20 million more partly for the photovoltaic applied research program at the Pasadena Jet Propulsion Laboratory. It also contains the Federal share of a 1 megawatt photovoltaic plant to be constructed by the Sacramento Municipal Utility District in California. The plant will be the world's largest, and by itself would constitute 20 percent of all the U.S. photovoltaics built in 1982. The Federal share, together with a State share, represent the difference between photovoltaic's current cost and the utility's current conventional source costs. It will be repaid as the cost of photovoltaics drops. The utility project doubles as a model for the transfer of technologies to the private sector.

The administration proposed cutting entirely the ocean thermal energy conversion program, from $34 million to zero. The action would kill the program at a point where it has achieved commercial feasibility in certain island locations of the world at $6,000 per kilowatt of capacity. By 1990 these costs should be half that, and commercial feasibility would exist for the U.S. gulf coast. OTEC is baseload solar power, the only form of renewable energy besides geothermal that now is baseload.

The OTEC program needs more Federal research into some lingering technical problems, and most importantly federally sponsored feasibility studies so that private lending institutions will risk the massive quantities of capital the OTEC plants require. Killing OTEC now, in addition to depriving the country of baseload solar power, deprives our shipyards of enormous industrial opportunities—the Japanese are not missing this potential.

The administration proposed cutting the Federal wind program from $58 million to $19 million, thus eliminating the Mod 5 large-scale wind generator and leaving us with the Mod 2. Boeing's Mod 2 has commercial application in less than 100 places around the Nation, at 10 to 12 cents per kilowatt hour. By spending another $20 million, which the committee bill recommends, the Nation can obtain a Mod 5 device with commercial application in thousands of places at only 3 cents per kilowatt hour. Boeing and General Electric would not have carried on with the Mod 5 on their own, given the outlays required, and the uncertainties of the market, especially as those uncertainties are abetted by an unsympathetic Federal Government insensitive to the manipulation of the marketplace by OPEC.

The administration proposed slashing the geothermal program from $126 million to $43.6 million, 65 percent. It further proposed cutting a medium temperature brine demonstration plant that could expand the potential of geothermal from one site with hot brines to over 400 warm brine sites in 43 States. They have a potential of 10,000 to 20,000 megawatts by year 2000. We were able to restore that demonstration plant, and make available to the administration existing funds to back geothermal loan guarantees.

The administration proposed cutting active and passive solar, those approaches which along with conservation promise the greatest amount of energy the soonest, by 68 percent, from $31.4 million to $10.1 million. Solar thermal dropped 52 percent from $87.6 million to $42.6 million, and biomass by 40 percent from $48.9 million to $29.5 million. We were able to restore solar thermal by $10 million, thereby improving the prospect that utilities will find thermal useful in small capital increments to add to their capacity in times of uncertain demand. Active and passive solar as well as biomass will be able to draw on a special $24 million solar reserve account should the administration see the wisdom in spending more on these options.

In sum, the bill attempts to restore to our energy policy some recognition that a marketplace manipulated by OPEC cannot be relied upon to liberate us from OPEC. We need to put oil in its rightful place among options. We have to provide industry with viable options to chose from and use. We have to do this as quickly as we can.

● Mr. CORRADA. Mr. Chairman, H.R. 4144, the energy and water development appropriations bill for fiscal year 1982, provides funding in two areas of particular interest to me and of importance to my constituents in Puerto Rico.

Under the general construction provisions of title I, the legislation provides for $16.3 million for the construction of the Portugués-Bucaná Rivers dam project. This project, the total Federal cost of which is $282 million, is the largest ever U.S. Army Corps of Engineers work undertaken in Puerto Rico. This project, once completed, will address the major problem of providing adequate water supplies to the southern coast of Puerto Rico, an area long plagued by drought conditions.

A second program of interest to us is funded under the solar energy research and development budget. One of the most exciting new technologies with a solid future as an integral part of our Nation's energy picture is ocean thermal energy conversion. OTEC is a renewable and environmentally safe technology that uses the temperature differential between the ocean waters to power a turbine to generate electricity. The process is particularly appropriate to islands such as Puerto Rico, Hawaii, the Virgin Islands, and Guam, and to coastal States like Florida and States in the gulf area.

Despite the fact that the administration wanted to eliminate funding for this program, the Committee on Appropriations reaffirmed congressional support for OTEC by allocating $29.3 million for fiscal year 1982. The committee is to be commended for its actions and the budget conferees should also be praised for agreeing on a figure of $25 million for OTEC, an amount that will allow the development of OTEC to continue on track.

I urge my colleagues to support these programs.●

Mr. BEREUTER. Mr. Chairman, I would like to address my fellow colleagues about an item in the pending bill. I refer to the $500,000 appropriation for the O'Neill unit, Pick-Sloan Missouri River Basin program.

For the past several years, this particular project has been the subject of debate on the House floor as amendments have been offered to overturn the position of the Appropriations Committee by deleting funds for the project. This year I am unaware of any such effort. There is, of course, good reason for this turn of events. Because my office has been contacted about my plans with respect to debate on this year's energy and water appropriations bill, I have asked for this opportunity to explain to my colleagues what has transpired these past several weeks.

The O'Neill project is probably the most controversial water development project in the State on Nebraska. Both proponents and opponents of the project have examined reams of material about it and often have arrived at exactly opposite conclusions. The project is supported by the senior Member of our congressional delegation who also serves on the Appropriations Committee, Congresswoman VIRGINIA SMITH. As the Representative from the First Congressional District in Nebraska, I oppose the project, as it is presently constituted. I also serve on the House Interior Committee, the committee which originally authorized the project.

Recently I issued a comprehensive report that details the reasons why I oppose the project. The full report has been shared with members of the House Interior and Appropriations Committees. My colleagues are free to contact my office if they wish to see

the report or various summaries that I have prepared.

The O'Neill project was in serious trouble long before I came to Congress. That is why I believe it is crucial to determine whether we can find an alternative way to deliver irrigation water to the general area that would be served by the current project.

A compromise was reached that has enabled us to secure the support of the Secretary of Interior and the Commissioner of the Bureau of Reclamation to conduct a study of alternatives. With the generous assistance of my two Republican colleagues on the Interior Committee, Congressman DON CLAUSEN and MANUEL LUJAN, Congresswoman SMITH and I, joined by our fellow colleague from Nebraska, Congressman HAL DAUB, have proposed and approved a plan of study for a 120-day, field-level reconnaissance study of alternatives to the existing project.

The study is to be completed by October 10, 1981. A scope of work document has been agreed to by all parties which lists eight alternatives that will be examined during this 4-month period.

During this study period, it was agreed by the Nebraska House delegates that no construction on the current project can proceed, even if the pending court injunction is lifted, and as also agreed, the Appropriations Committee has included a minimal $500,000 in the appropriation bill now before us. This figure was agreed to by Nebraska's House Members so it cannot be argued that deauthorization has taken place while alternatives are examined.

Mr. Chairman, the controversy over the current project will not subside. Those who support the project do so with deep conviction. Those who oppose it do so with equal fervor. Part of a legislator's responsibility is to examine all sides of an issue and then, if appropriate, try to seek compromise. It is in everyone's best interests to find a more publicly acceptable, cost-effective way to deliver irrigation water to the general area that would be served by the O'Neill project. That has been my objective. That is what the three members of Nebraska's House delegation have now agreed to seek through the study of alternatives.

● Mr. MATSUI. Mr. Chairman, it is a pleasure to speak in support of a specific appropriation contained within H.R. 4144 for a most progressive energy project—the Sacramento Municipal Utility District's proposed 100-megawatt photovoltaic powerplant. It constitutes an energy project beneficial both for the citizens of the Sacramento Valley and for the advancement of our national photovoltaic program.

The Sacramento Municipal Utility District proposes to construct a 100-megawatt photovoltaic powerplant for the provision of a near-term power resource to match the summer peak loads of the Sacramento region. A photovoltaic endeavor of this magnitude has never been attempted. Given the historic nature of this project, I firmly support the decision of the Appropriations Committee for a mutual sharing by the Federal Government and this utility district of the technical and cost risks associated with this first major commercialization of photovoltaics.

The Appropriations Committee has recommended the appropriation of $6.8 million to help underwrite the initial increment of generation for this powerplant—that is, the first megawatt of photovoltaic power. The estimated cost for this first step is $12 million, with private and State shares exceeding 43 percent of the cost. Hence, at this time, all that is needed to commence this innovative energy project is for the Federal Government to guarantee $6.8 million.

As the Appropriations Committee has concluded, this proposed obligation is of a very limited nature given the substantial safeguards inherent in the project. The energy plant will be constructed in incremental stages, with each stage requiring the adoption of innovative, proof-tested designs. The commitment to proceed with each new stage will not be made until specific cost standards have been met. This approach will minimize risk of cost overruns for both the Federal Government and the ratepayers of the Sacramento Valley.

Moreover, this proposed photovoltaic powerplant is consistent with the Department of Energy's announced support of a national photovoltaic program. The future commercialization of photovoltaics is very much dependent upon the establishment of online demonstration projects which can prove the economic viability of this alternative energy resource.

By endorsing the action of the Appropriations Committee, the Congress can act as a critical catalyst in achieving this online demonstration project. From a cost perspective, we are in a position to leverage this initial $6.8 million in reimbursable Federal expenditures against SMUD's commitment to expend $270 million in private sector outlays over the life of this project. Given the proposed budget reductions for our national photovoltaic program, this union of private sector funds with Federal assistance may be the sole means by which we will be able to translate photovoltaic theory into actual commercial generation. I ask the House of Representatives to support the recommendation of the Appropriations Committee on this specific appropriation.●

Mr. MYERS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEVILL. Mr. Speaker, I yield back the balance of our time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, restudy of authorized projects, and when authorized by law, surveys and detailed studies and plans and specifications of projects prior to construction, $154,414,000, to remain available until expended.

AMENDMENT OFFERED BY MR. FRANK

Mr. FRANK. Mr. Chairman I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FRANK: Page 2, beginning on line 15, strike out "$154,414,000, to remain available until expended" and insert in lieu thereof "$154,114,000, to remain available until expended: *Provided*, That none of the funds appropriated by this paragraph may be used for the collection and study of information (including any surveys and detailed studies and the preparation of any plans and specifications) pertaining to the North Nashua Flood Control Project, located in the State of Massachusetts".

Mr. FRANK. Mr. Chairman, on behalf of my district I would just like to present back to the Federal Treasury $300,000 from this project that had been authorized.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. The committee is familiar with this. There is no objection to the amendment and we accept the amendment.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman.

Mr. MYERS. This side offers no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. FRANK).

The amendment was agreed to.

□ 1310

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by laws; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction), $1,509,941,000, to remain available until expended.

AMENDMENT OFFERED BY MR. MYERS

Mr. MYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MYERS: On page 3, line 1, strike out "$1,509,941,000" and insert in lieu thereof "$1,518,941,000".

Mr. MYERS. Mr. Chairman, this particular amendment is for continuing construction of a program in Kentucky that borders on the Tennessee line. This would have been offered by the gentleman from Kentucky (Mr. ROGERS), had he been a member of this committee; but because he is not, and because it was inadvertently left out of our bill, I offer it.

The gentleman from Kentucky (Mr. ROGERS) is here today, and he is prepared to explain that this is the Big South Fork National River and Recreational Area that we are putting funds in to keep this project going.

At this time, I yield to the gentleman from Kentucky (Mr. ROGERS) to explain this particular amendment, which is actually his amendment.

Mr. ROGERS. Mr. Chairman, I rise in support of the amendment offered by the distinguished gentleman from Indiana. I would like to commend him for his leadership in the formulation of this legislation, and for his willingness to offer this amendment on my behalf. I would also like to commend him and the gentleman from Alabama for their assistance in this project which is so vital to the people of my district.

Mr. Chairman, the Congress is having to make many difficult budgetary decisions this year. Programs for Federal spending are now subject to a tougher scrutiny than ever before. More than ever, programs are evaluated in terms of whether they are essential, whether they constitute a legitimate function of the Federal Government, and whether they will unleash private efforts that will lead to more jobs, more businesses, more thriving local communities.

The Big South Fork National River and Recreation Area stands up admirably to this line of investigation.

It is for this very reason that, since my arrival in Congress, I have been fighting for the survival of Big South Fork. I have lobbied the administration. I have testified before the Appropriation Committee's Subcommittee on Water and Development. I have worked with Governor Brown of Kentucky, Kentucky Secretary of Transportation Frank Metts, Col. Lee Tucker of the Nashville Corps of Engineers, representatives of the National Park Service, and representatives of McCreary, Wayne, and Pulaski Counties, to support the development of Big South Fork.

Let me tell you something about Big South Fork.

Big South Fork is a unique natural wonder. With its river and gorge, it has the potential to become the Yellowstone of the East. With its combination, not just of rivers and great natural beauty, but also mountains, forests, and a broad range of recreational pursuits, it will offer a wide choice of vacation possibilities to individuals and families.

The park will offer camping, both of a primitive variety for those who seek wilderness adventures, and developed for those who prefer a more civilized vacation. There will be hunting, with an abundance of game and fishing. There will be hiking, horseback riding, boating, swimming, picnicking, sightseeing, and pleasure walking.

And these exciting vacation possibilities will be accessible to tourists from the nearby urban areas who may not be able to afford longer trips with the current high gasoline prices.

But Mr. Speaker, exciting as these possibilities are, they don't indicate what I see as being the special thrill of Big South Fork.

Big South Fork is expected to attract more than 1 million visitors each year to McCreary, Pulaski, and Wayne Counties, as well as to the neighboring counties in Tennessee. They will require service stations, restaurants, campgrounds, shops, and motel facilities—businesses and services which the men and women of my district are able and willing to provide.

These visitors will have a substantial and beneficial impact on the local economies. In 1986, they are estimated to spend $42,656,000 locally; in 1991, this is expected to reach $93,841,800. Since, in 1978, the total lodging, restaurant, amusement, and recreation-based revenue in McCreary County totaled only $956,000, the potential for economic development as a result of the Big South Fork is absolutely enormous.

And these additional revenues will mean jobs. These are jobs right at home, so that the men and women of my district will not have to leave their homes and families to find work. It is expected that there will be at least 1,761 new jobs as a result of Big South Fork in 1986, and 3,876 new jobs by 1991—and these are conservative estimates.

And the spinoff effects from these jobs will contribute to the economic development of these communities. And since McCreary County is now suffering from 10-percent unemployment, these benefits will be particularly welcome.

Mr. Chairman, the Big South Fork project will accomplish many of the goals of the current administration in terms of encouraging economic development. But most important, it will allow these communities to help themselves.

County and city governments are already preparing. In addition, the State is contemplating the construction of a major access road to the park from I-75.

My constituents are fulfilling their end of the commitment. They have invested and planned on the expectation of promised Federal funding. To arbitrarily cut off their funds at this point would not only prevent this extremely beneficial project, but would discourage other communities from making the kind of investments in their development which we are actually so eager to encourage.

Mr. Chairman, Big South Fork has the potential to become the Yellowstone of the East. It has the potential to provide a tremendous economic boost to McCreary, Wayne, and Pulaski Counties. It will allow the men and women of my district to help themselves. The Federal money spent at this time will be unusually well-invested money—the Federal Government will receive an ample return in terms of increased tax revenues and smaller public assistance rolls.

The people in my district and I have worked hard for this project. It is a worthy project. The administration is persuaded that it is worthy, which is the reason that it requested $9.9 million.

I urge my colleagues to join me in reinstating funding for this project, which will be so beneficial to my district.

AMENDMENT OFFERED BY MR. PRITCHARD TO THE AMENDMENT OFFERED BY MR. MYERS

Mr. PRITCHARD. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. PRITCHARD to the amendment offered by Mr. MYERS: In the proposed amendment strike the sum "$1,518,941,000" and insert "$1,320,941,000".

Mr. PRITCHARD. Mr. Chairman, I would first like to take a moment to explain what led me to offer this amendment and why I believe it merits the committee's support.

Prior to our consideration of last year's energy and water appropriations bill, I was made aware of the size and scope of the Tennessee-Tombigbee Waterway. It was then—and still is—the largest construction project the Corps of Engineers has ever undertaken. It therefore deserves continuing congressional scrutiny. My review of the project at that time led me to conclude that there were some fundamental questions about the project—its costs and benefits—which required detailed investigation. I offered an amendment to substantially cut back the Tenn-Tom's funding until the GAO could provide Congress with some answers. Although my amendment was narrowly defeated, GAO and other experts have, in the past year, conducted studies of the project. Their conclusions have indeed justified the serious doubts about the Tenn-Tom

which I raised on the floor of the House last year.

Let me briefly summarize for you what we have learned.

First, GAO concluded that the Tenn-Tom is not one, but two projects whose ultimate cost to the Federal Treasury will approximate $3 billion. That is $2½ billion more than the original estimates for the project. The currently authorized project will cost us about $2 billion. However, GAO said that, in order for the waterway to move commerce to the gulf Port of Mobile, your constituents and mine will be asked for another $1 billion.

Second, about the only thing the project's proponents and opponents both agree upon is that the economic justification for this waterway rests almost entirely upon the movement of coal down the Tenn-Tom to Mobile. The coal movements projected by the corps have been studied by GAO and the Congressional Research Service. I have also discussed this issue with numerous experts in the transportation field and in the coal business. Not one of these sources has been able to verify the coal traffic projections of the corps.

GAO studied coal movements which were to represent over half of the project's annual benefits. Only 20 percent of the benefits were expected to materialize.

CRS reviewed two critical issues: First, whether coal from Illinois, Indiana, western Kentucky, and Tennessee would go down the Tenn-Tom for export through Mobile, and second, the likelihood of coal moving down the Tenn-Tom, as opposed to other waterways or transportation modes. CRS concluded:

First, that Illinois basin coal has too much sulfur to be competitive in the export market, so it will likely be used here in the United States;

Second, that if Illinois basin coal does move south, it will likely use the Mississippi River, which can handle barge tows anywhere from four to seven times the size of those which can operate on the Tenn-Tom or move on unit trains; and

Third, that a survey of such influential coal publications as the Keystone Coal Manual indicates that there is not expected to be any growth in coal mining activity in Tennessee through 1988.

Now, I support U.S. coal exports. I believe we have a responsibility to help our allies reduce their dependence on OPEC. However, I am convinced that this project will not be moving coal for export. By the way, so is Wall Street.

These are difficult economic times. President Reagan and this Congress have made some far-reaching commitments to reduce Federal spending and get the budget under control. Like all other functions of the budget, expenditures for water projects will clearly feel the pinch in the coming fiscal years. If we commit ourselves to completing the Tenn-Tom and putting it at the top of the water projects list, it will consume about $200 million a year for at least the next 6 fiscal years. Many necessary water projects throughout the country will not be funded because of the immense financial burden which completing the Tenn-Tom will require. If you believe your area might need a water project sometime in the next 10 years, remember the Tenn-Tom will still be with us. Think about it. I believe you will conclude as I have that we do not need it and we cannot afford it.

I urge your support for the amendment.

The CHAIRMAN. The Chair would remind the Members, if the gentleman would suspend, that the gentleman from Washington, under the unanimous-consent agreement, has 55 minutes remaining under his control of the time on this particular amendment or on any subsequent amendment he or the gentleman from Pennsylvania (Mr. EDGAR) may offer to the pending paragraph.

The gentleman from Alabama has 60 minutes remaining under his control of time on this or such subsequent amendment.

The Chair now recognizes the gentleman from Washington (Mr. PRITCHARD) for such further time as he may consume.

Mr. PRITCHARD. Mr. Chairman, I will now yield time to other speakers. This will be a long debate, and I am sure all of the arguments will be gotten out fully. I think that is just the way the system should be.

The CHAIRMAN. The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Chairman, I rise in support of the amendment of my colleagues, the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Indiana (Mr. MYERS), the amendment for the Big South Fork. By oversight, I understand through the committee, the money was left out. It never was intended to be left out. It is a very worthy project. It should be approved by the committee, and I urge all members of the committee to support the project.

□ 1320

Mr. PRITCHARD. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. Mr. Chairman, during the debate this morning on the rule, our colleague from Pennsylvania admonished this House saying that we need a well-thought-out program because water is of the utmost importance.

In my opinion, his analysis is correct and I think that the issue of water is not going to confront us only in 1981 but even more so as time goes on. I am supporting this amendment for many reasons, but the main reason is because this is no longer, as our friend from Indiana pointed out, the all-American bill. In truth all-American projects are all going to be put into jeopardy if we continue funding this white elephant.

Let me give my colleagues a concrete example. Twenty years ago, this Congress first authorized the Green Bay Harbor project. That project, modest in size and scope, well within the technological capability of the Corps of Engineers and quite predictable in cost, is still waiting one generation after authorization.

Now, Green Bay was told, "Sorry, there is no money in the bank," and that is quite obvious.

This House is considering continued funding of the largest ditchdigging the world has ever seen; it is bigger than the Panama Canal; it is opposed by many groups: The Sierra Club, the National Taxpayers Union, and many of us here in Congress.

The Tennessee-Tombigbee Waterway has become a real budget-busting $2 billion expense. We are throwing good money after bad. Yet, the most oft repeated argument and the most persuasive argument I have heard here on the floor is, "We cannot cut back now, we already have too much invested."

That reminds me of a time back in Fort Leonard Wood when I served in the Army, playing poker one night. A gentleman dropped $500 and I said, "I don't think this your night. I think it is time for you to get out."

"No, I have too much invested," he said, and he proceeded to lose $300 more.

If we vote for this continued funding we are emulating that losing poker player. We are saying we are in this game, we have got too much invested, we cannot draw back now. I think it takes a good deal of courage to draw back. We have a responsibility to the taxpayers and their tax dollars. If tax dollars are not invested in the best possible way it is time for us to reconsider whether it is at the 1st stage, the 10th stage, or 20th stage, we have an obligation to do that.

The Tennessee-Tombigbee is a program whose time quite frankly has gone. It no longer earns our support. Other improvements like, for example, Green Bay, starve while this ditchdigging dinosaur is soaring and using up, soaking up every spare dollar our taxpayers have. That is why I think it is time for us to take a look at this project and if it does not make sense, if it

is not a good investment, let us be frank and candid and have the political courage to say it is time that we cut back on this project.

Mr. BEVILL. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Mississippi (Mr. BOWEN).

Mr. BOWEN. Mr. Chairman, this very vital project by the end of this fiscal year will be 85 percent committed and under contract; $1½ billion of the total $1.78 billion cost of the project will be under contract by the U.S. Corps of Engineers.

The estimated close-down cost of this project is some $328 million—$328 million to close the project down, if for some sad and tragic reason the amendment offered by the gentleman from Washington should be adopted.

In other words, it would cost the taxpayers of this country more to close the Tennessee-Tombigbee Waterway down now than it would cost to complete it, and, of course, obviously the full benefits envisioned in the project will certainly not materialize until we open the project, so that the entire Ohio/Tennessee system will have access to the waterway.

Ten locks by the end of this fiscal year will have been completed or well underway. Five dams will have been completed or under construction. All but 16 miles of the total 232 miles of this project will be completed or under construction.

It would obviously be an environmental disaster to try to close the project down at this time.

Certainly there are valid arguments that may be raised against this project, as there can be against any public works project that we undertake; but those arguments should have been brought before us 10 years ago and not today when we are on the verge of completion of the project.

The Corps of Engineers estimates that the benefit-cost ratio is now 3 to 1—3 to 1—to complete the project as it stands right now.

The opening of this great waterway will result in a savings of $3 a ton in coal shipped through the waterway. It will result in a reduction of $136 per mile in transportation costs, at a time when we need to save energy in every possible way.

The coal flowing through this waterway will go to 10 foreign countries and key domestic markets in Florida, Alabama, Mississippi, Georgia, and other points around the gulf.

I want to remind my colleagues that there has been no court opinion which has closed this project down, contrary to what the Members might have read in some places. There has been a finding by a three-judge panel of the fifth circuit that work in one 40-mile stretch of this waterway must be held up temporarily, where the corps decided to utilize a chain of lakes as a part of environmental enhancement, as a part of a project to improve environmental conditions. The corps failed to provide an amendment to its original environmental impact statement, and as a consequence, that three-judge panel has asked only that that one short stretch be halted until the amendment is completed to the environmental impact statement.

The work on the remainder of the entire waterway can move forward on schedule.

Incidentally, the question always seems to come up about the fuel tax. I want to assure every Member of this body that the waterway user tax will certainly be applied to the Tennessee-Tombigbee Waterway. We have applied that tax by statutes to all the other waterways of our Nation that are open for navigation. When this waterway is completed it will be applied there, and I might point out that the senior Senator from our State of Mississippi has already introduced legislation in the other body that would apply the tax immediately to the waterway.

There is no question but that the Tenn-Tom will be covered, and I certainly will help lead the effort to insure that it is covered.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. BOWEN. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

Earlier in the gentleman's statement the gentleman made a comment which I think would be helpful if we could clarify for the record.

The gentleman indicated the project is 232 miles and that only 16 miles of that waterway is yet to be completed. Is that correct?

Mr. BOWEN. I said that by the end of this fiscal year, if we proceed with the money that has already been appropriated to us for this fiscal year, all but 16 miles would be completed or well under construction.

Mr. EDGAR. Does that mean that the $189 million that we are appropriating in this bill for 1982, and similar figures that will be in the 1983, 1984, 1985, and 1986 budget will only be for that 16 miles?

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. BOWEN) has expired.

(By unanimous concent, Mr. BOWEN was allowed to proceed for 3 additional minutes.)

Mr. EDGAR. If the gentleman will yield further, the question I am asking the gentleman is that $1.1 billion has been spent on the project and it is estimated that close to an additional $1 billion will be necessary to complete the project from Pickwick, Tenn., to Demopolis, Ala.

The gentleman has indicated by the end of this year all but 16 miles of the project will be complete, and it troubles me that what the gentleman is suggesting is that the remaining $1 billion to complete the project to Demopolis will be used essentially to do that 16-mile section. Is that what the gentleman said?

Mr. BOWEN. That is not correct. The corps has estimated the total cost as $1.78 billion with $1.5 billion committed, and there is, of course, no projected cost, no authorization legislation, and no requested appropriations for the south of Demopolis stretch which the gentleman frequently refers to.

□ 1330

Mr. EDGAR. If the gentleman will yield further, in this question, I am not asking about the project from Demopolis to Mobile. I am simply asking the 232-mile section from Pickwick, Tenn., to Demopolis, the gentleman has suggested that is just about completed. I have heard arguments made that 80 percent of the project is complete. I simply am trying to get clarity for the record.

Mr. BOWEN. Eighty percent is not completed, but the point I made very explicitly was that by the conclusion of this fiscal year, 85 percent of the project will be under contract. As I say, only 16 miles of the proposed construction that the gentleman refers to of the 232 miles will be untouched at that point, that is, not be under construction in some manner or completed by the end of this fiscal year.

If we call a halt, then we only have 16 miles of unspoiled, virgin territory that is not already under construction. That is why I say it would be an environmental disaster if we tried to stop the project at this time. We would have the longest swamp in America. It would not be a very attractive or desirable kind of swamp to have. I know the gentleman would not want to be a party to that kind of environmental catastrophe. The remaining cost would be spread over the completion of work throughout the project and not solely over the 16 miles not under construction.

Mr. EDGAR. I thank the gentleman for yielding. I disagree with the gentleman in terms of what kind of environmental impact this would have.

Mr. BOWEN. I would like to conclude my remarks by reminding the committee that there is no bottleneck south of Demopolis. The river traffic there has been using that stretch of waterway for heavy commercial navigation since 1915. There is one small lock there which permits only a 6-barge tow, but that happens to be the average size of tows on most of our inland waterways. It is the average for the Upper Mississippi, for the Ohio, the Illinois, the Arkansas, the Tennessee, and the Alabama Rivers. It is a

very common size tow for economical operation.

Mr. Chairman, I hope we will keep the faith with the people of the 14 States who will benefit directly and the entire Nation which will benefit immensely from the completion of this great project, an essential link in our national waterway system, the Tennessee-Tombigbee Waterway. Thank you, Mr. Chairman.

Mr. PRITCHARD. Mr. Chairman, I yield 3 minutes to the gentleman from Iowa, (Mr. LEACH).

Mr. LEACH of Iowa. Mr. Chairman, I would first like to commend the gentleman from Washington (Mr. PRITCHARD) for this initiative and would stress that the issue at stake is above all one of modesty—whether we, as a Congress, can recognize past mistakes.

Clearly, it is difficult to bring to an end a project that is half built; it is better to have half a white elephant than a whole one. Water projects are important, and perhaps increasingly so, but we have to realize that the problems of water are much different today than the problems that we have known in this country over the last half century. A new direction in water projects is needed—one which places a clear emphasis on the importance of potable water for people rather than canal transportation for a limited number of industries.

The $200 million a year savings that can be obtained over the next decade if this project is brought to a halt can—simply put—be better applied elsewhere with a different type of water project meeting a different type of problem.

Accordingly, Mr. Chairman, I rise in support of the amendment of the gentleman from Washington.

A similar amendment was offered 13 months ago during consideration of the fiscal year 1981 energy and water appropriations. At that time, floor debate raised serious questions about the advisability of continuing this project. Although I voted to sustain the amendment, it was narrowly defeated. Over the past year substantial time and effort has gone into researching the answers to those questions. The results—which have been made available to the Members of the House—have reinforced my conviction that funding for the Tennessee-Tombigbee Waterway project should be terminated.

However well intentioned those who conceived the project may be, the $3 billion the General Accounting Office has confirmed the project will cost to finish is simply not justified by the benefits which would result. Tenn-Tom is an enormously impractical relic left over from a water management policy which is no longer in step with our present national needs and priorities.

Last summer's drought was not an isolated incident, but part of what meteorologists say is a long-term trend. The coming decades will see the country facing mounting problems of water quantity and quality, and it is the issues of water conservation, collection, and distribution that our energies and resources must be turned, not to the building of limited utility behemoths like Tenn-Tom.

In States like my own, farmers and residents of small, rural communities are being forced to dig deeper and deeper wells, only to find that what water is reached is frequently contaminated and unsafe for consumption by either themselves or their livestock. Similar problems with ground water quality and quantity have arisen in every State in the country.

Problems of the sort encountered with ground water contamination at the Love Canal will without doubt occur elsewhere and must be addressed. Droughts of the kind which limited the citizens of northern New Jersey to the use of 50 gallons of water per week earlier this year will recur and must be prepared for. The Ogallala acquifer, which extends from South Dakota to the Texas Panhandle, and which is so critical to approximately 25 percent of our wheat crop is rapidly being depleted. The acquifers and river systems which irrigate the agriculture of much of the Far West are in similar straits.

The maintenance and improvement of navigation on our major rivers, vital flood control projects, and port construction must all continue under the Corps of Engineers budget. In this context, it should be noted that expenditures for Tenn-Tom over the next decade will dwarf those needed for any other corps construction project now planned. In 1972 the corps set the project's cost at $323 million; as of 1980 the cost had ballooned to over $3 billion and the estimates rise every year.

At the same time, the GAO has found over 70 percent of the navigation benefits estimated to develop for the project have not materialized. Prospective shippers have found alternatives, such as the Mississippi River, economically superior. The corps projected 18 million tons of coal would have to move on the Tenn-Tom system to get a positive cost-benefit ratio for the project. A recent DOE-DOT study on energy transportation indicates the real number is likely to be less than 5 million tons.

At a time when major cuts in Federal spending are necessary for the recovery of our economic health, the Tenn-Tom project is a prime example of the sort of wasteful extravagance we cannot afford and the voters have indicated they will not permit. The Tenn-Tom project is bigger than the Panama Canal, but the potential usage is trivial by comparison. Its contruction creates jobs in the short term but in final measure the Tenn-Tom project stands as a monument to the extravagance of the congressional pork barrel rather than as a project useful to the economic well-being of the country.

Again, Mr. Chairman, I urge support for the Pritchard amendment.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Ohio (Mr. STOKES), a member of the Appropriations Committee.

Mr. STOKES. Mr. Chairman, I rise in opposition to the Edgar amendment. I voted last year for the Ten-Tom project and I intend to do so again this year. One of my main concerns about a project of this magnitude has been with reference to equal opportunity. Last year when this issue came to the floor a rumor had circulated to the Congressional Black Caucus that the NAACP in that area was opposed to this project because of the lack of participation of minorities in this project.

As a result of this rumor I approached Chairman TOM BEVILL and confronted him with this rumor. He was quite concerned about the rumor and assured me that it was untrue. In giving me that assurance he invited me to visit the project to see for myself and to talk with any and every one involved with the project in order to ascertain the facts for myself. As a result of his invitation I did accompany the chairman and several other Members of Congress to a site visit of the Tenn-Tom project. Not only did I see the project, but I was given the opportunity to talk with many people regarding the project and minority participation in employment and contractual opportunities. Included in those talks were not only the Corps of Engineers but also people like Wendell Paris, chairperson of Minority People's Council on the Tennessee-Tombigbee Waterway. Their organization has over 4,000 people organized into 15 or more county chapters in the counties bordering the Tennessee-Tombigbee. These counties are in Alabama, Mississippi, and from Mobile to the Tennessee line. The major goal of their organization is to insure that minorities and poor people receive a fair and proportionate share of all of the benefits of this $2 billion Federal public works project.

In talking with this organization I learned that they have consistently supported full Federal funding for construction of the waterway provided that minorities, women, and poor people are given an equitable share of the jobs, training contracts, and all other benefits of the project.

It is important to note that the Tenn-Tom project is located in one of

the most rural and economically depressed regions of the Nation. Forty percent of the population in the Tenn-Tom corridor is black. In some counties the minority population exceeds 60 percent. In about half the counties about half the population is low income. In 1977 Congress put a provision in the Water Resources Act which required the Secretary of the Army, acting through the Chief of Engineers to make a maximum effort to assure the full participation of minority groups in employment and the utilization of minority firms.

Under this section of the law the Chief of Engineers is directed to report to Congress on July 1 of each year on their progress on implementation of the law. As a result of this law and prodding by the Minority People's Council, I think a great deal of progress has been made in seeing that minorities receive their equitable share of participation in this project. I do not say that all has been done to insure their full participation, but great progress has been made. Notably, the U.S. Army Corps of Engineers has become more concerned and sensitive to providing minorities, women and local residents with a fair share of the project benefits.

During my visit to the site and here in Washington since my visit, I have had meetings with Gen. E. I. Heiberg and Brig. Gen. James Ellis regarding constructive steps to improve upon the progress now being made by them. I think the corps would be the first to admit that this project is not yet a panacea and that in spite of the progress which has been made they still have a lot to do in implementing their goals.

Two of my distinguished colleagues, PARREN MITCHELL and HAROLD FORD, have also worked with me in this matter to help insure minority participation in this project. Mr. Chairman, I want also to commend the distinguished chairman of the subcommittee, Mr. BEVILL, for his total commitment and insistence that the law be fully complied with and implemented to insure full minority participation. I have also received full and completed cooperation from this very able staff. Hunter Spillan and Ed Nolan have both been very helpful.

In conclusion, Mr. Chairman, I want to quote from a copy of a letter I received from an old friend, Dr. Aaron E. Henry, president of the State Conference of NAACP in Mississippi. The letter was written to Chairman BEVILL. Dr. Henry said:

We of the Mississippi State Conference of the NAACP feel very strongly that the Tennessee-Tombigbee project is a major employment project in Mississippi. It has a large number of blacks employed that would be without obtainable employment should the Tennessee-Tombigbee project be curtailed or halted. . . . We urge this subcommittee to recommend that sufficient funds be appropriated so that the Tennessee-Tombigee project can be completed.

Mr. Chairman, I intend to vote against the amendment so that this project can continue. In my opinion, the completion of the Tennessee-Tombigbee will provide even greater economic opportunities for minorities. Economic growth generated by the waterway will provide much needed permanent jobs, help increase personal income which is now the lowest in the Nation and generate new business opportunities for minorities. I hope the amendment is defeated.

Mr. PRITCHARD. Mr. Chairman, I yield such time as he may consume to the gentleman from New Jersey (Mr. HOLLENBECK).

Mr. HOLLENBECK. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I rise to express my staunch opposition to spending additional moneys for the Tennessee-Tombigbee Waterway project during fiscal year 1982 and beyond. I do not believe that additional appropriations are warranted given the cost-benefit ratio and the budget implications posed by this massive boondoggle.

To substantiate this view, I think we need only compare the funds required for Tennessee-Tombigbee to the total moneys appropriated for fiscal year 1981 to the Army Corps of Engineers. Of 212 corps projects totalling $1.3 billion, the Tenn-Tom project will run the taxpayers $220 million for 10 consecutive years. When one considers that the average corps project costs roughly $6.1 million per year, it is easy to understand how seriously the Tenn-Tom project is out of line with economic reality.

My home State of New Jersey received a total of $10.6 million in fiscal year 1981 construction money appropriated to corps' projects. The entire Northeast including Connecticut, Delaware, the District of Columbia, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, and Vermont received a total of $115.2 million for fiscal year 1981—$105 million short of the construction spent by the corps on the Tenn-Tom project alone.

Last year, as the House debated the wisdom of appropriating funds, I recall assurances from proponents of the project that the cost would not exceed $1.7 billion. Unfortunately, this estimate has proven less than reliable given the recently released General Accounting Office (GAO) report which clearly places the cost at a staggering $3 billion.

Supporters of the project have consistently maintained that the economic justification for the Tenn-Tom rests almost entirely on the amount of coal moved down the waterway to the Port of Mobile. Unfortunately, studies by the GAO and the Congressional Research Service have failed to indicate large movement of coal. Furthermore, the CRS study concluded that the Tenn-Tom project would face stiff competition from the existing Mississippi River system and, in the near future, railroads.

Given these facts, I urge all of my colleagues to join with me in supporting the amendment to H.R. 4144, the Energy and Water Development Appropriations, deleting funds for this 232-mile canal that would eventually displace more earth than was moved in building the Panama Canal. The facts are simple: The Tenn-Tom is more than $1 billion over budget, will carry little coal, will not produce its claimed benefits, is a severe drain on the Federal Treasury, and will preclude other needed water projects from being funded during the coming years. I hope my colleagues in the distinguished Chamber join me in voting to delete funding for this wasteful venture.

Mr. PRITCHARD. Mr. Chairman, may I inquire, how much time have we consumed?

The CHAIRMAN. The gentleman from Washington (Mr. PRITCHARD) has consumed 11 minutes of his 60 minutes. He has 49 minutes remaining. The gentleman from Alabama (Mr. BEVILL) has consumed 11 of his minutes.

Mr. PRITCHARD. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. EDGAR), the coauthor of this amendment.

Mr. EDGAR. Mr. Chairman, I have asked the pages to bring a map so that we can get an idea of what this project entails from Pickwick, Tenn., all the way down to Mobile.

As was indicated in some of the earlier testimony, this is a project that was initially authorized in 1946. However, construction of the project did not begin until 1971, and here we are in July of 1981 with still the prospect of spending between $15 million and $20 million a month on this project every year between now and the year 1990.

The project is in really two parts. From the border of Tennessee down to Demopolis, Ala., is the first section, and that Tennessee-Tombigbee Waterway is the one which we are dealing with in this legislation. I would point out to the Members that there is some study money in the bill to provide for straightening out the Lower Tombigbee section which goes from Demopolis to Mobile.

I would draw the attention of the Members to page 89 of a recent GAO study dated May 15, 1981. On page 89, it points out that eliminating the bottleneck that will be caused between the Tennessee-Tombigbee Waterway from Pickwick to Demopolis and the

Black Warrior River that is already in use below Demopolis will cost an estimated $960 million.

Let me quote it exactly:

Eliminating this bottleneck requires a project estimated by the Corps to cost $960 million, $323 million [and this is October of 1979 dollars] for construction and $637 million for inflation to the end of the estimated construction period of 1997.

What this basically says is that the project, which will cost approximately $2 billion to complete to Demopolis, will necessitate almost another $1 billion down to Mobile. That is where the figure of $3 billion comes from.

There has been a lot of opposition to this particular project. I could list out the many editorials around the country and the many prominent people who have tried to fight the project.

□ 1340

Mr. Chairman, let me read from a statement that appeared in the June 18, 1980, CONGRESSIONAL RECORD, at page 15332. Listen to these words:

I think it is about time that someone blew the whistle around here on the misguided notion that giant public works projects are unambiguously in the national interest, are an undisguised, unequivocal economic blessing just because someone comes up with a mechanical count showing the number of construction jobs, the number of permanent jobs, the amount of barge traffic, the amount of revenues that might be generated by the completion of a project of this sort, or even if they come up with an artifically contrived cost-benefit ratio demonstrating that this might be a viable idea.

This particular Congressperson goes on to state this:

I would suggest to the House today, if we are unwilling to look at the displacement affects, just moving around economic activity, shuffling it from one part of the country to another, if you are unwilling to look at the opportunity costs of diverting huge amounts of our national resources and capital to this questionable and marginal project, then you might as well employ single-entry bookkeeping all the way, go whole hog and build a pyramid in every state because that would generate a lot of jobs, at least for a temporary period of time and if you think that is too farfetched, then do something like buying the Jefferson Avenue plant that Chrysler shut down because it was obsolete and use it to build buggy whips and mechanical cash registers and some other obsolete products which the economy does not need. It would generate jobs and economic activity.

Now, the person who made that statement, strongly in opposition to the Tennessee-Tombigbee Waterway, happens to be a Republican and happens to have been selected by the President of the United States, Ronald Reagan, to be the Director of the Office of Management and Budget.

We have been told in this House over the last 6 months that we live in difficult times, that inflation is spiraling out of sight, and that all of us should pull our belts very tight and we should not allow the public purse, the Treasury of the United States, to be expended on worthless projects. We have been asked by the President of the United States to cut $40 billion out of public expenditures. We have been asked to cut back on nutrition programs, on legal services, and on housing starts. We have been asked by the President of the United States to cut back on student loans. We have been asked by the President of the United States to cut back on subsidies to Conrail and other transportation facilities.

But we have not been asked at this time in history to cut back on the Tennessee-Tombigbee Waterway. Oh, there was a small amount taken out. The committee cut $12 million from the original $201 million request.

Let me remind the House that not only does David Stockman oppose this project—his words are clear in the CONGRESSIONAL RECORD—but many other Cabinet officers have expressed their concern about this particular project, mostly privately, because they are part of an administration that for some reason has not spoken out, but I believe they would speak out publicly if they could because they recognize the demerits of this project.

Mr. Chairman, let me speak for a moment about the court challenge. It has been alleged that the court challenged only systems on 40-some miles of the lake territory of the project.

On July 13, 1981, the U.S. Court of Appeals for the Fifth Circuit ordered a halt to further construction of the major portion of the Tenn-Tom. The court held that the corps has blatantly violated NEPA, the National Environmental Policy Act, and its own regulations. The court held that the corps had used an unlawfully low interest rate, 3¼ percent, in calculating the benefits and costs to the project. And the court held—this is the court of appeals—that lawful determination of the required local support for the project had never been made by the corps. It is estimated that this court action will hold up the project for perhaps as much as 1 year.

Now, because of the court's order to enjoin the project funding for the Tennessee-Tombigbee this year, the funds are unnecessary. Listen to why.

First, major portions of the project are enjoined and cannot be built for at least 1 year. So why spend this year $189 million?

Second, it is uncertain that the corps can ever come into compliance with the law regarding this project.

Third, the corps should not be rewarded for such blatant violations of the law and its own regulations;

Fourth, the Congress should permit the judicial branch to consider the corps' efforts to comply with the conditions of the injunction dispassionately without further appropriations at this juncture; and

Fifth, and most importantly, the Congress should not make any decisions regarding further funding of the project until it has had a full opportunity to review the new environmental and economic studies just ordered by the court of appeals.

Now, there was some vague reference a few moments ago that only newspapers in places like New York have editorialized against this project. Let me point out that in newspapers like the Los Angeles Times they have said, on the 19th of July, 1981, "Let's scuttle it." The Los Angeles Times in March of 1981, said that we ought to end the project.

The Philadelphia Inquirer said we should "put cronyism aside" and end this project.

Those are newspapers that we might expect, but the Saint Petersburg Times, the Atlanta Constitution, the Tallahassee Democrat, the Idaho Falls Post-Register, the Chicago Sun-Times, the Chicago Tribune, the Fort Wayne Journal, the Wichita Eagle, the Lexington Herald, the Boston Globe, the Detroit Free Press, the St. Louis Post-Dispatch, the Raleigh News and Observer, the Wall Street Journal, the Providence Journal, and the Washington Post have all editorialized against this bad project.

Mr. Chairman, I suggest that my colleagues take a careful look at the editorials across the country. I suggest they take a look at statements from such distinguished people as David Stockman. Listen carefully, as we hear articulated by my colleague, the gentleman from Washington (Mr. PRITCHARD), the facts of this particular matter, and I think that any observer looking at it from an objective point of view would call for the termination of the project.

I urge my colleagues to support the amendment that I have cosponsored with my colleague, the gentleman from Washington (Mr. PRITCHARD). I urge that we get on with the business of cutting waste, fraud, and abuse out of the Government, balancing the Federal Government's budget.

Mr. Chairman, let us for once listen to the words of reason and cut this project.

The CHAIRMAN. The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to my colleague and friend, the gentleman from Alabama (Mr. SHELBY).

Mr. SHELBY. Mr. Chairman, I do not want to belabor everything, but I want to tell this House that the Tennessee-Tombigbee runs through my district. Demopolis, Ala., that has been mentioned, the lock and dam, is right in the heart of my district. The Gainesville lock and dam is right in

the heart of my district and is operational.

If you have had the opportunity, and a lot of you have, to fly over the Tennessee-Tombigbee construction project, as I have, along with the gentleman from Pennsylvania earlier this spring, I think it would be a revealing sight.

I say to you that when you try to extend the perimeter of the battle that we are talking about here of what this entire project is going to cost to include Demopolis, Ala., I believe that is a false argument. I do not think that Demopolis is in here. It is not a part of this project. The argument of my colleague from Pennsylvania is misleading.

I think if we look at it in a realistic way, we will look at the project as a whole and say, "Look, we have just about got this thing finished. Let us finish it. It makes sense. It has made economic sense for a number of years, notwithstanding a lot of the critics."

I say let us support the canal and let us defeat this amendment.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. SHELBY. I would be glad to yield.

Mr. EDGAR. I wonder if the gentleman could explain the statement on page 89 of the General Accounting Office report of May of this year which indicates that not to make the $960 million improvements below Demopolis will, in fact, create a bottleneck that will make the lower part of the Tombigbee virtually useless.

Second, would the gentleman agree that in this legislation there is close to $1 million set aside to complete the study for the lower Tombigbee portion; is that correct?

Mr. SHELBY. I do not have the exact figures on that. They are in various reports and I am sure the committee staff will make them available to the gentleman from Pennsylvania.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. BEVILL. Mr. Chairman, I yield 1 additional minute to the gentleman from Alabama.

Mr. SHELBY. First of all, the General Accounting Office, as all of us know, the people who make up those reports basically are an outstanding organization, but they are flawed like all of us are. The report by GAO is not well grounded. I do not think you are going to have a bottleneck in Demopolis. The Corps of Engineers does not think so and they certainly know the area better than GAO. I think it makes a lot of economic sense to finish the project and I believe we are going to do it.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. SHELBY. I would be glad to yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I certainly support the gentleman's remarks. I rise in opposition to this amendment.

Mr. Chairman, I appreciate having this opportunity to indicate my strong support for the funding that has been included in this bill for the Tennessee-Tombigbee.

When complete, the Tennessee-Tombigbee will be a 232-mile channel connecting 16,000 miles of mid-American inland waterways with ports in the Gulf of Mexico. The waterway will provide users access to a much shorter than currently available route to the gulf, saving shippers from the Tennessee River systems alone as much as 839 miles.

Among the most important areas of concern for this 97th Congress are energy and our economy. The Tennessee-Tombigbee will impact favorably on both, and, in fact, would not be justifiable in these days of budget tightening were this not true. There is no doubt that the total outlay for the Tenn-Tom is high, but the benefits are great and are already being felt along the channel route with completion still 4 or 5 years away.

In the 9 years of construction to date, the Tennessee-Tombigbee has done much to introduce economic confidence into an area that has historically had none. Employment opportunities along the waterway have flourished allowing persons in very economically depressed areas to experience, in many cases for the first time in their lives, livable personal incomes. Most of the resultant economic growth has been a direct result of construction activities, with the stimulus coming from the new jobs and the purchase of supplies, material, and equipment from local businesses. Once construction is complete, the potential for industrial development along the channel will allow the higher living standard to continue. I am very enthusiastic about the potential this project has for my State and the Southeastern United States, where the growth rate has for far too many years lagged behind the national average.

Commerce moved along the channel will be largely coal and agricultural, and the advantage of a considerable reduction in the distance traveled for existing barge movements of these products will result in the Tenn-Tom becoming immediately one of the busiest waterways in the Nation. Over 28 million tons of commerce will move on the waterway in the first year of operation. Consider, if you will, the navigation benefits. The shorter route will result in an average savings of $3.28 per ton of commerce. A typical coal movement will cost $7.54 per ton on the Tennessee-Tombigbee channel vis-a-vis $10.52 for the next cheapest form of transportation.

Not only will the shorter and cheaper route save money, it will also save fuel. It is estimated in the first year of operation alone 25.4 million gallons of diesel fuel will be saved by barges using the Tenn-Tom.

The location in and around much of the most productive farmland in the country are key considerations for the project. Already more than 5 million bushels of soybeans have been shipped on the channel's limited navigation route.

The more direct connection with the Gulf of Mexico for many agricultural shippers will encourage this amount to increase many times over when the waterway is completed. The advantages provided the transportation industry should have a very positive influence on our balance of trade, especially since the benefits provided are to major U.S. exports.

Although the Tenn-Tom has come under environmental attack, construction has been very mindful of environmental needs. It is unfortunate that the recent court decision has cast doubt on the environmental awareness of the project, I have no doubt that this will be corrected in short order. Large numbers of game fish have already been stocked in secondary lakes and game and wildlife preserves have been planned as an adjunct to the project.

Progress on the construction of Tenn-Tom has moved along at a remarkable pace; 9 of the 10 locks are either already complete or under construction. The entire project is approximately 60-percent complete and there is now limited navigation occurring south of Columbus, Miss., through Alabama to the Gulf of Mexico. The anticipated industrial development has already begun to appear; the future prospects are very exciting.

I ask you to carefully consider the serious need for the Tennessee-Tombigbee as you vote on the funding for this project for the 1982 fiscal year. I am aware of the special constraints we have on the budget for the next few years, and in keeping with President Reagan's plans, I ask that you consider the outstanding merits, accomplishments, and fine future this project has and support a level of funding that will meet with the President's goals while allowing the construction to continue uninterrupted.

Thank you.

Mr. PRITCHARD. Mr. Chairman, I yield 7 minutes to the gentleman from Indiana (Mr. COATS).

Mr. COATS. Mr. Chairman, there was a day when special interest, pork barrel projects were the accepted means of doing business in this House. At least one public works project for every district was the goal of any Congressman who wanted to be reelected

to this body. Even the voting public accepted this as a way of doing business, because they knew that their own district was either in the middle of a public works, money-infusing project or at least on the waiting list and due to be funded at some future date.

I would suggest that the political climate has changed in this country. A serious economic crisis is facing this Nation. It is time to reevaluate and rethink old priorities. We have taken steps in this body to recognize this crisis by voting to limit Federal spending. Some of these votes to cut spending have not been easy. Some of the cuts will hurt, but a majority of this body has been willing to make these short-term cuts in order to achieve the long-term good for the people of this Nation, because we believe that control of inflation and a revitalized economy will aid all Americans.

Now, if we acknowledge that spending cuts have to be made, then we must recognize that cuts have to be made first in public works projects that cannot stand up to economic justification, and first on this list of firsts is the Tenn-Tom Waterway, an ultimate $3 billion effort to build a manmade river when the Good Lord has already given us free passage to the gulf, namely the Mississippi.

Having said that, let me point out one of the specific reasons why this project is not economically justified. To maintain the navigation benefits needed to keep this project's benefit cost ratio above parity, the Corps of Engineers must be able to accommodate two-way eight-barge tow traffic north of Demopolis, Ala., along the authorized portion of the waterway. In addition, it must be able to move these eight-barge tows south of Demopolis.

Virtually all of the project benefits that the corps has determined are based on moving traffic to Mobile. The passage south of Demopolis to Mobile is critical to the economic justification of the Tenn-Tom project.

Now, the problem with that is this: In its present state, the river south of Demopolis simply cannot accommodate the volume of traffic needed to support the claimed project benefits by the Corps of Engineers.

The corps claims that by reconfiguring the eight-barge tows at Demopolis into six-barge tows, it will be able to move enough traffic to Mobile. This assumption is demonstrably suspect and deserves critical examination by this Congress before passing on this issue.

Photographs of the river south of Demopolis show that it is, in the corps' own words, "more crooked than a barrel of snakes."

Let me hold up for the body some aerial photographs of the river south of Demopolis. This is mile 70 to 75. Here is mile 26 to 28. As you can see, it is more crooked than a barrel of snakes. You cannot move eight-barge tows down this river south of Demopolis without some major improvements.

In 1976, the corps found that only 8 percent of the barge traffic on this part of the river moved in six-barge tow configurations. None moved in eight-barge tow configurations. That means that the tows are going to have to be broken up at Demopolis, put into four-barge tows and moved on down the river. That changes the corps' economic justification and makes the project not economically justifiable.

If the river below Demopolis cannot accomodate such tows, it is reasonable to assume construction of the project north of Demopolis will only serve to generate extreme pressure for the bend straightening, extensive bend straightening needed south of Demopolis. In fact, that is precisely what we mean when we say the ultimate $3 billion cost of the project.

This is not idle speculation. This entire process is neatly outlined in a memorandum from the major project promoter, the Tennessee-Tombigbee Water Development Authority. In that memo entitled "Lower End Study" they state:

> It is becoming increasingly obvious that the Lower End Study should be stalled. The workshop for landowners held last Thursday in Jackson, Alabama, drew some 300 persons including State political leaders, all of which voiced strong opposition to the proposed improvements and the taking of land. Therefore, we strongly recommend that the study be indefinitely shelved until some future time when congestion of traffic begins to occur on the Ten-Tom. At that time there will be much stronger evidence for these proposed improvements and much more support.

As my colleague from Pennsylvania has pointed out, that proposed improvement is going to cost this country and the taxpayers of this country $960 million. That is where we come up with the $3 billion ultimate cost.

I submit that this Congress should put a stop to any effort at accelerated funding for a project that is but the tip of the iceberg. If we fully fund the Tennessee-Tombigbee project north of Demopolis, we can fully expect to be told breathlessly only a few years from now in this body that just a little more work is needed to the tune of $1 billion.

The argument has been made since we have spent so much already that we ought to spend just a little bit more. I think the facts I have just stated, as documented by the GAO report, and the memorandums from the Corps of Engineers, indicate that we will spend quite a bit more to ultimately bring this project to conclusion.

Prior to the time I joined this body, I spent a number of years in the investment business. One of the basic rules by which we operated was that no matter how much money was previously spent on a project, you don't make the situation worse by throwing good money after bad. I am afraid, Mr. Chairman, that in spending more money on the Tenn-Tom Waterway, we are throwing scarce, badly needed good money after a bad project. Just because we have already spent $1 billion on this project does not mean we should spend an additional $1 or $2 billion.

This Nation can no longer afford this kind of wasteful, unjustified spending.

Mr. WOLPE. Mr. Chairman, will the gentleman yield?

Mr. COATS. I yield to the gentleman from Michigan (Mr. WOLPE).

Mr. WOLPE. I thank the gentleman for yielding. I would like to associate myself with the remarks of the gentleman from Indiana.

I rise in support of the amendment offered by my distinguished colleagues, the gentleman from Washington (Mr. PRITCHARD) and the gentleman from Pennsylvania (Mr. EDGAR), and commend them for their leadership in this important effort.

No single issue has dominated the attention of this Congress more than the effort to eliminate wasteful spending. It is an issue worthy of our attention, an issue that has been ignored for far too long, and an issue that now demands our immediate attention.

Recognizing the need to put our economic house in order, this Congress recently passed an austerity budget that drastically reduced Government spending. But there is a troubling aspect about this budget: While it eliminated a vast number of costly Federal entitlements—entitlements, it should be noted, that were designed to address the dilemmas of our country's most economically vulnerable—it left untouched numerous and glaring examples of waste and porkbarrel spending. And of all the pockets of waste that remain in the budget, perhaps none is more deserving of elimination than the Tennessee-Tombigbee Waterway.

From the outset, the benefits of the waterway were grossly overstated. In order to develop a persuasive case for the waterway's construction, the Army Corps of Engineers claimed that a multitude of businesses would be able to obtain more expedient and more affordable transportation as a consequence of the canal's construction. In truth, most of the businesses cited in the corps report either did not exist or denied that they had any interest in using the canal.

Advocates of the waterway claim that its construction is necessary to handle the transportation of increased coal production. However, a congressional research study released just this

week reports that no major expansion of coal mining is planned in the parts of Appalachia that the $2 billion canal project is supposed to serve.

Simply, we do not need Tenn-Tom. It is a boondoggle that we can live without. In fact, it is such a horrible waste of this Nation's resources that appropriations should be halted even if the project were under full-scale construction. But thanks to the wisdom of the Fifth Circuit Court of Appeals of New Orleans, we need not address that issue directly.

On July 13—last Monday—the Fifth Circuit Court of Appeals of New Orleans ordered the district court to issue an injunction against the river and canal sections of the project, and against all activity affecting the environment of land acquisitions planned after 1971—over 35,000 acres of land. The court held that the Army Corps of Engineers had, and I quote:

Blatantly violated the National Environmental Policy Act and its own regulations by refusing to prepare a supplemental environmental impact statement on the major changes in the Tennessee-Tombigbee Waterway that have occurred since 1971.

The court further states that—

The fault lies with the decision of the corps to ignore its responsibility and to resist this lawsuit while continuing its default.

It would be the height of folly for us to appropriate another $189 million for this project when it has been shown to be unlawful, and has been halted precisely because of that illegality.

There are far more important issues before us than creating a contingency fund for an obsolete and unlawful boondoggle that has been halted by the courts. If we fail to adopt this amendment, we will be throwing very expensive dice into the darkness—a frivolous and foolhardy gesture.

I urge adoption of the Pritchard-Edgar amendment.

Mr. COATS. I urge my colleagues to support the amendment of the gentleman from Washington (Mr. PRITCHARD).

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. I thank the chairman and rise in opposition to the amendment.

I have listened to my good friend, the gentleman from Pennsylvania, and his opinions about our distinguished chairman and the Director of OMB, David Stockman. But I also know that Mr. Stockman has been against food stamps, he has been against economic development, he has been against most of those things. So I do not think in reference to the Tennessee-Tombigbee that it is a good or valid argument to involve Stockman.

I respect the gentleman's opinion and his sincereness in opposing the Tennessee-Tombigbee. But I want to point out to the gentleman and to this body that if we took the same attitude in terms of the Hoover Dam, if we took this same attitude in terms of developing water projects in California that bring us the fruit into New York City, Detroit, and to Chicago during the winter months, if we took this same attitude 20, 30, or 40 years ago in developing any projects, I ask the gentleman to tell me where would this country be today, and is it in the best interests of the United States and its people that we do develop what we can afford? I do not disagree with anyone that wants to point out that we ought to conserve and cut back. We ought to do the best we can in terms of fiscal responsibility in this country.

But I also want to point out that if we stop everything, if we stop everything because we want to take a anti-development position, then we will not accomplish the greatness that we have accomplished to this point in time in terms of the world itself. So we have the Corps of Engineers and their projects that the corps has carried out so that this country today is the envy of the rest of the world because we have been able to develop our natural resources and we have been able to develop our rivers.

Let me tell my colleagues how far I think we yet have to go. We have a planned development by the Corps of Engineers to develop the hydroelectric potential of the Northeast and the Midwest, the only area of our country that does not have any type of marketing system for electric power, such as a power authority established by Federal law. How can we in the Midwest continue to be competitive when we have the Tennessee Valley Authority? If I would have been here in Congress I would have supported those projects at that time, because it was great to develop them, and there was a potential and a need to develop them.

But we need to develop essentially the Northeast and the Midwest, and I am going to need support, and the gentleman from Pennsylvania, is going to need support to develop that potential in Pennsylvania.

I would say to the gentleman not to expect his county government to do it and not to expect his State government to do it because they will never be able to do it or to afford it. They can participate, but they will not be able to afford it alone, so we need the Federal Government's participation.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Chairman, I rise in opposition to this amendment which would discontinue funding and eventual completion of the Tennessee-Tombigbee Waterway project.

As you know, I represent western Kentucky, an area rich in coal deposits. One major factor preventing rapid development of our coal, as more uses are discovered for it, is the deplorable lack of bulk transportation capabilities. Completion of Tenn-Tom would allow cheap and efficient transport of our coal to ports on the Gulf of Mexico and the many points between.

However, there are obstacles in the way. There are some who have fought Tenn-Tom since its inception. There are those in the House who have sought to cut its funding to the bone, saying such action is a cost-cutting one. I cannot agree with this view of the value of Tenn-Tom. To simply do away with over 8 years of construction effort and the planning that went into that effort would be unconscionable. Even worse, however, is the fact that the project would not fulfill its original purpose and that the nearly $1 billion previously spent on the project would be completely wasted.

Also, lest we foster the notion that only coal is to be transported on the waterway, we should remember that many agricultural commodities are transported by river barge and that the Central States and the South are some of the major agricultural areas of our Nation. Other commerce expected to be moved on Tenn-Tom are limestone, chemicals, and other basic raw materials.

But let us look more closely at the coal situation. As our national commitment to produce more coal began, we realized that production was only part of the problem. The coal must be moved to the location where it will be used or be shipped overseas, where its sale will allow us to close the gap on our trade imbalance. Indeed, Tenn-Tom has been criticized because the majority of commerce projected to be moved on the waterway is coal, one-half of which would be for export. At this time, and in the foreseeable future, however, coal is the best resource we have for resolving our energy supply and trade imbalance problems. The Tenn-Tom route can move coal at $2.57 per ton cheaper than existing modes of transportation, further lowering the cost to consumers. Additionally, Tenn-Tom will move coal to five steam-generating plants. An efficient method of transporting coal will lower projected costs of meeting electrical demand in the years ahead.

Information obtained direct from the coal industry indicates that completion of Tenn-Tom will result in an increase in coal production in the Ohio Valley. These data indicate a 14-percent increase in Kentucky alone, with Illinois increasing production by a whopping 42 percent, 32 percent in Indiana and a 26-percent increase in Ohio. Clearly, Kentucky is not the only State which would benefit from completion of Tenn-Tom.

Tenn-Tom is a vital and necessary project. To allow it to die from lack of funding would be a catastrophe. It must be completed quickly and I urge you to approve the administration's request for $201.9 million in fiscal year 1982.

Thank you.

□ 1410

Mr. PRITCHARD. Mr. Chairman, I yield 3 minutes to the gentlewoman from Rhode Island (Mrs. SCHNEIDER).

Mrs. SCHNEIDER. Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from Washington. In my opinion, the gentleman has identified a large expenditure of Federal funds which, simply put, does not stand the stringent test of cost effectiveness required of a responsible legislative body. Despite the heavy reliance on facts by the opponents to the SRC-I project yesterday, it was obvious the more emotional, rhetorical lingo was more persuasive. Nonetheless, I personally feel compelled to make a few points that are verifiably factual.

Let us look at the facts. With the $1 billion required to upgrade and complete the Demopolis to Mobile segment, this project will cost some $3 billion to complete. And what are we getting for this massive expenditure? The answer is less than encouraging.

The Army Corps of Engineers and other supporters of the project base its economic justification on the movement of coal. But both GAO and CRS find corps' estimates of coal movements greatly exaggerated, noting intense competition which would develop between Tenn-Tom and the Mississippi River and the railroads.

The Mississippi, despite its greater length, would still be more attractive to coal shippers. The tows, or strings of barges, would be larger on the Mississippi by a factor of 5 to 6. The Tenn-Tom would pose a very restrictive and slow passage, having 10 locks, while the Mississippi has none. CRS has estimated that a ton of coal can move down the Mississippi for as little as 10 percent of the cost of moving the same ton down Tenn-Tom.

Can this situation be worth another $1 billion? I think not, and I have not even addressed the competitive movement of coal by railroad.

The original cost estimate for Tenn-Tom was about $325 million. Today, 10 years later, it has increased 900 percent and is partially blocked by a court injunction.

This is simply another example of a huge, unnecessary, extravagant Federal porkbarrel project breaking the backs of the taxpayers. Let us shut it down this year and save close to $200 million. Do you realize what $200 million can buy? If we can shut it down for good when we have the opportunity, we can save an estimated $600 million plus $1 billion more on the Demopolis segment.

The amendment offered by the gentleman from Washington is an important first step, and I commend him for offering it. I sincerely urge my colleagues to join with us in slaying this sacred cow.

Mr. EDGAR. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHNEIDER. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I would like to congratulate the gentlewoman for her statement. I think it is right on target. And just to clarify a point which was made earlier, the gentleman from Michigan was speaking about the economic problems of our region of the country, particularly Michigan.

I would like to point out for the House that this project is going to expend $189 million in the function category for Tennessee-Tombigbee under Alabama, but it is also going to provide $800,000 for the Tombigbee River and tributaries in Mississippi. The whole State of Michigan is only going to get $600,000 a year under this bill.

Mr. BEVILL. Mr. Chairman, I yield such time as she may consume to the distinguished gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Chairman, I rise in opposition to this amendment.

Today the Tennessee-Tombigbee Waterway stands 63 percent completed, and by the end of fiscal year 1981 it is projected that 69 percent of the navigation portion of this waterway will be completed.

The Congress already has committed 85 percent of the Federal funds for the completion of the Tenn-Tom, and it seems incredulous that we would be thinking of halting funding for this project at this late date.

The opponents of continued funding of the Tenn-Tom argue that it will either be too successful, requiring additional work on connecting waterways, or that it will be empty, and therefore a waste of money.

I think that my colleagues will realize that you cannot argue both ways at the same time. The truth is that this waterway has been the topic of more investigations than any other Federal public works project in history. And it has met the test of each legitimate and complete investigation.

Those of us from the coal-producing States of this great Nation realize that America's answer to the energy crisis lies in its most abundant energy resource—coal. And we realize, also, that America has made a commitment to the rest of the world to double its production of steam coal by 1990 and triple it by the end of this century.

To do so will mean hundreds of thousands of additional jobs for America's coal miners. It will also mean a great deal of additional coal will need to be transported to our ports for export to other countries. To argue the contrary is to argue against the continued expansion of America.

We have the coal, we have the workers, we have the desire to eliminate our costly dependence on foreign oil. We now must ready our transportation network for the increased level of coal, for domestic use and for export. The Tenn-Tom stands ready to help do this. Let us not stop a worthy project, nearly two-thirds complete today. Let us vote for commonsense and vote to continue support for the Tenn-Tom.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Chairman, may I say to my colleagues again that this debate is, in my judgment, much ado about nothing in many ways.

I talked to the Director of the General Accounting Office, and he said the GAO was entitled to go back to the St. Lawrence Seaway or even further in history if the Senate or a chairman of a committee asked the agency to do so and to supply information. Thus the information asked of the GAO and supplied by that agency was in response to a Senate request and did not go to any conclusion as to the project, its present status, or its eventual merits.

Now, let us see what the court said in its opinion. I quote:

> We are extremely reluctant to interfere with the construction of a project that Congress has authorized for the last 10 years and is now 55 percent complete.

This was the figure at the time the suit was filed.

Thus the court acknowledges that the project has been approved by the Congress each of 10 years. The court does say to file a supplemental environmental impact statement. This is being done now. I shall not dwell here on the value of the Tenn-Tom to the Southeastern States and they are tremendous.

The question before us is, Shall we spend the money and complete the project and receive the estimated $125,000,000 income per year, or close the project which will result in the loss of more money and we will receive no benefits?

Reference has been made to the court's opinion that failure of the corps to file the supplemental environmental impact statement was sufficient to reverse the district court and directs such court to enjoin certain further construction until the corps had filed such supplemental environmental impact statement. In fact, the court said, "if such impact statement had been filed there would have been no need for a lawsuit." Again this impact statement is being prepared.

Now, we all wonder why the corps did not file a supplemental environ-

mental statement. I can only surmise that since the changes improved the environment, or so they thought, it was not necessary. They provided for the development of this area in the new section. Local people were satisfied. This lawsuit was brought by people from other areas.

The court of appeals answered in its opinion that you have to file the statement because the law says so, even if it does improve the situation.

The court of appeals returned the case to the district judge, and in the opinion said the district court, on a proper evidentiary showing, can release any part of the project from the injunction.

As to the amount of money involved it will be needed—perhaps to meet the expense of a new supplementary environmental statement plus construction. If the statement is filed early then the money is necessary for construction.

If the local district judge does relieve them from some of the injunction, you will need the funds for construction.

So let me say again, I am not only asking you to treat my section of the United States like we treated yours; but I am asking you that when you go this far down the road, do not have us coming here asking you for money to restore the environmental quality of this area like it was when the project was started.

Please realize this is an investment in a valuable project of great value locally, and also to the Nation.

Let us rush to completion so that we may reap the benefits of this sound project. I hope the Members will vote this amendment down.

Mr. PRITCHARD. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Chairman, as you know, nearly 70 percent of the benefit/cost justification for the Tennessee-Tombigbee project is based upon alleged coal movements from mid-America to the gulf. I have examined this claim closely, particularly as it relates to the potential for Illinois coal to move down the Tenn-Tom, and have found it to be very problematical.

A recently released study of potential Tenn-Tom coal traffic prepared by the Library of Congress asserts that very little, if any, Illinois coal will be shipped on the project:

First, the study correctly noted that Illinois coal tends to be higher in sulfur content than certain other coal. Thus there is at the outset a more limited export market for the coal, since foreign countries prefer to import lower sulfur coal.

Second, the study concluded that Illinois coal will be more expensive to burn, due to the need to scrub out the sulfur. Therefore, the study pointed out that Illinois coal—even more than other coal—will be moved to market by the cheapest means possible in order to offset the extra burning costs.

Third, the study concluded that it will be far cheaper to move coal down the Mississippi River than down the Tenn-Tom, for the following reasons:

First, the Mississippi is free of locks all the way from southern Illinois to the Port of New Orleans—while the Tenn-Tom is burdened with 10 separate locks, each of which would delay an eight-barge tow for periods of at least 45 minutes. In addition, the river between Demopolis and Mobile is extremely narrow and winding, a fact which would further impede barge traffic.

Second, barge tow sizes on the Mississippi can run as high as 45 to 50 barges—while the maximum tow size on the Tenn-Tom will be a mere 8 barges on the upper portion (above Demopolis) and only 4 to 6 barges on the lower portion (below Demopolis).

Based on these barge tow disparities, the Library of Congress concluded that—

> The direct labor cost of moving 6,000 or 9,000 tons of coal (on the Tenn-Tom) could approach that of moving 60,000 tons of coal down the Mississippi. (Study at page 5.)

Thus it is clear that very little Illinois coal will move on the Tenn-Tom. It is also clear that very little coal from other States will be moved on the project. Since the major justification for the project is the alleged movement of coal, it will clearly be an economic white elephant. We should not spend a penny more on the project.

□ 1420

Mr. BEVILL. Mr. Chairman, I yield such time as he may consume to the gentleman from Alabama (Mr. FLIPPO).

Mr. FLIPPO. Mr. Chairman, I rise in opposition to the amendment.

We, in the South, do not ask for policies which guarantee equality of economic condition. Rather, we support policies which guarantee equality of economic opportunity. The Tennessee-Tombigbee Waterway probably represents our No. 1 economic opportunity.

We have labored for many years—including 11 years of actual construction—on the Tenn-Tom and now have the navigation features almost 70 percent complete. I find it hard to believe that there are those who want us to abandon it now.

We have already spent over $1.4 billion.

Every major structure is already under contract.

It will cost almost as much to terminate it as it will to complete it.

This project is being built in Mississippi, which is 50th in per capita income in the United States. The project is finished in Alabama, which ranks 47th in per capita income, but Alabama will get very little benefit from this waterway unless it is completed and Tombigbee River is connected to the Tennessee by this new waterway route. Incidentally, Alabama, has already spent more than $130 million to relocate roads and bridges and expand the Port of Mobile in getting ready for this project.

I have never seen more misinformation about any project, than I have seen about Tenn-Tom this week. Some of the letters I received said it would be a "free waterway" and that we are subsidizing barge transportation.

I wish someone would cite for me a form of transportaion that is not subsidized to some degree by the Federal Government.

But we only ask for equal opportunity, and I assure you that there was never any intent that Tenn-Tom be any different from any other waterway. Every other waterway in this country was built without user charges being assessed on it.

But just to prove that we want to be fair with the other sections of this country, I have introduced legislation that will assess user charges on the Tenn-Tom.

I might add that the administration bill on user charges for waterways does include the Tenn-Tom. It levies a tax on fuel used on waterways, and provides for other methods such as licenses, ton-mile charges over given segments, lockage fees, congestion fees, and assessments based on cargo capacity.

These fees will be used to provide for full recovery of operation, maintenance and construction costs, with interest, over a period of 50 years.

But gentlemen, if this project is not completed, how is the Federal Government going to get back its $1.4 billion that has already been invested in this project? I submit to you that there will be no way to recover the taxpayers' money already spent.

I repeat, every public waterway system built in this country before Tenn-Tom was built without user fees being assessed on it. But we are not asking that Tenn-Tom be a free waterway. I have introduced legislation before it is completed to provide for recovery of all costs, with interest, in building and operating the Tennessee-Tombigbee Waterway.

To complete it will cost $475 million after this fiscal year. The full $1.7 billion cost of the project can be recovered through user fees, not to mention the thousands of new jobs that it will create through new industry and business.

If we stop it now, the $1.4 billion already sunk in concrete and moving dirt will be lost forever and there will be no way to recover it.

Gentlemen, I urge you to support completion of this much-needed project.

Mr. BEVILL. Mr. Chairman, I yield 3 minutes to the distinguished gentlewoman from Louisiana (Mrs. BOGGS), a member of the Appropriations Subcommittee and a very able member.

Mrs. BOGGS. Mr. Chairman, I rise in opposition to the amendment. I rise not only as a member of the Subcommittee on Energy and Water Development, who has listened to the testimony, read the testimony, visited the site, but also as the Representative of the Second Congressional District of Louisiana, in which the Port of New Orleans is located.

There are those who criticize this project, the Tennessee-Tombigbee project, as duplicating or cloning the Mississippi River. I can tell my colleagues that the Tennessee-Tombigbee has had the support of the Port of New Orleans, which is on the Mississippi River, since its inception.

This project will be in the Port of New Orleans' judgment a welcome addition to service the entire range of ports along the Gulf of Mexico.

We recognize that it will provide the heartland of America another direct and vitally important route to the deep water gulf port system. Its timely completion will provide added stability to the entire region's economy by increasing the viability of its industry. It will also be a great stimulus to regional and economic development in the area that it traverses which for the most part involves economically and underdeveloped or deprived locations, as the gentleman from Ohio has so well pointed out.

In a parochial way, I should like to say to the gentleman from Illinois that we are very grateful at the Port of New Orleans and on the Mississippi River for the movement of coal from the Illinois region through our ports, but we also recognize that with the great expansion of ports for the export of coal that we very much need another waterway that can also move the coal from the ports of Illinois.

So, in the light of the worldwide energy crisis, perhaps the single most important role of the new waterway in our Nation's future will be to provide another needed route for coal movements. In that role, the Tennessee-Tombigbee Waterway will add a major new fuel-efficient artery for the delivery of Appalachian coal to the world's coal markets through the Port of Mobile.

Over 1.2 billion tons of coal are expected to move on the Tennessee-Tombigbee during the 50-year economic life of the project, an average of 23.5 million tons annually.

Mr. Chairman, I join with the Port of New Orleans commissioners in strongly supporting the early completion of this vital waterway which we feel is very much in the overall national interest and I urge the defeat of this amendment.

Mr. BEVILL. Mr. Chairman, I yield three minutes to the distinguished gentleman from Oklahoma (Mr. WATKINS), who is a member of this subcommittee.

Mr. WATKINS. Mr. Chairman, I rise in opposition to the amendment and I support the Tennessee-Tombigbee. I would like to say to my colleagues in the House, hopefully with some commonsense, I really do not even think this discussion should be taking place today on this July 23, 1981.

I have never taken any of the trips across the waters to a foreign country. I have never taken one inspection trip across the seas. But I have taken a trip down to get a firsthand view of the Tennessee-Tombigbee. I would like to put it in perspective, hopefully with what I consider commonsense.

Before coming to Congress, I was a homebuilder and a land developer. Now think with me just a little bit. We are talking about a project here that is really a canal that connects two rivers. It is useless unless we finish it. It is useless unless we finish this project which has already had 70 percent of it completed with over 81 percent of the taxpayers' dollars spent to complete the project.

Now as a builder I would not even consider building a home or some facility, to three-fourths of the way complete and just stopping and not completing the project to get a financial return for the taxpayers dollars.

I would not consider changing some land development in a project and let it become useless and stop it.

If we go ahead and build this project with the additional 30 percent to make it so the water will flow through, we can ship barges and receive a financial return for the taxpayers. I have seen six barges tied together going down the lower part of the river. I have personally investigated the project. I have been down there and got ticks and chiggers on me. I can say from firsthand, personal inspection we can not just quit this project.

I ask my colleagues to go down there. If my colleagues want a white elephant to exist, to place egg on the face of this Congress and egg on the face of the taxpayers of this country, we can just stop this project and let it sit there.

But I appeal to the Members, let us go ahead and finish this project. Let us see some money come back in return. It will pay its way. We will open up a depressed area of this country. We will allow jobs to be created and economic development to take place. I think we all will be proud of it.

I just ask and I appeal to my colleagues, whether Democrat or Republican, whether conservative or liberal, to look at this as an economically viable project for the future of the citizens of our Nation.

If we leave it now 70-percent complete, with 81 percent of the money invested, it will take more money to fill the ditch back up or we can let it sit there, a scar on the face of this great country of ours, or we can go ahead and finish it and get some return to the taxpayers for this investment.

Mr. BEVILL. Mr. Chairman, I yield 6 minutes to my friend and colleague, the gentleman from Alabama (Mr. EDWARDS).

Mr. EDWARDS of Alabama. Mr. Chairman, I rose about this time last year and came to this very same microphone and I said to our colleagues in the House that in all of the years that the Tennessee-Tombigbee has been before this Congress I have made very few speeches about it; and the reason, frankly, is that I did have a very keen parochial interest in this project and I tend to shy away from getting involved in debates where I do.

I should have thought that after we debated this fully and fairly and completely last year, that that would have been the end of it. And I must say that I am a little dismayed that we find ourselves back here again making the same arguments. We could almost pull out our old speeches from a year ago and say the same things because not a whole lot has changed since then.

If that should have any bearing at all on our thinking, it should be the fact that we are 1 year closer to completion and, therefore, we should go ahead and see this project through.

□ 1430

The biggest problem we have with the Tennessee-Tombigbee is bigness. If this same project were on a smaller scale somewhere else, all these things we are talking about would not be before us today. It sticks out like a sore thumb. We know that. It is the biggest waterway project of its kind in the history of this country, and the chances are it will be the last of this kind.

I would suggest that it will be tougher in the years to come to see these kinds of projects get through the Congress because of the kinds of arguments we have been hearing today. I think that is sad. We should build America. We should do those things that develop our own country, and that is what the Tennessee-Tombigbee does.

I give the Members one little rural county in my district, one of the poorest counties in this country, certainly one of the poorest in my State. An industry of some 400 employees is right now getting ready to come into that county because of the Tennessee-Tombigbee Waterway, to pick that county up by its bootstraps and hire people and generate commerce.

That is what these waterways are all about, to move traffic. That little county is south of Demopolis. I do not think I have had one dime in this bill in 10 years for the Tennessee-Tombigbee that is in my district. South of Demopolis has been hauling barges back and forth for as long as the memory of man runneth not to the contrary, six- and eight-barge tows. There are locks there that can handle eight barges. Whether the operators want to use eight barges is their business, but they can handle them.

Sure, that river looks like a snake, the blue part south of Demopolis. I would say the gentleman from Pennsylvania (Mr. EDGAR) did not put enough curves in there. They are there, but barges and towboats have been going around those curves for 100 years. There is nothing unusual about that. Those boys that run those things know how to go around that river. I can show the Members some rivers in my district and in southwest Alabama curved more than that. They have been using those rivers to push or pull barges for a long, long time.

So the problem we face here, I suggest, is one of bigness. The Corps of Engineers has found the benefit-cost ratio on this project is 3 to 1—3 to 1 without dealing with anything south of Demopolis. I do not know why that should not be sufficient. I would argue if 3 to 1 on this project is no good that the chances of ever building another waterway project are pretty slim. 3 to 1 in most cases I have ever heard of has been very good and something that should be accepted by people who deal in this kind of thing.

What else does it mean? The State of Alabama has already put out $45 million to build the Port of Mobile up to take this traffic. We have passed another $100 million bond issue to further improve the Port of Mobile to handle the coal. We have been building the bridges, along with the State of Mississippi, to prepare ourselves for this project.

To now tell the people in that part of the country and the 23 States it will serve that, after about two-thirds completion, we are going to stop just does not make sense to me and it surely does not make sense to them.

So I ask the Members not to be confused and fuzzed up about this issue south of Demopolis.

There is no project south of Demopolis. There has been no request for a project south of Demopolis. There has been no authorization for a project south of Demopolis other than it is part of the Warrior-Tombigbee system which already exists. I can tell the Members that the people in my district would not look very kindly on doing anything south of Demopolis in any case.

The Tennessee-Tombigbee can stand on its own. It has a good benefit-cost ratio that merits the Members' support. I would urge the Members of this House to oppose this amendment and get on with the completion of this project.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Alabama. If I have any time remaining, I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, is the gentleman indicating that in this bill there is not close to $1 million for the study south of Demopolis?

Mr. EDWARDS of Alabama. What the gentleman said is there is no authorization to build anything south of Demopolis. There has been no request for money to build anything south of Demopolis. There is no money in this bill to construct anything south of Demopolis, and that is all I said.

Mr. PRITCHARD. Mr. Chairman, may I inquire, what is the time situation?

The CHAIRMAN. The gentleman from Washington (Mr. PRITCHARD) has 26 minutes remaining.

Mr. PRITCHARD. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. Mr. Chairman, I rise in support of the amendment of my colleague from Washington (Mr. PRITCHARD) to delete the funding for the Tennessee-Tombigbee Waterway. Although I am relatively new to the debate, after examining the economic facts of this project, I can find absolutely no compelling reason why the taxpayers of this country should continue to bear the financial burden of a multibillion-dollar project with limited, if any, benefits.

Mr. Chairman, a year ago the General Accounting Office was requested to take a close look at the Tenn-Tom project, and reported its findings to Congress in May of this year. Their conclusions confirmed everything which was said last year by opponents of the project. To briefly summarize:

The Corps of Engineers is constructing a severe bottleneck on the Tombigbee River. As GAO stated:

> Completing Tenn-Tom will create a bottleneck on the waterway south of Demopolis, Alabama. Eliminating the bottleneck would cost about $860 million. . . . Continuing Tenn-Tom may be sowing the seed for this additional project.

The conclusion seems inescapable to me that Tenn-Tom is going to be a $3 billion undertaking—$2 billion for the project north of Demopolis, and $1 billion for the project south of there.

More than $1.6 billion would be saved if Tenn-Tom were halted now, including the $1 billion needed to salvage the project south of Demopolis.

The navigation benefits used to justify the project have simply not materialized. GAO examined the benefits estimated by the Corps to arise between 1976 and 1981—benefits estimated to total $77 million annually. However, during that time, less than $16 million in benefits have actually materialized, or less than one-quarter the projected total.

At that rate, the project will be a dismal economic failure. Rather than producing $125 million in annual navigation benefits, the project will produce less than $26 million, while the annual costs on the northern portion of the waterway alone are likely to exceed $100 million.

The project is immense. Although over $1 billion has been committed to date, over $1.6 billion more remains to be spent on the portions of the waterway above and below Demopolis. Thus, the remainder of this project will require $200 million in annual Federal funds for the rest of this decade.

In terms of sheer size, the project is no less massive. The corps itself states that the amount of earth to be excavated for Tenn-Tom would build a 16-foot highway from the Earth to the Moon—a distance of one-quarter of a million miles.

In addition, during last year's debate, one of the most eloquent supporters of this amendment was the present Director of the Office of Management and Budget, David Stockman. Mr. Stockman made two extremely important points during that debate: First, that some of the economic activity generated by the project does not represent a net gain to the national economy. Rather, it will bring about regional shifts in economic activity from one area of the country to another. And second, that the opportunity costs of spending these additional billions of dollars to complete the Tenn-Tom project have not been counted. He stated, and I quote:

> If you spend $3 billion to build this new kind of transportation system or transportation complex, then that money is not going to be available to build steel plants, to build new auto plants, that this country needs, to build synfuels plants this country is going to need over the next decade.

And he concluded that if Congress is going to ignore the fact that projects of this type would not help develop new economic activity, except on a very parochial level, then:

> You might as well employ single-entry bookkeeping all the way, go whole hog and build a pyramid in every state because that would generate a lot of jobs.

There is clearly no rationale for continuation of this project. It does not constitute a successful or productive component of sound economic policy, transportation policy, or any other policy of this Nation. It is, however, pork policy, and one for which a radical overhaul is long overdue. Projects such as the Tenn-Tom Waterway should not be exempt from the sacrifices that far worthier programs are being forced to make in the name of

fiscal restraint and Federal budget austerity.

I would welcome the support of each and every Member of this body for my colleagues' amendment to delete the Tenn-Tom project from this bill.

Mr. PRITCHARD. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, this has been a healthy and an interesting debate. As it winds to a conclusion, I know there will be a number of summary points that have to be made. Let me just make three quick points.

Our chairman of the full committee, the gentleman from Mississippi (Mr. WHITTEN) was very articulate in his reading of a sentence from the court decision. Let me repeat the words that he used. He said:

> We are extremely reluctant to interfere with the construction of a project that Congress has authorized for the last 10 years and that is now 55 percent complete.

That is a quote out of the conclusion of the court decision. The problem is that the gentleman did not read what follows, which begins:

> But the plaintiffs have established that the Corps has blatantly violated NEPA and its own regulations by refusing to prepare a supplemental EIS on the major changes in the Tennessee-Tombigbee Waterway that have occurred since 1971.
>
> Any lay person looking at a list of these changes would at once perceive that such major alterations could have significant environmental impacts. All the expert testimony offered by the parties has confirmed that lay judgment, and the Corps has been at an utter loss for evidence to justify its refusal to file a supplemental EIS.
>
> If the limited injunctive relief we have imposed seems harsh or late, the fault lies with the decision of the Corps to ignore its responsibility and to resist this lawsuit while continuing its default.

I think that clarifies the court's conclusion, and I invite Members to see the total statement that was made by the court.

The second summary point I would like to make is that in 1980—last year—the fiscal request and budget appropriation was $246 million for this project. In 1981, this present fiscal year, we are spending $220 million on this project; and in these 3 years of fiscal constraint, fiscal year 1980, fiscal year 1981, and now in 1982, the total cost over 3 years will be $655 million.

Let me just share with my colleagues the fact that if we combined all of the money for Corps of Engineers water projects that we are spending in Ohio, Maryland, New York, West Virginia, Florida, Indiana, Kansas, Iowa, Montana, Colorado, and Arizona, and added up the total amount of money spent in all of those States, you would not come to the figure that is being appropriated, $189 million, for this legislation.

□ 1440

This is my final point. My colleague, the gentleman from Washington (Mr. PRITCHARD), has a good amendment.

There will be a follow-on amendment offered, but this amendment, I think is the one we ought to support. There is money in the pipeline to shut down the project. There are usable sections of the project from Columbus down. There is opportunity to resell some of the land, and, particularly, there is opportunity to pause and wait and see where the court decision takes us to determine what the final aspects of this particular project are.

But I would argue very strongly with my colleagues that if we do live in a time of limited Federal dollars and if we do live in a period of time when we have to be in great restraint in the use of those Federal dollars, we ought to question any project in which, if we cut $100 million out of it, we would still be spending more money on that project than all other projects in the Nation.

Mr. Chairman, I think it is the responsibility of this Congress, which has set the tone for cutting Federal spending, to cut this project, and move on and serve the Nation in constructing those needed water projects throughout the country that have merit and are clearly more justified than the project that has been laid out before us.

Mr. BEVILL. Mr. Chairman, I yield 5 minutes to my good friend and colleague, the gentleman from Indiana (Mr. MYERS), who is the ranking minority member of this subcommittee.

Mr. MYERS. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in very strong opposition to this amendment.

I know that the proponents of this amendment meant not to leave the impression that this administration did not favor completion of this project. Just in case anyone got that impression from some of the discussion this afternoon, I quote from a former member of this body who wrote a letter just today to a Member of the other body. I am speaking now about our U.S. trade representative, William E. Brock, and I will read just part of that letter that he sent today:

> I am writing to you in support of your efforts and those of your colleagues in defending the Administration's funding proposal for the completion of the Tennessee-Tombigbee project. As U.S. Trade Representative, I believe that the Tennessee-Tombigbee project has the potential to provide important benefits for shipping interests and foreign commerce. This is especially important for U.S. coal exports. Increased shipping capacity on the Tennessee-Tombigbee or any other American waterway can do much to encourage and facilitate international trade and to strengthen our domestic economy.

This is Bill Brock writing to a Member of the other body.

It has also been mentioned that our former colleague who served two terms here last year inserted into the RECORD some comment about this project. This, of course, we must recognize, was at a time when he represented 465,000-plus people in a district in Michigan. Today he has a much larger constituency, and I do not believe any Member here has a comment from him that he opposes the completion of the Tennessee-Tombigbee.

Now, the argument this afternoon seems to have hinged on the fact that the use of the upper part of the Tennessee-Tombigbee would become so expansive and so great that the tows would be larger and they would be unable to navigate the already completed lower section. If that is true, the argument of these same people that it will never become cost beneficial and economically feasible destroys itself by its own evidence. It has to be either one way or the other. Either there has got to be not enough traffic on it that is will never pay or they cannot use the argument that the lower part is going to have to be expanded. One argument has to concede the other. We hear from the proponents of this amendment that the cost-benefit ratio they talk about is on eight-barge tows. The economic study was on six-barge tows, and it has been determined in a recent court decision, so I think we easily destroy this argument by fact.

Much of the argument this afternoon has been along the line that if we had to start this, this is where we would be. I can understand the new Members who have not voted on this issue wishing that they did not have to vote on this, but they, too, cannot escape the fact that we have this investment.

There is not a segment of this waterway that is not under some type of construction, and much of it is already completed. So whatever happened in the past, right or wrong, we are where we are today. We either complete a project that is 60-percent complete or we do not. This is a project that, from every economic study, from those who know, is worthwhile, except for the GAO, and I do not know whether they were ever there to see it. From what I read, I am not sure they ever went there to see it.

It is unfortunate that many of the Members here today have to vote on something they have never seen. It is unfortunate, without any disrespect to those who have expressed views, that we must often vote on something that we know very little about. We can only get the studies someone else has given us.

Again, most of the opposition today to the completion has come from a

report from the General Accounting Office. Again, I see no evidence that anyone from the General Accounting Office ever went on the ground to see the project. Yet this committee has seen it on several occasions, and we strongly recommend that it would not be wise to accept this amendment and waste the money we have in the project today.

The chairman of the full committee has very ably said that it is not a simple matter of just stopping it in its tracks and say that we have wasted a billion dollars, and we are not wasting any more, as someone has suggested. It is not that simple. If we should not complete this waterway, if we adopt this amendment offered by our colleague, the gentleman from Washington (Mr. PRITCHARD), this would not simply just write it off and terminate it. There would be termination costs. We would have to pay contractors, and in the larger amounts there would be court suits that would be involved. I am sure there would be discussion in Congress that we would have to go back and restore the land to its original contour as closely as we can, at tremendous cost and with no return to the taxpayers.

Mr. Chairman, from all the evidence we have, this will be a viable project when completed, and from evidence both from the administration and from the committee that does have knowledge, we strongly recommend that we complete it.

The CHAIRMAN. The Chair recognizes the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is not an easy decision. I know that most Members have made up their minds. There may not be a loose vote in the House. I repeat, it is not an easy decision.

My friend, the gentleman from Alabama, said, "I don't know why we are here." It is not easy to be here and question a project that is this far along. I would agree with him on that.

When I left here the last time last year, I said, "I don't see how we can justify stopping it."

I would also agree with the gentleman that it is a big project, and that is why it stands out. But the fact that it is big does not mean that we do not check it out. Honestly, if I could see economic justification for this project, whether it was small or whether it was big, I would vote for it and continue it.

I am not trying to attack any part of the country and not give them their just due. I want this country to be strong. I think legitimate water projects are in the best interest of this country, and that we ought to fund them and we ought to support them.

But that does not mean that any time a project is started we do not look at it carefully in case we made a mistake. The sad truth is that we have made a mistake. That is the truth. It is just like the situation if you have a relative and you have been dumping some money in a business he is in; if things are bad, you do not say, "Well, I have given him $10,000 last year. I just have to keep dumping more money in it."

I think the facts show that we should stop this project.

Mr. Chairman, let me just cite several points. As far as the economics of this project is concerned, it just will not wash. The studies prove this conclusively. The Department of Energy in 1980 said there is not going to be 20 million tons of coal moving down the Tenn-Tom. They estimated 4 million tons. So that is a 500-percent error.

Then the General Accounting Office in 1981 said that the facts do not support this project.

□ 1450

How about the bond issue, when the Port of Mobile sold bonds to pay for an expansion? If you look into the prospectus and you look into what the bond people said, they do not anticipate a 20-million-ton increase in coal that was going down that waterway. They said it will be 1 million tons.

Now, these are the people who are promoting the sale of bonds in that very area.

I know the gentleman wants to ask me a question, so I would be glad to yield to him.

Mr. EDWARDS of Alabama. Well, just simply to ask, has the gentleman not been advised by the bond company that that figure was used as an absolute minimum and was never intended to be what was perceived to be the maximum or normal flow of coal down that river?

Mr. PRITCHARD. Well, I was not. All I would answer is that if Mobile is supposed to have a lot of coal and you only have 1 million tons, even if it is the minimum, I would think in selling bonds you would be on that shaky ground.

Mr. EDWARDS of Alabama. The gentleman, unless I am mistaken, neither the gentleman in the well nor the gentleman from Pennsylvania (Mr. EDGAR) has been talked to by the State docks people and/or the bond people explaining that provision in that document.

Mr. PRITCHARD. I have not. I will take the gentleman's word that that is the minimum.

Mr. EDWARDS of Alabama. It is not indicative of the coal and anybody who looks at those numbers knows that it is not. It is a number that was used without regard to any of these things we are talking about, I would suggest to the gentleman.

Mr. PRITCHARD. Let us take the Coal Weekly. In 1979, this is a trade journal, it described the Tenn-Tom and its estimates of coal delivery as a "pipe dream." That is the industry that ships coal.

The CRS service that came in and made a study of coal shipments, you know, they concluded that there just was not any way that you are going to get the coal shipments to justify this canal. Remember, that is the basis of the justification today.

I would hasten to add when this project was started, the basis was on shipments from south to north. If you go back and look in the records when it was started, they talked about shipments going north. Now all we do is talk about shipments going south.

The Keystone Coal report, now, that is the industry manual; you do not have to go down and walk along this canal to find out about coal shipments. You go to the industry itself and the Keystone Manual, which is the bible for the coal industry, they said it shows no planned expansion in coal production for Tennessee over the next few years. Now, why?

Well, it is high sulfur coal and foreign governments are not buying high sulfur coal. They can buy other types of low sulfur coal and use it in their production of electricity. They have got air problems in foreign cities, just as we have; so they are not buying high sulfur coal.

Let us just look at three or four facts. The project is 80-percent complete, they said. Now, it is 55-percent complete in the authorized project and it is 33-percent complete, when you include the necessary work south of Demopolis.

Another assertion is that it will cost over $300 million to terminate the project. The assertion is belied by several facts. First, the major portion of the project has already been halted by the court of appeals. Second, the General Accounting Office in its report in May of 1981 concluded that termination costs would be no more than $120 million, and possibly less, depending upon the degree of area restoration.

Third, even this figure would be reduced by at least $29 million through the resale of lands. It is a far cry from the $300 million that was claimed.

There is the assertion that the project will permit the economical shipment of large amounts of coal. The facts just do not show that.

Finally, what has happened in the Senate? We have a lot of people say, "Oh, we know over in the Senate it is going to go sailing through." The Senate Subcommittee on Public Works voted 9 to 5 to limit the funding of the project to just $25 million this year. This is the committee that held the hearings in the Senate and they voted 9 to 5 against it; so funding is not assured once it gets to the Senate.

We do have an opportunity and a responsibility right now to make a judgment whether it is proper to put more money into this project, and if it makes sense to you, I think you should; but I would urge you people who are convinced that it is not viable and have looked at the facts, I would urge you to take this step today. Do not keep prolonging it. Do it today. We have an opportunity right now to stop what I think is not effective spending of the American dollars. If 3, 4, or 5 years from now, our economy turns around and we have lots of money and we can fund projects that are very questionable and very marginal, why then we can take a look at it again; but today we ought to vote in favor of this amendment.

Mr. BEVILL. Mr. Chairman, I yield myself 12 minutes.

Mr. Chairman, we have heard a lot of talk here today. You know, it is amazing to me to sit here and hear about this project that I have been listening to testimony on for years. I do not believe anybody here that is in this Congress has heard more testimony, other than my good friend, the dean of the House, the gentleman from Mississippi (Mr. WHITTEN). We have had 2,000 people before our committee, but I hear more things when this bill comes up on the floor that I never heard before.

We have over 200 projects in this appropriation bill and every single one of them probably has some opposition. When this project is finished, and you are going to finish it, you are not going to stop a project this practically finished; I will guarantee that you are going to see the same type of opposition on other projects. They will target another project for deletion.

Last year, I pointed out that by accident I got hold of this publication I am holding up. It tells me what is going to happen before it happens, before I come to the floor I know what is going to happen. Its says here:

Strategy: How to kill the Tenn-Tom.

I tried last year, to find out who publishes this document. There is no signature, but I will tell you, there is some very sophisticated material in this publication. It tells you about a visit:

It is probably worth a hundred letters. You got to your Congressman and let him know that you are against the Tenn-Tom.

This first time in all these years I ever heard the cost of this project; somebody said $3 billion. I nearly fainted. It never has been over $1.78 billion. That is just all there is to it. You cannot make anything else of it; but in here they say it is going to cost $3 billion. Three billion dollars, that is a big difference; but that is the only place I ever hear it. We never hear it before the committee and I never heard it anywhere except in here when this bill comes up.

But I want you to listen now. You listen a minute and see if this rings a bell with you. It says here:

The most effective way to get in touch with your Congressman, don't go to Washington, because then you would be lobbying. He would look at you, you know, and he would know you done bought a ticket to come up here and he would think you are lobbying somebody. You get an appointment with him in his office back in his district and you go in there and you look at the Congressional Almanac before you go and pick out some votes that you like so you can brag on him. You go in there and make him feel good. You brag on him and tell him how much you appreciate that vote, the way he voted on such and such a bill, and then you pop it to him. You say, "Now, listen, I am against the Tombigbee." Now, this is not up here in your section of the country. All you have got to do is just be for it. I want your commitment. You know, that is way down there. That is a boondoggle.

They have never seen it, of course. They do not know anything about it, but they call it a boondoggle.

Now, this has been going, on, starting last year, and this is the second year of it, the same old thing. These people that are opposing this project, not one of them, not one of them have come before our committee to give us the benefit of their knowledge.

They have not told us anything.

I invited my good friends Congressman PRITCHARD, and Congressman EDGAR, to go down and see this project. We have nothing to hide about this project. I invited them to go down, and I appreciated them going down and seeing it. They looked at it and they were briefed by the Corps of Engineers.

The people who are building this project, the corps, are professional engineers, and they would be working somewhere else if they were not here working on the Tennessee-Tombigbee. They are professional engineers, and we rely on them for technical information.

I am glad we do not rely on what we hear on this floor because we would be in trouble. It would be a terrible water project when we got through with it if we relied on what we hear here.

The corps said the total cost of the project is $1.78 billion. No one raised a question about it, nobody questioned that figure.

The GAO in its recent study, discussed coal shipments. My good friend from Washington, Congressman PRITCHARD, has been told that they cannot use this high-sulfur coal from that area down there in foreign countries.

I will tell my colleagues right now if they will go down there they will see barges of coal, six barges together south of Demopolis, just where they have been for the past 65 years, traveling that part of the river, and they say it is not navigable and they cannot turn the curves. It is a crooked river, but it is not so crooked that six barges cannot go down it and have been going down it, tied together—eight could, but they use six, and it has been that way for 65 years. There is no authorization, and no one is even thinking of building a project south of Demopolis.

Let me finish by saying that from my home county, coal is going down the Tombigbee, down the Warrior River to Demopolis, and on down to Mobile, and being hauled from there into seagoing vessels to Japan and all over the world. So, if the gentleman will, he needs to tell the people in Japan that have been using that coal for 10 years and they are buying millions of tons.

What does the GAO say about the coal? The GAO in its recent study was asked, and I picked this up because my colleagues have been quoting and finding things in here, and they indicate that it says to stop the project. There is not anybody that knows anything about that project that ever said to stop it. Nobody would recommend that. The court would not recommend it. The court specifically said it would be a mistake to stop the whole project.

The GAO in its recent study was asked to determine whether the coal reserves were available to meet projected shipments over the 50-year life of the Tenn-Tom. The GAO finding, and here I am quoting them, found:

An estimated 58 billion tons of recoverable coal reserves are located in those States adjacent to the inland waterway systems with a potential for movement on the Tenn-Tom. This amount is 48 times the coal estimated to move on Tenn-Tom during its 50-year economic life.

The Corps of Engineers has consistently for 200 years been conservative in their estimates. We have checked them out and the benefits have always been more than the corps has estimated.

Someone mentioned that a million dollars is going for a study down south of Demopolis. Of course this is in the report, and all they have to do is look and see what is in here. Do not make it sound like we are trying to start another project. We are not. There are some locks down there. They have been there for 65 years.

The Oliver lock is going to have to be replaced one day. This money is to study these old locks. One of these days they are going to have to have some repairs on them and some work done on them.

There is no new project that we are talking about south of Demopolis.

We have all of these smoke screens and I cannot answer all of them. I do not have that much time. But my colleagues have heard what Mr. Brock said about the coal that we need to be moving on the Tenn-Tom. We need to ship that coal overseas, and more is going to be going overseas. The corps said 70 percent of the freight on the Tenn-Tom will be coal. My colleagues

know the important role that coal is playing now.

Some Members have said that members of the Cabinet are against the Tenn-Tom. My colleagues heard what Mr. Brock has said. He is very much in favor of it. The President is for it and the last six Presidents were for it.

There are other projects in there that cost just as much as the Tenn-Tom. There is not a State in this Nation that does not receive money through the projects funded in this appropriation bill. Every one of the 50 States is receiving money. So let us not throw up all of these smoke screens.

I have never seen such a phony attack as is made on this Tennessee-Tombigbee project. This project has been studied more than any project, not just any project in the United States, but any project in the world. It has met every test.

The L. & N. Railroad started this opposition with $15,000. This is where the ball started rolling. They do not have their name on this, but they put $15,000 into it to start this opposition when the project started. They have been to the U.S. Supreme Court twice, and the Supreme Court of the United States says you have not got a case. They have been in the Federal court. This is the sixth decision last week which really affirms the strength of this project. There actually have been six Federal court decisions, and twice the U.S. Supreme Court said no, said the lower courts have handled it right. This was on the environmental question, on economic feasibility, on every kind of question that could be raised, and they have raised it.

So I urge my colleagues to vote against this Pritchard amendment. If my colleagues approve this Pritchard amendment they are going to have an area out there that looks like the worst tornado that ever hit any part of the United States. I asked one of the engineers yesterday, what would happen if we did not get the funding for the project and just stopped it like one or two are advocating here.

He said, well, the first thing is that you would have to have people out there to pump the water, to dewater the locks and dams. There are still six locks and dams in different stages of completion. He said if we did not they would just push them up out of the ground. Talk about a disaster area.

Let me just urge my colleagues, vote no on the Pritchard amendment.

● Mr. SOLARZ. Mr. Chairman, I rise today to support the amendment offered by Representatives PRITCHARD and EDGAR to delete $189 million for the Tennessee-Tombigbee Waterway project from the energy and water appropriations bill.

As a member of the Budget Committee, I am particularly concerned about this needless and wasteful appropriation. We have completed work on the first budget resolution for fiscal year 1982 and are well into the reconciliation process which will reduce Federal spending by some $37 million. Over the last several months we have cut the flesh and muscle from vital and well-functioning programs because the Congress has accepted the argument that Government is living beyond its means. In this context there can be no justification for continuing to fund Tennessee-Tombigbee.

Let me also make it clear that I support public works and infrastructural spending as a necessary precondition to America's economic revitilization. All the tax cuts in the world will not improve productivity if we do not have the roads, waterways, and tracks to carry goods. But, I am convinced that Tennessee-Tombigbee will not improve our infrastructural capacity.

The rationale for Tennessee-Tombigbee is that it would provide a transportation avenue for coal exports. The Library of Congress reported on July 16, however, that there does not exist any substantial quality of coal for export to move on Tennessee-Tombigbee. Also, Tennessee-Tombigbee will not improve on the Ohio and Mississippi Rivers which can handle whatever coal there is.

GAO estimates that the total cost for this superfluous project will be $3 billion. GAO also found that the Army Corps of Engineers wildly exaggerated the project's benefits. Indeed, the majority of the tonnage claimed as a benefit comes from businesses which either do not exist or denied that they had any interest in the project. In fact, the Tennessee-Tombigbee Waterway will never justify its cost.

Finally, documents filed with the Federal district court in Mississippi show that in 1975 the corps withheld the true cost of the project because it would have had too great an emotional impact on Congress. On July 13, the U.S. Court of Appeals for the Fifth Circuit enjoined the Corps of Engineers from continuing work on the major construction area, concluding that the Army Corps had blatantly violated the law. How, in good conscience, can we rush to drastically reduce necessary programs and continue to fund such a boondoggle?

I urge you to support the amendment and vote against the Tennessee-Tombigbee appropriation.●

Mr. PRITCHARD. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington (Mr. PRITCHARD) to the amendment offered by the gentleman from Indiana (Mr. MYERS).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. PRITCHARD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 198, noes 208, answered "present" 1, not voting 26, as follows:

[Roll No. 156]

Downey	Lewis	Wylie
Dymally	Mattox	

□ 1520

The Clerk announced the following pairs:

On this vote:

Mr. Phillip Burton for, with Mr. Burgener against.

Mr. Mattox for, with Mr. Latta against.

Mr. Dornan for, with Mr. Hansen of Utah against.

Mr. Lewis for, with Mr. Hansen of Idaho against.

Mr. ST GERMAIN changed his vote from "aye" to "no."

Messrs. PURSELL and EVANS of Iowa changed their vote from "no" to "aye."

Mr. PHILLIP BURTON. Mr. Chairman, I have a live pair with the gentleman from California (Mr. BURGENER). If he were present he would have voted "no." I voted "aye." I withdraw my vote and vote "present."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1800

PERSONAL EXPLANATION

Mr. RITTER. Mr. Chairman, I was unavoidably absent during rollcall number 156. Had I been present I would have voted "aye." Such a vote would have been consistent with my vote in the previous Congress on this issue.

□ 1530

Mr. DONNELLY. Mr. Chairman, I move to strike the requisite number of words.

If I could engage the chairman of the subcommittee in a brief colloquy, I wish to inquire as to the Appropriations Committee's specific intentions for the Weymouth-Fore River project in Massachusetts. It is not addressed in the language of the energy and water appropriations bill. It is my understanding that final plans and specifications will be completed in October 1981, after more than 10 years of study and planning. Local sources are prepared to provide 50 percent of the total $401,000 cost of the dredging project, contingent upon prompt Federal approval of the remaining 50 percent, and I understand the gentleman has been assured by the office of the chief engineer that the project will proceed October 1, 1981.

Mr. BEVILL. Yes, the gentleman is correct.

Mr. DONNELLY. I thank the chairman for his support.

AMENDMENT OFFERED BY MR. EDGAR TO THE AMENDMENT OFFERED BY MR. MYERS

Mr. EDGAR. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. EDGAR to the amendment offered by Mr. MYERS: In the Myers amendment, strike out "$1,518,941,000" and insert in lieu thereof "$1,429,941,000".

The CHAIRMAN. The Chair should point out that under the unanimous-consent agreement, there are 11 minutes remaining under the control of the gentleman from Washington (Mr. PRITCHARD), and there are 4 minutes remaining under the control of the gentleman from Alabama (Mr. BEVILL).

The Chair now recognizes the gentleman from Washington (Mr. PRITCHARD) to yield such time as he desires.

Mr. PRITCHARD. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, I believe it will only take 10 minutes on my amendment—5 minutes for me to explain my amendment, 5 minutes for the gentleman from Alabama, (Mr. BEVILL), to respond. Then we can have a vote on my amendment on the Tennessee-Tombigbee Waterway.

Let me just indicate to you the status. We lost by a very few votes the Pritchard amendment, which was an attempt to eliminate all funding for the Tennessee-Tombigbee Waterway. The amendment which I have pending simply reduces the funding of that project to $100 million for fiscal year 1982.

It leaves in the project more money than any other water project in the Nation. In fact, my amendment will provide for $13 million more than is spent on the nearest, closest project, which is lock and dam 26.

As we have just determined by an action of the House, the House on this particular day does not want to kill the project.

Mr. Chairman, for two specific reasons, I believe that this project can proceed with the reduction of $89 million. Let me state them very quickly: First, the court of appeals has enjoined a major section of the project, therefore a great portion of the project will not need the kind of funding that was anticipated in placing $189 million in the project; and second, and probably more importantly, there is responsibility on the part of the States involved, the communities involved, to have a certain amount of cost sharing.

Let me quote for my colleagues a statement that is found on page 88 of the GAO report of May 1981. Under "Alternative Financing Is A Possibility," it states:

> We believe during this period when there is enormous pressure to reduce Federal spending, if the concern of the Congress is the remaining Federal expenditure, exploring alternative arrangements to finance the incomplete segments of Tenn-Tom may be worthwhile. While it was not within the scope of our review to examine alternative financing, we feel this is a possibility. Some methods that come to mind include:
>
> States or others could borrow funds from the Federal Government and repay through user charges.
>
> Alabama and Mississippi could issue long-term bonds and repay through user charges.
>
> Alabama and Mississippi could finance portions of the project through general revenue funds.

I indicated in earlier debate in hopes of supporting the Pritchard amendment that David Stockman spoke in the well of the House just a year ago in opposition to this project. I had indicated that all over the country there is concern about Federal spending, and we have had editorial endorsements from everywhere indicating the need to reduce Federal funding and particularly reduce it for the Tennessee-Tombigbee Waterway.

My amendment, in short, leaves $100 million, does not impact on the amendment offered by the gentleman

from Indiana (Mr. MYERS). In fact, it includes the increase of $9 million offered by the gentleman, and it is an opportunity for those Members—many of whom supported completion of the Tennessee-Tombigbee Waterway—to say that maybe it is more appropriate for us to spend close to $10 million a month rather than spending close to $20 million a month.

I urge my colleagues to reduce the funding to $13 million above the funding for any other project in the Nation, to fund it at $100 million, and to return $89 million to the Federal Treasury.

Mr. PRITCHARD. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Washington.

Mr. PRITCHARD. Mr. Chairman, I congratulate the gentleman on his amendment. I hope the people in this body will support it. I think since the Members have decided on a close vote to continue this project, it makes reasonable sense to cut down the pace, particularly since there is a court case that will slow down construction in the next 6 months.

Mr. EDGAR. I thank the gentleman for his comments.

I would like to congratulate the gentleman on his efforts on this issue. I hope the House will be responsible and vote $100 million rather than $189 million for this particular project, the Tennessee-Tombigbee Waterway.

I yield back the balance of my time.

The CHAIRMAN. The Chair will recognize the gentleman from Alabama (Mr. BEVILL) and inform the gentleman he has 4 minutes remaining under the unanimous-consent agreement.

Mr. BEVILL. Mr. Chairman, I yield myself such time as I may consume.

The gentleman has pointed out that we have no need for any more money. Frankly, 85 percent of the project will be committed by October 1. To approve this amendment will kill the project.

□ 1540

As the Members know, we have funded this project for 11 years. The project is like a bridge. We cannot use a bridge unless it goes all the way across the river. Eighty-one percent of the funding of that bridge has already been committed, and as of October 1 it will be 69 percent complete.

After this bill, we will need but four more smaller appropriations to complete the project and get the benefit of it.

Let me speak about the economy vote. We keep talking about the economy. The Corps of Engineers advise me that it will cost more to tear these locks and dams down and put this land back in an environmentally acceptable condition, than we have already spent. It will cost more to do that than it will to complete the project.

So the economy vote is to complete this project, and if Members vote for this amendment, they are still killing the project because this is going to cancel a great part of the ongoing work and it is going to wreck the project.

This a good project. It stands all tests. I urge the Members to vote against this amendment. If they approve the amendment, they are going the kill the project.

So please vote no on the amendment to cut out $89 million from the Tennessee-Tombigbee.

Mr. Chairman, let me correct one thing. We keep putting up these smokescreens. I do not want to spend my time explaining this, but there are other projects in the bill that cost more than the Tenn-Tom. Every State in this Nation is represented in the appropriation bill. I will just say there are appropriations for energy and water projects for every State in the Union.

So, Mr. Chairman, I urge the Members to support this project. Let us complete the project and get the benefits of it. The country needs it. We need to keep moving coal. Coal is no good in the ground. The fact is that we have one-third of the coal in the world, but it is no good if we do not have the transportation facilities to move it.

So, Mr. Chairman, I urge the Members to vote "No" on this amendment.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, I thank my colleague for yielding.

Carrying on with what the chairman of the subcommittee just said, if we are going to kill the project, we might as well kill the project right and kill it dead in its tracks. It would be foolish now to vote for $100 million if Members want to kill it entirely. So if they want to kill it, they might as well vote not to spending another $100 million.

If we are going to spend $100 million, we might as well spend $189 million and do it right. If we continue it at $100 million, it would be at a much slower pace and at greater cost to the taxpayers. The quicker we get the job done, the cheaper it is going to be. We all know what has happened with inflation.

So really, with all deference to my friend, the gentleman from Pennsylvania (Mr. EDGAR), the real issue was the last vote, and I can fully understand how someone might have voted for the last amendment thinking that we might save money. But on this amendment we would absolutely be wasting money to vote for $100 million.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I appreciate the gentleman's yielding.

Let me just say this as we move toward the vote. We passed a highway bill before this House that included $100 million for bridges over Federal projects. Ninety percent of those funds were used as a local match for the Tennessee-Tombigbee Waterway.

There has been very little responsible cost sharing, and I believe part of the $89 million can be made up by local cost sharing within the area.

Second, the court of appeals has effectively shut down a major section of the project. Much of the cost sharing can go in that direction.

The chairman of the subcommittee indicates that if we vote for the Edgar amendment, all these contracts will have to be stopped. Those contracts will have to be stopped under the court action anyway, and it is my opinion—and I hope it is shared by many—that we will move quickly to action on this to save the Federal Government $89 million. If Mississippi, Alabama, and Tennessee believe the project is as significant as they have stated, then they can share in some of the costs of the project.

Mr. Chairman, I hope that we will move to a vote on the amendment.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the subcommittee chairman.

Mr. BEVILL. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I am sure the gentleman does not mean to be erroneous, but the States and local governments have spent millions of dollars building bridges and roads. They have committed themselves with bond issues in anticipation of this waterway.

Recently, the Mobile, Ala., State Dock Commission issued bonds for $100 million for improved coal-loading facilities at the port of Mobile in anticipation of this project being completed in 1986, as scheduled. The Fifth Circuit Court of Appeals order has not stopped work on the project at this time and when the district court issues its order I am confident the corps will comply and make the necessary environmental impact statement available.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I would just like to close by saying that I thank my colleagues for this debate on the Tennessee-Tombigbee Waterway.

I think full funding of the project at $100 million clearly indicates the Federal commitment to the project that the House has just determined, and yet it saves the Federal Government $89 million.

The CHAIRMAN. The question is on the amendment offered by the gentle-

man from Pennsylvania (Mr. EDGAR) to the amendment offered by the gentleman from Indiana (Mr. MYERS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. EDGAR. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

Mr. EDGAR. Mr. Chairman, I demand a division.

On a division (demanded by Mr. EDGAR) there were—ayes 31, noes 67.

The CHAIRMAN. The amendment is not agreed to.

Mr. EDGAR. Mr. Chairman, I demand a recorded vote.

Mr. MYERS. A point of order, Mr. Chairman.

The CHAIRMAN. The point of order stands. A recorded vote has already been denied.

Mr. EDGAR. Mr. Chairman, I make the point of order that a quorum is not present on the last vote.

The CHAIRMAN. The Chair will count for a quorum.

One hundred and fifty-six Members are present, a quorum.

So the amendment to the amendment was rejected.

□ 1550

AMENDMENT OFFERED BY MR. FRANK TO THE AMENDMENT OFFERED BY MR. MYERS

Mr. FRANK. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. FRANK to the amendment offered by Mr. MYERS: In the proposed amendment strike $1,518,941,000 and insert in lieu thereof $1,501,121,000 and strike the period and insert in lieu thereof: "*Provided*, That none of the funds appropriated by this paragraph may be used for the Stonewall Jackson Lake Project, located in the State of West Virginia (including to acquire any land for such project or to commence construction on such project)."

Mr. FRANK. Mr. Chairman, first, I would like to offer my regrets for the historical circumstance that this is named the Stonewall Jackson Dam. I mean no disrespect to his memory. I would be glad, if the amendment carried, to name some other project the Stonewall Jackson Dam.

This amendment would strike $17.8 million from the appropriation and would prohibit any further expenditure on the Stonewall Jackson Dam in West Virginia.

Land acquisition has gone forward for this dam, but there has been no construction of the dam itself, so this is not a case where the argument that we have already been committed seems to have that much relevance.

It is a highly controversial project within the State of West Virginia itself.

The proposal is to build a dam, the benefits for which, as put forward by the Corps of Engineers, do not justify the expenditure. There is $17.8 million now at stake, but there is a remaining Federal loss totaling $142 million, so we are talking over the life of this project about a significant amount of money.

This is a time of austerity when tight standards have been applied to spending. I think logically the application of standards even far looser from those we have applied to most programs this year would lead the membership to agree to delete the Stonewall Jackson Dam.

As I said, it is controversial within West Virginia. Fourteen percent of the benefits claimed by the Corps of Engineers are for recreation, but that recreation has to be paid for in part by the State of West Virginia. The State senate of West Virginia this year adopted a resolution announcing that it had no intention, the State senate, of appropriating those funds.

The agriculture commissioner of the State of West Virginia has reiterated his opposition.

The Farm Bureau is opposed to it.

It is a project which would take approximately 140 farms in West Virginia, dislocating over 1,000 people.

We have got a consensus, I would hope, on money not being spent for projects of a low priority. I do not deny that there are benefits that would accrue from this project. I do disagree that they are worth the expenditure of $145 million of Federal funds.

Forty-seven percent, by far the largest single item of claimed benefits for this project, is for water quality control. It is water quality control solely by the method of flow augmentation, having the river flow better from the standpoint of controlling waste.

This dam entirely predates legislation which has since been enacted and has been carried out in substantial part which mandates treatment of water pollution at the source. The method of dealing with pollution by waterflow is no longer the public policy of the country. We have, in fact, spent tens of millions of dollars in this particular area alone, and I am glad we have, to deal with water pollution at its source. To continue to commit $145 million in Federal funds for a project whose main claimed benefit is water quality control and to ignore the fact that the country has in the interim since it was proposed changed its view on how to deal with water quality control, simply does not meet the standards of fiscal sanity and fiscal tightness to which we ought to be adhering.

Flood control is 29 percent. There is a problem with floods in western West Virginia; but we ought to be clear about what we are talking about. These are not life threatening floods. These are not the kinds of floods that send raging walls of water down on innocent people. There is a problem with backup and there is a problem with property damage by floods. This project would abate some of it. It does not seem to me it abates $145 million worth of it. If you look at the flood damage which has occurred, and again we are talking about property damage and nothing life threatening, so we are not here talking about putting anyone in jeopardy, I do not think you will find a degree of need to justify $145 million.

Mr. Chairman, earlier today I asked, and the chairman of the subcommittee, who has been very gracious in this work, and the ranking minority member agreed to an amendment which deleted a $300,000 study for a water project in my own district. There are some people in there who would benefit from it if it went ahead, but it did not seem to me that that study could eventuate in any project which would be worth the tens of millions of dollars it would have to cost us.

We are told we are in a new period and I hope, Mr. Chairman, that we are not dealing with this in a time warp. We have been told over and over again this is 1981, not 1965 and not 1968, and we simply cannot spend the way we used to.

I do not deny the project has merit. I deny it has $145 million worth of merit by today's standards.

Mr. KAZEN. Mr. Chairman, I move to strike the last word.

Will the distinguished gentleman from Massachusetts answer some questions for me, please?

Mr. FRANK. Certainly.

Mr. KAZEN. Is this amendment purporting to strike out $17.8 million?

Mr. FRANK. I believe it purports to do that; in fact, it does do that.

Mr. KAZEN. It is strictly the cost that goes to the Stonewall Jackson Lake project in West Virginia, and no other?

Mr. FRANK. I can say to the gentleman that it does not affect San Antonio in any way, shape, or form yet.

Mr. KAZEN. Will the gentleman answer my question. It is strictly for that one project?

Mr. FRANK. Yes; it is. It is $17.8 million solely for the Stonewall Jackson project. I have other amendments to deal with other projects with which the gentleman is concerned.

Mr. KAZEN. I thank the gentleman.

Mr. BENEDICT. Mr. Chairman, I rise in opposition to this amendment.

The Stonewall Jackson Dam, the object of this discussion, is in the second district of West Virginia, which I have the honor and the responsibility to represent.

We have heard a great deal of comment about numbers. I would almost think that my good friend and colleague, the gentleman from Massachusetts, had been to West Virginia; but I

think a few observations on the subject are appropriate.

This project is for water quality and flood control, pure and simple. It has been reviewed since its original authorization in 1966 by five different administrations, Democratic and Republican alike. It has been reviewed by the General Accounting Office. It has been reviewed by the Standing and Authorizing Committees of this body and, indeed, 2 years ago under like circumstances an amendment was offered by another freshman Member of this body and this body as a whole again brought this project forward.

By the end of this fiscal year, 80 percent of the lands necessary for this project will have been purchased. The work of moving utilities and highway reconstruction is ongoing. It represents the culmination of some 60 years of effort on the part of the citizens of Weston, W.Va., people who have worked now for three generations to achieve some measure of protection from recurring flooding to their homes and to their businesses.

I wish my colleague, the gentleman from Massachusetts, would come with me to West Virginia, to Lewis County, and to walk in my shoes and meet with these people whose lives are touched by this project.

Certainly there is controversy. Certainly there are those few who lose land in this project and whose pain is very intense over that loss, make no mistake of that. I have firsthand knowledge in my own family of the pain involved in losing land through a condemnation. No matter how worthy the project, there is no way it is acceptable to these individuals. These individuals have worked hard and they continue to do so in opposing the project.

In this world there are individuals who see this pain and this agony by these few people as an opportunity to further an adventure or an agenda of their own, sometimes with the best motives in the world, as I know my colleague, the gentleman from Massachusetts, has only the best of motives; but sometimes they are used quite cynically and this pain becomes an asset to be used by other persons for their own ends.

□ 1600

So before my colleagues pass judgment on this project I wish they would come with me to the city of Weston to talk to the business people whose businesses are subject to recurrent flooding and the people whose homes are subject to recurrent flooding, and those who fear that a fire will go untended because the streets of the city are blocked with floodwater. I wish my colleagues would come and meet with me and with the administrator of the local hospital who sent me a telegram along with dozens of other people from the city of Weston urging continuation of this project.

You should talk with the hospital administrator who is concerned that floodwaters will again fill the streets and emergency vehicles will not be able to travel from the scene of an accident or serious illness to the hospital.

We are dealing with people's lives here as well as dollars and cents. I think it is incumbent upon the Members of this House to have first-hand knowledge of those lives.

Make no mistake, there are two sides of this debate. There are a significant number of people who stand to benefit and who need this project badly. There are those who would say we could have used another method to have achieved flood control for the city of Weston. Ten years ago that is certainly true. But we must live in the world as it is today, not as we would like it to be, but as it is. This is the project that is available and at hand.

This project has bipartisan support from the congressional delegation. It is supported by our Senators and it is supported by the Governor of our State. It is supported by numerous local and civic organizations, the chamber of commerce, and others. It is important to the people of Lewis County and to Weston.

I thank my colleagues for their attention and urge defeat of this amendment.

Mr. MOLLOHAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I compliment the gentleman from Massachusetts for his sincere interest to reduce Federal expenditures and his research on the Stonewall Jackson Lake project in West Virginia. It is indeed gratifying to know that legislators from other parts of the Nation have taken a very keen interest in becoming familiar with a project in my home State.

However, some rather broad generalizations have been made about Stonewall Jackson, so let me discuss for only a few minutes the justification for the Stonewall Jackson Project.

It has been suggested that the amount of land in the project has increased. This is correct. But the fact is that the total land involved accounts for less than 1 percent of all property taxes collected in the entire county and amounts to roughly $14,000 per year.

It is contended that the project will eliminate 400 farms and relocation prospects are slim. The fact is that only 132 farms will be involved—and most of them are part-time operations. Property acquisition is over 60 percent complete and already almost 200 families have been successfully relocated. There is not a lack of housing in the area, and the impact of relocation is not nearly as severe as we would be led to believe.

It is stated that improvements to water quality have been superseded and the project is not needed for that purpose. The fact is that the West Fork River is spoiled by mine drainage, domestic wastes and sediment. It has the highest mineral content of any major stream in the Monongahela River Basin. Both the Interior Department and the Environmental Protection Agency favor the water quality benefits that will result.

It is claimed that flood benefits are exaggerated and include protection for new development. The fact is that the economic justification does not include benefits for new development. If that occurs in the area, it will be over and above the estimated benefits.

But the project will all but eliminate flood damages in the Weston area, which is flooded on the average of once a year, and will reduce by 76 percent annual damages caused by flooding of the West Fork River.

The claim is made that the water quality in the dam will be so poor that a separate swimming pool will have to be built. The fact is that the water quality will be more than adequate for swimming. However, West Virginia State health regulations prohibit swimming beaches in all new lakes.

The claim is made that large coal reserves will be lost having a real value of $1,844 per acre. Relatively, only a small coal acreage is involved and in no case has a farm with residence, farm buildings, and coal been purchased at a cost exceeding $700 per acre. Coal is being given a fair market value based on the sale of similar types and quantities of coal in the surrounding area.

It has been alleged that the Corps of Engineers did not fully explore small watershed alternatives. That is just not true. Detailed studies were made. When this question was first raised, I personally asked the Federal Soil Conservation Service State director to make an evauation of small watershed alternatives. He advised in a formal letter that there was no way a small watershed program could provide the essential benefits provided by the Stonewall Jackson Lake project.

With reference to legal action on the project—the truth is that Stonewall Jackson has met all legal requirements, including an environmental impact statement. Objections to the project made in Federal district court were overruled, appealed to a Federal circuit court of appeals and overruled, and an appeal to the U.S. Supreme Court was denied.

These are the facts, and it is indeed regrettable that misinformation is being used as a basis for this amendment.

But this is not the first time these points have been raised concerning the Stonewall Jackson Lake project. I can attest that these points have been thoroughly explored by the appropriate authorizing and Appropriations Committees and debated right here on the floor of the House in each of the last 10 years. And I might add that the same scrutiny has taken place on the Senate side. And each year the project is given a clean bill of health and funded by the Congress. During the 10 years I have supported this public improvement in my home State of West Virginia, three different Presidents have endorsed it.

Stonewall Jackson will provide flood protection, adequate domestic water supplies, water quality improvements, and recreation benefits which will contribute greatly to the advancement of tourism, the second largest employer in West Virginia.

This is an important project to my district and to the adjoining district. It would be tragic if we did not move forward with its construction.

Stonewall Jackson has the support of the new administration as illustrated through a budget request for fiscal year 1982. As we have heard, it has the vigorous support of the Appropriations Committee. And most importantly, it has the support of the largest conceivable majority of people in north central West Virginia.

I urge my colleagues to vote against this amendment.

Mr. ROEMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to say that we have heard a lot of conversations about water projects, somewhat emotional and often partisan, not by party but by district. One of the most telling arguments offered so far about these projects are those that are midway in their construction.

Unfortunately for the gentleman from West Virginia, this project cannot even offer that recommendation to the Members. It is a project that, if begun at all, has just been barely begun. It is a project which is marginally beneficial as to its benefits over costs, by the Corps of Engineers own reckoning. It is 1.3 to 1, and that is at a 4-percent interest rate.

Mr. MOLLOHAN. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from West Virginia.

Mr. MOLLOHAN. The gentleman said that the project has not even been started. The project calls for $189 million, and approximately $46 million has been spent. That has been spent for road relocation, utility, utility relocation, and for land acquisition.

Mr. ROEMER. Yes.

Mr. MOLLOHAN. And over 14,000 acres of 19,500 acres have already been purchased.

Mr. ROEMER. Yes.

Mr. MOLLOHAN. That has already been purchased, and the families have been relocated.

Mr. ROEMER. If I could reclaim my time, let me respond to that by saying that I said it had barely been just begun, and only land acquisition. The land is not going to go anywhere. It is still going to sit there, growing in value.

Mr. MOLLOHAN. Over $40 million of $170 million is not "barely."

Mr. ROEMER. It has some value to the purchaser.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from Massachusetts.

Mr. FRANK. I thank the gentleman for yielding.

Mr. Chairman, I say to my friend, the gentleman from West Virginia, that I understand and admire his advocacy of his district's needs as he conceives them. I do not deny that there would be some benefit for Clarksburg and for other parts of West Virginia.

The question is not whether this is a good thing but whether by the current fiscal standards that we are talking about that we should now commit ourselves to an additional $145 million expenditure.

As the gentleman from Louisiana has pointed out, no construction has started yet. Land has been acquired. Land acquired can be reacquired; it can be sent back. There is not a loss, in the economic sense.

I would also say to the gentleman from West Virginia that I appreciated the rebuttal he made of various arguments. I would only like to have the record state that none of the arguments I made were the ones he was rebutting. I understand that people have made arguments.

Mr. MOLLOHAN. You recognize I did not say you said that.

Mr. FRANK. Yes, I recognize that you did not say I said it. And if I spill this one out any longer, the record will become unrecognizable.

I simply wanted to make it clear that the arguments were not being put forward here.

The point is this: The gentleman from West Virginia who spoke first said flood control was the issue. The Corps itself only claims 29 percent for flood control. They claim 14 percent for recreation, but the State Senate of West Virginia says they are not going to put the money up for recreation.

The second gentleman from West Virginia says, "Well, the only reason they are not going to swim in the lakes is that State law says you cannot."

Frankly, if you cannot swim in the lakes, I do not care why, it is not very recreational. Not swimming in the lakes for health reasons is no more recreational than not swimming in the lakes because it is against the law.

The fundamental point remains that the project has some worth, but it does not seem to me to be worth $145 million additionally, particularly since its main point to claim benefit, water quality control, has been preempted not entirely, but in part, by the addition since this budget was conceived of a whole new way in this country of trying to deal with water quality.

Mr. BEVILL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. The committee has reviewed this project for the past 10 years and it is a good project. The main benefits of this project are water quality control and flood control. This is an important project and I urge the Members to vote against this amendment.

Mr. MYERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman who is the author of this amendment offered an earlier amendment that affected his State, and the committee accepted that, as has been the policy of this committee not to push a project on a Member who should know more about it than anyone else, members of this subcommittee included. In this particular instance now we have heard from two Members of the State affected, and they have both testified to the agony, the suffering, the loss associated with the fact that we have not provided protection from floods as well as water quality for this area. So the committee again urges the members of the committee here to support the Members who should know the most about it, the Members of the State as well as the members of the subcommittee, and to vote down this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. FRANK) to the amendment offered by the gentleman from Indiana (Mr. MYERS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. FRANK. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. A quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred and ninety-seven Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Massachusetts (Mr. FRANK) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. The Chair reminds the Members they will have just 5 minutes in which to record their votes.

The vote was taken by electronic device, and there were—ayes 137, noes 267, not voting 29, as follows:

□ 1640

Mr. JOHN L. BURTON changed his vote from "aye" to "no."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. ROEMER TO THE AMENDMENT OFFERED BY MR. MYERS

Mr. ROEMER. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. ROEMER to the amendment offered by Mr. MYERS: In the proposed amendment strike out "$1,518,941,000" and insert in lieu thereof "$1,298,000,000".

Mr. ROEMER. Mr. Chairman, I have an amendment that has just been read and which, if adopted by this House, would save about $330 million from the Jimmy Carter budget and about $200 million from the Appropriation Committee budget as presented to this House today.

The question becomes this: How can we save those enormous sums of money? There are two ways to cut the budget. The first technique is taking it project by project or program by program and asking each project or each program to stand or fall on its own merits or demerits.

This approach is intelectually and economically the most comfortable way to approach budget cuts. project by project and program by program.

But in this first technique of doing it project by project and program by program, there are problems, the most pressing of which is time. We have either not taken the time or had the time to discuss the programs which we cut across the board in this Congress. Also with these water projects, individual project review becomes horribly subjective as we look at the benefit-cost ratios and human life and property equations and compare those with the costs already sunk in the project.

The second way to cut the budget is across the board. It is the way that, in this case, I prefer.

Mr. PERKINS. Mr. Chairman, will the gentleman Yield?

Mr. ROEMER. Mr. Chairman, when I get finished, I will be glad to yield to the distinguished committee chairman.

The second way to cut the budget is across the board. Instead of pitting project against project, program against program, and review against subjective review, we make modest and manageable cuts equitably distributed and thereby yield enormous savings.

It is this second method that my amendment attempts to follow. The amendment does not target any project for termination. The amendment does not pit any project, one against the other. What the amendment does is to ask the Appropriations Committee, under certain broad categorical guidelines, to reduce all projects that fit beneath these guidelines by a similar 25 percent, from the Carter budget, excepting those projects which have already been reduced by at least 25 percent, saving $211 million over what the Appropriations Committee first recommended.

The criteria are as follows: First, all water projects less than 80 percent complete; second, all water projects that do not have at least a 10-to-1 benefit-to-cost ratio; third, exempt all projects already reduced by 25 percent or more from the Carter budget; fourth, all projects that are not designated in the committee report as rehabilitation or replacement or hurricane protection; and fifth, we reserve a $30 million amount saved under the criteria just stated, to the Appropriation Committee's discretion to fully fund those projects categorized as predominately flood control.

This amendment will reduce funding by 25 percent from the Carter budget on some 116 projects.

Let me conclude my remarks by saying this: I have learned a lot in my few months here, and I have learned it is most difficult to fool with projects because, although we talk about the common good and the broad scope of economy, we start first at home and then look outward.

□ 1650

I am asking that no project, not even those in my district, escape the categorization by these criteria. We can save a quarter of a billion dollars at a time when this country has no national water policy, at a time when we have asked program after program to cut back with almost no review and no consideration.

Should we not require the same sacrifice of brick and mortar that we ask of human beings?

I hope you can support this amendment. I hope you can support this goal of ours to bring some economic sanity into the area of water development.

I want to say that the strongest arguments that I have heard against delaying these projects is that inflation will cost us more in the long run. Well, this is not 1965. The reason we got into this inflationary mess is that we decided to spend now, regardless of the budget.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

(By unanimous consent, Mr. ROEMER was allowed to proceed for 3 additional minutes.)

Mr. ROEMER. When will we end the inflationary spiral? I predict we never will if we continue to spend because it is cheaper now than somewhere down the road.

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I would be glad to yield to the gentleman from Nebraska.

Mr. DAUB. I appreciate the gentleman yielding. I will rise later in opposition if I get time; but I want to ask the gentleman a question about the criterion.

Did the gentleman say that flood control projects are specifically excluded from the criterion that the gentleman offers the House now for consideration?

Mr. ROEMER. What we have done is applied the 25-percent cut on the 100-some odd projects that we looked at, which yield an additional $30 million in savings that we did not put in our amendment.

We ask in our criteria that the Appropriations Committee apply that $30 million to flood control projects.

Mr. DAUB. If the gentleman will yield further, I have not seen a copy of the gentleman's amendment and because of its importance, I really would like, and I ask unanimous consent that the gentleman be given additional time to read precisely to this body the language of the amendment.

Mr. ROEMER. All right. I will be glad to. We have copies and I will be glad to give the gentleman one. I ask the gentleman to recognize that these are amendments to the appropriations bill. By the nature of the bill, the amendments cannot authorize. That is why I have spent considerable time here today spelling out the criteria which I could not place in my amendment.

Mr. DAUB. I thank the gentleman.

Mr. BEVILL. Mr. Chairman, I rise in opposition to this amendment. It is a far-reaching amendment, as we have noticed. It would knock out about 80 percent of the projects in this bill.

I urge that we vote "no" on the amendment.

Mr. DAUB. Mr. Chairman, I move to strike the last word. I rise in opposition to the amendment.

I just had a chance to read the language of the proposed amendment from my good friend. I thank the gentleman. He has brought further information to me and I do appreciate the gentleman's indulgence.

I had the privilege of being 1 of approximately 2,000 witnesses that came before the Appropriations Committee. I happened to have had a chance to examine carefully, and I spent a lot of time with this, I would like to say to my colleagues, going through the 12,442 pages of testimony, many coming from persons 3,000 miles away to share with the experts on this subject their views on projects in their districts.

This particular language does not give, in my judgment, legitimate guidance to either the corps or to the Chief of the Bureau of Rivers and Harbors.

I take particular exception to this kind of language, because I do not believe that this body would have time in 1 week to examine probably 80 percent of the projects contained in the bill should their cost-benefit ratio not be better than 10 to 1.

Mr. ECKART. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, perhaps if we had commenced this budget cutting activity when it first had been suggested by an earlier President, we might not find it necessary to contemplate the project cuts that this amendment draws to our attention.

This Congress failure to restrain pork barrel and other unneeded projects requires us to take decisive action today.

It is important to point out to the committee that 162 of the water projects in this bill are funded at the levels requested 4 years ago and that the criteria being suggested by the gentleman from Louisiana in his amendment is not the kind of broad meat-ax cut that is not in tune with what might be the needs of a particular project, but that the gentleman's amendment is reflective of a strict review of projects that are well on the way to be completed. It does not pit individual projects against the other and does not terminate any projects nor provide for zero-based funding.

Mr. ROEMER. Mr. Chairman, would the gentleman yield on that point?

Mr. ECKART. I would be happy to yield.

Mr. ROEMER. I thank the gentleman for yielding.

I would like to make that point again. Unlike some comments on the floor and some made at this microphone, this amendment does not zero fund nor target any project.

As to the comments of my colleague, the gentleman from Nebraska, as to the criteria, in the appropriations bill, I trust and appreciate the wisdom of the Appropriations Committee and its various subcommittees. It is turning back to them the job of some modest cost savings in line with what we have done with everything from health care to human needs that I think is not only needed, but is necessary in the economic life of this country.

I thank the gentleman for yielding.

Mr. ECKHART. Well, I appreciate the gentleman's request and commend him for bringing this amendment to our attention. It is important that these cuts not affect only certain parts of the country but are fair and equitable. This amendment helps accomplish that purpose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. ROEMER) to the amendment offered by the gentleman from Indiana (Mr. MYERS).

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. MYERS).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 104. The discount rate for the Saginaw River, Michigan, project authorized in section 203 of Public Law 85-500 (72 Stat. 311) shall be as provided for in section 80b of Public Law 93-251 (88 Stat. 34) if non-Federal interests subsequently provide appropriate assurances for the non-Federal share of project costs.

Mr. BONIOR of Michigan. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to engage the chairman of the committee in a colloquy with regard to a particular issue that involves the Midwest.

I want to commend the chairman of the subcommittee, the gentleman from Alabama, and the ranking minority member, the gentleman from Indiana, for their assistance on the issue of winter navigation extension on the Great Lakes. This is an issue of great regional importance raising complex environmental and economic issues.

From 1970 through September 1979, on a demonstration project basis, the corps was authorized to extend the navigation season on the Great Lakes, and, in addition, to conduct a full feasibility study of a continuing extension. Since then, when their specific authority expired, the corps has developed an operational extension to January 7 plus or minus 1 week.

As part of the full feasibility study, the corps had authority to undertake environmental studies, and had some $6 million set aside for that purpose. They chose, however, to postpone environmental studies until after they were given authority for a continuing extension. The result is that today, some 10 years after Congress began to study extension of the navigation season, we still do not know the environmental impact of an extension.

The committee has generously put aside $2 million for fiscal year 1982 to allow the Corps of Engineers to begin the important studies necessary to assess the environmental impact of navigation extension. The full studies will require $8.5 million, and the committee has also agreed to complete that funding in subsequent years. Is that correct, Mr. Chairman?

Mr. BEVILL. The gentleman is correct.

Mr. BONIOR. I thank the gentleman. At the center of any environmental assessment, is the need to develop base-line data on the Great Lakes ecosystem absent navigation extension. If we do not know what the system looks like without an extension, we can hardly measure the impact of an extension. In order to meet the need for baseline data, it is necessary that we suspend the corps' operational extension, prohibiting navigation between December 15, plus or minus 2 weeks and April 1.

The chairman is well aware of this problem. In funding the environmental assessment, am I not correct in understanding that the chairman envisions that the operational extension will be suspended to allow for the collection of baseline data, and that the committee will declare that intent as part of next year's action on the fiscal year 1983 appropriation bill?

Mr. BEVILL. The gentleman is correct, for that 1 year.

Mr. BONIOR. The solution we have reached here tracks the solution that was proposed in section 124 of H.R. 4788, and explained in Water Resources Development Act of 1979, House Report No. 96-508, to accompany that bill. Unfortunately, H.R. 4788 died in the Senate. I thank the chairman again for his cooperation in resuscitating this important measure.

I would like to close with a caveat. As the chairman knows, I am deeply concerned that the corps has chosen to proceed with an operational extension. I think it is clear that Congress has reserved to itself the decision on whether or not the corps should extend the season. It is an authorization matter.

In closing, accordingly, I want to underline the fact that today's action does not affect the question of whether or not authority exists for navigation extension. Today's action in funding studies does not presume that authority exists. Rather, it is consistent with the need to develop fuller environmental studies so that Congress, and not the corps, can make the final decision. Similarly, today's commitment to suspend the operational ex-

tension does not assume that the corps is without authority. Rather, it reflects the needs of the studies themselves.

Today's action in short, leaves the question of authority exactly where it was yesterday—waiting for resolution.

□ 1700

The conclusion we have reached here tracks the solution that was proposed in section 124 of H.R. 4788 and explained in the Water Resources Development Act of 1979.

I would like to thank the gentleman from Alabama (Mr. BEVILL) and the gentleman from Indiana (Mr. MYERS). I will have further comments to make on this issue at a later time.

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 108. Clayton Lake which is an element of the flood control project for the Clayton and Tuskahoma Reservoirs, Kiamichi River, Oklahoma, authorized by section 203 of the Flood Control Act of 1962 (76 Stat. 1187), shall hereafter be known as "Sardis Lake". Any law, regulation, map, document, or record of the United States in which such lake is referred to shall be held and considered to refer to such lake as "Sardis Lake".

The Clerk read as follows:

Amendment offered by Mr. SIMON: Page 7, after line 23, insert the following new section:

SEC. 109. From the funds appropriated by the second paragraph of this title for general investigations, no more than $70,000 shall be expended for a study of flooding and drainage problems in Alexander County and Pulaski County, both located in the State of Illinois, and no more than $100,000 shall be expended from funds appropriated for the main stem study of the Ohio River to evaluate alternatives for flood damage reduction in Saline County and Gallatin County, both located in the State of Illinois.

Mr. SIMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SIMON. Mr. Chairman, I think for once this is an amendment to this bill that is completely noncontroversial. This is in regard to funding of studies that have already been authorized.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Alabama.

Mr. BEVILL. The committee is familiar with this amendment. We have no objection to it, no one objects to it and we accept it.

Mr. SIMON. I thank the gentleman from Alabama.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Indiana.

Mr. MYERS. I am very familiar with the problems the gentleman is addressing. They certainly do need attention. I know this is a very real problem and a frequent problem in the gentleman's district, and this side is pleased to accept the gentleman's amendment.

Mr. SIMON. I thank my colleague from Indiana.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. SIMON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

CONSTRUCTION PROGRAM

For construction and rehabilitation of projects and parts thereof (including power transmission facilities for Bureau of Reclamation use) and for other related activities as authorized by law, to remain available until expended, $605,258,000, of which $130,063,000 shall be available for transfers to the upper Colorado River Basin Fund authorized by section 5 of the Act of April 11, 1956, and $186,497,000 shall be available for transfers to the Lower Colorado River Basin Development Fund authorized by section 403 of the Act of September 30, 1968, for construction and for liquidation of contract authority provided pursuant to said Act: *Provided*, That of the total appropriated, $221,735,000 shall be derived from the Reclamation Fund: *Provided further*, That transfers to the Upper Colorado River Basin Fund and Lower Colorado River Basin Development Fund may be increased or decreased by transfers within the overall appropriation to this heading: *Provided further*, That the final point of discharge for the interceptor drain for the San Luis Unit shall not be determined until development by the Secretary of the Interior and the State of California of a plan, which shall conform with the water quality standards of the State of California as approved by the administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters: *Provided further*, That no part of the funds herein approved shall be available for construction or operation of facilities to prevent waters of Lake Powell from entering any national monument.

The Clerk read as follows:

Amendment offered by Mr. CONTE: On page 8, line 21, strike out "$605,258,000" and insert in lieu thereof "$601,258,000".

(By unanimous consent, Mr. CONTE was allowed to proceed for 5 additional minutes.)

Mr. CONTE. Mr. Chairman, those Members who are supporting this bureaucratic boondoogle clearly are grasping for straws.

A recently distributed "Dear Colleague" by the Member from North Dakota would have you believe that the Congress owes the proponents of this special-interest project something for their patience.

The author of this "Dear Colleague" states that one of the reasons for this water diversion project is to provide a "counterbalance for the negative impact that other aspects of the plan—the Garrison Dam itself and other mainstem dams—would have on the State of North Dakota." He continues by saying in his letter:

Unfortunately, the dam's construction together with that of the Oahe Dam in South Dakota, inundated one-half million acres of North Dakota's choice river bottom land.

Let me respond to the gentleman's statement by saying that what he proposes to do will require the acquisition and substantial destruction of an additional 200,000 acres of land. It must be said, however, that this is no ordinary land which the project would harm. Instead, it is a region which represents 13 congressionally authorized national wildlife refuges; and 70,000 acres of prime prairie waterfowl marshes which provide the perfect environment for the production of the canvasback duck. No other State in the country except Alaska can claim as many ducks as part of its environment. The support for these waterfowl marshes is obvious through the annual sales in duck stamps of $16.5 million. In fact, there has been such a controversy regarding the potential loss of land if this project goes forward that one county has sued to leave the conservancy district and three more are considering it.

The proponents of this project would have you believe that because the project was authorized by Congress in 1965, that it must be constructed now. As a matter of critical importance, U.S. District Court Judge Richey ruled on May 6, 1981, that the project may not continue unless Congress reauthorizes the project which now is expected to cost $1.018 billion versus the original projection of $207 million. The Congress has not reauthorized this boondoggle. In addition to the skyrocketing costs and plummeting benefit-cost ratio, the project has been declared by the International Joint Commission, one designed to study the impact of this project on the rivers which flow between North Dakota and Canada, as one which would cause significant injury to the health and property in Canada as a result of adverse impacts on the water quality. Let me emphasize to all Members in this Chamber that to go forward with this project would be a violation of the 1909 Boundary Waters Treaty.

Mr. Chairman, the proponents would also have you believe that this project will save North Dakota from some drought. It should be noted this taxpayer's nightmare will not be saving North Dakota from any drought since it is expected to irrigate only six-tenths of 1 percent of the agricultural land in the State. In fact, this year the Agriculture Department

is projecting that the State of North Dakota may lead the Nation in wheat production. Therefore, Garrison will not be reclaiming arid wasteland. On the contrary, the land to be irrigated, at a cost of $800,000 per farm or $3,300 per acre, is already productive.

Mr. Chairman, the author of the "Dear Colleague" wants you to believe that a 5,000 acre test-plot, which the $4 million in this bill is expected to fund, will resolve the concerns of our good neighbors to the north in Canada who aided this Nation in its time of need during the hostage crisis in Iran. As I stated earlier, the International Joint Commission concluded that because of the rough fish which would be transmitted into the Hudson Bay watershed from the North Dakota rivers that this project would be in violation of the 1909 Boundary Waters Treaty. This 5,000 acre test-plot does not even address this issue.

Mr. Chairman, at a time when fiscal restraint and responsibility is so critical to this Nation, I cannot understand, for the life of me, why these people think they need another $4 million in taxpayers' hard-earned money to fund this boondoggle when there are available $7.4 million in previously appropriated, unspent funds.

As I stated before, the district court's decision in May of this year blocks all new project construction and land acquisition on this project. If the Congress wants to spend this $4 million, it should at least be put in a program where it can be spent effectively. Appropriating this $4 million for the Garrison project is a waste; it represents the stockpiling of Federal dollars behind a dead project.

In the gentleman's final paragraph of his letter, he asks for the $4 million in tight Federal funds in order to keep the project from falling even further behind schedule. I must say to the gentleman from North Dakota that last year alone the project costs increased by $183 million, which is more than all the funds expended to date.

Mr. Chairman, it simply is no longer fiscally responsible to pour additional new taxpayers' dollars into this bureaucratic boondoggle. At the present rate of increase of 38 percent of the project costs, the American taxpayer would be finished off long before the project. Funds previously appropriated should be used to determine the best salvage value of the roughly 15 percent of project features constructed to date.

I strongly urge you to support the amendment to delete the $4 million for this travesty.

□ 1710

Mr. Chairman and members of the committee, I have served longer than anyone in this House on the Migratory Bird Commission. There are two members. Right now it is me and the gentleman from Michigan (Mr. DINGELL). Two members from the Senate, three members of the Cabinet. You do not know what we have to fight for from your hunters, from your sportsmen, who go out and buy these—duck stamp money—to buy a little wetland, to have some place where these ducks can breed, where waterfowl can breed, where they can travel in the flyways, in the Atlantic flyway, in the Central flyway, the Pacific flyway. And one of the best breeding grounds we have in the 48 States is North Dakota. Now they want to flood that land and destroy these refuges that the sportsmen of this country have bled for and fought for. The people of North Dakota themselves do not want this dastardly project. So let us put an end to it today.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Chairman, I want to compliment and commend the gentleman for his excellent presentation of the issue and join him and associate with him in the amendment and thank him. I was unavoidably detained in the reconciliation conference and got here a few seconds late. I thank the gentleman very much for offering the amendment.

Mr. CONTE. I thank the gentleman. I offered the amendment to protect the gentleman. I knew he was busy over there.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, is the gentleman of the opinion that we would not have as many ducks in the flyways if this amendment would not be successful?

Mr. CONTE. This area here is one of the best, let me say the best breeding grounds in the lower 48 that we have. It is the best breeding ground for the canvasback outside of Alaska. It is a jewel of a place. Not only that, but if you look at the ratio of the thing, the ratio now is almost 1 to 1, the cost ratio of it. It is a boondoggle. One county has already gone to court and said they do not want the thing. There are three other counties that want no part of this project.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. FORD of Michigan. The gentleman fascinates me with his knowledge of the habits and the flyways of the canvasback. What is it the gentleman does with them after they fly down out of North Dakota?

Mr. CONTE. Well, that is the idea of the whole thing. You want to keep that population up. You want to preserve the species so that the sportsmen can do a little hunting on their off times and harvest the flocks, but you do not want to destroy the flocks. There will be nothing to harvest later on.

Mr. BEVILL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. I would like to point out that the committees have consistently supported this project. There is a treaty between the two countries, Canada and the United States. The Prime Minister and President Reagan discussed this matter in Ottawa last week. President Carter and the Prime Minister of Canada had agreements. We have respected all of those. The delegation of North Dakota supports it, and the committee supports it. We urge the Members to vote no on this amendment.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I am from Oregon, but I do have a great interest in North Dakota. My credentials are, for a nonresident, rather good. My great-uncle was the first secretary of state of North Dakota. He bequeathed a farm in North Dakota to my mother, a 640-acre farm in the Williston Basin, the site of the great oil discoveries. Unfortunately, she gave it up for taxes in the 1930's, so we no longer own that.

Also, in my first year in the Congress I killed a dam in my district. I killed that dam in my district because it was a boondoggle. It was a $100 million irrigation dam without an irrigation project. Yet they were going to build it. They were going to build it because the stream was there, I guess, because it had no purpose. It had a cost-benefit ratio about 1 to 1, the same as the Garrison Dam. And it hurt me. I lost 30 percent of the vote in that area because I did that. But, my God, if we are going to cut the budget, where is it going to be cut? Are we all going to sit here and say: Cut somewhere else, not me?

Where I see waste, that is where I will go. And if it is in my own district, that is where I will go. The Garrison water project is a classic spending boondoggle. When originally authorized, the unit was to cost $200 million. Today it is estimated at $1 billion. It has a cost-benefit ratio of 1 to 1, and that is at 3¼-percent interest. They cannot even make a profit at 3¼-percent interest. My gosh, if you cannot make a profit today at 3¼-percent interest, something has got to be wrong.

Garrison has already drained $160 million from the Federal Treasury. How much longer do we send this money down the swamp? The project is 15-percent complete, down from the 20-percent complete estimated in 1979.

So it is going backward while we pump more money into it. Is there any wonder why we have inflation in this country when we build projects like synfuels plants at $4.5 billion and dam projects and canal projects at billions of dollars that do not pay their way? And then we say: Why do we have inflation in this country? It is because we are wasteful, inefficient, and we spend the taxpayers' money without a real accounting.

The gentleman from Massachusetts has adequately covered the waterfowl. I would like to repeat, however, that Canada, their opposition to this is that the waterways will flow into their waterways, bringing foreign rough fish and other biotic material into their Hudson Bay area. That is not being a good neighbor.

You know, Garrison, just as the dam that I was talking about earlier that I killed in my district, was conceived back in the 1930's. And back in the 1930's when no work was around and there were no public works and people were desperate, these dams were life-saving things to the community and to the working people. I supported them and I have supported dams all my life. But we have run out of the dams that are effective and efficient and that pay for themselves. Now we go back to this Dust Bowl era dam and try to resurrect it and keep it alive, and our taxpayers' money and our Federal coffers go down the tube day after day because we are afraid to say no. Well, let us say no today.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Massachusetts.

Mr. CONTE. The chairman of the committee mentioned that there was a 1909 boundary water treaty and that this was not in violation of it. I would like to make the point that the issue was referred to the International Joint Commission, which concluded that the project, "would cause significant injury to the health and property in Canada as a result of adverse impacts on the water quality." And this would be in violation of the 1900 Boundary Waters Treaty.

And I might say that I just got a call from Parliament in Ottawa this morning in opposition to this.

□ 1720

Mr. DORGAN of North Dakota. Mr. Chairman, I move to strike the requisite number of words. Mr. Chairman, a couple of evenings ago I was reading a book called "Touch of the Earth," that contains writings from Indian chiefs. The book describes Chief Joseph, Crazy Horse, and Sitting Bull discussing how you cannot always trust what they say in Washington.

I was thinking about the Garrison diversion project with respect to that conversation.

Back in the 1940's, the Pick-Sloan project was developed for a couple of reasons. They said they wanted to harness the Missouri River to provide both navigational aid and flood control downstream. They also wanted to provide for hydroelectric power, they said.

In exchange for what North Dakota had to give up for that project, 500,000 acres of North Dakota land in exchange for what we gave up for the construction of the dams within our borders, the Federal Government said it was willing to give North Dakota a million acre irrigation project. That was in the 1940's.

Well, a dam was built in North Dakota, a good dam, the Garrison Dam, which provides a goodly amount of hydroelectric power and flood control downstream. According to the statistics I have seen, the amount of money saved from flood damage that otherwise would have occurred had the dam not been built equals the cost of the Garrison diversion unit.

The fact is that our society, and particularly the downstream areas, have received a lot of benefits as a result of the Garrison Dam. We have borne the cost of that dam, 500,000 acres of North Dakota land, in exchange for promised benefits.

The promised benefit was 1 million acres of irrigable land in North Dakota. That changed in 1965. They said a quarter million acres.

Now we have some folks in Washington saying, no irrigable land. They say let us cut the project.

It seems to me that if we are left with the costs and no benefits—if we are left without a major water project in our State's future, in a semiarid climate, with 14-17 inches of rainfall per year—then we have lost something very precious.

I stand here to ask my colleagues to reject the amendment offered by the two gentlemen who have recently spoken. I think that the Garrison diversion program is a program that is worth continuing. It may well have some changes before it is completed. They say the costs have skyrocketed. Certainly they have skyrocketed because of inflation, because this project has been dragged out for so long.

We are not talking about $400 million in funding. We are not talking about $40 million. We are talking about $4 million of funding for the Garrison diversion project this year.

Mr. Chairman, I would like to conclude simply by saying that that promise that was made to our area of the country in the 1940's and again in the mid-1960's—the promise of a reliable and consistent water program, a water supply system for municipal and industrial use in North Dakota cities—is a very important promise.

I wrote a "Dear Colleague" letter which has been quoted at some length and I would like to read a paragraph from that letter and explain what I meant by that paragraph and to explain how that paragraph underlines what I think is the need for a water project in my State's future.

I said: "After 16 years of waiting for water from this often-delayed project, the people of North Dakota are recognizing that the impact of energy development in our State is making the availability of water an ever-increasing problem."

Let me repeat that."The people of North Dakota are recognizing that the impact of energy development in our State is making the availability of water an ever-increasing problem."

"This fall we are about to begin preliminary studies on a State-funded $60-$80 million pipeline to deliver water to one of our major communities. This city has grown so rapidly as a result of energy development that it can no longer supply its residents with decent water and now faces the possibility of having to recycle water from the third stage of its sewage lagoon. An emergency such as this community faces serves as a graphic reminder that wherever you go in a semiarid impact State like North Dakota, the availability of water can be a seriously limiting factor, one that—in the absence of a reliable delivery system such as Garrison Diversion—is capable of creating a crisis situation practically overnight."

I want to point out that the city of Dickinson, to which that paragraph referred, would not be served by the Garrison diversion program. The point is that the city remains arid, and illustrates that wherever you go in a semiarid State, the potential of a water delivery problem exists. The potential of a dryup of water supply for those industrial and municipal purposes exists.

North Dakota needs this project. I think the amendment should be turned down.

Mr. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I reluctantly rise to oppose the amendment. I am reluctant because my good friend of many years has proposed this amendment. He is my neighbor in the Rayburn Building. He serves good iced tea every once in a while.

However, because of the merit of this program, I am compelled to oppose this attack on the Garrison diversion. We have some perennial matters here that come up every year, and this is one. This year we do not have our good friends, the former Member, MARK ANDREWS, who is over in the other body. Mark mentioned to me last night this matter would be coming up and urged us on his behalf and on behalf of the many people from North Dakota who come every year to sup-

port this project. We do not hear from the Parliament of Canada. No, I must say we have never had a Member of Parliament come down and support it. We have had one or two people every year come in opposition.

We understand and listen to them because, yes, they are affected. But we are trying to work out those differences and I think we are about to resolve those differences. Maybe not to the satisfaction of every Member of the Parliament of Canada. Nevertheless, we are attempting to do that and it is a project that has widespread support.

The Governor has been here a number of times to testify on its behalf, and many members of the legislature, and it is one of those projects that certainly is not new to those Members who have been here for a while.

But it is a good project. People in North Dakota gave up land with the understanding this project would be built. We would be really violating the spirit of that agreement. The fact is that others have sacrificed for this project.

I think this body owes it to those who have sacrificed for the previous programs and projects. We should go ahead and complete this part, which is a necessary element in the complete project.

So I urge that the Members not support this amendment.

Mr. VENTO. Mr. Chairman, I rise in support of the Weaver-Conte amendment. The Garrison diversion is a project whose time and appropriateness have long since passed. It is a classic example of a boondoggle water project which defies economic and environmental logic.

This amendment to halt Garrison should be adopted solely on the basis of economics. Originally projected to cost $207 million, the Garrison diversion has now ballooned to over $1 billion with no end in sight for this explosion cost growth.

However, the problems with Garrison go beyond cost growth. It has been demonstrated that the construction of Garrison will have severe environmental impacts on this country and Canada.

As has been stated earlier, the Garrison diversion will require 220,000 acres to irrigate another 250,000 acres. A large portion of this land to be lost in construction includes national wildlife refuges. North Dakota possesses a rich waterfowl habitat. Its alkaline lakes and prairie marshes provide ideal breeding, feeding, and nesting areas for waterfowl. In fact, North Dakota produces more ducks annually than any other state except Alaska.

The Garrison diversion would have a devastating impact on waterfowl and their habitat. Thirteen national wildlife refuge areas will be destroyed or degraded through project development. In all, over 70,000 acres of prime prairie wetlands will be irreversibly lost.

Garrison diversion will also have severe environmental impacts on water quality for North Dakota, Canada, and Minnesota. A major concern is that the return flow of irrigation waters, channeled into the Souris and Red Rivers will increase the salinity of these waters and will add further pollutants such as sulfur. This concern is so great that Canada has appealed to the International Joint Commission. The IJC has agreed that the Garrison project would be a violation of the 1909 Boundary Waters Treaty between the United States and Canada. Because of this decision, the United States has made a commitment, reaffirmed by President Reagan this spring, that no action would go forward on Garrison that would have an impact on Canadian waters.

The concern in my State of Minnesota about the potential environmental impacts of the Garrison project is very great. The Minnesota-North Dakota border is the Red River, which is to receive some of the irrigation return flow. While this flow may increase water levels, it will also increase pollution levels above State legal limits. These significant environmental impacts caused the State of Minnesota Pollution Control Agency to join the Audubon Society lawsuit to halt the Garrison project.

Mr. Chairman, the Garrison project cannot stand the test of economics and environmental concerns. The time has come for Congress to say no to a program with skyrocketing costs and severe national and international environmental implications.

Mr. DASCHLE. Mr. Chairman, I have a serious problem in voting on the amendment to delete $4 million for the Garrison project. On the one hand, there are presently discussions being carried on by the State administrations of North and South Dakota, and between those States' congressional delegations, which could result in some very positive benefits for my State from the Garrison project. On the hand, there are, as yet, no provisions in the Garrison authorization which would protect South Dakota from some potential negative impacts resulting from the project. If the project is built as originally planned, there could be serious problems in my State with return flows from the project. There is nothing in the authorizing language which speaks to South Dakota's concerns about the quality of the water released into the James River, or about the timing of those releases. An ill-timed release could cause serious flooding problems for residents along the James River in South Dakota.

Even if the Garrison is built as originally planned, South Dakota could be in trouble. But the fact of the matter is that the environmental concerns of the Canadian Government may very well prevent the project from being built as planned. In that case, an alternative plan, draining into South Dakota entirely, might be substituted. In that case, the impacts on South Dakota might be even greater. I have tried to obtain assurances from the North Dakota delegation, and the State of North Dakota, that they will seriously consider specific protections for the State of South Dakota in the Garrison authorization. To this point, we have failed to successfully reach agreement on these protections in specific terms.

Coming from a State like South Dakota, I realize the necessity that water development is in our sister State, and I hesitate to oppose a project which North Dakota feels is necessary for its economic well-being. But I cannot support an authorization for a project which could seriously impact my State until some considerations are agreed upon to protect my State. I hope that some accommodation between our two States can be made. But until that accommodation is made, I must vote in favor of deleting the $4 million for additional construction this year.

Mr. LUJAN. Mr. Chairman, the uranium enrichment program includes the development of advanced isotope separation technologies. This program could result in significantly lower costs for uranium enrichment and conservation of uranium resources. Since gaseous diffusion enrichment plants are so power intensive, the development of this technology would have an additional national benefit—to conserve energy.

There are presently three processes for advanced isotope separation being developed. The report for the energy and water appropriations bill we are now discussing has included language on this program. This language calls for the Department to select one of these three processes as soon as possible.

This rush to decide among the three projects is ill advised. All of the three competing processes still have significant problems to overcome. Requiring DOE to choose one of them now would not allow DOE to make the best choice. This could be a precipitous move and a bad expenditure of funds.

I am at present a member of Reconciliation Conference, which considers these matters. I intend to make the same arguments to my colleagues there.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken, and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. CONTE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 188, noes 206, not voting 39, as follows:

[Roll No. 159]

□ 1740

The Clerk announced the following pairs:

On this vote:

Mr. Vento for, with Mr. Crockett against.

Mr. Ashbrook for, with Mr. Lewis against.

Mr. Vander Jagt for, with Mr. Dornan of California against.

Messrs. SCHEUER, McKINNEY, RODINO, HARKIN, D'AMOURS, LEVITAS, DAVIS, GOLDWATER, and LEHMAN changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. WRIGHT. Mr. Chairman, I move to strike the last word.

(By unanimous consent, Mr. WRIGHT was allowed to speak out of order.)

LEGISLATIVE PROGRAM

Mr. WRIGHT. Mr. Chairman, I take this time to announce to all the Members an agreement tacitly made between the leaders on both sides and the managers of the bill on both sides.

We really would like to finish this bill tomorrow. We would like to get to the crucial votes by about noon in order to accommodate Members, many of whom have plane flights leaving shortly after that hour.

Therefore, I am going to make a request of Members, in which I believe I am joined by our counterparts on the Republican side, and the request is that Members on both sides of the aisle tomorrow resist temptations to make 1-minute speeches and refrain from making those 1-minute speeches at the beginning of the day in order that we may get on to the bill and back into the Committee of the Whole very early. The House comes in at 10 a.m. If we can do that, then we can expedite the business of the House.

The gentlewoman from Tennessee (Mrs. BOUQUARD) has said that for her part she would be willing to restrain and curtail her side of the amendment in which she is interested to 30 minutes rather than the hour which has been agreed on, if there were a disposition on the other side to do the same.

In any event, we can begin, if it is mutually agreeable, with the general proposition that we will ask the Members not to delay tomorrow and to expedite getting on to the Committee of the Whole House for the further consideration of this bill, and if there should be too great a number of Members seeking recognition, I would expect to assert the prerogative of the Chair simply to postpone those recognitions until after the business of the House has been dispensed with.

Mr. COUGHLIN. Mr. Chairman, will the distinguished majority leader yield?

Mr. WRIGHT. Yes; I do yield to my friend.

Mr. COUGHLIN. Mr. Chairman, we have made commitments to Members on this side in connection with the debate on Clinch River, so I would not be able to guarantee that we can foreshorten the debate, but I will certainly do my best to do so.

Mr. WRIGHT. Mr. Chairman, I thank my friend for that comment. I am sure that he will act in good faith, and I am aware of the problem he faces.

I have had the problem, too, when there have been so many who want to be heard, and I do not want to choke off dissent or cause either side to operate under a gag rule of any kind. Perhaps we can both operate under a general restraint and get to a vote by noon at the latest on that particular

amendment. If we can do that, then I think everyone's purpose will be well served.

Mr. COUGHLIN. Mr. Chairman, I thank the distinguished majority leader for yielding.

□ 1750

Mr. WRIGHT. Now, it may be necessary for some conferees on the budget, I am advised, to continue their labors over the weekend. That information comes from no less an authority than the chairman of the Committee on Energy and Commerce.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OPERATION AND MAINTENANCE

For operation and maintenance of reclamation projects or parts thereof and other facilities, as authorized by law; and for a soil and moisture conservation program on lands under the jurisdiction of the Bureau of Reclamation, pursuant to law, to remain available until expended, $128,606,000, of which $82,303,000 shall be derived from the reclamation fund and such amounts as may be required for the Boulder Canyon Project shall be derived from the Colorado River Dam fund: *Provided*, That funds advanced by water users for operation and maintenance of reclamation projects or parts thereof shall be deposited to the credit of this appropriation and may be expended for the same objects and in the same manner as sums appropriated herein may be expended, and such advances shall remain available until expended.

Mr. WILLIAMS of Montana. Mr. Chairman, I move to strike the last word.

Mr. Chairman, if I may engage the attention of the distinguished chairman for the purpose of a colloquy which is of importance to the congressional district which I represent in Montana.

As the chairman knows, I say to the gentleman from Alabama (Mr. BEVILL), there is an Army Corps of Engineers water project in my district which has been the subject of extended controversy in recent years. The project I am referring to is the Libby additional units and reregulating dam.

Several years ago, on November 8, 1978, a Federal district court judge ruled that the reregulating dam portion of the project has never received congressional authorization, and the construction was halted. A year and 4 months later, on March 15, 1979, the Ninth Circuit Court of Appeals upheld the ruling.

Since that time, the Congress has refused to authorize the reregulating dam. In fact, a year ago January, I successfully offered an amendment to the public works bill deleting authorization for the reregulating dam.

Mr. Chairman, as the gentleman knows, an economic analysis conducted by the General Accounting Office showed that this project has a benefit/cost ratio 0.58 to 1. It is also necessary to make the point that the cost of this project, like that of so many other projects in this time of inflation, has severely escalated. The corps' initial project costs were $300 million in 1979. They now estimate that the costs have risen to $559 million.

As the gentleman knows, the corps had requested $14.6 million in order to continue work on the additional units 5-8. The committee has cut that request by $9.6 million to a total of $5 million. Unless the reregulating dam is authorized and constructed, there is very limited need for the additional units in Libby main dam. Mr. Chairman, these units cannot operate in conjunction with the four existing generating units due to downstream fluctuation criteria which govern the operation of Libby Dam. And while there is excess water behind Libby Dam which could provide additional electricity, it is only an additional 4 percent of electricity using the corps' own figures. It would be unwise to double the capacity of Libby Dam and merely add 4 percent to the power output. The benefits to the taxpayers could hardly replace the cost in this instance.

In summary, Mr. Chairman, I believe we agree that the additional units at Libby Dam are not being installed to operate as they were originally intended. To add these additional units without the reregulating dam, which Congress has refused to authorize, is unnecessary and wasteful. There is, however, wisdom in adding one of the additional units to Libby Dam to harness the electricity of the excess water to which I earlier referred. Am I correct then in my understanding that the $5 million which is being appropriated today is to be used only for the installation of one additional unit at Libby Dam, and not for any other facet of the Libby additional units and reregulating dam project?

Mr. BEVILL. Yes, I can tell the gentleman from Montana that no funds in this legislation are to be applied to construction of the Libby reregulating dam or the additional units 6, 7, or 8.

The CHAIRMAN. The Clerk will read.

The Clerk continued to read title II.

Mr. MYERS (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title II be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The CHAIRMAN. Are there any points of order to the remainder of title II? The Chair hears none.

Mr. WIRTH. Mr. Chairman, I move to strike the last word.

I would like to engage in a colloquy with the chairman.

Mr. Chairman, on page 72 of the report there is shown some $4 million for international programs. As we have discussed, there remains a need for approximately another $1 million to undertake other initiatives in this area of solar energy research and development, to improve our competitive advantages abroad.

I was wondering if it would be possible for us to shift $1 million out of the solar reserve account into the international account. It would show $5 million rather than $4 million on page 72 of the report.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman.

Mr. BEVILL. Yes. We will agree to that and have no problem with it.

Mr. WIRTH. I think that would be very helpful and would advance the competitive interests of this country overseas in the area of solar energy.

Mr. FAZIO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I also would like to engage the chairman in colloquy in the same area of concern in energy.

Mr. Chairman, the administration presented us with an austere solar budget, particularly austere in the area of active and passive solar energy for buildings. Because we were not convinced that the administration is correct in asserting that active and passive solar are basically launched in the marketplace, we included in this bill a novel $24 million solar reserve account, to be used should the administration find that its optimistic projections are not coming to pass and that solar is not making the near term contribution to energy independence it potentially could.

In the case of active solar, the committee noted that such activities as the solar homebuilders program, the gathering of performance and reliability data on solar hot water and space heating and cooling, and the dissemination of such information to the public and industry seemed to be of great importance. I would be appreciative if the chairman would confirm for the record that the committee is willing to see $4 million from the solar reserve account spent on these data acquisition, information dissemination, and training activities.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I yield to the distinguished gentleman.

Mr. BEVILL. I thank the gentleman for yielding.

We certainly are willing to agree to this and commend the gentleman for the outstanding work that he has done in the solar field particularly, and in the entire energy field.

Mr. FAZIO. I thank the chairman for his affirmation and appreciate his kind words.

The CHAIRMAN. If there are no points of order against the provisions of title II and there are no further amendments to title II, the Clerk will read title III.

The Clerk read as follows:

OPERATING EXPENSES

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES

For operating expenses of the Department of Energy necessary for energy supply, research and development activities and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), $2,115,499,000, to remain available until expended: *Provided*, That not to exceed $9,800,000 of the funds provided herein shall be for the purpose of carrying out the West Valley Demonstration Project Act in accordance with Public Law 96-368.

AMENDMENT OFFERED BY MR. COUGHLIN

Mr. COUGHLIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COUGHLIN: On page 16, line 15, strike "2,115,499,000" and insert in lieu thereof "1,887,499,000"; and in line 19, before the period, insert ": *Provided further*, That no part of this appropriation shall be obligated or expended for research and development, design, or construction of the Clinch River breeder reactor project".

The CHAIRMAN. Does the gentleman from Pennsylvania desire recognition?

Mr. COUGHLIN. Mr. Chairman, I desire to be recognized only to yield to the distinguished chairman of the subcommittee.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I would be happy to yield to the chairman.

Mr. BEVILL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. NATCHER) having assumed the chair, Mr. BEILENSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, had come to no resolution thereon.

LEGISLATIVE PROGRAM

(Mr. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, I ask to be recognized for the purpose of inquiring as to what we agreed to a moment ago. Is it my understanding the agreement for this program tomorrow is that the 1 minute will be held to a minimum and if not, in any event, the Committee on Energy and Water will be recognized and have the time early? The first order of business will be to recognize the gentleman from Pennsylvania (Mr. COUGHLIN) who has already been recognized. Am I correct?

The SPEAKER pro tempore (Mr. NATCHER). The gentleman is correct.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE REPORT ON H.R. 4242, TAX INCENTIVE ACT OF 1981

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means have until midnight Friday, July 24, 1981, to file a report on the bill (H.R. 4242), the Tax Incentive Act of 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. CONABLE. Mr. Speaker, reserving the right to object, I just would like to say that the minority has agreed to have its minority views available by the same time, midnight Friday.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

MERGER MANIA

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, the merger mania marches on. In one of the most obscene displays of corporate overindulgence ever seen in this Nation, Conoco continues to be pursued by a bevy of heavyweight beaus. The field of serious contenders seems to have been pared down to three, Seagram Co., the Canadian distiller, E. I. DuPont de Nemours & Co., the chemical giant, and Mobil Oil Co., the second largest oil company in America. There are still some second-line suitors hanging on the fringe. These include Marathon Oil Co.; Texaco, Inc.; and Cities Service Co. Looking at the frantic goings on, one might ask what each of the principal contenders hope to gain from a merger with Conoco. Seagram merely wishes to reinvest moneys gained from last year's sale of their energy holdings. Conoco is not too impressed with their overture, finds it, in fact, downright unfriendly, and wishes they would go away. Conoco might go so far as to say that they are not our kind, they drink, you know. DuPont, on the other hand, hopes to assure itself of an uninterrupted supply of petroleum products at reasonable prices to feed its petrochemical plants. Conoco loves the DuPont offer. They are the right kind of people. Of course the fact that they promise to retain Conoco's top management did not hurt their chances. It is tough to go out and find another six-figure salary on short notice. And Mobil, well, let me quote Mr. Willard Grimm, a well-known merger expert, who said that mergers of this type are "primary tools for achieving companies' growth goals, namely to lessen risk and obtain better cash flow." The key phrase here is "to lessen risk." This from the industry that insists they need all those profits so they can throw the dice in search of more energy resources to free the United States from foreign sources. These three companies I can assure you are not dice throwers and they are not out on the frontier of risk. They are looking for the sure thing, the instant winner, or, in the vernacular of the race track, "the sailboat race." An ironic note about a merger with Mobil is that Conoco finds their advances so repulsive that Conoco threatens to sue Mobil on the grounds that a merger with them would violate antitrust laws. Since when have the corporate giants showed such sensitivity to antitrust laws? The next logical question is who will finance these forays into merger land? Now any eighth grader will tell you that it is better to use someone else's capital and not your own. So of course most of the primary and secondary suitors have established lines of credit with their friends, the bankers. Mobil has established a $6 billion line of credit with a group of international banks led by Citibank. Texaco has arranged a $5.5 billion line of credit. Marathon Oil Co. has arranged a $5 billion line of credit with Chase Manhattan Bank. Cities Service Co. has arranged a $1 billion loan. This is all occurring during a period of time in our country when it is difficult to get a loan for a house or a car with sky-high interest rates for working men and women. And at a time when congressional budget conferences are trying to decide if middle-class college students should get loans, and banks are testifying to congressional committees on the same subject that they do not wish to become involved in such small loans.

I don't know how my colleagues feel on this subject, but it is difficult for me to stand by as Congress votes for budget cuts in essential services and not speak out against this carnival of avarice that continues day after day. Commenting on the accelerating pace of merger moves, the economist Robert Lekachman remarked: "The Reagan administration, which promised an investment boom, has instead unleashed the wildest collection of

mergers and takeover events since Napoleon conquered most of Europe."

The merger of Conoco and any of the suitors will not result in any real economic growth for this country, but is merely a redistribution of the wealth among the wealthiest giants of corporate American industry.

Today you cannot get a loan to buy a house, a car or to put your children through school. But if you want to buy an oil company, have I got a deal for you.

UNITED STATES NEEDS NEW IMMIGRATION POLICY

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, the United States needs a new immigration policy. Our present policy is unfair and ineffective. On March 6, the President set up a Cabinet-level task force to deal with this problem. During the past few months I have had the chance to look over some of the proposed recommendations by the task force. While immigration problems are complex and no solution will be perfect, many of the task force's recommendations are vague and insensitive.

As a Representative from the South Bronx, I am particularly concerned with immigration policy as it affects immigrants from the Dominican Republic. Two of the proposals made by the task force have the largest impact on Dominicans. One, is the legalization program. As I understand it, the administration proposes to give legal status to all undocumented aliens who were living in this country on January 1, 1980. The proposed legalization process would take 10 years to complete. Every 3 years immigrants would be required to renew their status subject to their staying out of legal trouble. After 10 years, they would be given permanent residence status. During that 10-year period, however, they would not be permitted to bring their families to this country, nor would they receive any social welfare benefits other than medicaid and education. Yet, these individuals would be required to pay full social security and income taxes.

What would happen would be the establishment of an entire underclass alienated from society, and isolated from their families. For an administration that places such strong emphasis on the family and more traditional values, it seems odd that it would support legislation that breaks down these values. In essence, this program establishes a caste system for browns and blacks. They would be required to support the Government without reaping its benefits.

The second major problem I have with the present immigration policy is with the preference system. As it stands now, the preference system for the admission of immigrants is unfavorably biased toward those countries and individuals who need to immigrate to the United States the least. The present system gives preference to family members of permanent U.S. residents first. I have no problem with that, but the system also gives preference to the more intellectually capable and sophisticated members of society. The sixth preference group, seventh is lowest, admits certified skilled laborers if there is a need for their skills. This is the category that most Dominicans are eligible for. Yet, because they come from an economically deprived area, technical schooling or certification is nearly impossible. But these individuals need help and opportunities. I am not suggesting opening doors to all the world's needy without setting some kind of limits. That would be ridiculous. But I am suggesting that the immigration preference system be set up in such a way so that the more economically deprived would have a better chance of coming to this country.

Both the legalization program and the preference system, as it is presently structured, show an unfair bias against Dominicans and all other poor Latin and Caribbean peoples. If an immigrant comes from an impoverished and politically unimportant country, he or she is not given equal treatment. Dominicans may not have oil but they have numbers, people who are willing to work to keep this country prosperous. It is not like America to forget the little person. I intend to see that we do not.

CLINCH RIVER BREEDER REACTOR

(Mrs. BOUQUARD asked and was given permission to address the House for 1 minute, to revise and extend her remarks and include extraneous matter.)

Mrs. BOUQUARD. Mr. Speaker, we will probably have a vote on the Clinch River breeder reactor issue today. I would like to read a copy of a letter sent by Dr. Edward Teller to Martin Anderson in the White House concerning the Clinch River project. It is a particularly interesting letter because opponents of Clinch River have extensively quoted Dr. Teller's comments against the project. As you will see from the letter, Dr. Teller does not oppose the project and has just made a film in which he supports the breeder reactor program generally, and Clinch River specifically.

HOOVER INSTITUTION,
Stanford, Calif., July 7, 1981.

Hon. MARTIN ANDERSON,
Assistant to the President for Policy Development, the White House, Washington, D.C.

DEAR MARTIN: I have sent you a copy of my recent letter to all members of Congress in connection with the Clinch River Breeder Reactor, about which I had serious doubts. Congress has now taken the definitive authorization action regarding this project and while I know that corresponding appropriation actions are still necessary, I feel that I should discontinue speaking of my reservations and rather try to support the National nuclear power program as it stands today and in a form from which it could be further improved.

I have agreed to the request of people from Oak Ridge to give a talk generally supporting the Clinch River project and making suggestions as to how to ensure the success of our whole nuclear electric power effort. This will be videotaped and I hope widely distributed to interested utilities for use in the campaign to move forward with our nuclear program.

Two points that I hope to emphasize, in addition to progress with Clinch River, are the great urgency of simplifying and improving the effectiveness of our federal licensing procedures and, secondly, taking appropriate steps which may minimize the public opposition to the breeder project which is apt to develop after the research and development phase is completed and when deployment begins. Indeed, this has been the pattern of political opposition to the present light water power reactor program.

I hope all this will appear to you as right and practical.

With best regards.

EDWARD TELLER.

EXTEND THE VOTING RIGHTS ACT

(Mr. CAMPBELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAMPBELL. Mr. Speaker, last Tuesday, the Civil and Constitutional Rights Subcommittee of the House Judiciary Committee unanimously voted to extend the Voting Rights Act. I rise today to commend the subcommittee on its action, and to urge the committee and Congress to give early and favorable consideration to legislation to extend and improve the act.

I learned through hard experience that the right to vote cannot be taken for granted, and that election laws can be unfairly applied to any minority—whether it be a people or a party. Our freedom to vote rests on both the good faith of our election officials and on the strength of our commitment to make and enforce fair and impartial election laws.

I learned this lesson during my very first step into politics. It was 1960 and I was not old enough to vote, but I helped a friend who was running in the Democratic primary for State house. I recall that the two of us paid

a visit on an old Democrat ward heeler in an attempt to persuade him to support my friend's candidacy. The old pol, sitting with his feet on a desk and chewing tobacco, told us that he could assure us victory in five precincts—if we paid a price. Because he refused to be bought, my friend lost those five precincts badly, and narrowly lost the primary. I lost some youthful naivete, but at the same time gained a lifelong appreciation of the importance of protecting the voting rights of all.

In this same year, 1960, the percentage of eligible black voters registered to vote stood at only 15.6 percent; today the figure is approximately 56 percent.

Mr. Speaker, I have felt the outrage of finding the doors of our election process closed shut. I know that we must remain vigilant in protecting our most fundamental right—the right to vote.

Since the adoption of the Voting Rights Act in 1965, minority voter registration has increased dramatically, testifying to the act's success in enforcing the 15th amendment of the U.S. Constitution. To preserve the gains in political participation made over the last decade and a half, and to provide incentive for good faith compliance in the future, Congress has the responsibility to extend the act. We also have a responsibility to examine a number of ways to make the Voting Rights Act fairer and more effective.

First, it may be time to grant aggrieved parties in sections of the country not now under the administrative preclearance section of the act a better chance to utilize the preclearance remedy to protect their voting rights. Subtler forms of voting discrimination, such as may exist behind gerrymandering and sudden moves to at-large districting, are not unique to the South; a strengthened administrative preclearance remedy ought to be expressly part of the law for applicability in all sections of the country. This is a more equitable way to enforce voting rights and is fairer than automatically imposing nationwide preclearance—a step I oppose as unmanageable and probably unconstitutional.

Further, I believe we need to encourage States and localities covered by section 5 of the act—preclearance—to observe not just the letter of the law, but the spirit as well. We can most effectively do this by providing a positive incentive for compliance—the ability for jurisdictions with consistent and excellent records of compliance to regain control of their own election laws. I am favorably impressed by a proposal introduced by Representative HENRY HYDE of Illinois, H.R. 3948, which would encourage covered jurisdictions to take positive steps to increase minority participation in the election process; the existing law simply maintains the status quo.

Under Representative HYDE's proposal, a State or political subdivision could be relieved from administrative preclearance upon meeting an exacting four-part test. In order to prevail, the petitioning jurisdiction must persuade a three-judge Federal panel that: First, no discriminatory test or device has been used during the 10 years preceding the filing of the action; second, that during this previous 10-year period, all submissions to the Attorney General have been made which were required under section 5; third, that the Attorney General has not successfully interposed any "substantial" objection with respect to such submission; and fourth, that the petitioning jurisdiction has demonstrated "constructive efforts" to involve minorities in the electoral process. Following relief from administrative preclearance, the court retains jurisdiction for a period of 5 years, during which time the Attorney General or any aggrieved party may seek to reopen the case and reimpose preclearance, arguing that the jurisdiction in question has participated in conduct which, had it taken place prior to relief from preclearance, would have precluded relief in the first place. After the 5-year probation period, the jurisdiction would be treated no differently than any other part of the country.

Relief from administrative preclearance should only be possible after a jurisdiction has taken meaningful steps to open—and keep open—the political process. And all the while, preclearance should remain a viable remedy—ready for use at any time in any section of the country where voting discrimination rears its ugly head. Whatever the details of the final legislation, the goal should be to promote good faith compliance with the act.

I believe that the clear success of the Voting Rights Act in breaking barriers to minority voter rights mandates the act's extension beyond 1982. As a southerner, however, I share the concerns of many that the existing law does not recognize or even encourage positive State actions designed to broaden voting rights. That is why I shall support efforts that will, without weakening the act's goals, reward good-faith compliance and promote efforts to expand minority voter participation.

REAGAN MONETARY POLICY

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, I see in the morning news that the economy is down at a rate of 1.9 percent in the second quarter. Domestic sales are down. Export sales are down. Unemployment is up and interest rates are up.

The Secretary of Commerce, Mr. Baldrige, states that business is going to be in for a rough time for the rest of the year. I have news for Mr. Baldrige. The high-interest-rate policy of this administration is breaking the back of business, it is breaking the back of farmers, and it is breaking the back of individuals.

Our own colleague, the gentleman from Ohio (Mr. PEASE) published an editorial in the Washington Star yesterday which reflects on the reason for this downturn in our economy. It states that the Reagan economic policy is producing a $80 billion deficit, and that the stock market, in reacting to that deficit, is taking a downturn. I insert the text of this editorial for the benefit of my colleagues:

[From the Washington Star, July 22, 1981]

DEFICITS SURE TO FLOW FROM 3-YEAR TAX CUT

While any tax cut debate obviously involves the kind and amount of tax reductions, the Great Tax Debate of 1981 is mainly about federal budget deficits and spending cuts.

To illustrate, the First Concurrent Budget Resolution (adopted by Congress on May 20) envisions an FY 1982 tax cut of $54 billion, spending cuts of $35 billion and a deficit of $38 billion.

Clearly, using the Reagan administration's economic assumptions, no tax cut would mean no deficit.

A look at budget projections for FY 1984 underscores the point even more vividly.

The Reagan-backed First Concurrent Budget Resolution assumes an FY 1984 tax cut of $48 billion, additional, as-yet-unspecified spending cuts of $28 billion, and a small surplus of $1 billion.

But the 1984 "surplus" not only assumes that Congress will indeed make the $28 billion in unspecified cuts. It also requires acceptance of the extremely optimistic economic assumptions of the Reagan administration regarding inflation, interest rates, unemployment, and GNP growth.

SIMILAR CONCLUSIONS

If those two factors—assumed spending cuts and optimistic economic assumptions—are removed, what then? I asked three independent sources to estimate the likely FY 1984 budget deficit under those circumstances. The answers are remarkably similar.

The Congressional Budget Office put the FY 1984 budget deficit at $80 billion.

Economist Joseph Pechman of the Brookings Institution put the FY 1984 deficit at $79 billion.

Rudolph Penner, economist with the American Enterprise Institute and a general supporter of the Reagan economic recovery plan, estimates the FY 1984 budget deficit at $87 billion.

From economist to economist, and from month to month, the projections for FY 1984 will vary slightly, but not much. If Congress adopts the Reagan economic recovery package this summer, it will face two years from now an FY 1984 budget which is also $80 billion in the red.

The tough choice for Congress in 1983 will be to make massive additional cuts on federal spending or to endure a huge budget deficit, the largest in U.S. history. The likely result: large, painful but insufficient cuts coupled with a large but not record-breaking deficit. Is Reagan budget strategist David Stockman aware of this probable scenario? I suspect so. The object is to force the Hobson's choice upon Congress as a way of getting otherwise unacceptable budget cuts adopted in 1983. How else, with Reagan off his peak of popularity, will the administration induce Congress to cut programs, like Social Security and veterans benefits?

Thirty-five congressional colleagues have joined me in signing a letter to President Reagan asking that the planned cuts for FY 1983 and FY 1984 be identified so that, at the very least, congressmen will know what they are committing themselves to if they vote for a three-year tax package.

Congress has struggled hard this year to come up with $37 billion in spending cuts. The Reagan budget strategy assumes further spending cuts (not yet specified) of $20 to $30 billion in FY 1983. Will Congress make those spending cuts in the summer of 1982, an election year, plus another $28 billion in spending cuts in the summer of 1983? Rudolph Penner doesn't think so. He assumes that any spending cuts will be offset by a few new programs and by cut reversals, and "the net result is that no progress is made on balance toward finding the $28 billion in unspecified outlay cuts listed for FY 1984 in the (first concurrent budget) resolution."

BUILT-IN DEFICIT

If Penner is right, and I believe he is, then the $48 billion tax cut which Reagan has scheduled for FY 1984 will contribute the bulk of a budget deficit that tops $80 billion.

The three-year tax cut? The issue is not tax relief for Americans. To repeat, the issue is the federal budget deficits and spending cuts.

Large deficits—an expansionary fiscal policy—must inevitably increase pressure for a very tight monetary policy with its certain concomitants: high interest rates, a depressed bond market, balky GNP growth rates, and business bankruptcies by the score.

Considering his great prowess in lobbying Congress, President Reagan will probably get his three-year tax reduction package in late July—unless responsible business and financial leaders speak out to help stave off disaster.

TAX BILL PROGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I want to continue the series of reports on the tax bill and the process being engaged in here between two groups, a bipartisan conservative Democratic/Republican coalition that is trying to pass President Reagan's economic recovery package and trying to help the United States fight high interest rates, inflation, and unemployment; and the efforts of the liberal Democratic leadership to retain power.

This was summarized recently by one gentleman who said the difference is that President Reagan has a program for America while the other side has a program for their political party. I think that is a fairly accurate summary. On the one hand we have a serious effort to change economic conditions while on the other hand we have a continuing series of efforts to zigzag and maneuver.

Least my colleagues think I am talking purely out of my personal beliefs as a partisan, let me quote two leaders, one intimately involved in the liberal Democratic leadership, the majority leader, the gentleman from Texas (Mr. WRIGHT). He said recently, and this was after a process of bargaining with the administration in trying to find a way to get a compromise bill:

Obviously 25 percent in 3 years instead of 30 percent in 3 years is not coming half way. It is coming one-sixth way.

Let me repeat that because I think it bears thinking about as a frame of mind. I am quoting the gentleman from Texas, the Democratic majority leader (Mr. WRIGHT):

Obviously 25 percent in 3 years instead of 30 percent in 3 years is not coming half way. It is coming one-sixth way.

It is as though halfway was between the gentleman from Texas, Mr. WRIGHT's position of zero and President Reagan's position of 30 percent. I cannot really believe the gentleman from Texas wanted no tax cut at all, yet that is certainly the way his quote read.

On another date he said:

If the White House will insist on a 3-year approach, I am not sure we could sell this to most of the Democrats, but conceivably we might be able to half way, 5 percent for 3 years, or 5 percent for 1 year, and then 7 percent, and then stop and regroup.

I think that gives my colleagues a fair summary of the difference. On the one hand there is an effort to bargain half way, give 5 percent, give 7 percent, whatever will work. On the other hand there is a serious, fundamental effort to reexamine the entire process. But the liberal leadership was in a dilemma. They really could not come flat out against a popular President, against a national movement, against an effort to cut taxes that runs from California to Massachuseets. So they tried to hide behind a smokescreen.

I quote again, and for the final time from the gentleman from Texas (Mr. WRIGHT), the majority leader. "I am certain that most of them," meaning Democrats, "do not believe in the 3-year tax cut. They do not want it. But a lot of the very same ones who do not believe in it nevertheless want to be perceived as supporting the President."

Some Democrats have been very upset, some liberals have been very upset with this approach.

I want to quote from an article that appeared in this morning's Washington Post by Michael Kinsley. Mr. Kinsley is the senior editor of the New Republic, a liberal magazine, normally of Democratic persuasion. He entitled his article rather eloquently "The Shame of the Democrats."

□ 1810

He says:

In the face of the conservative ideological revival, the Democratic Party has collapsed not just politically but morally.

He goes on further to say:

The moral humiliation is that the final program is worse for traditional Democratic values than Reagan's initial plan. The poor, the working class and indeed the country would have been better off if the Democrats had played no role at all in shaping the forthcoming tax and budget cuts.

Mr. Kinsley describes the process I have talked about in recent days. He says:

The progress of the tax bill since February has been even more startling. Someone ignorant of American politics, observing the debate, would assume that the Democrats were quite literally the party of millionaires. Reagan amended his original proposal once in an attempt to get Democratic support. That version has passed the Senate Finance Committee. But last week the House Ways and Means Committee passed its own version, and the Democratic leadership is planning an all-out fight to avoid another defeat on the House floor.

The Democrats' proposed two-year personal tax cut is skewed ever-so-slightly more toward moderate income people (a matter of $45 to $60 for someone making under $30,000). They hope to get great political mileage out of this, though the Republicans are waiting in ambush with the message that their three-year cut is bigger for everybody in the end.

Last night, I guess, we sprang that ambush by pointing out that the 3-year cut is far better—far better—than the 2-year cut which in fact by the third year becomes a tax increase.

The public has been confused in part because segments of the news media have, frankly, misreported, have stacked the deck against our efforts.

For example, if you look at the way in which Time magazine printed the tax bill, you get the Senate Finance Committee for 1982, the House Democrats for 1982, the Senate Finance Committee for 1983, the House Democrats for 1983.

Then you get the Senate Finance Committee again. But you do not realize, because there is no further bar, that in fact it is precisely in 1984 that the Reagan program begins to draw away from, to change, the whole face of American politics and of American take-home pay. For it is by that period that, for example, if you earn $15,000 this year, you suddenly find that you are being left behind if you go for the Rostenkowski tax increase, that you are in fact falling further and further behind as your cost-of-living increase pushes you into higher brackets.

What you are getting, in essence, as Mr. Kinsley said, is an offer by the liberals to buy off your current desire to change the way we do business, to change the kind of tax program that has continually raised the taxes for all of us, raised it by 249 percent in the 1970's.

What the liberals are trying to do is slow down that process just long enough so that we will forget what is happening and go about other business. But the process they are using to slow that down is itself so distasteful, so unacceptable that even many liberals are protesting.

Let me quote again from Mr. Kinsley's "The Shame of the Democrats":

Daniel Rostenkowski, Democrat of Illinois, chairman of the House Ways and Means Committee, is not going to sit idly by while the Republicans give away millions. Why should they get all the credit? He is determined to match every offer in the Senate bill, and raise them on a couple. The question, he said last week, is "whether you want to lose courageously, or to win." On the estate tax, for example, he outbid the Republicans by adopting all their changes and adding a 28 percent tax cut for estates over $2.5 million. The Senate proposes a $2,500 credit against the windfall profits tax for oil royalty owners. The windfall tax says, the committee report, "may impose a hardship on many low- and middle-income taxpayers." No doubt it is some sort of hardship to pay $2,500 in taxes, though this hardship is mitigated somewhat by up to $30,000 in oil revenues such a tax represents. But why stop there in your concern for low- and middle-income taxpayers? Rostenkowski wants to exempt a thousand barrels a day from the windfall tax. This represents a cool $12 million a year per operator.

Let me recap. What Mr. Kinsley, a liberal Democrat, is saying, is that the effort of the party of the common man, the effort of people, according to Mr. O'NEILL who has a tax cut for those below $50,000, in fact involves a 28-percent tax break for estates of $2.5 million. It involves a tax break of $12 million per year per operator, according to Mr. Kinsley.

Surely not the common man, unless Mr. O'NEILL, the Speaker's common man, has become rather wealthier than he used to be. Twelve million dollars a year? Many, many working families could spend a pittance of that $12 million and be far better off.

And where has this left us, this effort to wheel and deal, to maneuver, to zigzag, to somehow find a liberal answer which could at least slow down the tax revolt?

Mr. Kinsley says it well, speaking of the Democrats and the Democratic Party and its current disarray and the liberal Democratic leadership and their disarray:

What is the point of a political party with so little sense of its own constituency that it behaves in this way? Charles Manatt, the Democratic Party chairman, is a Sunbelt-style business lawyer from Los Angeles (real estate, entertainment, banking, and so on). I suspect he knows precisely how a commodity straddle works, and hasn't a clue about the eligibility rules for AFDC. But his firm's Washington office will prosper, just as that of his predecessor, Robert Strauss, is prospering. Al Ullman, Rostenkowski's predecessor as chairman of Ways and Means, is now a Washington "consultant" and hired lobbyist for the group working to gut the estate tax. Rostenkowski may think a similar niche awaits him. But if the Democrats keep devaluing their own souls, others may conclude that this merchandise is no longer worth buying.

But let us not just rely on the New Republic or on national liberal editorial writers. Let us look at the basic difference. The basic difference is that President Reagan, for many years, has worried how to change what has been happening to America. He has been out talking to people, he is concerned about unemployment, about the lack of jobs, he is concerned about the lack of opportunity for young people. He knows we need new factories and new jobs, that we need better machinery to compete with Japan and Germany, that American workers deserve the best chance to compete and to earn a living that is possible. He knows that working families need a chance and real tax cuts that will allow them to spend money on their children going to school, to buy clothing, to have a better home. President Reagan is committed to an economic recovery program. President Reagan has offered a clear systematic sought-out effort that by 1984 will have genuinely cut taxes. The other side is offering a tax increase, is offering an opportunity to hide for a little bit from the Tax Code that with each passing cost-of-living increase puts you in a higher bracket, takes more money away from you, leaves your family with less and less.

In the next week we will have a chance to change American history. The Ways and Means Committee, stacked 2 to 1 against the conservatives and against the Republicans stacked with liberal Democrats, has reported out a Rostenkowski-O'Neill tax increase bill that clearly over the next 3 years will not benefit working Americans.

□ 1820

That bill will come to the floor next week. We will have a chance here to vote on it.

Your opinion, your voice, can make a difference in whether America continues to decay, whether we have more unemployment, more factories closing, less chance to compete, or whether we in fact really do take a new stride, a new direction, move to a period of real prosperity, real jobs, and a growth in real take-home pay for our families and whether or not we can rebuild a system that will enable us to support social security and to guarantee every retired American a livelihood for the future.

If you want real economic recovery and a real change for the future, you have a chance now in the next few days to make your voice known.

THE SECOND ANNUAL NEW YORK-TOKYO BOYS BASEBALL FRIENDSHIP SERIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 5 minutes.

● Mr. ADDABBO. Mr. Speaker, it seems all we read and hear about these days as far as baseball is concerned, is news of strikes, negotiations, and free agency. The current baseball strike has perhaps distorted our perceptions and clouded our memories that the youth of our country, and of the world, still revel in playing the game of baseball for the sheer unabashed thrill and enjoyment of healthy competition, camaraderie, learning, and sportsmanship. It is a game where they and many of us here today, have been exposed for the first time to winning and losing, and all the responsibilities which come with both. The game of baseball on this level has always been and will forever remain just that, a game, to savor and enjoy in the glorious free time of adolescence.

With this in mind, I would like to take this opportunity to call to the attention of my distinguished colleagues in the House of Representatives a series of youth baseball games currently being played in New York City and its neighbor, Yonkers. It is an event helping to commemorate the 20th anniversary of the highly successful and truly unique sister-city relationship between two of the world's greatest cities. Last year, Tokyo was the host of the initial New York-Tokyo Nanshiki Baseball Games, the people of Tokyo extending to the 16-member New York Friendship Team the opportunity to experience their glorious city with all the hospitality and warmth Tokyo's citizens are famous for. This year's visit by the representative from Tokyo has been a time for New York to welcome our guests with open arms, the Japanese youth, when not playing baseball, visiting the sites which have made our "Big Apple" the electrifying and fascinating city millions of tourists have found it.

The youth representing New York City and Yonkers were chosen by the board of education and the Police Athletic League. Each of the five boroughs and Yonkers were represented by a team selected by the league, with a special team representing the entire city, "The New York Friendship Team," chosen by the New York Board of Education.

In the first game of the series, the Friendship Team and the visitors settled for an 11 to 11 tie in Central Park,

with three Queens residents—third baseman Pat Green of Flatbush, Dean Tatarian of Bayside, and Ozone Park's Mike DeLuca, who contributed a key two-run triple—playing important roles. In a game held yesterday the Queens PAL All Stars unfortunately found themselves on the short end of a 4 to 1 score, though this game, as well as all the others in this series, certainly does not tell the whole story.

You see, there are no losers in this series, only winners. The winners are the young people participating to meet new friends from a city around the world and to help them understand and learn about the many similarities and differences both cultures and nations have to offer. Sports have always been a fantastic tool in reaching understanding and facilitating cooperation on the international level, and is it my sincerest hope that the second annual New York-Tokyo baseball series will become a tradition both nations eagerly await every summer.

Through ventures such as the sister-city relationship, our two nations can become closer friends and partners in the search for world peace and security. The fine youth who participated in these games are the future world leaders of tomorrow and the lessons they have learned on the ballfields will be the ones they carry with them as they lead our nations to further greatness.

I would like to point out that this series would never have been so successful if not for the tireless efforts of so many caring and dedicated people. There would have been no baseball if not for the work of Chairman Robert M. Reunitz and Executive Director Mico D. Licastro, two gentlemen who have played key roles in the New York-Tokyo relationship. Among others, just to name a few of the so many, Al Mazza of the board of education, Conrad Ford of the Police Athletic League, and all the various officials from Tokyo all have done an outstanding job.

More importantly, it is the players, managers, coaches, and parents who deserve our utmost thanks and praise in giving us the opportunity to witness the game of baseball the way it was intended to be played. Never can it be said that we can never learn a thing or two from our young people.●

MIKHAIL RUDZEVITSKY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Hawaii (Mr. HEFTEL) is recognized for 5 minutes.

● Mr. HEFTEL. Mr. Speaker, it is an honor and a privilege for me to join in this special order honoring all Soviet Jews for their courageous battle for freedom and human dignity. I would like to take this occasion to pay special tribute to Mikhail Rudzevitsky, a Soviet Jew who was first refused permission to emigrate to Israel on July 19, 1973. An aeronautical engineer by profession, Rudzevitsky was born in 1949 and is married. He is being denied permission to emigrate due to the alleged secrecy of his service in the Soviet Army. Sadly, his status as a "refusenik" precludes him from practicing his chosen career profession.

Rudzevitsky is one of the lesser-known Soviet Jews whose attempt to emigrate to Israel has been denied. Because of this, it is vitally important that his plight receive wide publicity. I feel that all of us should speak out for those who have been denied the most fundamental of freedoms—freedom of movement, freedom of thought, freedom of expression, rights that we as Americans all too often take for granted.

Only through a knowledge of the plight of Soviet Jews can we as Americans fully appreciate the fruits of liberty which are ours. I am therefore proud to participate in this "Call to Conscience Vigil" and I call upon my colleagues to join with me in bringing the lesson of this ordeal to the attention of the American people.

The legacy of Mikhail Rudzevitsky and of all Soviet Jews is one of indomitable human spirit and faith in an enduring ideal. It is in the end firmly rooted in a dream of freedom which shall never die.●

COAL PIPELINE ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 10 minutes.

● Mr. UDALL. Mr. Speaker, today my colleagues, Mr. HOWARD, Mr. LUJAN, Mr. CLAUSEN, Mr. MCCOLLUM, Mr. FUQUA, Mr. GIBBONS, Mr. BREAUX, and I are introducing the Coal Pipeline Act of 1981. The bill would increase competition for transporting coal by making eminent domain authority available to slurry pipeline carriers, as it is currently available for other types of pipelines and railways. Although coal is a relatively cheap fuel, the cost of transporting it by rail amounts to about 50 percent of its delivered price. It is time to let slurry technology compete with rail transportation on an equal footing to help drive down the cost to American consumers of energy generated from coal-fired powerplants.

It is imperative that we move quickly to replace imported oil with domestic coal as an energy source. Energy produced in a coal-fired powerplant is half the price of energy produced with gas, even taking into consideration the cost of air quality control equipment. The cost of oil is now roughly three times the cost of coal in the United States, and the unpredictable supply and pricing policies associated with imported oil should not be suffered by this country any longer.

Abundant supplies of coal will not contribute to energy security in this country if transportation systems to move it from mine to powerplant are inadequate. It is clear that the railroads will continue to be a leading transporter of coal, but in many areas of the country coal is not even considered as an alternative fuel because there are no rail tracks to transport it. Coal slurry pipelines should aid this country's fight for energy independence by serving areas which would otherwise have no choice but to buy expensive oil and gas. The recent deregulation of the railroads is evidence that Congress believes in the competitive health of the railroads, and slurry pipelines competing for routes with railroads will keep rates down in furtherance of Congressional goals.

I want to emphasize that the legislation we are introducing today was written by the coal slurry industry and this is their proposal for consideration by the Congress. I do not necessarily agree with all the positions represented by the bill and will want to give careful study to certain important issues when the bill is subject to hearing scheduled by the Interior Committee July 30.

This bill does not set up a complicated regulatory process for accomplishing its purposes. Rather, it simply authorizes slurry pipeline carriers to apply for rights of way to construct pipelines to move coal, using mechanisms already in place in the Federal land Policy Management Act and the Interstate Commerce Act. It preserves the States' unqualified rights to appropriate, use, and regulate its water. I urge my colleagues to give this bill careful consideration in light of our country's policy on energy security and the Federal role in stimulating coal development.●

REGULATORY REFORM AND JUDICIAL REVIEW

The SPEAKER pro tempore. Under a previous order of the House the gentleman from California (Mr. DANIELSON) is recognized for 60 minutes.

Mr. DANIELSON. Mr. Speaker, on Monday, July 20, I received a report from the Judicial Conference on the United States expressing the views of that conference on the bill H.R. 746, the regulatory reform bill now pending before this subcommittee on Administrative Law and Governmental Relations of which I have the honor of being the chairman.

In early May, as chairman of that subcommittee, I requested an evaluation of our bill from the Judicial Conference because I knew that the regulatory reform bills pending before both Houses of Congress as well as proposed amendments to those bills

would have a significant impact on the courts.

The Judicial Conference is in a unique position to assess that impact, since the Conference operates as a sort of board of directors for the judiciary branch, and since it is composed entirely of Federal judges.

In response to my request the Judicial Conference in a letter dated July 20, 1981, addressed three distinct areas of concern: The scope and standards of judicial review, the level of judicial review, and the race to the courthouse in administrative agency cases.

The Conference restricted its comments to those portions of the bill which would have an impact upon the courts.

The position of the Judicial Conference is that some language in the pending legislation would force the courts to duplicate agency decisions and place them in a policymaking role which is inappropriate for the judiciary.

In its letter the Conference concluded that the present language of H.R. 746 and the Senate companion measure, S. 1080 which provides for independent court review of agency action, overreaches that goal and creates an unmanageable burden for the Federal courts.

The Conference bases this conclusion on its view that it is inappropriate that the judicial function become equated with complete oversight and redetermination of administrative agency decision.

The Conference specifically opposes the creation of judicial review for the procedures—I emphasize procedures—of agency decisionmaking which are required by these bills, such as the determination of which rules are "major," the applicability of so-called hybrid rulemaking procedures, and the contents of regulatory analysis.

The Conference concludes that such judicial review would put the courts "in the position of redetermining an agency factual decision whether the $100 million impact level had been reached" and would "require the courts to analyze the analysis that the agency used to reach their decision."

This would result in a dramatic increase in the number and complexity of the cases to be reviewed as well as a qualitative change in the depth of that review.

Among the other positions set forth by the Conference, the Conference also opposes the transfer of general jurisdiction over agency actions from the district courts to the courts of appeal because of the negative impact this would have on the comparative workloads of the courts.

This provision has been removed from H.R. 746 but it is presently included in the bill S. 1080.

Because of the importance of the issues raised by the Judicial Conference, I intend to reopen the hearings on H.R. 749, if that is the wish of the members of my subcommittee, at the earliest possible date.

In communicating with me the Administrative Office of the U.S. Courts said:

ADMINISTRATIVE OFFICE OF THE
UNITED STATES COURTS,
Washington, D.C., July 20, 1981.

Hon. GEORGE E. DANIELSON,
Chairman, Subcommittee on Administrative Law and Governmental Relations, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: In your letter of May 11, 1981, you requested the views of the Judicial Conference of the United States on H.R. 746. As I indicated to you at that time, the Judicial Conference was then in the process of considering H.R. 746 and other regulatory reform bills of the 97th Congress. In order to expedite the development and transmission of Judicial Conference views to Congress, the Judicial Conference in March of this year created a special ad hoc committee to consider the regulatory reform bills pending in Congress. That committee sent its report and recommendations to the Executive Committee of the Judicial Conference last week. Because the Judicial Conference meets only twice a year in March and September, the Conference has an Executive Committee authorized to act on behalf of the Judicial Conference on matters requiring action prior to a regularly scheduled session of the Judicial Conference. Due to the priority attention that H.R. 746 and S. 1080 are receiving in Congress, the Executive Committee has acted on behalf of the Judicial Conference in an effort to be responsive to congressional requests for Judicial Conference views.

The Judicial Conference addressed three distinct areas of concern:

I. The scope of judicial review of the administrative agency actions and the standards for such review;

II. The level of judicial review in the first instance in the federal court system; and

III. The proposed solution to eliminating the unseemly "race to the courthouse" in administrative agency cases.

I. SCOPE OF JUDICIAL REVIEW

The Conference first addressed its attention to the addition of the word "independently" (italicized) to Section 706(a) and to the language in the new Section 706(c) which precludes a "presumption in favor or against agency action. These sections are quoted below. The language of the existing section of the Administrative Procedure Act is in regular type; the additions made by S. 1080 are italicized. (The additions made by H.R. 746 to 706(c) are similar but presented in a different order.)

S. 1080

§ 706. Scope of Review.—(a) To the extent necessary to decision and when presented, the reviewing court shall *independently* decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action.

706(c) In making determinations under clause (2)(C) of subsection (a) of this section, the court shall require that action by the agency is within the scope of the agency jurisdiction or authority on the basis of the language of the statute or, in the event of ambiguity, other evidence of legislative intent. In making determinations on other questions of law, the court shall not accord any presumption in favor or against agency action.

The Conference does not object to the use of the word "independently" in § 706(a) nor to the use of the phrase "[no] presumption in favor or against agency action" in § 706(c). The Conference recognizes the importance of preserving the judiciary's traditionally independent approach to questions of law. The Judicial Conference is concerned that the language employed in S. 1080 and in H.R. 746 will generate new cases and will require more extensive judicial analyses that Congress intends or is practicable for the federal courts to undertake. Without appropriate qualifying language in the bill itself or in its legislative history, the modifications to the Administrative Procedure Act will have an effect beyond that intended by Congress and risks imposing unmanageable burdens upon the judiciary. The bills, S. 1080 and H.R. 746, appear to apply with equal force to all questions that might technically be termed matters of law, including the thousands of minor, interstitial matters which Congress appears to have intended as appropriate subjects of agency expertise. Additionally, there will be cases in which issues of law and fact will be so intermixed as to defy any federal court's efforts to separate them. To apply literally this proposed language concerning the scope of review to all issues in all agency cases before the courts might require duplication of the agencies' decisions by the reviewing court. The committee questions whether Congress intended that in all agency actions the federal courts be required to undertake such a difficult and time-consuming, if not impossible, task. It appears inappropriate that the judicial review function become equated with complete oversight and redetermination of administrative agency decisions including factual decisions. Not only would such review be complex and technical in nature, but the scope of review contemplated in these two bills would significantly increase the incentive to litigate agency decisions. The impact on the courts would be an increase in the number of administrative agency cases and a qualitative increase in the courts' workloads given the breadth of matters before the courts, the depth of the reviews, and the complexity of the matters subject to judicial review.

Position I.A.

The Judicial Conference is concerned with preserving the independent review of questions of law in agency actions by the federal courts. However, the language used in S. 1080 and H.R. 746 to accomplish that objective overreaches that goal and creates an unmanageable burden for the federal courts. Without appropriate qualifying language, the Judicial Conference opposes the modifications proposed to ensure independent judicial review because the effect of the proposed language would exceed the objective intended by Congress.

If Congress believes as matter of policy that judicial review is necessary, Congress could create a specialized Article I court or a group of such executive branch tribunals to perform such judicial review. The existence of such a court would avert the overburdening of the Article III courts with the many, routine appeals from agency decisions and rules. Appeal by certiorari from that court to an Article III court could, of course, be created for meritorious cases. The Judicial Conference supported the creation of such a

court for Veterans Appeals in the 96th Congress. The Judicial Conference Subommittee on Federal Jurisdiction which met in June of 1981 recommends reaffirmation of that position. The subcommittee also recommends supporting a similar Article I court for the appeals of Social Security claims. The reason is clear, the federal courts cannot absorb the workload. The federal courts today, given their existing backlogged dockets and their limited resources, could not hear and decide in any reasonable period of time the cases which the judicial review provisions contained in S. 1080 and H.R. 746 would generate.

Position I.B.

The Judicial Conference supports, as an alternative to direct review of administrative agency cases, the creation of an Article I court or courts with certiorari review by Article III courts.

The second major issue which the Conference addressed under the scope of judicial review was the modification of the Administrative Procedure Act to set a standard for judicial review of an agency's informal rulemaking under section 553. The Administrative Procedure Act currently provides no specialized standard of review for agency proceedings subject to section 553 of title 5. The proposed standards are as follows:

S. 1080

(F) *without substantial support in the rulemaking file, viewed as a whole, for the asserted or necessary factual basis, as distinguished from the policy or legal basis, of a rule adopted in a proceeding subject to section 553 of this title; and*

H.R. 746

(F) *without substantial support in the rulemaking file, viewed as a whole, for the asserted or necessary factual basis subject to section 553 of this title; or*

The Conference is concerned that the proposed language may blur the distinction between informal rulemaking (section 553) and formal rulemaking (section 554). The use of the phrase "substantial support" in S. 1080 and H.R. 746 is an improvement over the phrase "substantial evidence" which had been debated in the 96th Congress, but "substantial support" still tends to evoke an adjudicatory standard. Such a standard for informal rulemaking negates the Congressional purpose in establishing an informal process for creating, modifying, and repealing certain types of agency regulations. The Conference noted that there are an enormous number of minor regulations which are subject to the informal process and that there are *comparatively* few cases involving important rules with significant impact which are subject to this process.

A reviewing court needs the flexibility to address each case in a manner appropriate to the nature of the regulation considered, including assessing the suitability of the particular file in light of the particular regulation involved. The Conference reasoned that the Congressional intent in adding section 706(a)(2)(F) is to require support sufficient *under the circumstances* for the operation of the rulemaking process in a *particular* instance. The Conference believes that the phrase "adequate support" or the phrase "sufficient support" would better effectuate that intent than the phrase "substantial support" which appears in S. 1080 and H.R. 746. The Conference recognizes that the decision whether to add a separate standard for reviewing informal rulemaking is a matter of policy for Congress to address. Given the fact that Congress has inserted such a standard in S. 1080 and H.R. 746, the Conference feels that it is appropriate for the Judiciary to comment on the means by which Congress seeks to codify the requirement for support in an agency rulemaking file.

Position I.C.

The Judicial Conference proposes alternatives to the phrase "substantial support" in section 706(a)(2)(F) such as "adequate support" or "sufficient support" because the use of the term "substantial support" blurs the necessary distinction between the informal rulemaking process and the formal adjudicatory process which requires "substantial evidence" on the record.

A third concern considered was the pending amendments to permit judicial review of agency decisions and agency regulatory analyses supporting those decisions. Such judicial review would be a review of the entire informal rulemaking file, a review of the analyses and data supporting the agency's decisions, and a review of the non-documented processes of decision-making in informal rulemaking (§ 553). Such matters are not the equivalent of a *record* in the sense that courts now review the *records* of adjudicatory agency proceedings (§ 554). (For example, these amendments would put Article III courts in the position of redetermining an agency's factual decision whether the $100 million impact level has been reached. The bills would also require the courts to analyze the analysis that the agency used to reach their decision.) Not only will the number of cases increase by creating such judicial review, but the time and expertise to make the review required will also increase dramatically. The Conference questions the ability of the federal courts to perform such a task effectively and quickly.

Recommendation A.3.

The Judicial Conference opposes the creation of judicial review of such agency determinations and the supporting regulatory analyses.

The fourth and final issue that the Conference considered pertaining to the scope of judicial review was the potential for "interlocutory" judicial review of agency decisions (e.g., whether to classify a rule as a major or minor rule). H.R. 746 (as introduced and as printed on June 8, 1981) explicitly precludes judicial review of an agency decision such as cited above (Section 632(a) p. 10 of the June 8, 1981, committee print of H.R. 746). S. 1080 is silent on the subject. Because there is concern that an amendment to create such judicial review may be offered, the Conference decided to address the issue.

The Conference opposes judicial review of agency decisions during the rulemaking process for several reasons. First, such "interlocutory" review by the federal courts would add cases to already overburdened federal court dockets, cases which might again be before that court on the merits of the rulemaking process. Second, the agency's initial decisions may not be well suited for judicial review at an early point in time given a potential paucity of information in the file combined with the technical nature of the regulation. Many cases could require remand. It is the Conference's opinion that reversals of preliminary agency decisions would occur only rarely. Also, judicial review at an early stage of the rulemaking process would require more discretion by the reviewing court than Congress may have intended. Third, due to the flood of civil cases coming to the courts and the existing backlog, these "interlocutory" reviews would not only overburden the federal courts, but they would also hinder the rulemaking process. Given that one objective of regulatory reform is to expedite agency rulemaking procedures, creating a certain delay by permitting premature judicial review of agency decisions conflicts with achieving that objective of expediency. Finally, this delay could be manipulated by either those making the rule or those challenging it. Furthermore, that same strategy could be applied not only to the creation of new regulations but also to the modification or repeal of existing regulations.

Position I.D.

The Judicial Conference opposes efforts in Congress to create a right of judicial review for preliminary administrative agency decisions in the course of rulemaking.

II. LEVEL OF JUDICIAL REVIEW

H.R. 746 as introduced included the amendments to 5 U.S.C. § 704. The text of the current section 704 is as follows:

[Ch. 7, Judicial Review, 5 § 704]

§ 704. Actions reviewable.—Agency action made reviewable by statute and final agency action for which there is no other adequate remedy in a court are subject to judicial review. A preliminary, procedural, or intermediate agency action or ruling not directly reviewable is subject to review on the review of the final agency action. Except as otherwise expressly required by statute, agency action otherwise final is final for the purposes of this section whether or not there has been presented or determined an application for a declaratory order, for any form of reconsideration, or, unless the agency otherwise requires by rule and provides that the action meanwhile is inoperative, for an appeal to superior agency authority. Pub. L. 89-554, Sept. 6, 1966, 80 Stat. 392.

The amendments proposed in the original version of H.R. 746 are as follows:

JUDICIAL REVIEW

SEC. 207. (a) Section 704 of title 5, United States Code, is amended—

(1) by inserting "(a)" immediately before "Agency"; and

(2) by adding at the end thereof the following new subsection:

"(b) If no special statutory review proceeding is applicable, an action for review of a rule defined in section 551(4) of this title shall be brought in the United States Court of Appeals, and venue of such action shall be determined in accordance with section 2343 of title 28, United States Code.".

The proposed addition to section 704(b) has been deleted from the June 8 committee print of the House bill. The Judicial Conference chose, however, to consider this issue and recommend a position because the proposed change may be offered as an amendment to the Senate bill or reappear during the House mark-up of its bill.

The effect of the proposed addition of 704(b) would be to direct all administrative agency cases absent special statutory provisions to the courts of appeals rather than to district courts. The Conference considered the comparative workloads of the district and the appeals courts as well as the nature of the administrative agency action reviewed (e.g., Social Security cases). The Conference believes that the status quo is preferable to the judiciary.

Position II

The Judicial conference opposes adding a section 704(b) as proposed in H.R. 746 as introduced.

III. RACE TO THE COURTHOUSE

The Conference directed its attention to the solution proposed in S. 1080 to the problem of the "race to the courthouse." The provisions in S. 1080 (pp. 22-24) sustantially embody the proposal recommended by the *Administrative Conference of the United States.* To avoid unseemly action on the part of attorneys and to avoid inconsistent and contested actions by the various courts in deciding such matters of venue, the provisions in S. 1080 would amend 28 U.S.C. § 2112 to provide for random selection by the Administrative Office of the United States Courts when multiple proceedings have been instituted. The Judicial Conference supports this proposal with the caveat that the random selection is viewed as a ministerial function *not* as a judicial function. Were it viewed otherwise, the Administrative Office would not be an appropriate agent to perform the selection. The Conference is concerned that no judicial functions be imposed on the Administrative Office by Congress. However, the Conference believes that the selection function contemplated in this bill is ministerial and administrative in nature.

Position III

As a matter of principle, the Conference opposes the imposition of any judicial function on the Administrative Office of the U.S. Court. However, the Judicial Conference supports S. 1080's solution to the "race to the courthouse" problem with the qualification that the selection procedure is a purely ministerial duty. The Judicial Panel on Multidistrict Litigation with its staff may, however, be an alternative to the Administrative Office of the U.S. Courts as the agent administering the random selection process.

Sincerely yours,

WILLIAM E. FOLEY,
Director.

□ 1840

Mr. Speaker, I know that you are pleased, as am I and all the Members of the House of Representatives, to have received this comment from the Judicial Conference, which comment will play such an important role in the further markup of regulatory reform bills, in their consideration in the committees of the Congress, and in their consideration on the floor of the Congress. This exchange of ideas represents a new high level of cooperation between the judicial and legislative branches of our Government.

Mr. Speaker, I yield back the balance of my time.

PRIVATE IMMIGRATION BILLS RELATING TO FOREIGN MEDICAL GRADUATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 15 minutes.

● Mr. MAZZOLI. Mr. Speaker, the Subcommittee on Immigration, Refugees, and International Law of the Committee on the Judiciary established guidelines covering the consideration of private immigration bills introduced by Members on behalf of foreign medical graduates.

The subcommittee sent a "Dear Colleague" letter to all Members of the House which explained the policy adopted by the subcommittee at a meeting on June 11, 1981.

To give further notice of this new policy, I include, following my remarks, a copy of the letter detailing the new policy.

CONGRESS OF THE UNITED STATES,
COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVES,
Washington, D.C., July 13, 1981.

DEAR COLLEAGUE: This letter details the policy, recently adopted by the Subcommittee on Immigration, Refugees, and International Law, concerning private immigration bills which have been introduced on behalf of alien doctors who are currently living in the United States. These doctors are technically known under the law as foreign medical graduates (FMG).

FMGs are foreign-born doctors who have received their medical education and medical degree abroad. They initially entered this country legally, under an established program providing for further medical study, but are now in the U.S. illegally.

Many of these doctors want to remain in this country and practice medicine here. Under the law, they cannot remain here. They must return to their homeland.

Hence, many seek to remain in the United States, and legalize their status here, through means of a private immigration bill.

Quite a few of these bills are now before the Subcommittee. And, we have received reports that there are several thousand other FMGs in this country illegally. They are practicing medicine, some with proper medical licenses, others without such licenses.

We have also been advised that there may be as many as 30,000 FMGs in the U.S. illegally who are not practicing medicine but who are pursuing other occupations.

In short, the presence in the U.S. of these FMGs constitutes a major immigration issue. But this is one issue on which our Subcommittee has proceeded carefully in the area of private bills because a decision on one private bill to benefit a single FMG may set a precedent for thousands of other FMGs.

The Subcommittee, following extended and careful deliberation on June 11, 1981, adopted the following policy affecting the three categories into which these private bills fall:

I. Private bills introduced and referred to the subcommittee by June 11, 1981 covering FMGs who entered the United States prior to January 9, 1977

The Subcommittee will defer final action on these bills until a time near the end of the 97th Congress.

The Subcommittee desires the beneficiaries of these private bills to use this "grace period" to exhaust all administrative remedies existing under current law which could legalize their status and lead to their acquiring permanent resident status.

Specifically, this grace period is to enable the FMGs, who are the beneficiaries of these private bills, to satisfy the following statutory requirements for permanent residence:

1. Passage of the Visa Qualifying Examination (VQE). This examination tests the medical competence of physicians. It is given in 5 cities in the United States and 26 locations throughout the world. The next one is scheduled for September, 1981.

2. Exemption from the two-year foreign residency requirement. Some countries require their citizens—who have entered the United States as exchange visitors for medical studies—to return to their home country to practice the skills which they learned in the U.S.

This Subcommittee policy applies only to FMGs admitted into the U.S. prior to January 9, 1977, because this is the cut-off date established by Public Law 94-484, the "Health Professions Educational Assistance Act of 1976". In passing this law, the stated intent of Congress with respect to FMGs was to assure the services provided by such doctors was quality health care.

All FMGs who have entered the United States after January 9, 1977, have clear knowledge that they must leave the U.S. following completion of their specialty medical training.

The Subcommittee will schedule final action on all private bills in this category once the author of the bill provides proof to the Subcommittee that those listed requirements have been met by the beneficiary of the private bill.

However, it should be noted that fulfillment of these requirements does not guarantee favorable action on the bills by the Subcommittee. These requirements are simply prerequisites which must be met before the Subcommittee will take up the merits and equities presented by the case and move to final action.

The Subcommittee has authority to initiate a request for official reports from the Immigration and Naturalization Service (INS) and from the Department of State on a FMG, who is the subject of private legislation.

This request for an official report for a doctor in the United States—technically called a "waiver of Rule 4"—effectively stays deportation until all the reports are completed, are filed with the Subcommittee, and final action has been taken by the Subcommittee.

The Subcommittee has a policy to "waive Rule 4" only in those rare instances when unusual hardship to the bill's beneficiary, or to a U.S. citizen, can be demonstrated. Thus, in most instances, the Subcommittee does not waive Rule 4.

As part of the Subcommittee's new policy FMGs falling within this category, it will waive Rule 4—i.e., request Departmental reports—on all private bills which were pending before the Subcommittee on this category on June 11, 1981.

To summarize: final action on private bills of this category will be deferred until the end of the 97th Congress to allow time for the accomplishment of the two statutory requirements listed above, except that final action will be scheduled earlier where the Subcommittee has proof that the two requirements have been fulfilled.

Implicit here, of course, is that the Subcommittee will view with very little favor private bills in this category where the FMGs do not meet the VQE and foreign residency waiver requirements.

II. Private bills introduced and referred to the subcommittee after June 11, 1981 covering FMGs who entered the United States prior to January 9, 1977

Private immigration bills for FMGs referred to the Subcommittee after June 11, 1981, covering FMGs who entered the United States under the exchange visitor program prior to January 9, 1977, will not be scheduled for Subcommittee consideration until the Subcommittee receives proof that the FMGs have met these two requirements: passage of the visa qualifying examination, and, exemption from the two-year foreign residency requirement.

The Subcommittee intends to clear its docket of all private bills for FMGs before the 97th Congress adjourns.

Implicit here, of course, is that the Subcommittee will view with very little favor private bills in this category where the FMGs do not meet the VQE and foreign residency waiver requirements.

III. Private bills already introduced and referred to the subcommittee or yet to be introduced covering FMGs who entered the United States on or after January 9, 1977

Private bills on behalf of FMGs, who entered the U.S. on or after January 9, 1977, will be scheduled in the regular fashion.

It is the intention of the Subcommittee to view unfavorably all private bills to benefit FMGs who entered the country on or after January 9, 1977.

As was explained earlier, January 9, 1977, was the date upon which the new national policy on FMGs became effective.

All FMGs who have entered the U.S. for study on or after January 9, 1977, know clearly that they must leave the U.S. and return to their homeland after completion of their medical studies.

Conclusion

The Subcommittee has developed its policy on private immigration bills for FMGs with three objectives in mind.

The first is to provide a balanced, thoughtful, and firm application of the nation's immigration laws.

The second objective is to support the goals of the Health Professions Educational Assistance Act of 1976 which established a new national standard for foreign medical doctors.

The third objective is to be of assistance to Members of the House who have sponsored private immigration bills for FMGs.

We appreciate your attention to this complicated issue. If you have any questions, please do not hesitate to contact the Subcommittee staff on 55727.

Sincerely,

Romano L. Mazzoli, Chairman, Subcommittee on Immigration, Refugees, and International Law; Sam B. Hall, Jr.; Patricia Schroeder; Barney Frank; Hamilton Fish, Jr., Ranking Minority Member, Subcommittee on Immigration, Refugees, and International Law; Dan Lungren; Bill McCollum.●

THE FAMILY FARM ANTITRUST ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

● Mr. KASTENMEIER. Mr. Speaker, I am pleased today to introduce the Family Farm Antitrust Act of 1981, which is being cosponsored by my colleagues Mr. BONIOR, Mr. FORSYTHE, Mr. KOGOVSEK, Mr. PANETTA, Mr. PRICE, Mr. STUDDS, and Mr. WEAVER. Our purpose in proposing this legislation is to preserve the family farm base of American agriculture by prohibiting large, nonfarm investors from gaining control of farm production.

Historically, American agriculture has been based on the family farm. To a large degree, this is still the case. However, we are now witnessing major changes in the way we produce food. Since the late 1930's farm numbers have declined from 6.8 million to under 2.7 million. The size of the average farm has increased dramatically, and the Nation's largest farms are producing a growing share of our food supply.

Concern over these trends prompted former Agriculture Secretary Bob Bergland to hold a series of public forums around the Nation in late 1979 on the structure of American agriculture. If there was one common thread in these discussions, it was the widespread public support for the family farm. Americans recognize that it is the farm family which has made the United States the most efficient food producer in the world.

We cannot totally halt the trend toward fewer and larger farms; nor is it desirable to return to an era of small subsistence farms. What we can do, and what my proposal seeks to do, is to insure that corporate giants do not use their overwhelming economic power to control the production of food in this country.

During the past decade we have found that companies such as Dow Chemical and Boeing are in direct competition with family farmers. Many of the large conglomerates which produce farm machinery, fertilizer, seed, and livestock feed are moving directly into farming. Often these companies also process and market farm commodities. Therefore, they can provide important advantages to their farm subsidiaries. We cannot expect small independent farmers to compete with the economic muscle of these giant firms.

In discussing this issue, some would argue that the presence of business corporations and wealthy investors in farming is not a problem. They might point out that nonfarm corporations appear to have a small share of the agricultural market.

However, if we look beyond the general statistics, we find some disturbing trends. Last year, in a staff working paper, the Congressional Budget Office analyzed the most current available figures on corporate farming. The Budget Office revealed that there are 800 large corporations involved in farming and reported that most of these corporations have substantial nonfarm business activities. The CBO further looked at the largest one-third of these corporations and found that, on the average, each owned 20,000 acres of farmland and had $9.3 million in annual agricultural sales. Twenty-one of the companies reported receiving Government farm subsidy payments averaging $434,000 in 1974.

Also in 1980, farmers all over the country were alarmed to learn of the formation of the American Agricultural Investment Management Co., Inc. (AAIM), which has been organized to help pension funds invest in farmland. Under this plan, AAIM would purchase and operate farms for its clients.

It appears that the company has not yet made any moves toward actually buying farms. This is fortunate, because pension funds in this county command vast financial resources, and could afford to invest in huge tracts of our prime agricultural land. However, we must do more than merely hope that this does not occur. We must enact legislation on the national level to restrict such purchases.

Several State governments have acted to restrict investments by nonfarm corporations and aliens. These statutes vary greatly, but their existence indicates the level of concern among the States over this issue.

We must recognize three important points about corporate concentration in agriculture. First, it will not increase efficiency. U.S. Department of Agriculture studies have shown that a fully mechanized, single-family farm can achieve maximum efficiency per unit of production.

Second, soil and water conservation will decline under corporate stewardship. Business firms seek to maximize profits, and many important conservation practices reduce profits in the short term. Such practices are much more attractive to a family which has held a farm for generations and hopes to leave the land to its children and grandchildren.

Third, corporate control will change the very character of rural communities. Sociological studies show that a much higher quality of life exists in areas dominated by independent farm families than in those areas where nonfarm investors are prevalent.

We are slowly learning the painful lesson that economic concentration does not result in greater efficiency and productivity. We have seen the effects of such concentration in the profiteering of the oil companies and the total mismanagement of the steel and automobile industries. Enactment of the Family Farm Antitrust Act will mean that we will not have to relearn this same lesson in our most important industry—food production.

The Family Farm Antitrust Act would prohibit any person or corporation with nonfarming assets in excess of $5 million from engaging in farm production. It addresses not only the

ownership of productive farmland, but also the control of agricultural production through the leasing of farmland and through contracts which give the corporation control over the actual operation of farms. The Secretary of Agriculture is directed to periodically advise the Congress on the need to raise the nonfarm asset ceiling.

Upon passage of the Family Farm Antitrust Act, companies and individuals who are in violation would have 5 years to divest their holdings. The Farmers Home Administration would be required to acquire those holdings at fair market values if no other buyers could be found. This land must then be resold within 2 years.

A civil penalty would be applied to those who do not divest within the 5-year period and those who come into violation of the bill after its passage. The penalty equals $2,000 per year for every acre of farmland controlled in violation of the act, or twice the value of the commodity illegally produced, whichever is greater.

Agricultural cooperatives and nonprofit educational and research institutions would be exempt from the bill.

Mr. Speaker, I urge my colleagues to support the Family Farm Antitrust Act. I would like to submit the text of this legislation to the RECORD at this time:

H.R. 4250

A bill to amend the Clayton Act to prohibit certain anticompetitive practices in the agricultural industry

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Family Farm Antitrust Act of 1981".

FINDINGS; DECLARATION OF POLICY

SEC. 2. (a) The Congress finds that—

(1) in order to nurture the private enterprise system, it is desirable to protect consumers and small businesses, and to provide for the continued existence of the family farm, by protecting family farms against the monopolization of the agricultural industry,

(2) vertical integration within the agricultural industry by corporations engaged in the processing, distributing, and retail industries, and other conglomerate corporations, tends to create monopolies in the agricultural industry, to foster anticompetitive trade practices in that industry, and to produce unfair competition for family farms, and

(3) the anticompetitive forces at work within the agricultural industry, by threatening the existence of the family farm, are causing population shifts from rural areas to urban areas which rob the rural areas of productive population and increase the problems of already overcrowded urban areas.

(b) The Congress declares that it is the policy of the United States and the purpose of this Act to restore competition to the agricultural industry and to provide for the continued existence of the family farm.

AMENDMENTS TO CLAYTON ACT

SEC. 3. (a) The Clayton Act (15 U.S.C. 12 et seq.) is amended by inserting after section 8 the following new section:

"SEC. 8A. (a) Except as provided in subsection (b), no person engaged in commerce (or in an activity affecting commerce) in a business other than farming, whose unrelated assets exceed $5,000,000 shall—

"(1) engage, directly or indirectly, in farming or the production of agricultural commodities;

"(2) control, or attempt to control, the production of agricultural commodities through the ownership or leasing of land for use in the production of agricultural commodities; or

"(3) participate in the production of agricultural commodities by acquiring a controlling interest in the stock or other share capital, or the assets, of another person, or by any other means of acquisition or control of another person who is engaged in the production of agricultural commodities.

"(b) Subsection (a) shall not apply to a person who is—

"(1) an organization which is described in section 501(c)(3) of the Internal Revenue Code of 1954 and exempt from tax under section 501(a) of such code if the farming activities of that organization do not result in unrelated business income taxable under part III of subchapter F of chapter 1 of such Code; or

"(2)(A) an association that is described in the first section of the Act entitled 'An Act to authorize association of producers of agricultural products', approved February 18, 1922 (7 U.S.C. 291) commonly known as the Capper-Volstead Act, and that satisfies the requirements of the first section of such Act; or

"(B) a cooperative association, as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)) that satisfies the requirements of section 15(a) of such Act.

"(c)(1) Subject to paragraph (2), any activity engaged in, or property or other interest owned, during the 5-year period beginning on the effective date of this section by a person to whom subsection (a) applies, which would (but for the operation of this paragraph) be a violation of subsection (a) shall not be considered to be a violation of such subsection for such 5-year period if engaging in activity or owning such property or other interest is a continuation by such person of an activity engaged in, or property or other interest owned, by such person immediately before such effective date and if such activity or such property or other interest is not increased or expanded during such 5-year period.

"(2) Paragraph (1) shall not apply with respect to any activity engaged in, or any property or other interest owned, during such 5-year period by any such person if, immediately after the end of such 5-year period, such person continues to engage in such activity, or own any property or other interest, in violation of subsection (a).

"(d) It shall not be a violation of subsection (a) for any creditor, beneficiary, or intestate successor to acquire, pursuant to forfeiture, devise, or the laws of intestate succession, and to hold for not more than 2 years any property or other interest, which acquisition and holding would violate such subsection but for the operation of this subsection.

"(e) Any person who knowingly violates subsection (a) shall be subject to a civil penalty not to exceed the greater of—

"(1) twice the amount of the gross income from the production of agricultural commodities in the calendar year in which the violation occurs received by such person, directly or indirectly; or

"(2) the product of $2,000 and the number of acres used in the production of agricultural commodities in the calendar year in which such violation occurs.

Such penalty shall accrue to the United States and may be recovered in a civil action brought by the United States.

"(f) For purposes of this section—

"(1) the term 'agricultural commodities' means livestock, grain, cotton, tobacco, peanuts, other field crops, vegetables, fruits, tree nuts, milk, eggs, or hay or other forage;

"(2) the term 'grain' means wheat, corn, barley, oats, rye, rice, grain sorghum, and soybeans;

"(3) the term 'livestock' means cattle, swine, sheep, goats, horses, ponies, mules, donkeys, burros, hares, rabbits, fur-bearing animals, bees, chickens, turkeys, ducks, geese, or game birds;

"(4) the term 'production of agricultural commodities' means the use of land in a calendar year to produce agricultural commodities if in such calendar year the fair market value of the aggregate amount of such agricultural commodities disposed of for profit, by sale or otherwise, exeeds $1,000; and

"(5) the term 'unrelated assets' means assets which are not used for the purpose of engaging in the production of agricultural commodities.".

(b) Section 11 of the Clayton Act (15 U.S.C. 21) is amended by—

(1) by striking out "sections 2, 3, 7, and 8" in subsections (a) and (b) and inserting in lieu thereof "sections 2, 3, 7, 8, and 8A", and

(2) in subsection (b) by striking out "sections 7 and 8" and inserting in lieu thereof "sections 7, 8, and 8A".

ASSISTANCE OF THE SECRETARY OF AGRICULTURE

SEC. 4. (a) To the extent provided in advance in appropriation Acts, the Secretary of Agriculture, acting through the Farmers Home Administration, shall acquire at fair market value any property or other interest of which a person is requred to divest himself in order to comply with section 8A(a) of the Clayton Act, if such person establishes to the satisfaction of the Secretary that he is otherwise unable to sell or exchange such property or other interest for such purpose for the fair market value of such property or interest.

(b) The Secretary of Agriculture shall sell, at not less than fair market value, any property acquired by the Secretary under subsection (a) as soon as practicable, but in any event not later than 2 years after the date on which such property is so acquired under such subsection.

ENFORCEMENT ACTIVITIES OF THE SECRETARY OF AGRICULTURE

SEC. 5. The Secretary of Agriculture shall—

(1) acquire information to determine whether violations of section 8A(a) of the Clayton Act have occurred if such information is available to the Secretary under any other provision of law,

(2) exercise any general investigatory authority vested in the Secretary, to investigate alleged violations of such section reported to the Secretary by any person, and

(3) report to the Federal Trade Commission the results of such investigations.

RECOMMENDATIONS REGARDING LEGISLATION

SEC. 6. The Secretary of Agriculture shall from time to time submit to each House of the Congress any recommendation for adjustment of the monetary amount specified in section 8A(a) of the Clayton Act, as added by this Act, which the Secretary determines to be necessary, taking into account changes in economic conditions, to carry out effectively the purpose described in section 2(b) of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. There are authorized to be appropriated such sums as may be necessary to carry out sections 4, 5, and 6 of this Act.

□ 1850

POTENTIAL IMPACT OF CUTS ON CHILD HEALTH IN BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. DINGELL) is recognized for 10 minutes.

● Mr. DINGELL. Mr. Speaker, Members of Congress are being forced in budget reconciliation conferences all over the Hill this week to deal with hundreds of Federal policies and programs for which we are making thousands of separate budget decisions involving billions and billions of dollars.

I am seriously concerned that the administration has proposed drastic cuts in areas like health care with no realistic idea of their impact of human life and human health. For that reason, I am convening a joint hearing with the Subcommittee on Health and Environment and the Subcommittee on Oversight and Investigations next Monday to assess the potential impact of these cuts on child health and infant mortality so that conferees might be better able to weigh this impact during our conference discussions. Meanwhile, I commend to my House and Senate colleagues an excellent discussion of this subject by Larry S. Gage, general counsel of the National Association of Public Hospitals, which appeared in the July 21 Washington Star:

[From the Washington Star, July 21, 1981]

BUDGETS AND THE LATE BABY DOWNING

(By Larry S. Gage)

Sometimes it takes a tragic emotional incident like the death of a premature baby to open our eyes to the damage our budget-cutting mania may do to the national health.

Two pounds, six ounces, "baby boy Downing" died of respiratory failure in a rural Florida hospital earlier this month. He had been denied admission, because of recent budget cuts, to a public hospital neonatal intensive care unit just 40 miles away. In the scant few hours he lived, he taught us several valuable lessons about the remarkable past and uncertain future of our nation's health-care system.

Perhaps "baby boy Downing" would not have been saved in any event by his transfer to the neonatal unit, but he'd have had a chance. Prior to 1950, his chances would have been zero in any hospital. In even the best-equipped facility in 1965 his chances of survival would have been closer to 7 in 100 than the current estimate of 7 in ten. Recent technological advances in emergency transportation and patient care for these infants, as in many other areas of medicine, have been nothing short of astonishing.

AVAILABLE TO NEARLY ALL

Because this technology has been costly, it is perhaps equally astonishing that we have in many areas made it available to all citizens, regardless of their ability to pay. Despite some noticeable gaps, and notwithstanding our consistent failure to enact universal national health insurance, our patchwork crazy-quilt of federal, state, local, and private support has enabled us—at least until now—to provide this care in many parts of the country to almost everybody who needs it.

The federal government, through Medicaid, Medicare, and other health-care programs, is a major partner in this system—but by no means the only one. Many services are directly funded by state and local governments, through publicly owned hospitals, clinics, and other institutions. These subsidized public services are often far more extensive than people realize—ranging from state-wide emergency transportation systems, to shock-trauma centers, burn units, well-baby clinics, poison centers, renal dialysis, and neonatal intensive care. The neonatal unit in this case, for example, was in a county-owned institution: Tampa General Hospital.

Highly specialized services like neonatal units are expensive. Babies often must stay for a long time, at prohibitive cost. In a public institution, government must ultimately agree to pick up the tab.

In a state like Florida, where Medicaid eligibility is extremely restrictive, a public hospital must find other sources of income if such care is to be provided for those who cannot afford to pay. For the most part, such hospitals must rely on direct state or local operating subsidies, which often comprise a major portion of a hospital's budget.

When state or local governments cut back on their contribution, however, a public hospital may have no choice but to slash available services. And despite the special tragedy associated with the death of a child, it is only logical that costly, high-technology services which benefit only a few will be early budget-cutting targets.

Baby boy Downing was refused admission to Tampa General for precisely this reason. The state of Florida has cut direct subsidies for neonatal care nearly in half. The Tampa General governing board responded by insisting that the number of available beds be reduced from 33 to 18.

HOLES IN THE NET

At other public hospitals faced with other budget cuts the services reduced might be different—but the net result will be the same; people denied necessary medical attention, perhaps even in life threatening situations. In fact, cities and counties are going through similar fiscal crises all over the country, even before the current wave of federal budget cuts goes into effect.

This story is being heard in public hospitals—our system's institutional "safety nets"—all over the country, Denver, Los Angeles, St. Louis, Boston, Chicago, Atlanta, and New Orleans, are among those already struggling with funding shortfalls.

There is clear cause for alarm as Congress works to complete the budget reconciliation process. While neither house accepted the President's proposed 5 per cent cap on federal Medicaid increases, for example, the Senate adopted Medicaid cuts of considerably greater magnitude than the House, primarily by reducing the minimum federal share from 50 per cent to 40 per cent, and indexing federal Medicaid increases in later years to the GNP deflator.

ESCALATING COSTS

Reducing the minimum federal match will have a cruel impact on a small handful of states—California, Michigan, Illinois, and New Jersey will lose over a half a billion dollars among them in 1982 alone. Tying the rate of later increases to the GNP deflator will also result in severe disruptions for "safety net" institutions. For without major structural changes in health-care systems as a whole, overall health costs will continue to increase at a rate 3 to 5 per cent faster than general inflation—due in no small measure to new developments in areas such as neonatal care.

Fortunately, the House adopted a more moderate and equitable set of health-care budget cuts, especially for later years, and it is thus up to the Reconcilation Act conferees meeting this week to learn the final lesson from "baby boy Downing": That unless they act with utmost caution in fashioning a final list of health-care budget cuts from the House and Senate proposals, there will be many more like him to come.●

PRODUCTIVITY: THE 1981 JEC MIDYEAR REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 10 minutes.

● Mr. REUSS. Mr. Speaker, I introduce today the Joint Economic Committee's unanimous midyear report on "Productivity." The 20 members of the committee have been carefully studying and reviewing the critical economic issues of America's declining productivity. This report represents the result of the committee's latest work and their agreement on the importance of reversing the productivity slump if we are to restore America's economic health. The report includes the committee members' consensus on recommendations to reverse America's declining productivity. The committee's bipartisan report is being introduced in the Senate today by its vice chairman, Senator ROGER JEPSEN.

Here are the major points of the Joint Economic Committee's midyear report. The committee hopes that Members will take note of the magnitude of the productivity decline, its effect on the economy, and the importance of reversing the slump. We hope that Congress will be moved to action on the committee's recommendations for reversing the negative trend in productivity.

During the three decades following the end of World War II, the American economy was the strongest and most productive in the world. Since 1973, however, our productivity growth has deteriorated sharply. Between 1950 and 1965, the level of pro-

ductivity grew at an annual rate of 3 percent. For the period from 1967 to 1973, the annual rate was 2.4 percent. Between 1973 and 1980, the country experienced a dramatic drop in productivity as the rate of growth fell to 0.6 percent annually.

This fall off in the growth of U.S. labor productivity has become a major source of concern for Congress and the American public. And for excellent reasons: declining productivity has far-reaching effects on the Nation's economic health; declining productivity leads to higher inflation, higher unemployment, and a weakening of the U.S. trade position. In addition, the absence of productivity gains prevents any general improvement in the standard of living of the American people. As the Joint Economic Committee has concluded in an earlier study, "Sluggish productivity growth is the most important factor contributing to our economic malaise."

Higher productivity is vital if America is to restore its image and position of strength in the world. Higher productivity is vital if America is to stop its inflationary spiral. Higher productivity is vital if America is to increase employment levels. And, higher productivity is vital if America is to maintain and increase the quality of life of its people. Without productivity gains, it will be difficult, if not impossible, to achieve the healthy and strong economy we are all working for.

Congress has recognized the importance of this issue. The effort to reverse the productivity slump now takes center stage in virtually all congressional economic policy discussions. Efforts to improve the level of productivity must remain at the forefront of not only the work of Congress, but also in the actions of business, labor, and the American people in general. The Joint Economic Committee's midyear report proposes meaningful recommendations for all parties which have an important stake in reversing the productivity decline.

America still has the highest level of productivity in the world. Discussions about America's declining productivity refer to a decline in the rate of productivity growth, and not total productivity. When one looks at the entire U.S. private economy compared to our competitors, American industry and workers rank as the most efficient and productive in the world. However, if current trends continue, it will not be very long before many of the other industrialized countries achieve productivity levels that meet or exceed the productivity of the American worker.

Although productivity growth has long been recognized as one of the most important determinants of national well-being, it has not until recently been a major source of concern for Congress or the American public. The members of the Joint Economic Committee are encouraged by the growing interest in this issue which the committee first began studying in 1957 with a study on productivity, prices, and incomes. The committee continued to review the productivity issue periodically throughout the 1960's and 1970's. Over the past few years, especially, the Joint Economic Committee has been actively studying and reporting on the extent, causes, and effect of the productivity decline.

The Joint Economic Committee's midyear report calls attention, once again, to this most important issue. The report begins with a summary of America's productivity record and a discussion of the causes of the decline. In the main portion of the report, the committee presents their unanimously approved recommendations for improving America's productivity. The committee's eight recommendations, which are primarily microeconomic policies, involve both Government policies and private-sector activities that could help restore the American economy's productivity growth.

The specific recommendations for action are directed at three areas:

First, Congress and the administration should pursue economic policies aimed toward restoring our economy to healthy, long-run growth, as well as toward lower inflation and unemployment.

Second, Government and business should work together toward increasing the stock of capital available to America's workers. In both the public and private sectors, we should pursue policies to increase investment in both real and human capital, reduce waste and inefficiency, and improve the Nation's infrastructure.

Third, corporate managers should retune their thinking to look beyond short-term profits. Greater emphasis should be placed on the question of how today's business decisions influence productivity and affect American industry's long-run ability to survive and compete in the world economy.

The Joint Economic Committee's first recommendation calls for Congress and the administration to pursue policies which will promote economic growth, reduce inflation, and increase employment. High growth will enable industry to utilize their unused capacity, thereby increasing the output per unit of fixed costs. A reduced rate of inflation will improve productivity by increasing personal savings and by providing a stable and less risky economic environment conducive to business investment. High employment improves productivity by making it easy for workers to adjust to technological change by finding new jobs at comparable or better pay.

The second recommendation proposes that the tax system be targeted to encourage productivity improvement in the private sector. Specifically, the committee favors liberalized depreciation for capital-intensive industries in order to stimulate fixed investment, tax incentives for research and development activities, and improvement and increased use of the targeted jobs tax credit for labor-intensive industries. Adoption of this recommendation will help to resolve one of the most important factors in the productivity slowdown, the inadequate level of capital investment during the 1970's. At the same time, the committee recognizes the need to give substantially the same benefit to new spending for research and development, and job training.

Creating conditions for lower interest rates is the focus of the third recommendation. The Democratic and Republican members of the Joint Economic Committee believe that lower interest rates will stimulate investment in business, agriculture, housing, and research, with the result being an expansion in productivity and competition.

The fourth recommendation calls for improved investment in vital public and private infrastructure. The proper macroeconomic policies or a well-designed capital depreciation program will not have a maximum effect without adequate highways, ports, railroads, bridges, utilities, and the like. The steady shift in population from the Northeast and Midwest to the South and West, coupled with declining tax bases in some parts of the country, has placed increasing, unmet demands on the Nation's infrastructure. While public works investment in constant dollars by the Federal Government has remained near its 1968 peak, such investment by State and local governments declined by 40 percent and 25 percent, respectively. The committee believes that some revision or consolidation of existing Federal categorical grant programs may stimulate a more effective use of public funds and diminish the risks of waste and fraud occurring in these programs.

In the fifth recommendation, the committee advocates Government efforts to reduce the burden of paperwork and anticompetitive economic regulation. Efforts must also be made to insure that social regulation meets its objectives in cost effective ways. It would be difficult to quantify the effect of Government regulation on productivity, but there can be little doubt that the rapid growth of Federal regulatory programs during the past 15 years has hurt. A program to improve the productivity of the American economy must include measures to improve regulatory cost-effectiveness, and reduce the unnecessary costs of redundant, ineffective, wasteful, and conflicting regulations and paperwork.

Regulatory cost-effectiveness must be improved, but not at the expense of tampering or rescinding the significant contributions some of the regulations have made toward the overall well-being of consumers and workers.

The sixth recommendation focuses attention on the need to improve the productivity of the Federal Government. Just as America's businesses use scarce resources to produce privately consumed goods and services, the Government also absorbs scarce resources in order to produce public goods and services. Improving the Federal Government's productivity would free up resources for use in the private sector or to permit effective achievement of Governmet objectives without expanding the budget or Federal employment.

The final two recommendations focus on business and labor's responsibility in reversing the productivity decline. The seventh recommendation encourages business to develop a new emphasis on longrun competitiveness in product develpment, production, engineering, distribution, and marketing; rather than on short-term financial performance. A key component of increasing long-term competitiveness is increasing productivity. Therefore, the members of the Joint Economic Committee strongly urge each and every American business firm to develop its own productivity improvement program.

The final recommendation encourages labor and management to cooperate in improving longrun productivity and competitiveness. Cooperative activities by labor and management have already demonstrated their effectiveness in increasing productivity. The committee heartily supports continued labor/management cooperative activities.

The committee's midyear report is valuable, not only because of the recommendations which outline actions needed to help improve productivity, but also because it recognizes the role and responsibility of all the actors who must participate if America is to reverse the productivity slowdown. The claim has been made that Government is the sole or primary cause of the problem. The further claim is made that governmental changes alone will reverse the productivity slowdown. These claims are simply false. Responsibility for reversing the productivity decline rests with every individual and segment in our Nation.

There is no doubt that Government must play an important role in reversing the productivity decline. The committee's recommendations clearly outline Government's responsibility. The Federal Government must pursue policies which will reduce inflation, lower interest rates, and provide a more stable and less risky business environment. Congress and the administration must also develop a tax system which will encourage, rather than discourage, productivity growth. And, all levels and branches of Government must work toward reducing unnecessary and anticompetitive paperwork and regulation.

In addition to Government, however, business, labor, and the American people in general must share in the responsibility for improving productivity. There is much that the private sector can do on its own that would significantly enhance productivity. I am pleased to report that business and labor have already undertaken successful efforts to improve productivity.

The hearings which the Joint Economic Committee has held during the past few months have introduced the committee members to what U.S. business and labor can and are doing to improve productivity. Industry and labor leaders have examined Japanese methods, as well as tapped their own resources, in developing programs to improve productivity. Industry is placing greater emphasis on quality and people-oriented management. They have recognized that productivity, quality products, and quality of work life are inseparable. Labor has demonstrated their appreciation of the private sector's role in improving productivity through their willingness to join, as well as lead, industry efforts to promote productivity.

Here are some examples of business and labor's efforts to improve productivity.

Business and labor have begun to improve productivity on their own by making better use of our country's most valuable asset—our people. These efforts revolve around an understanding of and appreciation for the new value system of today's worker. In his testimony before the committee, Dr. James J. Renier, from Honeywell, described the new value systems as—

> One that values persons over institutions, individualism over conformity, participation over authority, quality over quantity, diversity over uniformity, and experience over things.

This new value system reflects the great improvements in the standard of living for America's workers, and the fact that workers' concerns extend beyond simply earning enough money to meet life's necessities. Today's workers want assurance that they are making a real difference, that their best talents are being effectively used, and that they are recognized as an individual and not just another input in the production process.

The best example of business and labor's recognition of the values and abilities of the American worker is the increasing number of companies establishing quality control circles. In these quality control circles, representatives from management and labor meet regularly to discuss production problems and to present and review proposals for improving the production process workers' knowledge. Companies across the board are reporting that these cooperative labor/management efforts result in productivity gains, improved labor/management relations, and better work environments.

The Westinghouse Electric Corp. currently conducts 700 quality circles at 150 locations, involving 10,000 people. The Honeywell Corp. is proud of the fact that, at one facility, 10 teams improved productivity by 46 percent over 2 years. At another Honeywell plant, 28 teams reduced assembly time in 1 year equal to savings of $625,724. Quality circles are also being established in the automobile industry. Labor and management have worked together at General Motors to establish over 50 quality circles. The result has been improved product quality, reduced absenteeism, and a more satisfied work force.

Industries are also instituting large-scale productivity programs that include not only quality circles, but also investment and engineering programs. Many of these programs are aimed at improving product quality and developing and implementing advanced production methods. Robert M. Lynas of TRW told the committee that: "The challenge of the 1980's for U.S. industry is to increase the emphasis on quality management." The success of the Japanese can be attributed, in large part, to their insistence on high-quality products and production processes with low reject rates. Successful efforts in this country include a large-scale program at Beatrice Foods which resulted in a $7 million savings in 1 year ending February 28, 1981. Another example is Westinghouse, which has created a multimillion-dollar productivity "seed fund." About $30 million has already been used on more that 120 projects, including advanced robotics systems.

Private sector activities to improve productivity are not limited to America's large corporations. Small companies are one of the greatest contributors to increased productivity. For example, the emphasis which the Millipore Corp. of Bedford, Mass., places on research and development, and long-term horizons has resulted in productivity improvements and growth. The willingness of America's small and high-growth industries to take additional risks in the marketplace will help pull America out of its productivity decline.

Corporations of all sizes are beginning to respond to the values and abilities of the American workers. With the continued cooperation of labor, the private sector will continue to be a vital part of our efforts to reverse our painful productivity slowdown. The result of private sector pro-

ductivity activities has and will be higher productivity.

Implementation of the recommendations of the Joint Ecomomic Committee's report will require the cooperative efforts of business, labor, and Government. The committee believes that this report sets the tone and direction for such cooperation.

INTRODUCTION OF THE SMALL BUSINESS INNOVATION RESEARCH ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, I am introducing the Small Business Innovation Research Act of 1981 which amends the Small Business Act in a way which will significantly strengthen the role of the Nation's smaller, technology-based firms in federally funded research and development projects. This bill, which is identical to a bipartisan measure introduced in the Senate, moves toward a solution of a very real problem facing the United States—the low and falling rate of productivity and innovation.

Within the last few years, productivity levels of U.S. industry have dropped below those of all leading industrial nations. While the annual growth rate of major trade competitors such as Japan and Germany has been on a sharp upturn.

During this same period, innovation rates have also decreased. New technologies are not being developed to keep pace with the needs of U.S. markets. I submit that one answer to this highly complex issue lies in utilizing our limited monetary resources in a way that insures maximum benefits through a comprehensive and coordinated effort aimed at improving our methods of producing innovative technology.

The Small Business Innovation Research Act of 1981 will provide a powerful and creative method of properly channeling the impact of the Federal Government in the area of research and development. Approximately 60 percent of all research and development in this country is funded by the Federal Government. This amounted to $31.7 billion in 1980. With enactment of this legislation productivity will be increased through Federal encouragement of small businesses to engage in risk taking, job creating enterprises.

As the delegates of the White House Conference on Small Business perceived, there is ample reason to insure that small business receives an equitable share of Federal research and development dollars in light of its demonstrated ability to produce low-cost technological development. As documented in a recent study by OMB it was found that from 1953 to 1973 almost half of all major U.S. innovations were developed within firms with less than 1,000 employees. Additionally, other studies have shown that traditionally, small firms have produced innovations and technological breakthroughs at a far greater rate than larger, more heavily structured businesses.

The National Science Foundation, whose highly successful small business innovative research program was the model for this proposal, found that small businesses are much more cost effective than larger companies engaging in R. & D. research.

Let us not forget that small businesses are not only the innovators but the job creators as well. As a 1979 MIT study shows, firms with 250 or less employees produced 90 percent of the 6.8 million jobs created from 1965 to 1976.

The Federal Government's failure to recognize the innovative technological potential of small business is all too clear. Over the past 4 years, the share of Federal research and development funds received by firms with fewer than 500 employees remained at a mere 3 to 4 percent.

The time has come for Congress to recognize its responsibility to foster the growth of this potential by encouraging small businesses to create new jobs and tax revenues through the generation of new technologies.

The engine for this growth will be a requirement that agencies having research and development budgets over $100 million must establish small business innovative research—SBIR—programs designed to enable small firms to develop the types of new products and processes needed by the particular agency. This bill will require that a goal of 1 percent of each agencies' annual R. & D. budget must be allocated to small business.

We even have an existing mechanism in place to facilitate this goal setting process within an agency. Public law 95-507 already provides a system whereby an agency undergoes an annual small business goal-setting process. Utilizing 95-507 to implement the requirements of this law for research and development will avoid unnecessary disruptions of the Federal procurement system.

As it stands, small innovative companies are held back due to an insufficient capital base. High-technology firms are rich in innovative potential and call for extensive financing. However, viewed as they are as high-risk ventures, investors are hesitant in financing them.

This bill would attack this capital investment trap that innovative small businesses find themselves caught in.

The SBIR provides for three-phased funding of small, high technology firms. Initially, agencies invite small businesses to submit R. & D. proposals, of which the most promising will be funded up to $50,000 for testing of feasibility of the innovation. If this initial research proves successful additional funding is possible—where private capital is not within reach—ranging from $100,000 to $500,000. Finally, the actual production and marketing will be financed by private capital.

In order to implement the SBIR program, each Federal agency is called to set aside 1 percent of its total annual R. & D. budget for small business. A 3-year phasein period calling initially for two-tenths of 1 percent is provided in order to allow agencies adequate preparation time for proper construction of the SBIR program. The SBA would be responsible for coordinating the release of program solicitations, monitoring the awarding of grants, and reporting to the Small Business Committee on the implementation of the program.

If enacted, the Small Business Research and Development Act of 1981 will assist the Federal agencies in meeting their R. & D. objectives, while developing the untapped potential of small, high-technology companies. New products, more efficient processes and more jobs would be created as a result of the programs. No new Federal moneys are required; simply the transference of a minute portion of already existing funds to the leading innovators in our economy: small businesses.

The benefits accruing to our Nation's spirit of entrepreneurship and the stimulus to economic diversity arising from such a carefully limited Federal effort may very well play a significant role in revitalizing our economy over the decades ahead.●

REQUEST FOR A RULE ON H.R. 4242, THE TAX INCENTIVE ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI), is recognized for 5 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, today the Committee on Ways and Means favorably ordered reported to the House, H.R. 4242, a bill to provide significant tax relief to individuals and to restructure the tax treatment of business income to encourage increased savings, investment, and productivity growth.

I take this occasion to advise my colleagues that the Committee on Ways and Means has specifically instructed me to request a modified closed rule. We intend to file the committee report tomorrow, July 24, 1981, and will request to be heard before the Committee on Rules as expeditiously as possible.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. WHITE) is recognized for 5 minutes.

● Mr. WHITE. Mr. Speaker, I was under the impression that I had recorded my vote in favor of the Courter substitute to H.R. 3519 that directs the President to submit recommendations to the Congress to improve efficiency and management, and eliminate waste, fraud, abuse, and mismanagement in the Defense Department. As the RECORD of July 16 does not reflect my having voted, I would like to make it clear that I agree with the intent of that amendment (rollcall No. 136).●

NATIONAL FLOOD INSURANCE PREMIUMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON. Mr. Speaker, I would like to take this opportunity to express my displeasure with the recent national flood insurance premium incease.

A number of families in my district have received NFI premium increases ranging from 300 percent to greater than 800 percent. I find it distressing that a Government agency, in particular, the Federal Emergency Management Agency, would contribute so heavily to the inflationary fire. At the very least, such an increase in premiums would be more reasonable if that rate hike were spread over a longer period of time at a more acceptable rate increase.

I appreciate FEMA's attempt to make the national flood insurance program fiscally sound. But, it stands to reason that a 300-plus-percent increase is unjustified and a poor decision in today's economic climate.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. GAYDOS (at the request of Mr. WRIGHT), after 11:30 a.m. on Wednesday, July 22, and for today on account of personal reasons.

Mr. HENDON (at the request of Mr. MICHEL), for July 24, 1981, on account of official business.

Mr. GILMAN (at the request of Mr. MICHEL), after 1 p.m. today to attend a funeral.

Mr. MARTIN of Illinois (at the request of Mr. MICHEL), for July 24, 1981, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DAVIS) to revise and extend their remarks and include extraneous material:)

Mr. DOUGHERTY, for 60 minutes on, July 29.

(The following Members (at the request of Mr. FAZIO) to revise and extend their remarks and include extraneous material:)

Mr. ADDABBO, for 5 minutes, today.
Mr. HEFTEL, for 5 minutes, today.
Mr. UDALL, for 10 minutes, today.
Mr. DANIELSON, for 60 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. MAZZOLI, for 15 minutes, today.
Mr. KASTENMEIER, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. DINGELL, for 10 minutes, today.
Mr. REUSS, for 10 minutes, today.
Mr. LAFALCE, for 10 minutes, today.
Mr. ROSTENKOWSKI, for 5 minutes, today.
Mr. WHITE, for 5 minutes, today.
Mr. NELSON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LIVINGSTON, to revise and extend his remarks on House Joint Resolution 308 at the conclusion of the debate.

Mrs. BOGGS, to revise and extend her remarks on House Joint Resolution 308 at the conclusion of the debate.

Mr. VENTO, on the Weaver-Conte amendment, in the Committee of the Whole today.

Mr. BEDELL, to revise and extend his remarks, during general debate on energy and water in the House today.

Mr. LUJAN, immediately preceding debate on title III of H.R. 4144 in the Committee of the Whole.

Mr. DASCHLE, during the Committee of the Whole today.

Mr. BEREUTER, during general debate on H.R. 4144 in the Committee of the Whole today.

(The following Members (at the request of Mr. DAVIS) and to include extraneous matter:)

Ms. FIEDLER in two instances.
Mr. FISH.
Mr. NELLIGAN.
Mr. SOLOMON.
Mr. ROTH.
Mr. ASHBROOK in two instances.
Mr. DERWINSKI in two instances.
Mr. BROYHILL.
Mr. LEACH of Iowa.
Mrs. HOLT.
Mr. LUJAN.
Mr. EMERY.
Mr. DENARDIS.
Mr. PORTER.
Mr. WOLF.
Mr. COATS.
Mr. CLAUSEN in two instances.
Mr. PHILIP M. CRANE.
Mr. ROUSSELOT in two instances.

(The following Members (at the request of Mr. FAZIO) and to include extraneous matter:)

Mr. FORD of Michigan.
Mr. YATRON.
Mr. UDALL.
Mr. PEASE.
Mr. OTTINGER.
Mr. SHARP.
Mr. HUBBARD.
Mr. FOWLER.
Mr. BEDELL.
Mr. HEFNER.
Mr. HEFTEL.
Mr. LELAND in two instances.
Mr. MAZZOLI.
Mr. RICHMOND.
Mr. RODINO
Mr. SKELTON.
Mr. HAWKINS.
Mr. SYNAR.
Mr. CONYERS in two instances.
Mr. SOLARZ in two instances.
Mr. DICKS.
Mr. DYSON.
Mrs. BOGGS.

ADJOURNMENT

Mr. DANIELSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 50 minutes p.m.), the House adjourned until tomorrow, Friday, July 24, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1868. A communication from the President of the United States, transmitting a report on progress toward conclusion of a negotiated solution of the Cyprus problem, pursuant to section 620C(c) of the Foreign Assistance Act of 1961, as amended (H. Doc. No. 97-78); to the Committee on Foreign Affairs and ordered to be printed.

1869. A letter from the Secretary of Agriculture, transmitting notice of a delay until July 31 in the submission of a report on the study of the potential for expansion of U.S. agricultural exports and the use of agricultural exports in obtaining natural resources or other commodities and products needed by the United States, required by section 210(a) of Public Law 96-494; to the Committee on Agriculture.

1870. A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting a list of contract award dates for the period July 15 to October 15, 1981, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

1871. A letter from the Director, Defense Security Assistant Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment to the United Kingdom (Transmittal No. 81-83), pursuant to section

813 of Public Law 94-106; to the Committee on Armed Services.

1872. A letter from the Assistant Secretary of the Navy (shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance data entry/keypunch function at the Navy Regional Finance Center, Washington, D.C.; to the Committee on Armed Services.

1873. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the guard services function at the Aviation Supply Office, Philadelphia, Pa., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1874. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the custodial services function at the Fleet Training Center, Mayport, Fla., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1875. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-58, "Vital Records Act of 1981," and report, pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1876. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-64, "Clothing of Two Public Alleys in Square 1818," and report, pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1877. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-62, "District of Columbia Statehood Constitutional Convention Amendment Act of 1981," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1878. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-63, "Traffic Act Amendments Act of 1981," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1879. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-67, "District of Columbia Depository Disclosures Amendments Act of 1981," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1880. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-66, "Good Faith Donor and Donee Act of 1981," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1881. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-65, "To authorize the sale of library-related items by the District of Columbia Public Library," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1882. A letter from the Secretary of Education, transmitting proposed final regulations to govern the legal profession training program, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1883. A letter from the Secretary of Education, transmitting proposed final regulations to implement the institutional grants for graduate and professional study program, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1884. A letter from the Secretary of Education, transmitting proposed final regulations to govern determination of a student's cost of attendance at a postsecondary Institution under the Pell grant program, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1885. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment to the United Kingdom (Transmittal No. 81-83), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. NATCHER: Committee on Appropriations. House Joint Resolution 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981 (Rept. No. 97-92). Referred to the Committee of the Whole House on the State of the Union.

Mr. GINN: Committee on Appropriations. H.R. 4241. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-193). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. Report pursuant to section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 97-194). Referred to the Committee of the Whole House on the State of the Union.

Mr. BINGHAM: Committee on Foreign Affairs. H.R. 3136. A bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation, with an amendment (Rept. No. 97-195). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GINN:

H.R. 4241. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

By Mr. ROSTENKOWSKI:

H.R. 4242. A bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and for other purposes; to the Committee on Ways and Means.

By Mr. BROYHILL:

H.R. 4243. A bill to establish a national tourism policy and provide for its effective implementation; to the Committee on Energy and Commerce.

By Mr. CHAPPELL (for himself and Mr. HUTTO):

H.R. 4244. A bill to continue the minimum monthly insurance benefits under title II of the Social Security Act for individuals currently entitled to such benefits; to the Committee on Ways and Means.

By Mr. COTTER:

H.R. 4245. A bill to amend the Gun Control Act of 1968 to provide for separate offense and consecutive sentencing in felonies involving the use of a firearm; to the Committee on the Judiciary.

H.R. 4246. A bill to require a speedy trial for criminal defendants charged with use of a firearm in the commission of a Federal crime; to the Committee on the Judiciary.

By Mr. JAMES K. COYNE:

H.R. 4247. A bill to amend title 5, United States Code, to allow paid leave for Federal and District of Columbia Government employees serving in volunteer fire departments or rescue squads in emergency circumstances; to the Committee on Post Office and Civil Service.

H.R. 4248. A bill to amend the Internal Revenue Code of 1954 to clarify the tax exemption for interest on obligations of volunteer fire, ambulance, and rescue departments: to the Committee on Ways and Means.

By Mr. EMERY:

H.R. 4249. A bill to amend the Internal Revenue Code of 1954 to allow the residential energy credit for certain wood-burning stoves; to the Committee on Ways and Means.

By Mr. KASTENMEIR (for himself, Mr. BONIOR of Michigan, Mr. FORSYTHE, Mr. KOGOVSEK, Mr. PANETTA, Mr. PRICE, Mr. STUDDS, and Mr. WEAVER):

H.R. 4250. A bill to amend the Clayton Act to prohibit certain anticompetitive practices in the agricultural industry; to the Committee on the Judiciary.

By Mr. OTTINGER:

H.R. 4251. A bill to provide for the modification of the navigation project at Mamaroneck Harbor, N.Y., relating to the Federal share of certain costs of disposing of dredged material; to the Committee on Public Works and Transportation.

By Mr. SABO:

H.R. 4252. A bill to amend the Railroad Retirement Act of 1974 to make annuities payable before the first day of the month when the first day is on a weekend or holiday; to the Committee on Energy and Commerce.

By Mr. GUARINI (for himself, Mr. COURTER, Mr. DWYER, Mrs. FENWICK, Mr. FLORIO, Mr. FORSYTHE, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. MINISH, Mr. RINALDO, Mr. RODINO, Mr. ROE, Mrs. ROUKEMA, and Mr. SMITH of New Jersey):

H.R. 4253. A bill to modify the navigation project for Anchorage Channel, New York Harbor; to the Committee on Public Works and Transportation.

By Mr. LAFALCE:

H.R. 4254. A bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy; to the Committee on Small Business.

By Mr. UDALL (for himself, Mr. LUJAN, Mr. DINGELL, and Mr. BROYHILL):

H.R. 4255. A bill to authorize appropriations to the Nuclear Regulatory Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. GEJDENSON (for himself and Mr. DOWNEY)

H. Con. Res. 161. Concurrent resolution disapproving the proposed transfer by the Republic of Korea to Uruguay of certain items produced using technical data of U.S. origin; to the Committee on Foreign Affairs.

By Mr. RAHALL:

H. Con. Res. 162. Concurrent resolution expressing the sense of Congress that acts of violence and aggression in Israel, Iraq, and Lebanon aimed at innocent citizens be condemned; that the administration be commended for its decision to suspend the shipment of military planes to Israel, and calls for further temporary suspension of arms to Middle East combatants; that Congress be involved in the development of a comprehensive U.S. policy leading to peace in the Middle East region; and that Congress urges all parties to the violence to halt all aggressive acts; to the Committee on Foreign Affairs.

By Mr. DIXON (for himself Mr. WAXMAN, Ms. FIEDLER, Mr. DYMALLY, Mr. LEWIS, Mr. BEILENSON, Mr. HAWKINS, Mr. MOORHEAD, and Mr. PEPPER):

H. Res. 193 Resolution concerning the safety and freedom of Soviet citizen Yuri Badzyo; to the Committee on Foreign Affairs.

By Mr. HAWKINS:

H. Res. 194. Resolution expressing the concern of the House of Representatives with respect to the loss of jobs in the United States due to expanded foreign production, and sale in the United States of goods, and for other purposes; to the Committee on Education and Labor.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. JOHN L. BURTON:

H.R. 4256. A bill for the relief of Reynaldo B. Nidoy and Bella Anderson Nidoy; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 52: Mr. RAILSBACK and Mr. MARKS.

H.R. 247: Mr. MOLLOHAN and Mrs. SCHROEDER.

H.R. 352: Mrs. MARTIN of Illinois.

H.R. 374: Mr. LANTOS, Mr. HOYER, and Mrs. COLLINS of Illinois.

H.R. 375: Mr. RANGEL, Mr. BIAGGI, and Mr. WHITLEY.

H.R. 560: Mr. RICHMOND.

H.R. 768: Mr. MCEWEN, Mr. ERDAHL, Ms. FIEDLER, Mr. ANTHONY, Mrs. BYRON, Mr. FLORIO, Mr. DOWNEY, and Mr. ERLENBORN.

H.R. 907: Mr. WEAVER.

H.R. 2034: Mr. CHAPPELL, Mr. LELAND, and Mr. SMITH of New Jersey.

H.R. 2052: Mr. EDGAR.

H.R. 2208: Mr. HUNTER.

H.R. 2561: Mr. DAUB, Mr. WEBER of Minnesota, Mr. WOLPE, Mr. BEREUTER, Mr. LANTOS, Mr. HAMILTON, and Mr. NICHOLS.

H.R. 2773: Mr. FRANK and Mr. WATKINS.

H.R. 3136: Mr. FINDLEY and Mrs. SNOWE.

H.R. 3186: Mr. GRAMM and Mr. LOEFFLER.

H.R. 3456: Mr. SHELBY, Mr. DORGAN of North Dakota, Mr. SAWYER, Mr. MADIGAN, Mr. SPENCE, Mr. VENTO, Mr. FAZIO, Mr. RAILSBACK, Mr. HUNTER, and Mr. RITTER.

H.R. 3496: Mr. ALEXANDER, Mr. GARCIA, Mr. CHAPPIE, Mr. WILLIAM J. COYNE, Mr. GORE, Mr. HANSEN of Idaho, Mr. HAWKINS, Mr. HOYER, Mr. JONES of Tennessee, Mr. KOGOVSEK, Mr. LELAND, Mr. MARLENEE, Mr. RATCHFORD, Mr. RUDD, Mr. SAWYER, Mr. SMITH of Iowa, Mr. SKEEN, Mr. SNYDER, Mr. WIRTH, Mr. WOLPE, and Mr. YATES.

H.R. 3575: Mr. ANDERSON, Mr. BAILEY of Missouri, Mr. DE LA GARZA, Mr. EMERSON, Mr. FROST, Mr. MURTHA, Mr. MYERS, Mr. ROBERTS of Kansas, Mr. ROTH, Mr. SYNAR, Mr. WEBER of Ohio, and Mr. WHITTAKER.

H.R. 3666: Mr. LEBOUTILLIER.

H.R. 3708: Mr. MCCLORY, Mr. GOLDWATER, Mr. STUMP, Mr. JONES of North Carolina, Mr. KINDNESS, Mr. HANSEN of Idaho, Mr. FRENZEL, Mr. WINN, Mr. TRIBLE, Mr. BARNARD, and Mr. WAMPLER.

H.R. 3710: Mr. BEDELL.

H.R. 3824: Mr. MAZZOLI, Mr. CLAY, Mr. HYDE, Mr. JEFFRIES, Mr. HERTEL, and Mr. WILLIAMS of Ohio.

H.R. 3904: Mr. MURPHY.

H.R. 3929: Mr. BURGENER, Mr. JAMES K. COYNE, Mr. FORSYTHE, Mr. LAGOMARSINO, Mr. LUNGREN, Mr. SMITH of New Jersey, Mr. STANTON of Ohio, and Mr. WOLF.

H.R. 3949: Mr. FROST.

H.R. 4002: Mr. WEAVER and Mr. PANETTA.

H.R. 4015: Mr. RALPH M. HALL, Mr. MOTTL, Mr. WYDEN, Mr. SABO, Mr. HALL of Ohio, Mr. HERTEL, Mr. VENTO, Mr. MURPHY, Mr. DAUB, and Mr. CORRADA.

H.R. 4155: Mr. BROYHILL.

H.J. Res. 50: Mr. MCDONALD.

H.J. Res. 168: Mr. PICKLE, Mr. ST GERMAIN, Mr. WHITLEY, Mr. PORTER, Mr. PERKINS, Mr. GORE, Mr. FORD of Tennessee, Mr. EVANS of Delaware, Mr. EVANS of Iowa, Mr. PRITCHARD, Mr. JAMES K. COYNE, Mr. BROWN of Ohio, Mr. DORGAN of North Dakota, Mr. HATCHER, Mr. JENKINS, Mr. NAPIER, Mr. BINGHAM, Mr. BARNARD, Mr. EMERSON, Mr. SKEEN, Mr. LUJAN, Mr. BRINKLEY, Mr. FOGLIETTA, Mr. SMITH of Alabama, Mr. UDALL, Mr. MCCLORY, and Mr. AUCOIN.

H.J. Res. 214: Mr. ARCHER, Mr. ALEXANDER, Mr. ANDREWS, Mr. BADHAM, Mr. BEVILL, Mr. BOLAND, Mr. BOWEN, Mr. BREAUX, Mrs. BYRON, Mr. CARNEY, Mrs. CHISHOLM, Mr. COATS, Mr. DE LA GARZA, Mr. DICKINSON, Mr. DOUGHERTY, Mr. EMERY, Mr. FARY, Mrs. FENWICK, Mr. FISH, Mr. FORD of Tennessee, Mr. FORD of Michigan, Mr. GINN, Mr. GRADISON, Mr. HOWARD, Mr. JEFFRIES, Mr. KEMP, Mr. LATTA, Mr. LUKEN, Mr. LEACH of Iowa, Mr. LENT, Mr. MOORE, Mr. MOTTL, Mr. MURPHY, Mr. PICKLE, Mr. SCHEUER, Mr. SMITH of Iowa, Mr. SNYDER, Mr. SPENCE, Mr. STANTON of Ohio, Mr. STENHOLM, Mr. WALGREN, Mr. WHITTAKER, Mr. WHITTEN, and Mr. WON PAT.

H.J. Res. 263: Mr. AKAKA, Mr. ANNUNZIO, Mr. ARCHER, Mr. ASHBROOK, Mr. BAFALIS, Mr. BAILEY of Pennsylvania, Mr. BAILEY of Missouri, Mr. BARNES, Mr. BEARD, Mr. BEREUTER, Mr. BETHUNE, Mr. BLILEY, Mrs. BOGGS, Mr. BONIOR of Michigan, Mrs. BOUQUARD, Mr. BREAUX, Mr. BRINKLEY, Mr. BROOKS, Mr. BROOMFIELD, Mr. BROWN of California, Mr. BROWN of Colorado, Mr. BURGENER, Mr. JOHN L. BURTON, Mr. PHILLIP BURTON, Mr. CARNEY, Mr. CHAPPELL, Mr. CHENEY, Mrs. CHISHOLM, Mr. CLAUSEN, Mr. CLAY, Mr. COATS, Mr. COELHO, Mr. COLLINS of Texas, Mr. CONTE, Mr. CORCORAN, Mr. COUGHLIN, Mr. JAMES K. COYNE, Mr. CRAIG, Mr. D'AMOURS, Mr. DAN DANIEL, Mr. DANNEMEYER, and Mr. DAUB. Mr. DAVIS, Mr. DE LA GARZA, Mr. DELLUMS, Mr. DE LUGO, Mr. DENARDIS, Mr. DERWINSKI, Mr. DICKINSON, Mr. DICKS, Mr. DINGELL, Mr. DIXON, Mr. DORNAN of California, Mr. DOWDY, Mr. DREIER, Mr. DUNCAN, Mr. DUNN, Mr. DWYER, Mr. DYSON, Mr. EDGAR, Mr. EMERSON, Mr. ERDAHL, Mr. EVANS of Georgia, Mr. FARY, Mrs. FENWICK, Ms. FERRARO, Mr. FIELDS, Mr. FISH, Mr. FLIPPO, Mr. FOGLIETTA, Mr. FORD of Michigan, Mr. FORSYTHE, Mr. FOUNTAIN, Mr. FOWLER, Mr. FRENZEL, Mr. FUQUA, Mr. GEJDENSON, Mr. GEPHARDT, Mr. GIBBONS, Mr. GILMAN, Mr. GINGRICH, Mr. GONZALEZ, Mr. GOODLING, Mr. GREEN, Mr. GREGG, Mr. GUNDERSON, Mr. RALPH M. HALL, Mr. SAM B. HALL, JR., Mr. HAMMERSCHMIDT, Mr. HANSEN of Idaho, Mr. HARTNETT, Mrs. HECKLER, Mr. HEFNER, Mr. HENDON, Mr. HERTEL, Mr. HILER, Mr. HILLIS, Mr. HOLLAND, Mr. HOLLENBECK, Mrs. HOLT, Mr. HOPKINS, Mr. HUBBARD, Mr. HUCKABY, Mr. HYDE, Mr. JEFFRIES, Mr. JENKINS, Mr. JONES of North Carolina, Mr. KASTENMEIER, Mr. KAZEN, Mr. KEMP, Mr. KINDNESS, Mr. KRAMER, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LEATH of Texas, Mr. LEE, Mr. LEHMAN, Mr. LELAND, Mr. LENT, Mr. LEWIS, Mr. LIVINGSTON, Mr. LOEFFLER, Mr. LOTT, Mr. LUNGREN, Mr. MADIGAN, Mr. MARKEY, Mr. MARKS, Mr. MARTIN of New York, Mr. MARTIN of North Carolina, Mrs. MARTIN of Illinois, Mr. MAVROULES, Mr. MCCLORY, Mr. MCCURDY, Mr. MCDADE, Mr. MCDONALD, Mr. MCGRATH, Mr. MCKINNEY, Mr. MICHEL, Ms. MIKULSKI, Mr. MILLER of Ohio, Mr. MILLER of California, Mr. MITCHELL of New York, Mr. MOORE, Mr. MOORHEAD, Mr. MORRISON, Mr. MURTHA, Mr. MYERS, Mr. NATCHER, Mr. NELLIGAN, Mr. NICHOLS, Mr. O'BRIEN, Mr. OBERSTAR, Mr. OTTINGER, Mr. OXLEY, Mr. PANETTA, Mr. PARRIS, Mr. PASHAYAN, Mr. PATMAN, Mr. PATTERSON, Mr. PAUL, Mr. PEPPER, Mr. PETRI, Mr. PEYSER, Mr. PORTER, Mr. PRICE, Mr. PRITCHARD, Mr. PURSELL, Mr. QUILLEN, Mr. RATCHFORD, Mr. ROBERTS of Kansas, Mr. ROBINSON, Mr. ROEMER, Mr. ROGERS, Mr. ROSE, Mr. ROSENTHAL, Mr. ROUSSELOT, Mr. ROYBAL, Mr. RUDD, Mr. RUSSO, Mr. SAWYER, Mrs. SCHNEIDER, Mr. SCHULZE, Mr. SCHUMER, Mr. SHAW, Mr. SHELBY, Mr. SHUMWAY, Mr. SIMON, Mr. SKEEN, Mr. SMITH of Oregon, Mrs. SMITH of Nebraska, Mrs. SNOWE, Mr. SOLOMON, Mr. SPENCE, Mr. STANGELAND, Mr. STANTON of Ohio, Mr. STATON of West Virginia, Mr. STRATTON, Mr. STUMP, Mr. SWIFT, Mr. SYNAR, Mr. TAUZIN, Mr. TAYLOR, Mr. THOMAS, Mr. VENTO, Mr. VOLKMER, Mr. WALKER, Mr. WAMPLER, Mr. WEAVER, Mr. WEBER of Ohio, Mr. WEBER of Minnesota, Mr. WEISS, Mr. WHITEHURST, Mr. WHITLEY, Mr. WHITTAKER, Mr. WHITTEN, Mr. WILSON, Mr. WOLF, Mr. WOLPE, Mr. WORTLEY, Mr. WRIGHT, Mr. WYLIE, Mr. YOUNG of Alaska, and Mr. YOUNG of Missouri.

H.J. Res. 277: Mr. MCCLORY, Mr. GOLDWATER, Mr. STUMP, Mr. JONES of North Carolina, Mr. KINDNESS, Mr. HANSEN of Idaho, Mr. FRENZEL, Mr. WINN, Mr. TRIBLE, Mr. BARNARD, and Mr. WAMPLER.

H.J. Res. 293: Mr. LANTOS, Mr. VENTO, and Mr. GRISHAM.

H. Con. Res. 112: Mrs. FENWICK, Mr. FRANK, Mr. FRENZEL, Mr. GRAY, Mr. HYDE, Mr. LANTOS, Mr. LEACH of Iowa, Mr. SIMON, Mr. SOLOMON, Mr. TRIBLE, and Mr. YATRON.

H. Res. 176: Mr. ADDABBO, Mr. MCKINNEY, Mr. REGULA, Mr. DUNCAN, Mr. SKEEN, Mr. FOGLIETTA, Mr. CONTE, Mrs. SCHNEIDER, Mr. DELLUMS, Mr. WORTLEY, Mr. UDALL, Mr. LANTOS, Mr. MORRISON, Mr. SMITH of New Jersey, Mr. BROYHILL, Mr. GREGG, Mr. CORCORAN, Mr. ROE, Mr. RAILSBACK, Mr. EVANS of Iowa, Mr. RITTER, Mr. MARKEY, Mr.

SUNIA, Mr. EDGAR, Mr. RAHALL, Mr. TAUKE, Mr. FRENZEL, Mr. HALL of Ohio, Mr. CROCKETT, Mr. WEBER of Ohio, Ms. MIKULSKI, Mr. DERRICK, Mr. DWYER, and Mr. BROWN of Ohio.

PETITIONS, ETC.

Under clause 1 of rule XXII,

146. The SPEAKER presented a petition of Howard Jarvis, Los Angeles, Calif., and others, relative to passage of "The American Tax Reduction Act of 1981"; which was referred to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4119

By Mr. ERTEL:

—Page 53, immediately after line 22 insert the following new sections:

SEC. 622. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency.

SEC. 623. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

By Mr. PEYSER:

—Page 49, line 2, immediately before period insert the following: ": *Provided*, That no funds appropriated under this section shall be expended by the Governor of the Farm Credit Administration, the Federal Farm Credit Board, or their delegates to implement or execute any policy authorizing loans under the Farm Credit Act of 1971 as amended, other than rural housing loans, to persons or legal entities who derive less than 50 percent of their income as bona fide farmers or ranchers, or less than 50 percent of their income from farm-related businesses.".

H.R. 4121

By Mr. LEVITAS:

—Page 43, after line 21, insert the following:

SEC. 617. None of the funds made available pursuant to the provisions of this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

H.R. 4144

By Mr. ERTEL:

—Page 31, immediately after line 19 insert the following new sections:

SEC. 504. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency.

SEC. 505. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

H.R. 4209

By Mr. SNYDER:

—Page 38, after line 15, add the following new section:

SEC. 322. None of the funds in this Act shall be used to implement any change in the policy or rules governing the operation of aircraft at Washington National Airport (14 CFR 93, subpart K; 14 CFR 159, subpart C) as such policy or rules were in effect on July 21, 1981.

—Page 38, after line 15, add the following new section:

SEC. 322. None of the funds in this Act shall be used to implement any change in the policy or rules governing the operation of aircraft at Washington National Airport (14 CFR 93, subpart K; 14 CFR 159, subpart C) as such policy or rules were in effect on July 21, 1981. This limitation shall not apply to any change in 14 CFR 159.60.

H.R. 4242

By Ms. MIKULSKI:

—Add to title I, subtitle A:

That (a) section 170 of the Internal Revenue Code of 1954 (relating to charitable, etc., contributions and gifts) is amended by redesignating subsections (h) and (i) as subsections (i) and (j), respectively, and by inserting after subsection (g) the following new subsection:

"(h) STANDARD MILEAGE RATE FOR USE OF PASSENGER AUTOMOBILE.—If the Secretary prescribes by regulation a standard mileage rate which may be used to compute for the taxable year the deduction under section 162 for use of a passenger automobile, such standard mileage rate may be used to compute for such year the deduction under this section for use of a passenger automobile."

SENATE—*Thursday, July 23, 1981*

(Legislative day of Wednesday, July 8, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Gracious heavenly Father, often when we need Thee most, we find it hardest to come to Thee. Sometimes we do not come because we are impressed with our strength and do not feel any need. Sometimes we do not come because we have failed or sinned and refuse to admit our need. Either way it is pride which deprives us of Thy favor. Forgive us, Lord, for finding it so difficult to understand the meaning of grace, that grace means the umerited favor of God.

Help us to see that the one condition grace requires is admission of need; that it is our weakness which qualifies us for Thy strength; that it is our lack of wisdom which qualifies us for Thy light and truth; that it is our failure and sin which qualifies us for Thy love, forgiveness, and renewal.

Loving God, we have no secrets from Thee. Thou knowest us far better than we know ourselves. Help us to humble ourselves before Thee and find in Thy grace a very present help in time of trouble. Touch every person in the Senate with grace and love and healing. Forgive and restore wherever there is need in heart and office and home. We ask this in the name of Him who never failed to supply every need brought to Him. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATOR STEVENS IS THE PROUD FATHER OF A NEW BABY DAUGHTER

Mr. BAKER. Mr. President, I am happy to report to my colleagues that the distinguished assistant Republican leader, Senator STEVENS, and his wife Catherine are the proud parents of a new baby girl. Both baby and mother are reportedly doing fine, and as far as we can ascertain, so is Senator STEVENS.

Senator STEVENS' daughter, who will be named later today, was born at 12:08 this morning at George Washington University Hospital.

It is truly a touching sight, Mr. President, to see a proud papa gallivanting through the Capitol corridors with a smile on his face and a box of cigars in his hand. Even more touching is the conversation that corners Senator STEVENS with polemics on reconciliation, and finishes with "and she looks just like me."

I am sure that I speak for this entire body in wishing the new parents all the very best for their entire family.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Mr. President, I am elated and gratified at the good news that the distinguished majority leader has brought to the Senate.

I hope he will convey my good wishes to Mrs. Stevens and also to the proud father, and the good wishes of my wife, Erma.

Mr. BAKER. I thank the minority leader. He may be assured that I will do that at the earliest opportunity.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. BAKER. Yes, I yield.

The PRESIDING OFFICER (Mr. COHEN). The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I take this opportunity to congratulate Senator and Mrs. TED STEVENS upon becoming the proud parents of a fine baby daughter. My understanding is that the mother and the baby are both doing nicely.

The baby has not yet been named, but we are certainly hoping that she will favor her lovely and beautiful mother.

We wish the parents great success with this splendid baby.

Again, on behalf of my wife, Nancy, and myself, we wish to extend our heartiest congratulations and best wishes for the good health and success of this baby girl.

Mr. MURKOWSKI. Mr. President, I take this brief moment to offer my warm congratulations to the senior Senator from Alaska (Mr. STEVENS) and his wife, Catherine, on the birth of their baby girl this morning at 12:08 a.m. This new baby girl, yet unnamed, joins sisters Susan and Beth and brothers Walter, Teddy, and Ben.

Mr. President, in the finest traditions of the Republican leadership, this is the first baby born to a Republican Member of the 97th Congress. Not only is TED now my colleague, but my longtime friend, as are members of both our families. Mrs. Murkowski and I are delighted at this new edition to the Stevens family, and I am sure that other Members of the Senate join me in extending warm congratulations to them.

I might mention that my colleague is said to be currently in a state of shock over the price increase of a box of cigars in the last 25 years.

Mr. DOLE. I thank the distinguished Senator from Alaska. We will accept the addition. [Laughter.]

THE DEMISE OF THE WASHINGTON STAR

Mr. BAKER. Mr. President, it is with great sorrow that I rise this morning to report that Time, Inc., has decided to suspend the operations of the Washington Star. Washington afternoons shall never be the same.

I am sure that I join with many of my colleagues in noting the countless contributions that the Star has made to legislative reporting and to the city of Washington itself. The zealous appetite for information which Washingtonians are world renowned for will be greatly diminished.

The Star's proud history dates back to the Civil War. Its legacy is distinguished by many of the most notable names in American journalism. It has always been regarded as one of the best afternoon papers in the country.

Mr. President, I believe that this is a major tragedy in the annals of contemporary news reporting. For the hundreds of thousands of its readers, the Washington Star has been more than an institution. It has been a force and responsible voice in the community, which took on an almost human quality and a fixture of objectivity and trust.

I am reminded of the thoughts of Henry Adams:

> He had often noticed that 6 months' oblivion amounts to newspaper death, and that resurrection is rare. Nothing is easier, if a man wants it, than rest, profound as the grave.

BUDGET RECONCILIATION CONFERENCE

Mr. BAKER. Mr. President, yesterday we dispensed with the request for a Saturday session for this week, due in large part to our time agreement on the tax bill. I am grateful to the distinguished minority leader, Senator BYRD, for his help in achieving that time constraint.

It is my hope at this time, however, that this action does not prevent my colleagues from remembering just how busy we all are. We are now in the second week of the budget reconciliation process. Fifty-eight subconferences were established, and over 250 conferees appointed to resolve divisive issues and facilitate a distinguished proposal.

We have launched a major effort, and consequently, our advancements have been many. Perhaps one of the finest

examples of our progress is the banking subconference.

I wish to express my profound appreciation to the members of the banking subconference who, under the outstanding leadership of the distinguished Senator from Utah (Mr. GARN), have successfully completed their conference with the House Committee on Banking. Senator GARN, along with my distinguished colleagues, Senators PROXMIRE, HEINZ, LUGAR, and RIEGLE, worked diligently with their counterparts from the House to expeditiously conclude their important and difficult subconference.

Let me assure you, Mr. President, that their completion was not an easy task. The banking subconference was the largest of the scheduled subconferences. There were 32 separate issues involved, and approximately $13–$14 billion in reductions at stake. Instead of turning out to be the bane of the reconciliation effort, the banking subconference acted efficiently and reduced authorizations for 1982 by roughly $13 billion.

The committee acted on measures affecting the Export-Import Bank, the community development program and numerous individual housing programs. Many of the provisions involved crucial policy changes that will have far-reaching consequences in the years to come.

I believe that the banking conferees have provided a model for other conferees. I strongly urge the members of the Agriculture, Commerce, Finance, Labor and Human Resources, and Energy subconferences, to heed the Banking Committee's example. It is my intention to have the conference reports on the Senate and House floors next week, and I would like to suggest that the members of the above-mentioned subconferences meet this Saturday to work out their differences and conclude their business.

We must push ahead and diffuse the remaining difficulties. We should not let unresolved issues jeopardize the entire process.

I might remark to my colleagues in the unfinished subconferences, that useful and constructive weekend sessions this week might very well prevent more intense, pressure-filled, and vacation-ruining meetings in August.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, is there an order for the transaction of routine morning business following the recognition of the two leaders under the standing order and the recognition of two Senators provided for under the special orders?

The PRESIDING OFFICER. Not this morning.

Mr. BAKER Mr. President, I ask unanimous consent after the recognition of the two leaders under the standing order, and the recognition of the two Senators under special orders, as provided for heretofore, that there be a brief period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. in which Senators may speak for not more than 1 minute each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

ECONOMIC RECOVERY TAX ACT OF 1981

Mr. BAKER. Mr. President, I wish to reiterate the point made by the distinguished minority leader and myself yesterday. We now have an order for third reading of the tax measure at 3 o'clock on Wednesday, July 29. That is good news. The bad news is that we have 91 amendments to deal with, more or less, and my devout wish is that it shall be less.

But that also means, Mr. President that we will surely have to work very hard and very late in order to assure that every Senator has an opportunity to present, if they wish to do so, his or her amendment that appears on that list, and in an orderly way, and not save them for the last minute to have a stampede of amendments beginning at 3 o'clock on Wednesday.

So I must say with great regret that I expect the Senate will be in very late tonight; I would estimate perhaps as late as 11 or 12 o'clock in the evening. There already is an order for the Senate to convene at 10 o'clock tomorrow. It will be my intention to adjust that time to an earlier hour, if it is necessary, to accommodate any requests for special orders.

I regret that it is necessary to announce that the Senate will be in late tonight and probably tomorrow night, and also we expect late sessions on Monday and Tuesday night, but I do believe that is necessary if we are to fulfill our legislative responsibility and complete work on this joint resolution and go to third reading by 3 o'clock on July 29.

Mr. President, I am pleased to yield the remainder of my time to the minority leader if he wishes it or to any other Senator on this side of the aisle. Would the minority leader like any additional time?

Mr. ROBERT C. BYRD. I thank the distinguished majority leader. I think I will need the additional time.

Mr. BAKER. Mr President, I yield the additional time I have assigned to me to the distinguished minority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. On my side of the aisle I wish to emphasize the necessity, as the distinguished majority leader has stated, for working long and late in order to complete action on the tax bill by the deadline of 3 p.m. on next Wednesday.

Mr. President, I know that these morning hours are relaxed hours, and some Senators who have amendments are inclined to feel there is no great rush, and that we can delay a few minutes here and a few minutes there on into the morning. We repeatedly get these suggestions and requests from our colleagues that, "Well, I would like to go later in the day," "I would like to go later in the morning," "I would like to have my amendment taken up tomorrow."

The problem with that is too many amendments wait until tomorrow and, as a result, a glut of amendments develops which makes it difficult for some Senators to get any time at all on their amendments when the last moment arrives.

So I would suggest in the interest of having every Senator have his time at bat that Senators get their amendments ready, be ready to call them up, and do not attempt to lay over amendments until tomorrow when it can be done today.

I say there will be a great deal of sadness and some weeping and gnashing of teeth next Wednesday at 3 p.m. if Senators do not do that.

Mr. BAKER. I agree with that.

If the Senator will yield to me, I would absolutely concur in that. The Senator and I and most Members of the Senate have seen that happen before. It is always a source of great anguish to me and to the minority leader, I am sure, to have Senators express their concern, their legitimate concern, that they had no time or, in this case, 5 minutes for debate. Now is the time to avoid that, today.

On yesterday I asked the distinguished manager of the bill, Senator DOLE, to try to keep us advised with a list of six amendments in advance so we would know the sequence and the order in which amendments were to be presented. I urge Senators on this side of the aisle who hear these remarks to make known when they will be ready at the earliest moment to offer their amendments today, not tomorrow, not Monday or Tuesday, as the minority leader suggests.

ORDER TRANSFERRING TIME TO SENATOR PROXMIRE

While the distinguished minority leader has yielded to me briefly, I am advised that the Senator from California (Mr. CRANSTON) will not need the special order in his favor this morning, but the Senator from Wisconsin wishes possession of his time, will the minority leader be agreeable if I transfer that time now?

Mr. ROBERT C. BYRD. I would be very happy if the Senator would do that.

Mr. BAKER. I thank the minority leader. Mr. President, I ask unanimous consent that the time allocated to the Senator from California this morning under special order be transferred and controlled by the Senator from Wisconsin (Mr. PROXMIRE).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

I will ask the members of the Democratic policy staff to attempt in every way to keep Senators on my side alerted to the need for calling up their amend-

ments, and we will try to assist in having a list of amendments by Senators who are ready to go throughout the day and the remaining days preceding next Wednesday.

THE STRATEGIC ARMS CONTROL POLICY OF THE UNITED STATES

Mr. ROBERT C. BYRD. Mr. President, the strategic arms control policy of the United States is currently in limbo. Although President Reagan has expressed his desire to engage in serious strategic arms reduction negotiations, the present policy can be summed up as "rearm first, talk later." This simple approach does the world an injustice and damages the cohesion of NATO. We must build and talk at the same time. If the Soviets are not interested in this process, a serious American effort will go far toward convincing our allies that our perception of the threat is correct and they must take further measures to contain it. The present course gives the Soviets the patently unearned advantage of posturing as the real exponents of arms control. It puts us in a difficult position as we press Europe to expand its forces and commitments in a more equal partnership with us. And it may well require excessive diversion of funds from our conventional forces to our strategic arsenal.

Mr. President, the distinguished senior Senator from Colorado (Mr. HART), as a member of the Armed Services Committee, has followed arms control matters in a thoughtful and constructive way for many years. He recently wrote a perspective article for the New York Times on the problems the present drift in arms control policy presents for the Nation, particularly in the areas of defense planning and the excessive diversion of resources from our conventional forces which would be necessitated by an uncontrolled arms race.

I ask unanimous consent that the article, which appeared in the July 22, 1981, issue of the New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FOR ARMS TALKS SOON

(By Gary Hart)

WASHINGTON.—When Secretary of State Alexander M. Haig Jr. presented the Reagan Administration's strategic arms limitation policy last week, he made no promises that negotiations would resume any time soon. The Administration, he said, is committed to arms-limitation talks—but not on any specific timetable and not until some conditions, including modifications in Soviet foreign policy, are met. On this most crucial question, a wide gulf separates theory and practice, intention and rhetoric, in this Administration.

The Administration's reluctance to resume negotiations toward limits on nuclear arms demonstrates two fundamental flaws in its national-security policy. First, nuclear-arms limits are seen as ancillary, not central, to national security. Second, nuclear-arms agreements are viewed as a concession to the Soviet Union for good behavior rather than legal protection against Soviet bad behavior.

Secretary Haig and his colleagues seem to think of arms limitation as national security's poor relation. They are willing to tolerate it, but it must always take a back seat to a strategic military buildup.

In a nuclear age, national security must mean more than our ability to fight a war successfully. Security must also mean preventing a nuclear war from ever occurring. Prevention of nuclear war has two interdependent and equally important elements: a stable and survivable deterrent and limitations on the Soviet threat.

An arms-limitation agreement would benefit our national security in at least four ways. Unfortunately, as yet, this Administration seems not to recognize them.

It would limit the size of the Soviet nuclear threat. By 1985, the Russians will have the technical capacity to increase vastly their nuclear arsenal. They will be able to more than double the number of "silo-killer" warheads that SALT II would have permitted, deploy additional heavy missiles, and nearly double their arsenal of land-based missiles with multiple warheads. As Mr. Haig says, numbers are not the whole story. But limiting numbers is one way of limiting the threat. Regardless of whether the limits negotiated two years ago were adequate, right now we are living without any legal limits whatsoever.

It would provide greater certainty for United States defense planning. A treaty would legally restrict the Soviet Union to known test practices and known test ranges, which we have monitored for years with high confidence. We may seek more ambitious limitations or tighter safeguards, as Mr. Haig suggests. But the only way to achieve these limitations is by entering into negotiations. We gain no additional security by waiting; we lose nothing by negotiating.

It would provide greater ability to focus our resources on conventional forces. If the Russians embark on an uncontrolled nuclear-arms buildup, pressures on us to do the same would be enormous. An Administration so aware of Soviet expansionism should be alert to the dangers of an uncontrolled nuclear-arms race. It would divert both our attention and our resources from the conventional forces we and our allies need to discourage Soviet adventurism.

It would help provide a consensus on national-security issues. We need a stable majority on national-security issues if we are to rebuild and maintain our military strength. This majority must include those who, in the past, saw a strong defense and nuclear-arms limits as mutually exclusive.

The Administration also fundamentally misconstrues the purpose of arms-limitation treaties. It seems to think that they are a reward to our friends, and not a control on our rivals.

The Administration's policy of "linkage" holds that until Soviet adventurism diminishes, we must delay arms negotiations. Mr. Haig suggests that any other policy leads to the "appalling conclusion" that we must tolerate Soviet aggression. But Mr. Haig is wrong. It is not a question of our tolerating Soviet conduct. It is exactly because of Soviet conduct that we must pursue an arms-limitation treaty.

The Reagan Administration has linkage backwards. The only linkage that makes sense is linkage between our distrust of the Russians' intentions and the need for an arms treaty that limits their capability. The more we distrust the Russians, and the more we are concerned about a continued strategic buildup by them, the more we should support arms-control agreements that limit them.

No one would argue that we should agree to a treaty for the sake of agreement, or accept one with inadequate verification, or lock ourselves into outmoded technology. But Mr. Haig's pointing at these problems does nothing to solve them. Only full discussion at the negotiating table can.

Mr. Haig described the Administration's stance on strategic-arms talks as one of "patient optimism." But there is no reason for patience in seeking negotiations—and there is little reason for optimism that talks will begin soon enough.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that any remaining time I have may now be transferred to Mr. PROXMIRE to be controlled by him when his order is executed.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF TAX MEASURE

Mr. BAKER. Mr. President, it is now 9:44 a.m. I believe there is an order, is there not, for the Senate to resume consideration of House Joint Resolution 266 at 10 o'clock?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. We are on a collision course, then, with the special orders entered and after the time allocated to the Senator from South Carolina there would not be time remaining for the Senator from Wisconsin. Therefore, I ask unanimous consent that the Senate resume consideration of House Joint Resolution 266, without any intervening debate, motion, or point of order, at the conclusion of the time allocated to the distinguished Senator from Wisconsin.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR THURMOND

The PRESIDING OFFICER. Under the previous order, the Senator from South Carolina is recognized for not to exceed 15 minutes.

Mr. THURMOND. I thank the Chair.

THE DAVIS–BACON ACT, PART V, CASE STUDIES

Mr. THURMOND. Mr. President, in continuing my discussion of the Davis-Bacon Act, today I would like to provide some examples where the act, as implemented by the Department of Labor, has resulted in increases in the cost of Federal construction projects.

PART 1—DAVIS-BACON ACT CASE STUDIES

Yesterday I mentioned the General Accounting Office study of April 1979 which recommended the repeal of the Davis-Bacon Act. That study contains a series of examples demonstrating the impact that the Davis-Bacon Act has on Federal construction projects. I urge my colleagues to review those cases.

More recently, in April of this year, Senator NICKLES, chairman of the Labor Subcommittee of the Senate Committee on Labor and Human Resources, held oversight hearings on the Davis-Bacon Act and the cases which I shall discuss

today are taken from this most recent hearing.

For the purposes of this presentation, I have broken the criticisms of the Davis-Bacon Act into four categories:

First. The importing of wage determinations from high-cost areas to low-cost areas.

Second. The improper determination of what prevailing wages actually are.

Third. The problem of changing wage determinations.

Fourth. The improper classification of workers resulting from Labor Department wage determinations.

IMPORTING OF WAGE DETERMINATIONS

Although the Davis-Bacon law requires that the Secretary of Labor determine prevailing wages for the "city, town, village, or other civil subdivision of the State in which the work is to be performed," the Labor Department usually issues prevailing wage determinations on a county-by-county basis. As a result, there are many instances where higher wages paid in urban areas may be imported into rural areas within the same county. Let me cite three examples.

Senator NICKLES himself cited a case in Oklahoma involving the Mountain Park Dam in Kiowa County. On this project the Labor Department ignored similar construction that was underway near the Mountain Park Dam and instead imported wage rates from the Hugo Dam in southeast Oklahoma, a project that was 225 miles away, with the resultant wage rates 30 percent greater than those prevailing locally in Kiowa County.

The second example cited by a witness from the Associated Builders & Contractors (ABC) referred to a builder constructing a multifamily housing project outside of Des Moines, Iowa, who was forced to pay the commercial union rates that prevailed in the city of Des Moines. In this case the actual prevailing rates for residential work in the area of the project ranged from 25 to 50 percent below that for the metropolitan area.

Let me cite a third example, quoting directly from a contractor who testified before Senator NICKLES' subcommittee:

My company is presently considering constructing the additions and renovation project to the "Site R" sewage treatment plant. (This is a military construction project associated with the alternate military command center.) That was, until we received the Department of Labor wage determination for this project.

Upon receipt of the "Site R" determination, our company protested to the Department of Labor, Davis-Bacon Division, stating that we were, at the time, engaged in a similar project almost within sight of the "Site R" job. The wages on the "Site R" project were over double the wages actually being required on the Fort Ritchie project. We stated that with such differences in wage rates, it would be impossible to manage the two projects if we were the successful bidder. The area at both sites is rural-agricultural. In fact, the Davis-Bacon rates on the Fort Ritchie project are actually higher than the "prevailing" local rates, since the only local work is some small scale housing construction.

The Department of Labor refused to alter the "Site R" rates with the explanation that since there was no representative trade sample in the "Site R" Adams County, Pennsylvania area, they used the Harrisburg, Pennsylvania wage rates—Harrisburg is over 75 miles away.

IMPROPER WAGE DETERMINATIONS

In my earlier presentations I discussed the 30-percent rule and the average method used by the Department of Labor in making wage determinations. Almost without exception these rules result in wage determinations which must be used by contractors on Federal contracts which are in excess of those that actually prevail. Again, let me give you several examples taken from Senator NICKLES' hearing.

One builder in Lancaster, Pa., estimated the cost for a sewer project to be $125,000, to be accomplished with his nonunion work force. However, when he discovered that Davis-Bacon wage determinations were to be applied to the contract, he refrained from bidding on that job. The job was awarded to another contractor for the amount of $200,000. This contractor paid the union wage scale and incurred the additional expense of having his labor force move into the town and stay in a motel until the job was finished.

A large general contractor in Maryland estimated the cost for a residential high-rise project. Prior to beginning construction the contractor determined that Federal funding assistance from the Department of Housing and Urban Development would be required and, therefore Davis-Bacon wage rates would apply. As a result, the contractor was forced to recalculate his costs and to obtain new estimates from all his subcontractors. The resulting recalculation of the project's cost provides an excellent opportunity to evaluate the added costs directly attributed to Davis-Bacon. In this case the original project estimate of $4,694,000 was increased by $447,000 or nearly 10 percent.

CHANGES IN WAGE DETERMINATIONS

In my earlier discussion of Davis-Bacon I mentioned that there are some 20,000 Davis-Bacon wage determinations made by the Department of Labor each year. Federal contracting agencies and private contractors alike must keep up with these changing wage determinations to be sure that contract documents and contract estimates reflect the most recent wage determination. This process of continually changing wage determinations is an administrative problem and often results in increased cost as noted in the following two cases.

The ABC reported a situation in the State of Maryland where the Department of Labor prevailing rate for plumbers on a rural Maryland project was doubled (from $6.41 per hour to $12.86 per hour) in two successive wage determinations less than 3 months apart. Despite a protest to the Labor Department in accordance with established procedures, the higher rate was sustained on the basis that the 30-percent rule applied.

Another subcontractor from Florida reported that on a 50-unit Housing and Urban Development project in Jacksonville, the Davis-Bacon wage determination was modified shortly before construction began. The hourly wage rate rose $2 per hour for plumbers and $1.57 per hour for unskilled labor. The result was that the subcontractor was forced to reestimate his cost and provide greatly increased labor estimates and he was only one of over 40 subcontractors who were forced to adjust bids upward.

IMPROPER TRADE CLASSIFICATION

I have mentioned briefly the issue of job classifications. The Department of Labor has the unenviable task of developing job classifications for every construction trade for every skill level. This is a very difficult task because construction practices vary across the Nation. Let me cite a single example that received much publicity here in the Washington area a few years ago.

In 1977 the State of Virginia began construction on a 1.6-mile section of Interstate 66. The Virginia State Highway Department felt that certain workers should be paid highway prevailing wages, but the Labor Department made an arbitrary judgment that prevailing wages for heavy construction should apply. This would have resulted in greatly increased costs for this project. In this case the State of Virginia successfully appealed this expensive wage determination proposed by the Department of Labor.

Mr. President, I could spend several days citing case after case of examples where the Davis-Bacon Act has cost the taxpayer money. The examples that I have mentioned here today are typical examples and I know the Members have heard from their constituents about similar cases in their State. In my next presentation I intend to continue my series on Davis-Bacon with a discussion of a similar piece of legislation—the Walsh-Healey Act—which is no longer in force.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 15 minutes in addition to the 8 minutes yielded by the Senator from West Virginia.

INTERIOR DEPARTMENT POLICIES THREATEN U.S. TRADITIONS

Mr. PROXMIRE. Mr. President, Secretary of Interior James Watt's policies represent a time bomb waiting to go off for future generations of Americans. They have the potential to do more lasting harm to our Nation than the proposals of any other Secretary in the Cabinet.

America has been blessed both with vast natural assets and enormous productive capacity. The tension between these two national goals—protecting our natural assets while expanding our pro-

ductive capacity—has led to compromises in the best interests of both.

Secretary Watt, however, has threatened to overturn this balance of reason by siding in every instance with unbridled economic development, no matter what the environmental cost.

Defense and foreign policies can be changed almost overnight. Social programs can be cut and obsolete programs can be canceled. But our natural resources are fragile and not always renewable. Thus the changes Secretary Watt recommends will have tragic consequences for decades.

Our children and our children's children will have to live with his mistakes.

No Secretary of the Interior has been so fanatically opposed to the traditional American desire to pass on to succeeding generations the opportunity to enjoy the use of our natural resources. No Secretary has been more cynical in his approach to fish and wildlife, to parks and open lands and wilderness areas. His radical positions are outside the mainstream of American conservatism.

Here are just a few of the reasons why Secretary Watt's policies pose a threat to basic conservation practices:

He has proposed reducing to guideline status the only effective economic and environmental standards for water projects. The result will be more boondoggles, more waste of the taxpayer's money.

He has dramatically weakened the Office of Surface Mining which enforces the law requiring restoration of strip-mined lands. The probable result—a blank check to mining companies to further ravage our land.

He has sacrificed long-term productivity of Federal grazing lands in favor of maximizing current economic return to livestock operators. The potential result—depletion of our vital rangelands.

He has proposed increasing greatly the rate of offshore oil leasing to levels even many oil companies oppose. He would allow leasing in such environmentally sensitive areas as the Santa Maria Basin off the coast of California. The likely result—destruction of critical coastal areas.

He supports increased commercialization of the national parks. The result—it would line the pockets of the concessionaries at the expense of the public.

He has called for a 85 percent spending cut for further land purchases for parks, wildlife refuges, and additions to the National Forest System while cutting wasteful water project construction funds by only a token 5 percent. The result—increased land costs and possible loss of important natural areas.

Ironically, Secretary Watt's policies have been a shot in the arm for the environmental movement. Complacement attitudes have been cast aside. New energy, talent and organization is now evident. Memberships have increased and contributions are pouring in. From the left to the right, wildlife and conservation groups representing millions of hunters, fishermen, birders, and environmentalists have found unity in a common opposition to the Interior Secretary.

The Watt policies should be reversed by Congress. With strong public support this may be possible. The American public needs to make its voice heard on this subject.

1. BUDGET REVISIONS

Secretary Watt has frankly stated that he would "use the budget process to be the excuse to make major policy decisions." A review of the $383 million in requested rescissions for fiscal year 1981 and $877 million (15.3 percent) in requested cuts in fiscal year 1982 reveals major reductions in resource management and conservation programs while programs directed toward resource use were cut little or not at all, and in some instances increased:

Acquisition programs under the land and water conservation fund were cut 92 percent ($520 million to $45 million), including the total elimination of the States' share of the fund. The urban parks and recreation recovery program and the historic preservation fund were cut 100 percent.

The two water resource planning agencies (Water Resources Council, Office of Water Research and Technology) were cut 100 percent ($71.8 million) and replaced by a proposed "Office of Water Policy" funded at $2.5 million within the Office of the Secretary.

The Fish and Wildlife Service took a reduction in force of 531 positions in its resource conservation programs (5,127 to 4,596) including 194 positions in habitat preservation programs.

The Office of Surface Mining was cut 26 percent—$246 to $180 million. Personnel cuts were deeper, from 935 to 628, with the bulk of the cuts in enforcement and State program review.

The Bureau of Mines took almost a 50-percent cut in its environmental technology personnel—437 to 224—while its resource technology program increased 25 percent—698 to 903. The environmental program addressed mine waste controls and reclamation while the technology program studies new uses for minerals and and technology development.

The Bureau of Land Management inventory and environmental assessment programs were cut by 130 positions while onshore and offshore oil and gas leasing programs received an addition of 40 positions.

In contrast, the Bureau of Reclamation suffered only a 5-percent cut—$35 million—in water project construction, by stretching out eight projects. No projects were eliminated.

These revisions represent a major shift away from resource conservation programs and toward resource development programs.

2. EMASCULATION OF THE OFFICE OF SURFACE MINING (OSM)

Three separate secretarial actions threaten to eviscerate the Office of Surface Mining:

The authorized personnel ceiling was reduced from 1,001 to 628 positions.

OSM was "reorganized" to eliminate all five regional offices that supervised implementation of the Strip Mining Act, to be replaced by two "Technical Centers" to support, not supervise, State implementation. The total number of field offices was reduced from 42 to 22.

New OSM regulations have been proposed that will first, eliminate the requirement of on-the-ground inspections, second, eliminate the requirement of specific compliance with Federal regulations, and third, allow mine operators to simply certify that violations have been abated, with no independent verification.

Without adequate personnel, enforcement authority, or regulations, OSM will not be able to effectively enforce the Strip Mining Act.

3. RANGELAND POLICY

Mr. President, Secretary Watt has announced a new "good neighbor" rangeland policy that caters to grazing interests at the expense of our public lands. The new policy will sharply reduce the overall level of rangeland management, focus management actions on measures to maximize economic return to livestock operators, and accelerate decertification of our public lands. Specifically, the revised policy will:

First, adopt a "triage" policy, dividing rangeland into three management categories: maintain (M), custodial (C) and improve (I). Management will focus on the "I" category, with the objective of maximizing economic return. The "I" category represents approximately 60 percent of our rangeland. The remaining 40 percent will be maintained at the status quo, which is generally a level of grazing that results in long-term deterioration of the resource. By contrast, a recent CEQ study estimates that 83 percent of our rangeland is in "unsatisfactory" condition and productive capacity will decline 25 percent in 25 years without strong restoration efforts.

Second, allocations to these three management categories will be made on the basis of trend data and maps, rather than detailed environmental assessments. This, along with reduced vegetative production inventories, means that grazing decisions will be made in the absence of good information on the carrying capacity of the land, thereby inviting overgrazing and deterioration of the resource.

Despite these problems, Mr. President, BLM is reducing the section of its rangeland management staff devoted to grazing inventories by 40 permanent full-time positions. This further complicates the implementation of an effective rangeland management program.

4. WATER RESOURCE PLANNING

The Carter administration launched a comprehensive water policy reform effort, the object of which was to replace the existing pork-barrel process with uniform eligibility criteria designed to achieve national economic development and environmental quality objectives. Secretary Watt has systematically dismantled this effort through the following actions:

First, proposed zero-funding of the U.S. Water Resources Council and the Office of Water Research and Technology, and elimination of independent water project review.

Second, opposed reauthorization of the U.S. Water Resources Council.

Third, proposed relaxation of WRC's principles and standards, National Economic Development Manual, and Envi-

ronmental Quality Manual from regulatory to guideline status.

Fourth, various efforts to reduce fish and wildlife mitigation efforts within his Department, including first, reduced funding for fish and wildlife coordination, second, freeze on Fish and Wildlife Coordination Act regulations, third, use of duck stamp wetland acquisitions as mitigation credits for water projects, and fourth, prohibition on use of condemnation authority for mitigation.

Fifth, withdrawal of Federal water rights claims, and sharp reductions in the budgets of offices that quantify the water needs of national parks, refuges and BLM lands.

5. MORATORIUM ON HABITAT ACQUISITION

Mr. President, Secreary Watt's proposal to request a rescission of $250 million in appropriated park acquisition funds in 1981, and to effectively freeze all new acquisitions out of the Land and Water Conservation Fund (LWCF) in fiscal year 1982, has been widely described as applying only to acquisition of parks. Overlooked is the fact that BLM lands, wildlife refuges, and additions to the National Forest System are also funded out of the LWCF.

A coalition of national conservation organizations has put together a list of critically threatened areas, authorized for purchase but not yet acquired, which may well be lost to development this year if Secretary Watt's moratorium remains in place. This includes $161 million in parks, $25.8 million in refuges, $2.2 million in BLM lands, and $42.9 million in national forests, for a total of $231.9 million. Other acquisitions will be delayed, increasing the total cost of congressionally mandated acquisitions and making some acquisitions prohibitively expensive. Acquisitions are funded out of revenues from OCS leasing pursuant to Congress' intent to offset the loss of publicly owned, nonrenewable resources—oil and gas—through acquisition of another form of natural heritage to be handed down to posterity—parks, refuges, and forests. OCS lease revenues are estimated to increase from $4.1 billion in 1981 to $27.3 billion in 1985, yet the freeze prohibits the use of these receipts to "recapitalize" our inventory of natural resources.

6. ACCELERATED OFFSHORE OIL AND GAS LEASING

In April 1981, Secretary Watt proposed to accelerate the 5-year OCS leasing program, to increase the total number of sales from 36 to 42, and to open up over 1 billion offshore acres to leasing. This, first, will reduce the effectiveness of the environmental assessment process, since it is impossible to adequately assess such large amounts of acreage in such a short time; second, does not permit the results of initial exploration in previously unexplored areas to be factored into planning for subsequent sales, since the spacing of sales will be compressed to 2-year intervals; and third, involves leasing in environmentally critical areas, such as the Santa Maria Basin off California.

Recent press reports, denied by the Secretary, that he is thinking of reducing the total offered acreage from 200 million per year to 50 million per year will do little to alleviate these problems if, as reported, he simply lets the oil companies select the areas for bidding. While environmental assessment may become more manageable, the total number of sales will not be reduced, accelerated spacing of sales will continue, and critical areas will still be opened if they contain potential for oil and gas development.

7. CONCESSIONAIRE MANAGEMENT OF PARKS

Secretary Watt supports a much expanded role for concessionaires in park management. He first announced the new policy in a speech to the Conference of National Park Concessionaires in March 1981. Implementation of the policy will be gradual, but is partially reflected in the prospectus calling for concessionaire proposals for activities in Yellowstone Park, issued in June 1981.

The prospectus allows for: First, longer concessionaire contracts than the current average of 20 to 30 years, thus lessening the professional park managers' ability to modify connection activities in response to changing park conditions; second, waiver of franchise fees in return for concessionaire investments into concession operations, thus encouraging increased, and possibly unneeded development in the park; third, continuation of concessionaire possessory interests in facility development and improvement, thus increasing the cost to the Federal Government of contract termination in the event of inadequate operation; and fourth, expanded concessionaire involvement in "cooperative planning" within the park, thus elevating concessionaire influence in management decisions and increasing the risk of making resource decisions based on economics rather than proper resource protection and visitor enjoyment.

Mr. President, by requesting this type of proposal, the prospectus implicitly rejects a proposal under consideration within the National Park Service to set up a Public Benefit Corporation (PBC) that would own the concessions but lease them out under short-term management contracts. The consequence of the new policy is to increase the likelihood that national parks will be managed to maximize economic return to concessionaires, not to maximize the long-term health of the park's natural resources.

8. LESS PROTECTION FOR ENDANGERED SPECIES

Secretary Watt has launched a broad-based attack on protection of endangered species. His proposed budget reduces funds for endangered species listing, 33 percent; recovery, 20 percent; enforcement, 13 percent; and State acquisition of habitat, 100 percent. Although four new listings were proposed before he assumed office, he has repeatedly delayed their final listing and has "frozen" over 40 additional proposed listings that have been finalized within his Department. He has proposed to amend the definition of "harm" to mean only injury or death to an endangered species. Steps are also being taken within the Department to deemphasize identification of critical habitat areas, and to establish a priority list of endangered species favoring vertebrates and, particularly, mammals, although there is no basis in the Endangered Species Act to make such distinctions.

These multiple initiatives will result in the loss of many species that did not make it "under the wire" and will make recovery of listed species more difficult through reduced habitat protection.

9. LAW OF THE SEA TREATY SCUTTLED

Mr. President, on February 18, 1981, Secretary Watt sent a letter, which has not previously been made public, to Secretary of State Alexander Haig. The letter strongly opposes the treaty as then drafted and is generally considered the determining factor in Secretary Haig's decision to withdraw U.S. support for the treaty and replace the U.S. negotiating team. The treaty would have: first, brought 160 nations under uniform environmental protection regulations for marine resources, second, expanded other international marine treaties, such as the London Ocean Dumping Convention, to all 160 signatories, and third, called for uniform standards for seaworthiness of all large vessels, including oil tankers. If the treaty is scuttled, these protections will be lost.

10. DESTRUCTION OF CONSENSUS ON RESOURCE CONSERVATION

Mr. President, Secretary Watt's inflammatory rhetoric has shredded the fragile fabric of emerging consensus on resource issues. This consensus recognizes the importance of planning for the long-term health of our commonly-held resources as well as for their short-term consumption. Through the use of such ill-chosen terms as "lock-up," "extremists," and "crisis development," his constant allusions to easterners versus westerners, the States versus the Federal Government, and the public sector versus the private sector, he has fanned the flames of regionalism, encouraged private sector overreaching, and reduced conservation issues to the level of partisan politics.

In the long run, this improvident and fractious rhetoric will result in more damage to the resources of this Nation than any other single action he can take in the management of the Department.

HOUSE LETTER ON THE TOBA-MASKOY TRIBE

Mr. PROXMIRE. Mr. President, I once again call the Senate's attention to the plight of the Toba-Maskoy Indians of Paraguay.

The Toba-Maskoy have been forcibly moved to what is known to be an uninhabitable area. There is currently an international outcry about their treatment by the Paraguayan Government.

Our colleagues in the House of Representatives have taken the initiative on this matter. The Subcommittee on Human Rights and International Organizations has sent a letter to the President of Paraguay urging him to restore the tribe to its ancestral lands. In this letter, the House subcommittee members state that "cultural and physical geno-

cide threatens the Toba-Maskoy Tribe."

Mr. President, this initiative by our House colleagues is admirable. Unfortunately, their action is handicapped by our inaction. We have not ratified the Genocide Convention. It has been pending in this body for 41 years, denied ratification by the U.S. Senate. Therefore, any American effort to stem the potential genocide in Paraguay is necessarily less effective. How much longer must we inhibit our Nation's capacity to stand up for human rights around the world? We must ratify the Genocide Convention and we should do it promptly.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. NICKLES). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1982

Mr. BAKER. Mr. President, the request I am about to make has been cleared with the distinguished minority leader, and it seems appropriate that we should go forward with it at this time, for reasons that will be obvious from the request.

I ask the Chair to lay before the Senate a message from the House on S. 815.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 815) to authorize appropriations for fiscal year 1982 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test, and evaluation for the Armed Forces, to authorize appropriations for fiscal year 1982 for operations and maintenance expenses of the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for fiscal year 1982 for civil defense, and for other purposes.

(The amendment of the House is printed in the RECORD of July 16, 1981, beginning at p. H4478.)

Mr. BAKER. Mr. President, I move that the Senate disagree to the amendments of the House and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed the following conferees on the part of the Senate: Mr. TOWER, Mr. THURMOND, Mr. GOLDWATER, Mr. WARNER, Mr. HUMPHREY, Mr. COHEN, Mr. JEPSEN, Mr. QUAYLE, Mr. DENTON, Mr. STENNIS, Mr. JACKSON, Mr. CANNON, Mr. HARRY F. BYRD, JR., Mr. NUNN, Mr. HART, Mr. EXON, and Mr. LEVIN.

Mr. BAKER. Mr. President, I thank the distinguished Senator from Mississippi and the distinguished Senator from Texas, the chairman of the committee, and I thank the minority leader for his help in expediting the appointment of the conferees.

ECONOMIC RECOVERY TAX ACT OF 1981

Mr. BAKER. Mr. President, what is the pending measure before the Senate?

The PRESIDING OFFICER. The pending business will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

ORDER TO INCLUDE BENTSEN AMENDMENT FOR CONSIDERATION ON TAX MEASURE

Mr. BENTSEN. Mr. President, I would like to explain to my colleagues that yesterday morning I had to leave early to fly to Texas for an emergency trip for the funeral of one of my very closest friends and was only able to get back late last night. I was out of touch by telephone a good part of that period, practically all of that period of time. I did not know about the time limitation on amendments.

Because of that, my staff did not get in touch with me. Therefore, under those extenuating circumstances, I ask unanimous consent that my amendment be listed among those to be considered at the appropriate time. I have discussed this with the distinguished chairman of the Finance Committee, the manager for the majority, and I have discussed it with the minority leader, all of whom think it appropriate.

Mr. DOLE. Mr. President, reserving the right to object, and I will not object because of the extenuating circumstances, this Senator certainly understands and it is perfectly satisfactory with this Senator.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 508

The PRESIDING OFFICER. The pending question is the Dole stock option amendment.

Mr. BAKER. I thank the Chair.

Mr. President, the distinguished chairman of the Finance Committee is not in the Chamber. He is not here at this time because, at my request, he is attending, briefly, a conference on reconciliation. He will be in the Chamber shortly. I believe all Senators will understand that it was absolutely essential for him to make a brief appearance at that conference.

It would seem inequitable, then, to charge this time against his amendment, and I ask unanimous consent that the time consumed in the quorum call not be charged against anyone.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum, on those conditions.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that we temporarily set aside the amendment of the Senator from Kansas.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I believe the Senator from Indiana has an amendment he wishes to send to the desk.

UP AMENDMENT NO. 262

(Purpose: To place manufactured homes in the 10-year property class)

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. LUGAR) for himself and Mr. CRANSTON proposes an unprinted amendment numbered 262.

Mr. LUGAR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 50, line 17, strike out "and".

On page 50, line 18, strike out the end period and insert in lieu thereof ", and".

On page 50, between lines 18 and 19, insert the following: "(iv) manufactured homes.".

On page 50, line 21, insert "(other than manufactured homes)" after "property".

On page 76, between lines 13 and 14, insert the following:

"(7) MANUFACTURED HOMES.—The term 'manufactured home' has the same meaning as in Sec. 603(6) of the Housing and Community Development Act of 1974, which is 1250 class property used as a dwelling unit."

Mr. LUGAR. Mr. President, I offer this amendment on behalf of the distinguished Senator from California (Mr. CRANSTON) and myself. It has been brought to my attention that the treatment of manufactured housing under the accelerated cost recovery system is unclear and, therefore, if left to the Internal Revenue Service, could result in discrimination against manufactured housing for rental purposes. It is clearly unfair to risk having the Internal Revenue Service classify manufactured housing as real estate subject to the 15-year category. This result would cause manufactured housing to suffer a substantial loss relative to all other forms of rental housing in the course of this tax bill, the purpose of which is to make investment in all forms of capital more attractive.

Manufactured housing comprises a substantial segment of new home sales each year. The latest figures indicated that from 20 to 25 percent of new home sales are manufactured houses, and in many parts of the country this form of housing supplies the only form of affordable home ownership. In some geographic areas, investors and developers have made significant use of manufactured housing as an excellent substitute

for conventional rental housing, particularly for the elderly and handicapped.

Congress has increasingly recognized the benefits of manufactured housing, especially after it took steps to insure that all such homes conform to a single, uniform construction and safety code—National Mobile Home Construction and Safety Standards Act of 1974—in title VI of the Housing and Community Development Act of 1974. Since that landmark legislation, Congress has steadily expanded the range of subsidy and loan insurance programs available to manufactured housing in homeownership situations.

Mr. President, fully 18 percent of the Nation's manufactured home dwellers rent their units according to HUD's January 1981 report to Congress. This amounts to 657,000 households. I am advised that the owners of these older rental units have generally taken depreciation of from 7 to 12 years. As with the 15-year real estate category, the Congress does not address the actual useful life of residential structures. The whole purpose of the rapid depreciation provisions in the bill is to encourage investment through specific, predictable incentives. Recent developments in construction techniques and materials have led to a useful life for manufactured housing which exceeds that of older units. Nevertheless, it remains unfair to categorize manufactured housing along with all other real estate in the 15-year category. This development has led to the ever-increasing attractiveness of manufactured housing as a housing alternative.

Clearly, the Congress must make certain through this tax bill that investors receive an adequate incentive to invest in manufactured housing. My amendment places manufactured houses in the 10-year category. Such an incentive would continue the positive approach the Congress has taken toward manufactured housing as a safe, reliable, and less expensive alternative to fixed-site housing. Rental housing of all kinds is in short supply across the Nation. Manufactured housing can play a vital role in meeting the needs of thousands of families if investment incentives, otherwise provided for in this important tax bill, are not inadvertently taken away.

Mr. President, the manufactured housing industry has succeeded after many years of effort in having Federal policy recognize the durability and safety of manufactured housing. Again, any action to categorize this sound housing alternative in a shorter category than the 15-year category made available to real estate in no way would reflect the Congress assessment of the value to the Nation of manufactured housing.

Accordingly, I suggest that this bill be amended to clarify that manufactured housing be included in the 10 year accelerated cost recovery category.

Mr. President, the intent of the amendment is to clarify the Tax Code so that the Internal Revenue Service will treat manufactured houses in the 10-year category. Presently a manufactured house used as a residence is depreciated by owners anywhere from 7 to 12 years. There could be ambiguity without this clarification as to how it will be treated in the new depreciation provisions.

The intent of the amendment is to center this situation in the category of 10 years.

The amendment has been cleared, I understand, with the distinguished Senators on the other side of the aisle. We have consulted with the Treasury, and there is no objection. I yield to my distinguished colleague from New York.

Mr. MOYNIHAN. Mr. President, I first ask unanimous consent that the Senator from New York (Mr. MOYNIHAN), the Senator from New Jersey (Mr. BRADLEY)—and would my distinguished colleague wish to be listed as a cosponsor?

Mr. D'AMATO. I would like to be listed as a cosponsor.

Mr. MOYNIHAN. I ask unanimous consent that we be listed as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, this is in the view of the Committee on Finance altogether meritorious legislation.

If I may make a little historical point, it was only in 1970 at a time when it appeared that for a decade, despite some fair amount of prosperity, housing starts had lagged and lagged and lagged that it was suddenly learned in the Bureau of Census that manufactured housing was being listed under truck manufacture, and about a quarter of our actual housing market was lost to view, as it were.

I know there is a shortage of rental housing, and manufactured housing could alleviate a considerable part of this practice. The Senator from Indiana has a meritorious amendment which is supported on this side, if he wishes to move its adoption.

Mr. LUGAR. I thank the distinguished Senator from New York. I move the adoption of the amendment.

The PRESIDING OFFICER. Is all time yielded back on the amendment?

Mr. MOYNIHAN. I do not believe there was a time agreement.

The PRESIDING OFFICER. There was a 20-minute time agreement.

Mr. MOYNIHAN. On a second occasion this morning I ask the forgiveness of the Chair. I yield back all our time.

Mr. LUGAR. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Indiana.

The amendment (UP No. 262) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Kansas.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the amendment of the Senator from Kansas be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 263

Mr. MOYNIHAN. Mr. President, on behalf of myself and my distinguished colleague from New York (Mr. D'AMATO) I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN), for himself and Mr. D'AMATO, proposes an unprinted amendment numbered 263.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 281, line 24, insert "(a)" before "Subsection".

On page 282, between lines 8 and 9, insert the following:

(b) SPECIAL RULE FOR FLOOR SPECIALISTS.—Section 1236 (relating to dealers in securities) is amended by adding at the end thereof the following new subsection:

"(d) SPECIAL RULE FOR FLOOR SPECIALISTS.—

"(1) IN GENERAL.—In the case of a floor specialist (but only with respect to acquisitions, in connection with his duties on an exchange, of stock in which the specialist is registered with the exchange), subsection (a) shall be applied—

"(A) by inserting 'the 7th business day following' before 'the day' the first place it appears in paragraph (1) and by inserting '7th business' before 'day' in paragraph (2), and

"(B) by striking the parenthetical phrase in paragraph (1).

"(2) FLOOR SPECIALIST.—The term 'floor specialist' means a person who is—

"(A) a member of a national securities exchange,

"(B) is registered as a specialist with the exchange, and

"(C) meets the requirements for specialists established by the Securities and Exchange Commission.".

Mr. MOYNIHAN. Mr. President, this is a technical amendment to the provision of the bill as reported from the Committee on Finance that incorporates S. 1432, the legislation generally referred to as the commodity straddles legislation.

As the distinguished Presiding Officer knows, these straddles provisions are a major component of our measure. They stand to gain the Internal Revenue Service some $1.3 billion in the first full fiscal year in which they are in effect. That is the measure of the hemorrhaging of the system that is rapidly occurring under the present arrangement.

A distinguished member of the New York Bar at a recent meeting of the tax section of the New York Bar Association referred to the commodity tax straddle as having the potential to zero out the revenue system. We have adopted what we feel to be a fair and effective measure that will maintain the integrity and the viability of the commodity exchanges while avoiding their endangerment for the purpose of pure tax avoidance, something that is becoming notorious.

Of course, in the previous administration, the Assistant Secretary of the Treasury, Mr. Lubick, first raised this to the attention of this Senator; and Mr.

Chapoton, his successor, has been firm in supporting this matter. The Secretary of the Treasury has technically taken himself out of this discussion owing to his previous activities in the commodity markets of his firm, not of himself, but the Treasury Department altogether favors this.

Mr. President, in order to achieve our purpose. we have had to repeal the so-called 30-day lookback rule for brokers and dealers in securities. This is from an earlier period.

Today, a broker-dealer has 30 days to decide whether any security he buys is for his own investment or for sale to a customer. Securities that a dealer buys for himself produce capital gain or loss. Securities that he buys for a customer produce ordinary income or loss.

The committee bill requires that for the remainder of this year, a broker-dealer would have to declare why he is purchasing a security by the day after he buys it. Beginning in 1982, he would have to declare this on the same day he buys it.

My amendment would restore a limited 7-day lookback. The limited lookback would be available only to market specialists on stock exchanges. These are people who trade professionally on the floors of the exchanges and who are required by SEC rules to buy or sell when anyone wants to trade. In the jargon of the stock exchange, they are market makers.

The 7 days in the amendment are 7 business days, not calendar days.

I should also say that the limited lookback would be available only for stock in which the market maker is a specialist.

I am offering the amendment for two reasons. First, there is no reason to eliminate the lookback for specialists. Stock does not lend itself easily to the sort of tax manipulation that we have heard about in the commodity futures area. Stock prices are not as violatile as commodity futures prices.

Moreover, market specialists are closely regulated by the stock exchanges and by the Securities and Exchange Commission. Their business is making markets. They are not in the business of marketing tax shelters to outsiders.

Second, it is impractical to eliminate the lookback for specialists. That is because a specialist has a hard time determining what stock he has in hand. Stock transactions take days to clear. A stock that a specialist may have thought he was buying for a customer may be refused by the customer, or there may have been a misunderstanding. The specialist does not know for sure what he has until days after each transaction.

This is a technical amendment. It is something that I would have raised in the Finance Committee, had I been aware of the need for it in late June.

I have spoken personally to the Assistant Treasury Secretary, Buck Chapoton, and to the chairman, Senator DOLE, about it. I have personally seen to it that the amendment was cleared on both sides of the aisle.

This will give fairness to the operators on the floor of the exchanges. It will see that it represents a modification of a present arrangement but in no significant way a transformation. It is particularly, of course, important to dealers who make the markets, the so-called market specialists, who, by offering at any given time to buy or to sell a particular stock, a particular security, are the hubs of activity in these markets. We do not wish in any way to impair their activity, as much as a layman can do it. We wish them well. We wish them all to prosper, and we wish their markets to do so, and we wish the investors to do as well, and the firms that their investments have invested in. Such is our disposition in these matters. I believe my colleague would wish to speak on this matter and I am happy to yield to him.

Perhaps the Senator from New York would wish to take time on his side at this point.

Mr. President, I must ask, I have been delinquent, is there a time agreement on this amendment?

The PRESIDING OFFICER. The Senator is correct. There is a 30-minute time limitation.

Mr. MOYNIHAN. Is it equally divided?

The PRESIDING OFFICER. That is correct.

Mr. MOYNIHAN. Then perhaps the Senator from New York, being the only Senator on that side of the aisle at the moment, would yield himself such time as he desires.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Mr. President, I join with my distinguished colleague from New York in moving the adoption of this amendment, inasmuch as it is intended to correct an inadvertent, I believe, deficiency that would occur of a total elimination of the 30-day lookback provision as it pertains particularly to the specialists. The specialists, as defined by the SEC on the various exchanges, are an absolute necessity for maintaining an orderly market. Without giving them sufficient time in which to allocate which account they will place the securities, particularly when they are attempting to make that market, we will destroy the viability of a system that has been an effective tool and part of the American economy, particularly as it relates to our exchanges in the sale of stock.

The amendment is a compromise amendment. It would allow those market makers on the floor of the national security exchanges known as specialists 7 days to identify whether a security is held for long-term capital gains. This is the bare minimum that can be done without risking the crippling of our capital markets. The amendment has the support of the Treasury and the Finance Committee. The Joint Committee on Taxation has judged that it will have a negligible revenue effect.

But I must caution my colleagues, that we will merely avoid dealing a crippling blow to the securities markets by adopting this amendment. I have here, and will submit for the RECORD assessments by the Chairman of the Security Exchange Commission, John Shad, and representatives of the specialist profession that market makers require a 30-day lookback in order to perform their functions properly.

I do not feel that we, as responsible representatives, can approve this amendment and believe that we have truly come to grips with the full scope of the problem. We must adopt this compromise here today and then we must carefully assemble the information that is necessary to assess the full impact of the elimination of the 30-day lookback on the functioning of the markets.

I cannot stress enough that this is not a tax shelter. This amendment allows professionals who insure the soundness of the securities markets will not be deprived of a right we allow every other investor—the right to take the effects of taxes into account when planning their investments.

I greatly appreciate the support of the Finance Committee and the Treasury for this compromise amendment. I look forward to the support of my many distinguished colleagues.

In title V, in the bill before us, the Finance Committee has, quite properly, eliminated a tax abuse that results from the 30-day lookback provision.

Under present law—Internal Revenue Code section 1236—a securities dealer is allowed, upon acquiring a security, 30 days—30-day lookback—in which to clearly identify whether the security is held for investment thereby receiving favorable capital gains treatment. This allows market makers a reasonable period of time in which to respond to market developments. According to critics, the problem created by the 30-day lookback is that broker-dealer limited partnerships have been set up purely to take advantage of the tax opportunities presented.

I have no quarrel with eliminating the lookback for these partnerships. However, Congress should be able to correct one problem without creating another. The manner in which this abuse has been eliminated has claimed an unintended victim, those traders of securities who are obligated to make a market in a security.

Marketmakers have unique responsibilities arising from their obligation to maintain an orderly market even in the face of tremendous market pressure. During a significant movement in the market these traders must stand ready to make a market by buying or selling securities in accordance with the need for liquidity in the market. During such a run in the market a specialist may continually accumulate a position that the specialist had no intention of acquiring.

In a volatile up and down market a marketmaker will not even be able to judge what disposition would be in his long term best interest. These responsibilities, which are critical to the functioning of our markets and the process of capital formation, give rise to the need for a lookback provision limited specifically to market makers. It is essential to the market maker that he be able to look back over the movement of the market.

Mr. President, I further add that I believe that the 7 working days that we

provide will not be totally adequate to accomplish the important mission that the specialists are charged with. However, it is better than 1 day and it certainly moves in the right direction in restoring what I consider to be a balance to the marketplace.

It would be my hope that, after a period of time, this body and the House would see that additional time would be provided to the specialists with no loss in income to the Treasury.

Mr. President, I strongly support and urge the adoption of what I consider to be necessary remedial legislation.

Mr. MOYNIHAN. I thank my colleague from New York, who has been indefatigable in expressing his views on this matter. He understands it in great detail, and he has followed it, which is a natural concern to our State as to other States.

I see our distinguished colleague from Illinois has risen. Maybe he would wish to speak on the matter which I know has concerned him.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I wish to thank my friend from New York for his introduction of this amendment. This is the lookback amendment.

May I ask my distinguished friend from New York whether he contemplates offering later this morning the so-called transitional amendment that includes the three steps in the transitional process that we discussed in the past?

Mr. MOYNIHAN. I would say to my friend from Illinois that the amendment will be offered, but it is technical and highly so and there are some matters to be worked out with the staff of the Joint Tax Committee so that we have a good, clean bill and everyone understands it. But the Senator is entirely right. These amendments are listed in the agreed-upon matters that come before us. He may be sure that they will be brought up and, of course, that he will have the fullest opportunity to participate in these matters, as he has done.

Mr. DIXON. May I ask my friend if he is indicating that that matter will be taken care of here on the floor of the Senate, not in the conference committee at a later date but now during the course of time that we are considering this bill?

Mr. MOYNIHAN. That is my present thinking. I wish to discuss it with the chairman of the committee. It is clearly our intention that this matter be dealt with. I can speak to the distinguished Senator later on that, if he wishes.

Mr. DIXON. Mr. President. I thank the distinguished Senator from New York for his accommodations in this matter. I think he knows, as do his colleagues that support this straddle tax contained in title V of this bill, that some of us here very strongly oppose what is being done here and very strongly support the version that has been adopted by the House Ways and Means Committee, which we believe is the better version to support that important industry in our State and the agriculture industry generally in the country.

But I do wish to say here publicly that I am indebted, as is our senior Senator from Illinois (Mr. PERCY) and others, for the many accommodations given us by the senior Senator from New York in connection with these amendments. He has been very open with us and very fair.

I assume, on the basis of what he has now said, that, in addition to this lookback amendment, he will be offering, in due course, before the completion of this bill on next Wednesday, that three-step transitional amendment has been shown to me on several occasions. While we will not then feel supportive of the legislation contained in title V, I can say that we appreciate the courtesy accorded us. I thank him for his time and efforts, as well as the distinguished Senator from Kansas, the chairman of the Finance Committee.

Mr. MOYNIHAN. Mr. President, I appreciate those remarks from the Senator from Illinois.

Mr. SYMMS. Will the Senator from New York yield to me?

Mr. MOYNIHAN. I am happy to yield to my friend from Idaho.

Mr. SYMMS. I thank the Senator from New York for yielding.

I was off the floor momentarily. I just want to ask a question. Is the Senator offering a 7-day lookback for the specialists?

Mr. MOYNIHAN. That is correct.

Mr. SYMMS. One of my concerns is, as I understand it now they actually do not get the reconciliation until the eighth day. Have the exchanges assured us that they will be able to speed up their computer operation so that they can actually accomplish this?

Mr. MOYNIHAN. This is seven business days. We are given to understand that this is not a problem.

Mr. SYMMS. My concern is that, to my knowledge, there has not been any abuse on taxes with the specialists.

Mr. MOYNIHAN. No.

Mr. SYMMS. They presently have a 30-day lookback. I was wondering where the 7 days came from. Why do we not have 15 days?

Mr. MOYNIHAN. We asked for 15 calendar days, but 7 business days was the most that could be secured from the Treasury.

Mr. D'AMATO. Would the Senator yield?

Mr. MOYNIHAN. I am happy to yield.

Mr. D'AMATO. If I might answer my distinguished colleague on this point, the fact is that this has been an overreaction, this moving to only 7 days. It is better than nothing, because if we kept it at 1 day we would create chaos in the marketplace.

I believe my colleague, Senator SYMMS, is absolutely right. There is no necessity to even tamper with this, as this 30-day lookback period applied its application to the specialists. It is a total overreaction. I believe the Treasury has taken the wrong step in saying they would only support 7 days. Mr. Shad, Chairman of the SEC, has indicated in a letter dated July 16, 1981, to me that he supports a retention of the 30-day lookback for specialists on the national security exchanges.

Mr. President, I ask unanimous consent to have the letter from Mr. Shad printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SECURITIES AND EXCHANGE COMMISSION,
Washington, D.C., July 16, 1981.

Hon. ALFONSE M. D'AMATO,
Chairman, Subcommittee on Securities, Senate Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR CHAIRMAN D'AMATO: This is to confirm my support of your efforts to amend H.J. Res. 266 to retain the 30 day look-back for specialists on national securities exchanges. In fact, I would recommend retention of that provision for all legitimate market makers. This is, of course, my personal view, since the full Commission has not functioned on the question.

Stock exchange specialists perform a vital function by providing the liquidity necessary to ensure the efficiency and orderliness of the securities markets. Section 1236 gives due deference to this function in allowing specialists and other securities dealers a thirty day period to determine whether a particular purchase will be held in inventory—and be subject to ordinary tax treatment—or be placed in the dealer's investment account—where it may be eligible for capital gains treatment. While I am aware of reports of the abuses of the provision by limited partnerships formed for the purpose of trading in securities (as opposed to acting as a dealer or market maker), deletion of this provision for bona fide dealers and market makers (including specialists) will increase the risk of their performing an essential function for the Nation's individual and institutional investors.

Please call if I can be of further assistance.

Sincerely,

JOHN S. R. SHAD,
Chairman.

Mr. D'AMATO. Mr. President, that would not have cost the Treasury any money. It would have continued to provide an orderly manner for which these transactions could be accomplished. I guess it is a matter of pride of authorship for some people. Some of the specialists spoke to the Treasury and they said, "Oh, we can get away with 7 days." I am accepting to this as 7 days being better than 1 day. I do not believe that we have acted responsibly in this case. It is better than nothing. That is why I am moving and supporting my distinguished colleague from New York, Senator MOYNIHAN, that it be at least given 7 working days.

Mr. SYMMS. I appreciate the remarks of the Senator very much.

I would like to ask the senior Senator from New York one other question. I came on the floor when my friend from Illinois, Senator DIXON, was asking about is it the intention to offer some corrective amendments to this?

Mr. MOYNIHAN. Yes, there are a number of them, some or all of which will be offered. Some may be taken up in conference. These are matters that require a fair amount of work with the staff.

Mr. SYMMS. I thank the Senator very much.

In closing, I would say, along with what Senator D'AMATO just said, I support this amendment, but I do so only because it is better than the very bad situation in the bill. I personally am very

opposed to the portion of the bill that deals with the whole section on the commodity tax straddle question. I think it goes far too far. I have made this known to the chairman of the committee and the Treasury. I think the House position is much better than what we have in the Senate.

I hope by the time we get to conference on this bill, there may be some reconciliation which could be considered by this body with the House. I know the Senator and I dealt with the House last night. If they are as tough with the Finance Committee as with the Public Works Committee, maybe some of my fears will be set aside.

Mr. MOYNIHAN. My distinguished friend will recall that at the hour of 10:45, the House conferees decided, in their terms, to yield to the Senate conferees. We sat there longer than they, which sometimes determines the outcome.

The PRESIDING OFFICER. Who yields time?

Mr. MOYNIHAN. Mr. President, I am happy to yield 2 minutes to the Senator from Illinois.

Mr. DIXON. I thank the Senator from New York for yielding.

I would say to my distinguished friend, the Senator from Idaho, that immediately prior to his coming to the floor I had a discussion with the Senator from New York. The Senator from Idaho will recall that we looked at a transitional amendment containing three points which had been given to me by the aides to the Senator from New York several days ago.

I want to say that it is still my understanding that in the course of these proceedings before we pass this bill next Wednesday, the Senator from New York, not in the conference committee but here on the floor, will be offering that transitional amendment.

I understand that from representations made to me by the distinguished senior Senator. I understand that to be the case.

Mr. SYMMS. Will the Senator from Illinois agree with me on the statement I made about the fact that the approach to close the appearance of abuses is much better taken care of in the House version than what we have done thus far here in this body?

Mr. DIXON. I will say to the Senator from Idaho that I am indebted, as I indicated publicly here, to the distinguished senior Senator from New York and the chairman of the Finance Committee, the Senator from Kansas, with respect to this subject matter. I completely disagree entirely with their approach. I think the House Ways and Means Committee approach is a much better one. I think all of this has been handled too hurriedly.

On the three prior occasions, this very question has been rejected earlier in this session of the Senate by the body, a majority of both the Republicans and Democrats. I am distressed by what is occurring. I do not think adequate hearings have been held.

I think the approach is wrong, but I want to say once again that the Senator from New York and the Senator from Kansas have been very courteous and kind. I only ask for assurance that here we do have the transitional amendment. That assurance up to now has been given and I am grateful for it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOLE. As I understand it, there is no objection to the pending amendment. Is that correct?

Mr. MOYNIHAN. That is my understanding.

Mr. DOLE. We will get into the other matter later. I do not suggest that I would support any transitional rule which would permit people to avoid paying taxes. If that is one of the rules, I would oppose it.

Mr. MOYNIHAN. Mr. President, I am prepared to yield back our time.

The PRESIDING OFFICER. Does the Senator from Kansas yield back his remaining time?

Mr. DOLE. Yes.

Mr. MOYNIHAN. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

So Mr. MOYNIHAN's amendment (UP No. 263) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, I think the pending business is the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I understand the amendment of the Senator from New Jersey is next, with a 2-hour time limitation.

Mr. BRADLEY. Mr. President, there is a 2-hour time limit, but I do not think it will require 2 hours.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

UP AMENDMENT NO. 264

(Purpose: Providing targeted rate schedules)

Mr. BRADLEY. Mr. President, it is unclear at this point how many Senators would like to speak. Therefore, I will not agree to reducing the time of 2 hours on this amendment.

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) for himself and Mr. MITCHELL proposes an unprinted amendment numbered 264.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, beginning with line 11, strike out all through the matter preceding line 1 on page 15 and insert in lieu thereof the following:

(a) RATE REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	11% of the excess over $3,400.
Over $5,500 but not over $7,600	$231, plus 14% of the excess over $5,500.
Over $7,600 but not over $11,900	$525, plus 16% of the excess over $7,600.
Over $11,900 but not over $16,600	$1,213, plus 19% of the excess over $11,900.
Over $16,000 but not over $20,200	$1,992, plus 21% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,874, plus 25% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,974, plus 29% of the excess over $24,600.
Over $29,900 but not over $35,200	$5,511, plus 33% of the excess over $29,900.
Over $35,200 but not over $45,800	$7,260, plus 42% of the excess over $35,200.
Over $45,800 but not over $60,000	$11,712, plus 48% of the excess over $45,800.
Over 60,000	$18,528, plus 50% of the excess over $60,000.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	10% of the excess over $3,400.
Over $5,500 but not over $7,600	$210, plus 12% of the excess over $5,500.
Over $7,600 but not over $11,900	$462, plus 14% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,064, plus 17% of the excess over $11,900.
Over $16,000 but not over $20,200	$1,761, plus 18% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,517, plus 23% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,529, plus 26% of the excess over $24,600.
Over $29,900 but not over $35,200	$4,907, plus 30% of the excess over $29,900.
Over $35,200 but not over $45,800	$6,497, plus 41% of the excess over $35,200.
Over $45,800 but not over $60,000	$10,843, plus 47% of the excess over $45,800.
Over $60,000	$17,517, plus 50% of the excess over $60,000.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500.	10% of the excess over $3,400.
Over $5,500 but not over $7,600.	$210, plus 11% of the excess over $5,500.
Over $7,600 but not over $11,900.	$441, plus 12% of the excess over $7,600.
Over $11,900 but not over $16,000.	$957, plus 16% of the excess over $11,900.
Over $16,000 but not over $20,200.	$1,613, plus 17% of the excess over $16,000.
Over $20,200 but not over $24,600.	$2,327, plus 22% of the excess over $20,200.
Over $24,600 but not over $29,900.	$3,295, plus 25% of the excess over $24,600.
Over $29,900 but not over $35,200.	$4,620, plus 28% of the excess over $29,900.
Over $35,200 but not over $45,800.	$6,104, plus 40% of the excess over $35,200.
Over $45,800 but not over $60,000.	$10,344, plus 46% of the excess over $45,800.
Over $60,000	$16,876, plus 50% of the excess over $60,000.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every

individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	11% of the excess over $2,300.
Over $4,400 but not over $6,500	$231, plus 14% of the excess over $4,400
Over $6,500 but not over $8,700	$525, plus 16% of the excess over $6,500.
Over $8,700 but not over $11,800	$877, plus 19% of the excess over $8,700.
Over $11,800 but not over $15,000	$1,466, plus 21% of the excess over $11,880.
Over $15,000 but not over $18,200	$2,138, plus 23% of the excess over $15,000
Over $18,200 but not over $23,500	$2,874, plus 27% of the excess over $18,200.
Over $23,500 but not over $28,800 %	$4,305, plus 32% of the excess over $23,500.
Over $28,800 but not over $34,100.	$6,001, plus 41% of the excess over $28,800.
Over $34,100 but not over $44,700	$8,174, plus 45% of the excess over $34,100.
Over $44,700	$12,944, plus 50% of the excess over $44,700.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	10% of the excess over $2,300.
Over $4,400 but not over $6,500.	$210, plus 12% of the excess over $4,400.
Over $6,500 but not over $8,700.	$462, plus 14% of the excess over $6,500

On page 20, strike out lines 10 through 17, and insert in lieu thereof the following:

"(1) on July 1, 1982, as if the reductions in the rate of tax under section 1 reflected in the tables for taxable years beginning in 1982 were effective on such date, and

"(11) on July 1, 1982, as if such reductions reflected in the tables for taxable years beginning after 1982 were effective on such date.".

Mr. BRADLEY. Mr. President, the amendment I have sent to the desk is a 3-year tax cut that is targeted to individuals earning under $50,000. It has the same revenue loss as the bill that the Senate Finance Committee reported. It has the same withholding schedules. It is a 3-year tax cut.

Mr. President, let me explain why I propose this amendment.

As the Senate knows, in the last 2 days I have proposed a 1-year tax cut and I have proposed a phased-in 2-year tax cut. The purpose of those two amendments was to recognize that interest rates are hurting many segments of our society, endangering our national security, and destabilizing the international financial system: The only way to get interest rates down is to have a Government policy more credible than the administration's and to have a tax program that recognizes that fiscal and monetary policy are inextricably entwined. A 1-year tax cut provides the right signal to the financial markets, a signal that says we are pursuing a course which is fiscally responsible and, therefore, has some chance of getting those interest rates to come down.

Mr. President, I have proposed those two amendments with interest rates primarily in mind.

I have said throughout the debate on the tax bill in the Finance Committee that my interest was to provide real tax relief to individuals, to promote risk-taking, to see interest rates come down, and to build a consensus for economic growth.

Mr. President, after seeing those two amendments receive less than 30 votes of my fellow Senators, I have concluded that a responsible fiscal tax cut is not going to be supported in the Senate. A 1-year tax cut, although it targeted significantly more tax relief to individuals earning under $50,000, will not be adopted. I also recognize that the phased-in 2-year tax cut for individuals will not be adopted. Therefore, Mr. President, we are presented with doing nothing to the 3-year tax cut that is supported by the administration and that the Senate Finance Committee reported to the floor, or attempting to alter that 3-year tax cut in a way that is more consistent with the objectives that I have stated, which are providing real tax relief, promoting risk-taking, and building a consensus for economic growth.

So, Mr. President, given the fact that this 3-year tax cut is moving down the tracks and clearly is going to overrun the Senate, I have decided to propose this 3-year tax cut amendment which, in my view, if it is the Senate's will to have a 3-year tax cut, makes that tax cut more acceptable. It does so by providing greater tax relief for individuals with under $50,000 in income.

Mr. President, we have been presented with a number of alternatives and I think it is the will of Senators on my side of the aisle not to spend more than the Senate Committee on Finance has agreed to spend on tax cuts. For example, the revenue loss in the Senate Finance Committee bill in calendar 1982 is $56 billion, in fiscal year, $36.9 billion, in calendar year 1983, $115 billion, in fiscal year 1983, $93 billion.

Mr. President, the amendment I have proposed does not exceed that revenue loss. The amendment I have proposed has in it every provision that the Senate Finance Committee has adopted. The only difference is that it skews the individual rate reductions to persons earning under $50,000 in income. I offered this amendment in the Finance Committee after my 1-year tax cut was rejected, the 1-year tax cut that provides significantly more relief to individuals earning under $50,000. This provides less than the 1-year tax cut. It provides less relief for individuals with under $50,000 in income, but provides more than the Senate Finance Committee bill.

I want to make the point, Mr. President, why I think it is important to provide this greater tax relief for individuals earning under $50,000. The argument that we have heard in committee and on the other side and in the media is that this is a redistribution amendment. First, let me say it is not significant redistribution. I do not think it would qualify as redistribution.

Also, I make the point that it is not the intent of this amendment to kill risk-taking in the society or to punish those individuals who happen to have wealth. In the bill, we have provided for a reduction from 70 to 50 percent on investment income. The purpose of that is to promote risk-taking an innovation and capital formation. That is still in this amendment, but it is this Senator's view that the combination of that reduction in tax on investment income and across-the-board rate cuts provides insufficient relief for individuals earning under $50,000.

The reason that I make this amendment, Mr. President, is not for redistribution reasons but for economic growth reasons. I think it is essential that we build a consensus for economic growth and a consensus means all segments of our society. It does not just mean the business community or individuals who have wealth. It means getting all Americans to understand that unless our economy is growing, we shall not be able to continue to have the expectations of rising living standards, which this Senator believes have come to be taken as almost a birthright for most Americans. Unless we have a growing economy, we will not be able, as this budget debate this year and in ensuing years will demonstrate, to have sufficient revenues to keep the promises we have already made to the old, the disabled, and the sick.

What this amendment does is say let us get everybody on board the train of economic growth and let us do it in a way that provides some benefits to those individuals who will be hardest hit by social security tax increases and by inflation pushing them into the higher tax brackets. The spirit of this amendment recognizes that we want everyone in this country to recognize that, in order to increase productivity, we need to increase investment. In order to increase productivity, we need to increase worker participation in accelerating the learning curve, in maximizing innovation in our society.

This amendment is offered in the same spirit that, in the budget debate, I fought for trade adjustment assistance. To one person, trade adjustment assistance is a welfare program. To another person, to this Senator, trade adjustment assistance is an essential prerequisite to economic growth, an essential prerequisite to a growing economy that participates actively in international markets. If we are to maximize our comparative advantage, we clearly are going to have industries that become less competitive with those of Japan or West Germany.

These industries are institutions, yes, but they also comprise many individuals. What this Senator argues is that if we are to grow and if part of the way we are to grow is to maximize our comparative advantage, we have to find some way to take care of those individuals who find themselves, at 50 or 60 years of age, caught in an industry that has suddenly lost its competitiveness.

That is what trade adjustment assistance is all about, Mr. President. In order to get those workers in older industries on board the train of economic growth in the international context, we are going to have to provide some cushion for them and to retrain them so that they can make the transition from the declining industries to the growing industries.

It is in the same spirit, Mr. President, that I offer this amendment. If we are going to get individuals who earn under $50,000 to go along with the business incentives that are critical to maximizing productivity and international competitiveness, we are going to have to as-

sure these individuals that we have a tax cut that is not skewed to the wealthy alone but that provides relief for them, relief from the higher social security taxes and the inflation that pushes them into higher tax brackets. That is the purpose of this amendment.

It is also offered in the same spirit—as we have said a number of times on the floor—that says that this economy is not separate from the world economy. A State's economy—whether it is Kansas or Colorado or Ohio or New Jersey—cannot be separated from the economy of this country. We are all interrelated; we are a part of the whole. An illness in one part is an illness in the whole. Similarly, the economy of the United States has to be a part of a growing world economy.

It is the recognition of that interrelatedness that also motivates me to offer this amendment. It recognizes that individuals earning $50,000 and under are absolutely essential toward building that consensus for economic growth and international competitiveness. So it is with that spirit in mind that I have offered the amendment, and it is with that spirit in mind that I will debate the amendment, if need be.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ARMSTRONG). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, again, so that the Senate may know what this amendment is all about. this is an amendment which takes the same revenue loss as the Senate Finance Committee measure. This tax cut does not cost more and therefore does not create a bigger deficit than that of the administration-Senate Finance Committee bill. It is a 3-year tax cut. and it even has the same withholding tables.

Probably a little known fact is the withholding table issue. The individual will receive a tax cut under the Senate Finance Committee measure in July of 1982. That is when the 10-percent cut will go into effect. Normally, withholding changes take effect in January; that is, on a calendar year basis rather than the fiscal year basis in the administration's bill. I would not be one to suggest that the timing of the tax cut has any political motivation, although there will be elections in November 1982. The individual who has his withholding taken out of his paycheck and who finds that he has less withheld in July 1982. as opposed to January 1982. might indeed remember this tax cut and those who advocated it.

This amendment provides that even if we keep the same withholding schedules, the same 3 years, and the same revenue loss, an individual earning under $50.000 should and would receive a greater tax cut. Let us just take one hypothetical example.

In 1982 an individual earning $30.000 who is married and has two dependents, under the Finance Committee bill would receive a tax cut of $499. Under this tax cut amendment he would receive $562. In 1983 and 1984 that individual would also receive significantly more tax relief under this amendment than under the Senate Finance Committee bill.

So opposition to this amendment cannot derive from the argument that we will create greater deficits. We cannot. We will not.

Opposition to this amendment can only rest on a doctrinaire adherence to the concept of across-the-board cuts. It can only derive from the belief that somehow or other individuals making under $50,000 should not get a greater tax cut.

Mr. President, that is opposition which I do not understand, for it is individuals earning under $50,000 who are hardest hit by the increases in social security taxes and by the bracket creep which will push individuals into higher tax brackets.

What this amendment says is let us recognize that. Let us take the President's 3-year tax program and let us target more to those making under $50,000.

This amendment does not do all of those things that I had hoped would be in a tax cut. I supported a 1-year tax cut. I have supported a phased-in 2-year tax cut because I think that is an approach which will get interest rates down.

But that is not the world we are living in. I see the train coming down the tracks. We are going to have a 3-year tax cut and so this amendment simply says if we are going to have a 3-year tax cut let us take the same revenue loss figures, the same withholding tables, and let us target more relief to individuals earning under $50,000.

Under this approach, in 1983 an individual making $35,000 with two dependents would get $1,043 back in a tax cut, versus the $916 he or she would get under the administration-Finance Committee approach.

Mr. President, as I look at the economy, I have the greatest fear about high interest rates, not only because they are killing the auto dealers, the housing industry, the savings and loans, farmers, and any business that has high inventories they must finance out of bank debt, but also as I argued on the floor of the Senate in the past 2 days, because it affects our national security and destabilizes the international financial system.

It threatens our national security in two very direct ways: One is that it encourages oil companies to deplete their oil stocks instead of holding them, and if the oil stocks are depleted and we have another interruption in the Middle East, which is a real possibility, we will not have any cushion and oil prices will skyrocket much more than they would if we had high oil stocks.

High interest rates create a situation where oil stocks are depleted and this endangers our national security.

Internationally, because ours is the dominant economy, the United States maintaining very high interest rates forces our European allies to raise their interest rates. The result is that the country that we want to increase defense expenditures, West Germany, to share the burden of NATO, will not be able to increase those defense expenditures as much as we would like because they will be paying more in interest to finance their deficit.

Those are two very real reasons why our national security is endangered by high interest rates.

So, Mr. President, the amendment that is before the Senate now is related specifically to the issue of who gets the tax cut, and I argue once more that the reason we should provide more tax relief to individuals earning under $50,000 is because we need them on the train of economic growth and we need those individuals to realize that they are included in this program to make America more competitive internationally and that a Congress that is enacting a 3-year tax cut recognizes that they should be made whole for the increases in taxes that they will be paying from social security increases and from bracket creep.

It is a very clear choice. Those who oppose this amendment cannot say that they are opposing it because it is a 1-year tax cut and not a 3-year tax cut. It is a 3-year tax cut. They cannot oppose it for any other reason than that they prefer to adhere to a doctrinaire approach of across-the-board tax cuts instead of providing upper income individuals with the 70-to-50 reduction in investment income and pushing the rest of the tax relief more to individuals earning under $50,000.

The only reason that they can oppose it is because they do not want individuals making less than $50,000 to get that relief, or that they adhere kind of blindly to the concept of across-the-board cuts.

Mr. President, I hope that Senators will realize that people who earn under $50,000 actually deserve, for long-term growth reasons, a greater tax cut than the administration has proposed and the Finance Committee has reported.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I understand we are on controlled time.

The PRESIDING OFFICER. Who yields time?

Mr. BRADLEY. Mr. President, I yield 5 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator is recognized.

Mr. METZENBAUM. Mr. President, I have not given this amendment nearly as much attention or dedication as has the distinguished Senator from New Jersey who, I know, has worked diligently and hard in order to try to make this tax bill a more equitable one, and I think it might very well be stated that this is the fairness and equity amendment because the country seems committed

and the Congress is certainly committed to cutting taxes.

The real question is who is going to get the benefit of those tax cuts? I think this amendment moves very far in trying to rectify a situation that is indeed a bad one, an unfair one.

When you have a tax bill that requires those who earn less than $10,000 a year to have their share of the tax burden increased 50 percent, while those earning in excess of $100,000 a year have their share of the tax burden cut 25 percent you know that something has gone wrong, that in some way it just has not worked out right for the people of this country.

This tax bill, as I look it over, is an amazing document. No one would have believed it would be possible for any group of Congresspersons or Senators to come before the Congress in 1981 with a measure that goes as far as this one. The amendment with respect to estate taxes, I never heard any complaint at all on that subject having to do with taxes in connection with estates after a husband or wife is deceased. There was some complaint about the amount but I do not think anybody ever thought they were going to totally repeal any tax at all. That is in this bill.

Then when you look at what has been done as far as the rates themselves have been concerned, and the cutbacks, whether it has to do with the capital gains question, making it a maximum now of 20 percent, or whether it has to do with the rates themselves, a maximum of 50 percent, one questions whose tax bill is this and what is it really all about?

I am not going to say that this amendment is going to solve all the problems of this tax legislation, but I think it would move us very far in the direction of correcting the inequities that exist. It is far more reasonable, it is far more equitable, and it is far more considerate of middle-income Americans.

Middle-income Americans have been sitting out there waiting for a tax cut they think would have some impact upon their ability to put bread on the table for their children. They have been concerned about trying to buy homes, they have wanted to be able to send their kids to college. But what are we doing with this tax bill? We are giving all of our attention to capital gains treatment and to stock options and a host of other areas that are special privileges for those who have able spokespersons around the Halls of Congress.

This amendment would move us dramatically, realistically, and fairly in the direction of equity, and I commend the Senator from New Jersey for his leadership in offering this amendment, and I hope the Senate will see fit to accept it.

Mr. BRADLEY. I thank the Senator from Ohio for his comments and his support.

I will be pleased to yield 10 minutes to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator.

Mr. President, let me begin by acknowledging the leadership of the Senator from New Jersey (Mr. BRADLEY) on these tax questions over the last several weeks.

As the leader of a special economic task force within the Democratic Party here within the Senate he has time and again taken the lead on critical issues. He is doing so today.

Mr. President, I want to indicate my strong support for this amendment.

I think that this amendment, more than any other, will be seen as the tax fairness amendment. It is a straightforward attempt to distribute the tax cut more fairly among people in all income groups across this country.

This amendment accepts the Reagan administration's proposal for a 3-year tax cut. But it divides the benefits of that tax cut in such a way that those with incomes above $50,000 do not get the massive windfall that they would under the Reagan plan. If this amendment passes, the wealthy would get somewhat less than the President proposes, and those families with incomes below $50,000—those who need the tax cut help the most—would get more of the tax relief Congress is about to provide.

The other evening, I had the opportunity to meet with a group of economists and business people from across the country. The tropic of our discussion was the prospect for economic recovery under so-called Reaganomics. We discussed the total impact of the new administration's program, the combination of budget cuts, changes in the tax law regulatory relief and increased spending, a basic issue was whether the combination of all these things falls with equal weight on people across our society, people in different circumstances and people in different income groups. The effort of the United States to work through our economic problems is going to require struggle and sacrifice for some period of months, perhaps for 1 or 2 years. The ultimate success of that effort will depend upon holding a strong consensus in this country. The only way, in the end, to hold a consensus during a time of struggle and sacrifice is to make one that the burdens are shared on a fair basis.

That is why the formula for distributing the tax cuts is absolutely essential.

Mr. President, unless we build more equity into this tax cut than the Reagan people are suggesting, there is no way we will be able to hold the public faith and the public support for a national economic recovery program through the hard months that are ahead.

Mr. President, if you consider the effect of the higher social security taxes that are coming, if you look at the effect of inflation that is anticipated, many Americans with incomes below $50,000 a year will actually be falling behind under the Reagan tax package. They will be net losers. They are being asked to be net losers so that those in the very high-income brackets can be net gainers in a very large way.

Well, there is absolutely no justification for the kind of tax cut distribution proposed by President Reagan. The people in the Reagan administration are floating the notion that somehow or other the people with very high incomes know better how the Nation's resources should be invested and that they are more likely to save. Frankly, I think that is insulting to everybody else. Most of the people in my State who earn $12,000 or $14,000 or $18,000 or $22,000 a year are struggling to save, and they do put money aside. Otherwise they cannot send their kids to college; otherwise they cannot buy a house or they cannot buy and acquire some of the other things that people ought to be able to have in our kind of a county in 1981, 1982 and 1983.

Mr. President, people at middle income levels do, in fact, need to save and want to save. And they ought to be given a chance to save. They ought to be given more of this tax cut so that they can have an opportunity to get ahead, to put some money aside, to strengthen their own family finances. When middle income Americans save, they too provide that larger savings pool that we need for capital investment here in the country to modernize our industry and provide more jobs.

This tax cut bill will be flawed if it does not direct adequate relief to those middle income Americans. That is a critical defect in the Reagan plan.

The Reagan plan looks out basically for those people at the high end of the income scale. That is not surprising because, as I look around this administration, that is who the administration is.

I can see why people who earn $200,000 a year would think the Reagan tax cut is terrific. Because the President's plan is terrific if you earn $200,000 a year, as the President does, and as many of his friends do. But if you earn $30,000 or $18,000 or $12,000, as most Americans do, the Reagan tax package is not fair. It will not provide enough help.

What we are trying to do is correct that defect here. We are accepting all other basic premises of the President in this amendment. We are saying, "Yes, there should be tax cuts; yes, the tax cuts should total the amounts proposed by the President; yes, the tax cuts should be broad-based; yes, we will talk in terms of 3 years, but let us direct that tax relief on a fair basis to the people in our society who need it the most and who will put the funds to good use."

So that is the sole purpose of this amendment. That is why it is important that we have a clear debate on the issue.

Now my feeling is very strong. The rank and file people of this country do need tax relief, they have been hurt by inflation, they have been hurt by a loss in real income in the last few years. They are saying that to us in every possible way. They are saying it to county officials, city and State officials, and they are certainly saying it to us here at the Federal level. So I support the idea of providing this tax relief.

But we can not in any honest way say that this bill before us is a fair tax bill. And we will not be able to say it is fair unless we make this change to distribute more of these proceeds to people under $50,000. And unless the tax cut is fair, we will make it much more difficult for the American people to keep up our

common resolve to overcome our economic problems.

That is why it is essential that we move in the direction of this amendment.

Mr. President, Senators on this side of the aisle have made a number of attempts to formulate different packages with tax cuts for 1 year, tax cuts for 2 years, no tax cut in the first year and a tax cut later in time. Each proposal was put forward in an attempt to devise a better tax cut. This proposal is one important effort to improve this bill.

This amendment arises from a desire to provide a tax cut that is better, that is fairer, that is more equitable, and one that will do more good for more people. I think we have a solid approach here. It is not perfect. We do not have perfect choices in situations such as these. But this one meets the test of equity and fairness.

The Reagan individual tax cuts do not meet the test of equity and fairness. So it is on that basis that I hope the Senate will decide to support this amendment. It makes good sense and I think it is one that the country can continue to support.

I thank the Senator for yielding.

Mr. BRADLEY. Mr. President, I thank the Senator from Michigan for his comments.

I want to reiterate what I have already stated several times today. This is an amendment which modifies the Senate Finance Committee bill in only one way. It modifies it by simply providing greater tax relief to individuals earning under $50,000.

Again, let me state the rationale. In this tax bill there is a reduction on investment income from 70 percent to 50 percent; the tax on interest, dividends, capital gains, were all reduced. The reduction on investment income is from 70 to 50 percent.

Mr. President, that clearly benefits individuals earning over $50,000. And this Senator believes that that tax reduction is essential to creating investment and innovation and capital formation, all of which are important to make America more productive and internationally more competitive.

But, Mr. President, the Senate Finance Committee bill not only provides a reduction from 70 to 50 percent on investment income, which I support, but it also gives across-the-board tax cuts. Across-the-board tax cuts means 10 percent for everyone.

Mr. President, the real issue here is whether an individual who earns $90,000 a year can use an extra hundred dollars more than a family earning $20,000 a year. Is the benefit greater to the family earning $20,000 a year or to the family earning $90,000 a year?

I would argue, Mr. President, that since that family earning $20,000 a year will be paying much higher social security taxes and will much more likely be pushed into a higher tax bracket than the family earning $90,000 a year, that that family earning $20,000 could use the hundred dollars more and that the society as a whole would benefit more if that family got the $100.

Why? Because it would demonstrate to them that Government is concerned about the higher taxes that they are going to pay, and that Government is providing greater relief to them. And it says to the upper-income individual that we encourage you to take risks; that we encourage you to invest; and that if you invest and make it we are going to reduce the tax that you have to pay, we are going to reduce that tax from 70 to 50. But we also recognize that families struggling to pay heating bills and food bills and mortgage payments could use that $100 more than the family making $90,000 a year.

That is the simple explanation of what this amendment says. And I cannot understand why the chairman of the Finance Committee and the administration does not accept this amendment and say, "We have now provided greater tax relief to middle America." I do not understand it.

The individuals I have talked to who make more than $50,000 cannot understand it either. They say, "We do not want another $100. We are already going to get sizable increases by the reduction in the investment income tax from 70 to 50. We want you to take that extra hundred dollars that we are going to get on across-the-board cuts but that we do not need and we want you to push that into tax relief for families with incomes under $50,000."

That is the message I hear from individuals earning over $50,000. They know they are going to benefit from lower investment taxes and they see down the road a possible adverse reaction to this tax bill, namely, that the Senate would not even provide $100 more to people making $50,000 or less in this country. I cannot understand why. I cannot understand why.

The only conclusion that I can draw is that there is some doctrine at issue here, that there is some ideological commitment to the concept of across-the-board cuts.

Mr. President, that troubles me. Senators who vote against this amendment cannot say they voted against it because it costs more and it will create a bigger deficit, because it will not. It has the same revenue figures as the administration-Senate Finance Committee bill.

Senators who vote against this amendment cannot say that they wanted a 3-year tax cut but the amendment was a 1- or a 2-year. This is a 3-year tax cut. They can only say that they adhere rigidly to the concept of across-the-board cuts and that that rigid adherence to the concept of across-the-board cuts is why they have refused to give people earning under $50,000 even $100 more in tax relief.

That is the only reason that anyone can offer if they vote against this amendment.

Mr. President, to me it is a very clear issue. It is one that I do not feel the other side has addressed, and which probably they will not address. Frankly, they have the votes. But I think it is a question that every citizen in this country should ask of their elected representatives. "Why did you vote against the tax cut amendment that would not have jeopardized the tax reduction on investment income, that would not have cut back on investment, risk taking, or innovation, but would only have permitted a person earning under $50,000 to get back an extra $100?"

My rationale for this is not redistribution, but it is that in order to build a consensus for economic growth, we have to show that Government recognizes the problems that are caused by higher social security taxes and by inflation. And we have to show that Government is sensitive to the problems of families earning under $50,000, as well as to the need to generate more investment and to promote risk taking in this society.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. Who yields time?

Mr. BRADLEY. I yield 2½ minutes to the Senator from Massachusetts. It is my understanding with the Senator from Kansas that toward the end he would be willing to yield 10 minutes additional time to the Senator from New Jersey. I will wait until he returns before I make the request.

The PRESIDING OFFICER. The Senator has 2 minutes 52 seconds that he can yield without obtaining additional time.

Mr. BRADLEY. Mr. President, may I yield time from the bill? I yield such time from the bill as the Senator requires.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I join in commending to the Senate the amendment of the Senator from New Jersey. I have followed closely the work of Senator BRADLEY during the debate on this tax bill in the Finance Committee, in the Democratic Caucus and here on the floor of the Senate. In a series of different amendments in this debate, he has tried to correct the basic inequity in the Senate Finance Committee bill, and to insure meaningful tax relief for the vast majority of American taxpayers.

The Bradley amendment is a fairness amendment. It deserves the support of the Senate, because it corrects some of the worst abuses in the committee bill.

The Finance Committee bill is basically unfair to average families and to middle-income Americans. It is a bonanza for the rich. But it shortchanges everyone making less than $50,000 a year.

The Bradley amendment operates within the supply-side economics concept. It preserves the reduction in the tax rate on unearned income from 70 to 50 percent. It preserves significant marginal rate reductions for various income groups. But within these constraints, it achieves the basic goal of fairness by earmarking a larger share of the tax relief for those earning less than $50,000.

Senators who support the Reagan eco-

nomic program and supply-side theory can also support the Bradley amendment, because it retains the basic features of the administration plan, while securing a fairer distribution of the tax relief. It gives more relief to the millions of Americans who are the hardest pressed by inflation and by the increase in social security taxes.

I join with the Senator and his cosponsors in urging that the Senate accept the Bradley amendment. If we care about fairness and equity as well as about providing incentives for economic recovery and the modernization of American industry, then we should adopt the Bradley amendment, because it is responsive to these important demands.

I thank the Senator for yielding time.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from New Jersey yield time for that purpose?

Mr. BRADLEY. I yield time to be charged against the bill and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BRADLEY. Mr. President, I yield 5 minutes off the bill to the distinguished Senator from Montana (Mr. BAUCUS).

The PRESIDING OFFICER. The Senator is recognized.

Mr. BAUCUS. Mr. President, first, I pay my compliments to the Senator from New Jersey. He, more than anyone else, has led the effort to restore some sanity to the individual cuts portion of this bill. He not only has led the efforts, he is the first one to push hard—first in the committee and, since the action of the committee, in subsequent weeks and now here, on the floor—to modify the bill that is now before the Senate to make it fairer regarding income tax cuts. I think the large majority of the American people owe the Senator from New Jersey a debt of gratitude because his efforts have been very salutary and very productive and we shall some day see the results—if not immediately, then in the next weeks, months, and next couple of years.

Mr. President, when the Finance Committee recently completed its consideration of the tax bill that is before us today, I voted for the measure, since I genuinely believe we must modify our taxes and must improve our Nation's productivity.

Many aspects of the tax bill are very good, and I believe will serve their purposes.

We have addressed such important items as the marriage tax penalty, estate tax reform, and I am pleased to see that we have accepted the Democratic proposal to reduce maximum tax rates on all income to 50 percent.

We tried to help small business and we have done our best to encourage a change in our savings rates.

The so-called all-savers bill should help increase the savings at our beleaguered savings and loans and the increase in IRA's should encourage people to put more money into savings.

We have helped ESOP's and we have helped the small royalty owner.

We have done many good things in the bill, I think.

But there are still some glaring weaknesses in it and that is why I am now speaking in support of this Bradley alternative proposal.

Mr. President, I am not opposed to people earning money and becoming rich. Indeed, that is the incentive that drives our economy. It is important.

But I am opposed to using the tax system to benefit those who need the benefit the least. This is particularly true after we have very wisely and generously reduced the maximum tax rates from 70 percent to 50 percent. That helps those who have money and encourages them to invest.

That is how it should be.

But when, on the basis of vague supply side economics, we take a general tax cut which is supposed to be beneficial to all American people and even tilt that in favor of the wealthy, I must rise in protest.

The Bradley proposal seeks to modify the inflationary and inequitable administration bill by proposing a 3-year tax cut with provisions that focus more individual relief to middle- and low-income Americans. This is not an expensive proposal. In fact, it does not cost any more; all it does is tilt the balance a little bit to those who need greater relief from inflation.

Our tax system must be fair and this proposal is fair.

Alternatives are also fair, possibly making it a 2-year tax cut or, if we must have a 3-year tax cut, including a trigger to make sure the third year is warranted makes good sense. I cannot imagine embarking on such an enormous and radical change in our tax structure without providing us with an opportunity to sit back and think a bit about what we are doing and evaluating how well we are doing.

To me that is only good sense. Mr. President. But Senator BRADLEY's present proposal makes sense too and is simple.

My only complaint with the Bradley proposal is that it does not go far enough. I believe that we could do a great deal with the depreciation schedules as well.

I find it disconcerting that big business and the administration are tied so closely together that all business cannot accept a more rational and wise expensing proposal. Expensing makes sense; 10–5–3 really does not, especially if inflation rates come down.

Mr. President, I hope to see the Senate take all these measures and really craft a tax bill which will make us productive, which is not a giveaway to big business, which is not a giveaway to anybody but is fair to all.

Mr. President, I urge my colleagues to give serious consideration to the amendment before us now. It makes sense and it is the way we should go. I support it enthusiastically.

In summary, Mr. President, I have only this to say: When we combine the spending cuts that we are enacting today in this Congress, this week and next week, along with this tax bill, in about 3 or 4 months or a year or 2, the American people are going to wake up to what we have done here. What we have done is simple: We have redistributed American wealth. The greater intent, to restore productivity, to get our economy moving and to redress some of the problems that have occurred because of taxflation is obviously the primary purpose for this tax bill. That is the intent of the budget and tax cuts.

But a practical effect will be redistribution of wealth to the wealthy. Mr. President, already in America, the disparity between upper-income Americans and lower-income Americans is greater than in most countries in the world. It is greater than in Western European countries, greater than in Japan. This tax bill is going to make that disparity in America today even greater yet; so, after a few months, or next year, when Americans begin to realize, when commentators begin to comment even more about what is happening here, I think the American people are going to want this redistribution changed.

That is why I support the proposal of the Senator from New Jersey, Mr. President. It is an effort to minimize that greater redistribution. It is an effort to enact a bill which is fair. Mr. President, fairness is essential, because the more the tax system is perceived as being unfair, the more American taxpayers are not going to pay income taxes. They are not going to report income. There is going to be a greater underground economy and there is going to be more and more disillusionment with Washington and with Government generally.

Mr. President, we have to have a tax system which is fair. It is not fair, in my judgment, when we redistribute income to an even greater degree than is now true. We need to tilt this package to help lower- and middle-income people as well the wealthy. This proposal does that.

I thank the Senator from New Jersey.

The PRESIDING OFFICER (Mr. MATTINGLY). Who yields time?

BRADLEY AMENDMENT: SKEWED RATES

Mr. DOLE. Mr. President, the Senator from New Jersey proposes an amendment similar to one that he offered in the Finance Committee. If I recall correctly, that amendment was rejected by the Finance Committee by a vote of 14 to 5. That does not mean the amendment lacks all merit, but does indicate that there are many who feel the President's proposal has more merit.

We had a good discussion of the amendment there. Again, I commend the Senator from New Jersey for offering the amendment.

The Bradley amendment would offer a 3-year tax cut for individuals with a 5–10–10 sequence, as in the President's program and the Finance Committee bill. The difference is that the Bradley cut would not be an across-the-board cut: It would attempt to skew the tax cut toward the groups some call middle-income. In this case, that means taxpayers with incomes of $50,000 or less. Under the Bradley amendment, about $1.5 to $2 billion would be shifted each year from taxpayers above that cutoff point to taxpayers below that level.

Mr. President, I will say that this is a very straightforward, simple amendment. The Senator from New Jersey asks us to engage in income redistribution rather than across-the-board rate cuts. The President, and the Finance Committee, have made a commitment to an across-the-board tax cut. They have done so in the expectation that such a cut will restore incentives to work, save, invest, and help get the economy moving. To the extent the individual tax cut is artificially structured to help this group or that—as the Senator proposes—it sacrifices those goals and runs a greater risk of merely stimulating demand and fueling inflation. The latest reports show good news on the inflation front, but that does not mean that we should cease to be concerned about the threat of renewed inflation.

This is a well-intentioned amendment, Mr. President. But if you divide the extra tax reduction for the middle-income group among the taxpayers in that group, you will find that the Senator has only succeeded in giving some marginal dollars in tax reduction to each taxpayer. The cost for doing that is to sacrifice the across-the-board principle, which is what we are counting on to increase productivity and savings in the economy. I do not think that change is worth the price, particularly if it means more inflation that will eat away at the value of those extra dollars of tax reduction.

Mr. President, there are many ways to skew a tax reduction proposal to favor certain groups. We hoped to avoid that in this bill, and we have succeeded so far with respect to individual rate cuts. There are some in the other body who would prefer to give more to commodity traders, or to $5 million estates, or to oil producers generating 500 barrels a day. Those are all examples of skewing that are not in our bill. But if we want equitable, across-the-board, sustained tax relief, the Finance Committee bill—and the President's proposal—are a superior alternative. I am confident that the Senate will continue to express its preference for a better product.

Mr. President, the basic problem is that the Bradley amendment just happens to be in conflict with the policy advocated by the President. That is a judgment that the President has made.

I am not suggesting that, maybe, when we are all done and we come back here from conference, there might not be some aspects of this amendment in the conference agreement. But I think at this point it is premature. I do believe it is a well-intentioned amendment.

Mr. President, I do not want to unduly extend the debate, so I am prepared to yield back the remainder of my time.

Mr. BRADLEY. I am prepared to yield back the remainder of my time.

I appreciate the words of the chairman. That is as close as he can get to supporting the amendment.

Mr. DOLE. I did the best I could, without supporting it. The Senator from New Jersey has been very helpful to us in the committee, and I still believe that on the final vote he may be in the "yea" column—I hope.

Mr. BRADLEY. Time will tell.

The PRESIDING OFFICER. All time on the amendment has been yielded back. The question is on agreeing to the amendment of the Senator from New Jersey (UP No. 264). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN) is absent due to death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 42, nays 57, as follows:

[Rollcall Vote No. 212 Leg.]

YEAS—42

Baucus	Exon	Metzenbaum
Biden	Ford	Mitchell
Boren	Glenn	Moynihan
Bradley	Hart	Nunn
Bumpers	Hollings	Pell
Burdick	Huddleston	Proxmire
Byrd, Robert C.	Inouye	Pryor
Cannon	Jackson	Randolph
Chiles	Johnston	Riegle
Cranston	Kennedy	Sarbanes
DeConcini	Leahy	Sasser
Dixon	Levin	Tsongas
Dodd	Matsunaga	Williams

Domenici	Lugar	Tower
Durenberger	Mathias	Wallop
East	Mattingly	Warner
Goldwater	McClure	Weicker
Gorton	Murkowski	
	Nickles	

NOT VOTING—1

Garn

So Mr. BRADLEY's amendment (UP No. 264) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, I move to lay that amendment aside temporarily.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. DOLE. I would be happy to yield to the Senator from Oregon.

UP AMENDMENT NO. 265

Mr. HATFIELD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 265.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 171, between lines 16 and 17, add the following new section:

"SEC. 253. MORTGAGE SUBSIDY BOND TRANSITIONAL RULES.

"(a) GENERAL.—The table set forth in section 1104(n)(1) of the Mortgage Subsidy Bond Tax Act of 1980 is amended by adding at the end of the table the following item:

"State of Oregon	66,500,000 May 12, 1981, General Obligation Bond issues of the State of Oregon for financing for veterans qualified under the Oregon Department of Veterans' Affairs program, to provide loans for which applications were accepted prior to January 1, 1981 and for which written commitment would have been made within one month thereafter but for the requirements of sections 1102 and 1103 of the Act.

"(b) CLERICAL AMENDMENT.—The heading for the table set forth in section 1104(n)(1) of such Act is amended by striking out "city or county" and inserting in lieu thereof "state, city, or county".

"(c) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in the amendments made by the Mortgage Subsidy Bond Tax Act of 1980."

Mr. HATFIELD. Mr. President, this is one of those issues that affects only the State of Oregon.

I offer this amendment on behalf of myself and my colleague, Senator PACKWOOD.

Mr. President, in late 1980 the Congress enacted a reconciliation bill that included new restrictions upon the issuance of mortgage revenue bonds and general obligation bonds issued on behalf of veterans home loans. The Senate never fully studied this matter, or considered it on the Senate floor. The bill was forced upon us in conference on the reconciliation measure. Unfortunately, a drastic mistake was made by enacting this legislation in late November with an effective date of January 1981.

Five thousand Oregon veterans had relied upon existing law, received letters of commitment or substantially relied to their detriment on the existing Oregon veterans program. But in early January they found themselves cut off by the act. Even though extensive transition rules were provided for mortgage revenue

bonds and for specific bond issues in Chicago, for example, no transition rules were provided for State veterans' programs.

Mr. President, my amendment merely allows the State of Oregon to spend $66.5 million of a May 1981 bond sale to finance those 1,500 applicants who have so patiently waited for relief.

The Mortgage Subsidy Bonds Act was intended to allow present general obligation bonds for residences of veterans to continue. The act, however, imposed two new requirements that have imposed a severe financial impact on hundreds of Oregon veterans. These requirements dictate that substantially all of the proceeds of a bond issue be used for residential purposes and that the proceeds cannot be used to acquire or replace existing mortgages.

The difficulty lies in the fact that those Oregon veterans who have entered into landsale contracts with intentions of refinancing them with VA loans may not be able to receive mortgages from any bond sale that occurs after January 1, 1981. Upon the opinion of Oregon's bond counsel and the attorney general of the State of Oregon, the VA has severely curtailed its policy on home loans. The VA is now holding 1,448 refinance applications for a total of $66,527,710. All of these applicants have received letters of commitment or have incurred substantial financial obligations in reliance upon previous VA requirements.

The State was planning to fund these applications via the May 1981 bond sale, but the provisions of the act are effective January 1, 1981, and, therefore, the funds from the bond sale must be used in accordance with the act. The State of Oregon is desperately working to finance as many of these letters of commitment as possible; however, when the funding required for other applications draws State reserves below the $66.5 million mark, the State will be forced to cancel all remaining refinance applications. The entire Oregon delegation strongly supports S. 425. This legislation seeks to hold harmless those individuals who in good faith have made substantial economic commitments in the expectation of recieving funds from the May 1981 bond sale. No detailed transition rules were written for State veteran programs, but they were provided for mortgage revenue bonds. I hope my colleagues will recognize the urgent need for relief of affected Oregon veterans.

Finally, Mr. President, the Oregon State attorney general has expressed concern that a class action suit might be filed on behalf of affected applicants if relief is not provided. Thus, the State may be forced to pay for these mortgages, regardless of the cost, or face a law suit that would threaten the very existence of the Oregon veterans program.

S. 425 is strictly limited to the May 1981 bond sale and holds harmless those individuals who applied prior to January 1, 1981. This legislation will give relief to some 1,500 Oregon veterans who are depending on the VA for much-needed funds.

I have discussed this matter with the managers of the bill, the distinguished Senator from Kansas (Mr. DOLE) and the distinguished Senator from Louisiana (Mr. LONG), and also with Secretary of the Treasury Regan, and the Veterans' Administration here in Washington, and to the best of my knowledge all have approved of this amendment in order to gain relief for these 1,500 Oregon veterans.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. GORTON). The Senator from Kansas.

Mr. DOLE. Mr. President, this is merely a change in the transitional rule provided in last fall's mortgage subsidy bond revisions. It does not change the permanent provisions. The Senator is correct, it has been discussed with this Senator and with the distinguished Senator from Louisiana, and personally with Treasury Secretary Regan and the Treasury staff, and we have no objection to the amendment.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DOLE. I yield back our time.

Mr. HATFIELD. I yield back our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oregon.

Mr. HATFIELD's amendment (UP No. 265) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I wish to thank the Senator from Kansas and the ranking minority member for their cooperation in this matter.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I would again move to temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. Mr. President, if we could take up one other noncontroversial amendment, then I understand the Senator from Massachusetts and the Senator from Arkansas would then be next.

Mr. MATTINGLY addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

UP AMENDMENT NO. 266

(Purpose: Extension of prohibition on fringe benefit regulations)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) proposes an unprinted amendment numbered 266.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle F of title II, insert the following:

SEC. . Prohibition of Issuance of Fringe Benefit Regulations.

Section 1 of the Act entitled "An Act to prohibit the issuance of regulations on the taxation of fringe benefits, and for other purposes", approved October 7, 1978 (Public Law 95-427), is amended by striking out "May 31, 1981" each place it appears and inserting in lieu thereof "December 31, 1983".

Mr. MATTINGLY. Mr. President, on May 31, 1981, the temporary moratorium prohibiting the Internal Revenue Service from issuing regulations regarding the taxation of fringe benefits expired.

In an effort to prevent the Internal Revenue Service from issuing regulations regarding the taxation of fringe benefits. I introduced legislation to extend permanently the expiring moratorium. In addition, Senator JEPSEN and I, along with 62 other Senators from both political parties, wrote Secretary of the Treasury Regan requesting that he halt publication of such regulations, since the possibility is remote that the Congress would allow such regulations to take effect.

In response to this effort, Secretary Regan announced:

No regulations or rulings altering the tax treatment of fringe benefits will be issued by the Treasury prior to July 1, 1982.

I was pleased by this announcement.

Although we have temporarily won the battle, the war is not over. I have, therefore, offered an amendment to extend the moratorium to December 31, 1983. This will give sufficient time for Congress to review the issue of fringe benefits and act accordingly. In addition, it will prevent the Internal Revenue Service from pulling the rug out from under the feet of employers and employees until Congress considers the issue.

While having no negative revenue effect, enactment of my amendment would eliminate a potential administrative burden for employers and prevent a gross injustice to employees.

Mr. DOLE. Mr. President, I understand the amendment prohibits the issuance of final regulations on fringe benefits until December 31, 1983. The House committee has taken similar action. I think the date there is May 31, 1983. It is not certain what revenue effect this will have, because the regulations have never been issued.

It is, however, a very sensitive point with a number of Members. In fact, we have heard from, as I think the Senator from Georgia accurately stated, about 60-some Members who had an interest in this matter and who sent a letter to Treasury Secretary Don Regan.

Mr. President, I ask unanimous consent that a copy of the reply to that letter from Secretary Regan be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C., *June 17, 1981.*

Hon. ROBERT DOLE,
U.S. Senate,
Washington, D.C.

DEAR BOB: I fully appreciate the concern expressed by Members of Congress with respect to Treasury's intentions regarding the issuance of proposed fringe benefit regulations.

After reconsidering the matter with Commissioner Egger and Assistant Secretary Chapoton, we have decided that no regulations or rulings altering the tax treatment of fringe benefits will be issued by the Treasury prior to July 1, 1982. As a result, present administrative practice will not be changed during this period.

This decision will alleviate the uncertainty created by the expiring legislation and provide ample opportunity for the Treasury to work with the Congress at an appropriate time to develop an acceptable solution to existing interpretative and enforcement problems in this difficult area of the law.

With best wishes.

Sincerely,

DONALD T. REGAN,
Secretary of the Treasury.

Mr. DOLE. Mr. President, I hope that Congress, together with the Treasury, could go to work on this overall problem. Certainly some rules are necessary. We hear a great deal about the underground economy and untaxed fringe benefits are considered by some to be on the border of that economy. I think once we clear the air by working together with Treasury it would be helpful to those in the airline industry, pilots, stewardesses, and others, salesclerks, all the people who will get free tuition and other things that we hear about to have some certainty on what the rules are. This amendment would certainly give ample time for the Congress, and specifically the Finance Committee, to address this issue.

As far as I know there is no objection to the amendment.

Mr. MATTINGLY. Mr. President, I move the adoption of the amendment.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Georgia yield back the remainder of his time?

Mr. MATTINGLY. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Georgia (Mr. MATTINGLY).

The amendment (UP No. 266) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATTINGLY. Mr. President, I ask unanimous consent to add Senator SASSER's name as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, again I ask unanimous consent to temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand it, the Senator from Massachusetts and the Senator from Arkansas wish to proceed with a major amendment under which there is a 2-hour time agreement. Is that correct? Is there a 2-hour time agreement on this?

Mr. KENNEDY. The Senator is correct; 2 hours, equally divided.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

UP AMENDMENT NO. 267

(Purpose: To insure that all taxpayers receive a net tax reduction)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS), for himself and Mr. KENNEDY, proposes an unprinted amendment numbered 267.

Mr. BUMPERS. Mr President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, beginning with line 10, strike out all through page 23, line 15, and insert in lieu thereof the following:

SEC. 101. RATE CUTS; RATE REDUCTION CREDIT

(a) RATE REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

"If taxable income is:	The tax is:
Not over $3,600	No Tax.
Over $3,600 but not over $5,700	12% of the excess over $3,600.
Over $5,700 but not over $7,800	$252, plus 14% of the excess over $5,700.
Over $7,800 but not over $12,100	$546, plus 16% of the excess over $7,800.
Over $12,100 but not over $16,200	$1,234, plus 19% of the excess over $12,100.
Over $16,200 but not over $20,400	$2,013, plus 22% of the excess over $16,200.
Over $20,400 but not over $24,800	$2, 937, plus 25% of the excess over $20,400
Over $24,800 but not over $30,100	$4,037, plus 29% of the excess over $24,800.
Over $30,100 but not over $35, 400.	$5,574, plus 33% of the excess over $30,100.
Over $35,400 but not over $46,000.	$7,323, plus 39% of the excess over $35,400.
Over $46,000 but not over $60,200.	$11,457, plus 44% of the excess over $46,000.
Over $60,200 but not over $85,800.	$17,705, plus 49% of the excess over $60,200.
Over $85,800	$30,249, plus 50% of the excess over $85,800.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $3,600	No tax.
Over $3,600 but not over $5,700.	10% of the excess over $3,600.
Over $5,700 but not over $7,900.	$210, plus 12% of the excess over $5,700.
Over $7,900 but not over $12,100.	$474, plus 16% of the excess over $7,900.
Over $12,100 but not over $16,200.	$1,146, plus 17% of the excess over $12,100.
Over $16,200 but not over $20,400.	$1,843, plus 19% of the excess over $16,200.
Over $20,400 but not over $24,800.	$2,641, plus 23% of the excess over $20,400.
Over $24,800 but not over $30,100.	$3,653, plus 26% of the excess over $24,800.
Over $30,100 but not over $35,400.	$5,031, plus 30% of the excess over $30,100.
Over $35,400 but not over $46,000.	$6,621, plus 35% of the excess over $35,400.
Over $46,000 but not over $60,200.	$10,331, plus 40% of the excess over $46,000.
Over $60,200 but not over $85,800.	$16,011, plus 44% of the excess over $60,200.
Over $85,800 but not over $109,600.	$27,275, plus 48% of the excess over $85,800.
Over $109,600	$38 699, plus 50% of the excess over $109,600.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $3,600	No tax.
Over $3,600 but not over $5,700.	9% of the excess over $3,600.
Over $5,700 but not over $7,900.	$189, plus 11% of the excess over $5,700.
Over $7,900 but not over $12,100.	$431, plus 13% of the excess over $7,900.
Over $12,100 but not over $16,200.	$977 plus 17% of the excess over $12,100.
Over $16,200 but not over $20,400.	$1,674, plus 18% of the excess over $16,200.
Over $20,400 but not over $24,800.	$2,430, plus 22% of the excess over $20,400.
Over $24,800 but not over $30,100.	$3,398, plus 25% of the excess over $24,800.
Over $30,100 but not over $35,400.	$4,723, plus 28% of the excess over $30,100.
Over $35,400 but not over $46,000.	$6,207, plus 33% of the excess over $35,400.
Over $46,000 but not over $60,200.	$9,705, plus 38% of the excess over $46,000.
Over $60,200 but not over $85,800.	$15,101, plus 42% of the excess over $60,200.
Over $85,800 but not over $109,600.	$25,853, plus 45% of the excess over $85,800.
Over $109,600 but not over $162,600.	$36,563, plus 49% of the excess over $109,600.
Over $162,600	$62,533, plus 50% of the excess over $162,600.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

"If taxable income is:	The tax is:
Not over $2,600	No tax.
Over $2,600 but not over $4,700	12% of the excess over $2,600.
Over $4,700 but not over $6,800	$252, plus 14% of the excess over $4,700.
Over $6,800 but not over $9,000	$546, plus 16% of the excess over $6,800.
Over $9,000 but not over $12,100.	$898, plus 20% of the excess over $9,000.
Over $12,100 but not over $15,300.	$1,518, plus 22% of the excess over $12,100.
Over $15,300 but not over $18,500.	$2,222, plus 23% of the excess over $15,300.
Over $18,500 but not over $23,800.	$2,958, plus 28% of the excess over $18,500.
Over $23,800 but not over $29,100.	$4,442, plus 32% of the excess over $23,800.
Over $29,100 but not over $34,400.	$6,138, plus 38% of the excess over $29,100.
Over $34,400 but not over $45,000.	$8,152, plus 41% of the excess over $34,400.
Over $45,000 but not over $60,900.	$12,498, plus 49% of the excess over $45,000.
Over $60,900	$20,289, plus 50% of the excess over $60,900.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $2,600	No tax.
Over $2.600 but not over $4,700.	10% of the excess over $2,600.
Over $4,700 but not over $6,800.	$210, plus 14% of the excess over $4,700.
Over $6,800 but not over $9,000.	$504, plus 15% of the excess over $6,800.
Over $9,000 but not over $12,100.	$834, plus 18% of the excess over $9,000.
Over $12.100 but not over $15,300.	$1,392, plus 19% of the excess over $12,100.
Over $15,300 but not over $18,500.	$2,000, plus 21% of the excess over $15,300.
Over $18,500 but not over $23,800.	$2,672, plus 25% of the excess over $18,500.
Over $23,800 but not over $29,100.	$3,997, plus 29% of the excess over $23.800.
Over $29,100 but not over $34,400.	$5,534, plus 34% of the excess over $29,100.
Over $34,400 but not over $45,000.	$7,336, plus 37% of the excess over $34,400.
Over $45,000 but not over $60,900.	$11,258, plus 44% of the excess over $45,000.
Over $60,900 but not over $82,100.	$18,254 plus 48% of the excess over $60,900.
Over $82,100	$28,430, plus 50% of the excess over $82,100.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $2,600	No tax.
Over $2,600 but not over $4,700	9% of the excess over $2,600.
Over $4,700 but not over $6,800	$189, plus 11% of the excess over $4,700.
Over $6,800 but not over $9,000	$420, plus 14% of the excess over $6,800.
Over $9,000 but not over $12,100	$728, plus 17% of the excess over $9,000.
Over $12,100 but not over $15,300	$1,255, plus 18% of the excess over $12,100.
Over $15,300 but not over $18,500	$1,831, plus 20% of the excess over $15,300.
Over $18,500 but not over $23,800	$2,471, plus 24% of the excess over $18,500.
Over $23,800 but not over $29,100	$3,743, plus 28% of the excess over $23,800.
Over $29,100 but not over $34,400	$5,227, plus 32% of the excess over $29,100.
Over $34,400 but not over $45,000	$6,923, plus 35% of the excess over $34,400.
Over $45,000 but not over $60,900	$10,633, plus 42% of the excess over $45,000.
Over $60,900 but not over $82,100	$17,311, plus 45% of the excess over $60,900.
Over $82,100 but not over $108,600	$26,851, plus 48% of the excess over $82,100.
Over $108,600	$39,571, plus 50% of the excess over $108,600.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

"If taxable income is:	The tax is:
Not over $2,600	No tax.
Over $2,600 but not over $3,700	12% of the excess over $2,600.
Over $3,700 but not over $4,700	$132, plus 14% of the excess over $3,700.
Over $4,700 but not over $6,800	$272, plus 16% of the excess over $4,700.
Over $6,800 but not over $8,800	$608, plus 17% of the excess over $6,800.
Over $8,800 but not over $11,100	$948, plus 19% of the excess over $8,800.
Over $11,100 but not over $13,200	$1,385, plus 22% of the excess over $11,100
Over $13,200 but not over $15,300	$1,847, plus 23% of the excess over $13,200.
Over $15,300 but not over $18,500	$2,330, plus 27% of the excess over $15,300.
Over $18,500 but not over $23,800	$3,194, plus 31% of the excess over $18,500.
Over $23,800 but not over $29,100	$4,837, plus 35% of the excess over $23,800.
Over $29,100 but not over $34,400	$6,692, plus 40% of the excess over $29,100.
Over $34,400 but not over $41,800	$8,812, plus 44% of the excess over $34,400
Over $41,800	$12,068, plus 50% of the excess over $41,800.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $2,600	No tax.
Over $2,600 but not over $3,700	10% of the excess over $2,600.
Over $3,700 but not over $4,700	$110, plus 12% of the excess over $3,700.
Over $4,700 but not over $6,806	$230, plus 15% of the excess over $4,700.
Over $6,800 but not over $8,800	$545, plus 16% of the excess over $6,800
Over $8,800 but not over $11,100	$865, plus 17% of the excess over $8,800.
Over $11,100 but not over $13,200	$1,256, plus 19% of the excess over $11,100.
Over $13,200 but not over $15,300	$1,655, plus 21% of the excess over $13,200.
Over $15,300 but not over $18,500	$2,096, plus 24% of the excess over $15,300.
Over $18,500 but not over $23,800	$2,864, plus 28% of the excess over $18,500.
Over $23,800 but not over $29,100	$4,348, plus 32% of the excess over $23,800.
Over $29,100 but not over $34,400	$6,044, plus 36% of the excess over $29,100.
Over $34,400 but not over $41,800	$7,952, plus 40% of the excess over $34,400.
Over $41,800 but not over $55,600	$10,912, plus 45% of the excess over $41,800.
Over $55,600	$17,122, plus 50% of the excess over $55,600.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $2,600	No tax.
Over $2,600 but not over $3,700	9% of the excess over $2,600.
Over $3,700 but not over $4,700	$99, plus 11% of the excess over $3,700.
Over $4,700 but not over $6,800	$209, plus 12% of the excess over $4,700.
Over $6,800 but not over $8,800	$461, plus 15% of the excess over $6,800.
Over $8,800 but not over $11,100	$761, plus 17% of the excess over $8,800.
Over $11,100 but not over $13,200	$1,152, plus 18% of the excess over $11,100.
Over $13,200 but not over $15 300	$1,530, plus 20% of the excess over $13,200.
Over $15,300 but not over $18,500	$1,950, plus 23% of the excess over $15 300.
Over $18,500 but not over $23,800.	$2,686, plus 26% of the excess over $18,500.
Over $23,800 but not over $29,100.	$4,064, plus 30% of the excess over $23,800.
Over $29,100 but not over $34,400.	$5,654, plus 34% of the excess over $29,100.
Over $34,400 but not over $41,800.	$7,456, plus 38% of the excess over $34,400.
Over $41.800 but not over $55,600.	$10,268, plus 42% of the excess over $41,800.
Over $55 600 but not over $82,100.	$16,064 plus 48% of the excess over $55,600.
Over $82,100	$28,784, plus 50% of the excess over $82,100.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

"If taxable income is:	The tax is:
Not over $1,800	No tax.
Over $1,800 but not over $2,850	12% of the excess over $1,800
Over $2,850 but not over $3,900	$126, plus 14% of the excess over $2,850.
Over $3,900 but not over $6,050	$273, plus 16% of the excess over $3,900.
Over $6,050 but not over $8,100	$617, plus 19% of the excess over $6,050.
Over $8,100 but not over $10,200.	$1,006, plus 22% of the excess over $8,100.
Over $10,200 but not over $12,400.	$1,468, plus 25% of the excess over $10,200.
Over $12,400 but not over $15,050.	$2,018, plus 29% of the excess over $12,400.
Over $15,050 but not over $17,700.	$2,787, plus 33% of the excess over $15,050.
Over $17,700 but not over $23,000.	$3,661, plus 39% of the excess over $17,700.
Over $23,000 but not over $30,100.	$5,728, plus 44% of the excess over $23,000.
Over $30,100 but not over $42,900.	$8,852, plus 49% of the excess over $30,100.
Over $42,900	$15,124, plus 50% of the excess over $42,900.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,800	No tax.
Over $1,800 but not over $2,850	10% of the excess over $1,800.
Over $2,850 but not over $3,950	$105, plus 12% of the excess over $2,850.
Over $3,950 but not over $6,050	$237, plus 16% of the excess over $3,950.
Over $6,050 but not over $8,100	$573, plus 17% of the excess over $6,050.
Over $8,100 but not over $10,200.	$921, plus 19% of the excess over $8,100.
Over $10,200 but not over $12,400.	$1,320, plus 23% of the excess over $10,200.
Over $12,400 but not over $15,050.	$1,826, plus 26% of the excess over $12,400.
Over $15,050 but not over $17,700.	$2,515, plus 30% of the excess over $15,050.
Over $17,700 but not over $23,000.	$3,310, plus 35% of the excess over $17,700.
Over $23,000 but not over $30,100.	$5,165, plus 40% of the excess over $23,000.
Over $30,100 but not over $42,900.	$8,005 plus 44% of the excess over $30,100.
Over $42,900 but not over $54,800.	$13,637, plus 48% of the excess over $42,900.
Over $54,800	$19,349, plus 50% of the excess over $54,800.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $1,800	No tax.
Over $1,800 but not over $2,850.	9% of the excess over $1,800.
Over $2,850 but not over $3,950.	$94, plus 11% of the excess over $2,850.
Over $3,950 but not over $6,050.	$215, plus 13% of the excess over $3,950.
Over $6,050 but not over $8,100.	$488, plus 17% of the excess over $6,050.
Over $8,100 but not over $10,200.	$837, plus 18% of the excess over $8,100.
Over $10,200 but not over $12,400.	$1,215, plus 22% of the excess over $10,200.
Over $12,400 but not over $15,050.	$1,699, plus 25% of the excess over $12,400.
Over $15,050 but not over $17,700.	$2,361, plus 28% of the excess over $15,050.
Over $17,700 but not over $23,000.	$3,103, plus 33% of the excess over $17,700.
Over $23,000 but not over $30,100.	$4,852, plus 38% of the excess over $23,000.
Over $30,100 but not over $42,900.	$7,550, plus 42% of the excess over $30.100.
Over $42,900 but not over $54,800.	$12,926, plus 45% of the excess over $42,900.
Over $54,800 but not over $81,300.	$18,281, plus 49% of the excess over $54,800.
Over $81,300	$31,266, plus 50% of the excess over $81,300.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1982.—

"If taxable income is:	The tax is:
Not over $1,050	12% of taxable income.
Over $1,050 but not over $2,100	$126, plus 14% of the excess over $1,050.
Over $2,100 but not over $4,250	$273, plus 16% of the excess over $2 100
Over $4,250 but not over $6,300	$617, plus 19% of the excess over $4,250.
Over $6,300 but not over $8,400	$1,006, plus 22% of the excess over $6,300.
Over $8,400 but not over $10,600.	$1,468, plus 25% of the excess over $8,400.
Over $10,600 but not over $13,250.	$2,018, plus 29% of the excess over $10,600.
Over $13,250 but not over $15,900.	$2,787 plus 33% of the excess over $13,250.
Over $15,900 but not over $21,200.	$3,661, plus 39% of the excess over $15,900.
Over $21,200 but not over $28,300.	$5,728, plus 44% of the excess over $21,200.
Over $28 300 but not over $41 100.	$8,852, plus 49% of the excess over $28,300.
Over $41,100	$15,124, plus 50% of the excess over $41,100.

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,050	10% of taxable income.
Over $1,050 but not over $2,150	$105, plus 12% of the excess over $1,050.
Over $2,150 but not over $4,250	$237, plus 16% of the excess over $2,150.
Over $4,250 but not over $6,300	$573, plus 17% of the excess over $4,250.
Over $6,300 but not over $8,400	$921, plus 19% of the excess over $6,300.
Over $8,400 but not over $10,600.	$1,320, plus 23% of the excess over $8,400.
Over $10,600 but not over $13,250.	$1,826, plus 26% of the excess over $10,600.
Over $13,250 but not over $15,900.	$2,515, plus 30% of the excess over $13,250.
Over $15,900 but not over $21,200.	$3,310, plus 35% of the excess over $15,900.
Over $21,200 but not over $28,300.	$5,165, plus 40% of the excess over $21,200.
Over $28,300 but not over $41,100.	$8,005, plus 44% of the excess over $28,300.
Over $41,100 but not over $53,000.	$13,637, plus 48% of the excess over $41,100.
Over $53,000	$19,349, plus 50% of the excess over $53,000.

"(3) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,050	9% of taxable income.
Over $1,050 but not over $2,150.	$94, plus 11% of the excess over $1,050.
Over $2,150 but not over $4,250.	$215, plus 13% of the excess over $2,150.
Over $4,250 but not over $6,300.	$488, plus 17% of the excess over $4,250.
Over $6,300 but not over $8,400.	$837, plus 18% of the excess over $6,300.
Over $8,400 but not over $10,600.	$1,215, plus 22% of the excess over $8,400.
Over $10,600 but not over $13,250.	$1,699, plus 25% of the excess over $10,600.
Over $13,250 but not over $15,900.	$2,361, plus 28% of the excess over $13,250.
Over $15,900 but not over $21,200.	$3,103, plus 33% of the excess over $15,900.
Over $21,200 but not over $28,300.	$4,852, plus 38% of the excess over $21,200.
Over $28,300 but not over $41,100.	$7,550, plus 42% of the excess over $28,300.
Over $41,100 but not over $53,000.	$12,926, plus 45% of the excess over $41,100.
Over $53,000 but not over $79,500.	$18,281, plus 49% of the excess over $53,000.
Over $79,500.	$31,266, plus 50% of the excess over $79,500.".

(b) INCREASE IN ZERO BRACKET AMOUNT.—

(1) IN GENERAL.—Subsection (d) of section 63 (defining zero bracket amount) is amended—

(A) by striking out "$3,400" and inserting in lieu thereof "$3,600",

(B) by striking out "$2,300" and inserting in lieu thereof "$2,600", and

(C) by striking out "$1,700" and inserting in lieu thereof "$1,800".

(2) FILING REQUIREMENTS.—Paragraph (1) of section 6012(a) (relating to persons required to make returns of income) is amended—

(A) by striking out "$3,300" and inserting in lieu thereof "$3,600",

(5) by striking out "$4,400" and inserting in lieu thereof "$4,600", and

(C) by striking out "$5,400" and inserting in lieu thereof "$5,600".

(3) CONFORMING AMENDMENTS.—Subparagraph (C) of section 402(e)(1) (relating to tax on lump sum distributions) is amended by striking out "$2,300" and inserting in lieu thereof "$2,600".

(c) CREDIT TO REFLECT EQUIVALENT 1981 RATE REDUCTION.—

(1) IN GENERAL.—Section 6428 (relating to refund of 1974 individual income taxes) is amended to read as follows:

"SEC. 6428. 1981 RATE REDUCTION TAX CREDIT.

"(a) ALLOWANCE OF CREDIT.—There shall be allowed as a credit against the tax imposed by section 1, or against a tax imposed in lieu of the tax imposed by section 1, for any taxable year beginning in 1981, an amount equal to the product of—

"(1) 1.25 percent, multiplied by

"(2) the amount of tax imposed by section 1 (or in lieu thereof) for such taxable year.

"(b) SPECIAL RULES FOR APPLICATION OF THIS SECTION.—

"(1) APPLICATION WITH OTHER CREDITS.—In determining any credit allowed under subpart A of part IV of subchapter A of chapter 1 (other than under sections 31, 39, and 43), the tax imposed by chapter 1 shall (before any other reductions) be reduced by the credit allowed under subsection (a).

"(2) CREDIT TREATED AS SUBPART A CREDIT.—For purposes of this title, the credit allowed under subsection (a) shall be treated as a credit allowed under subpart A of part IV of subchapter A of chapter 1.

"(c) TABLES TO REFLECT CREDIT.—

"(1) SECTION 3 TABLES.—The tables prescribed by the Secretary under section 3 shall reflect the credit allowed under subsection (a).

"(2) OTHER TABLES.—In order to reflect the amount of the credit under subsection (a) for different levels of tax or taxable income, the Secretary may—

"(A) modify the tables under section 1, or

"(B) prescribe such other tables as he determines necessary.".

(2) CONFORMING AMENDMENTS.—

(A) The table of sections for subchapter B of chapter 65 is amended by striking out the item relating to section 6428 and inserting in lieu thereof the following new item:

"SEC. 6428. 1981 rate reduction tax credit.".

(B) Paragraph (1) of section 3(a) (relating to imposition of tax table tax) is amended by inserting "and which shall be in such form as he determines appropriate" after "Secretary".

(d) REPEAL OF MAXIMUM TAX ON PERSONAL SERVICE INCOME.—

(1) IN GENERAL.—Part VI of subchapter Q of chapter 1 (relating to maximum rate on personal service income) is repealed.

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 3(b) (relating to tax tables for individuals) is amended to read as follows:

"(1) an individual to whom section 1301 (relating to income averaging) applies for the taxable year,".

(B) Subsection (b) of section 1304 (relating to special rules for income averaging) is amended—

(i) by inserting "and" at the end of paragraph (1),

(ii) by striking out ", and" at the end of paragraph (2) and inserting in lieu thereof a period, and

(iii) by striking out paragraph (3).

(C) The table of parts for subchapter Q of chapter 1 is amended by striking out the item relating to part VI.

(e) CONFORMING AMENDMENTS.—

(1) ALTERNATIVE MINIMUM TAX.—Paragraph (1) of section 55(a) (relating to alternative minimum tax) is amended—

(A) by striking out all that follows "$60,000" in subparagraph (B) and inserting in lieu thereof ", exceeds", and

(B) by striking out subparagraph (C).

(2) PERSONAL HOLDING COMPANY TAX.—Section 541 (relating to personal holding company tax) is amended by striking out "70 percent" and inserting in lieu thereof "50 percent".

(f) WITHHOLDING TABLES.—

(1) DETERMINATION OF WITHHOLDING.—Section 3402(a) (relating to requirement of withholding income tax at source) is amended to read as follows:

"(a) REQUIREMENT OF WITHHOLDING.—

"(1) IN GENERAL.—Except as otherwise provided in this section, every employer making payment of wages shall deduct and withhold upon such wages a tax determined in accordance with tables or computational procedures prescribed by the Secretary. Any tables or procedures prescribed under this paragraph shall—

"(A) apply with respect to the amount of wages paid during such periods as the Secretary may prescribe, and

"(B) be in such form, and provide for such amounts to be deducted and withheld, as the Secretary determines to be most appropriate to carry out the purposes of this chapter and to reflect the provisions of chapter 1 applicable to such periods.

"(2) AMOUNT OF WAGES.—For purposes of applying tables or procedures prescribed under paragraph (1), the term 'the amount of wages' means the amount by which the wages exceed the number of withholding exemptions claimed multiplied by the amount of one such exemption. The amount of each withholding exemption shall be equal to the amount of one personal exemption provided in section 151(b), prorated to the payroll period. The maximum number of withholding exemptions permitted shall be calculated in accordance with regulations prescribed by the Secretary under this section, taking into account any reduction in withholding to which an employee is entitled under this section."

(2) WAGES PAID FOR PERIOD LESS THAN 1 WEEK.—Section 3402(b) (relating to the percentage method of withholding) is amended—

(A) by striking out paragraph (1), and redesignating paragraphs (2) through (5) as paragraphs (1) through (4), respectively; and

(B) by striking out paragraph (3), as redesignated by subparagraph (A), and inserting in lieu thereof the following:

"(3) In any case in which the period, or the time described in paragraph (2), in respect of any wages is less than one week, the Secretary, under regulations prescribed by him, may authorize an employer to compute the tax to be deducted and withheld as if the aggregate of the wages paid to the employee during the calendar week were paid for a weekly payroll period.".

(3) ZERO BRACKET AMOUNT.—Paragraph (1)(G) of section 3402(f) (relating to withholding exemptions) is amended by inserting "(or more than one exemption if so prescribed by the Secretary)" after "one exemption".

(4) CHANGES IN WITHHOLDING.—Section 3402(i) (relating to additional withholding) is amended to read as follows:

"(i) CHANGES IN WITHHOLDING.—

"(1) IN GENERAL.—The Secretary may by regulations provide for increases or decreases in the amount of withholding otherwise required under this section in cases where the employee requests such changes.

"(2) TREATMENT AS TAX.—Any increased withholding under paragraph (1) shall for all purposes be considered tax required to be deducted and withheld under this chapter.".

(5) WITHHOLDING ALLOWANCES.—

(A) IN GENERAL.—Paragraph (1) of section 3402(m) (relating to withholding allowances based on itemized deductions) is amended to read as follows:

"(1) GENERAL RULE.—Under regulations prescribed by the Secretary, an employee shall be entitled to additional withholding allowances or additional reductions in withholding under this subsection. In determining the number of additional withholding allowances or the amount of additional reductions in withholding under this subsection, the employee may take into account—

"(A) the excess of his estimated itemized deductions or other estimated deductions (as prescribed by the Secretary) over his zero bracket amount (as defined in section 63(d)),

"(B) such tax credits to which he is entitled as specified in the regulations prescribed by the Secretary, and

"(C) such additional items as specified in the regulations by the Secretary.".

(B) TABLES.—Paragraph (4) of section 3402(m) is amended to read as follows:

"(4) AUTHORITY TO PRESCRIBE TABLES.—The Secretary may prescribe tables or computational procedures pursuant to which employees shall determine the number of withholding allowances or the amount of reduced withholding to which the employees are entitled under this subsection.".

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a), (b), (d), and (e) shall apply to taxable years beginning after December 31, 1981.

(2) WITHHOLDING AMENDMENTS.—The amendments made by subsection (f) shall apply to remuneration paid after September 30, 1981.

On page 29, after line 20, insert the following:

SEC. 104. INCREASE IN EARNED INCOME AMOUNT.

(a) IN GENERAL.—Subsection (a) of section 43 (relating to earned income credit) is amended to read as follows:

"(a) ALLOWANCE OF CREDIT.—

"(1) IN GENERAL.—In the case of an eligible individual, there shall be allowed as a credit against the tax imposed by this subtitle for the taxable year an amount equal to 13 percent of so much of the earned income for the taxable year as does not exceed $5,000.

"(2) TRANSITION RULE.—Paragraph (1) shall be applied in the case of—

"(A) taxable years beginning in 1982, by substituting '11' for '13', and

"(B) taxable years beginning in 1983, by substituting '12' for '13'.".

(b) REVISION OF LIMITATION.—Subsection (b) of section 43 (relating to limitation) is amended to read as follows:

"(b) LIMITATION.—

"(1) IN GENERAL.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(A) $550, over

"(B) 13 percent of so much of the adjusted gross income (or, if greater, the earned income) of the taxpayer for the taxable year as exceeds $8,000.

"(2) TRANSITION RULE.—Paragraph (1) shall be applied in the case of—

"(A) taxable years beginning in 1982, by substituting '13.75' for '13' and '$7,000' for '$8,000', and

"(B) taxable years beginning in 1983, by substituting '12' for '13'.".

(c) CONFORMING AMENDMENTS.—

(1) SUBSECTION (F)(2) OF SECTION 43 IS AMENDED—

(A) by striking out "$10,000" each place it appears and inserting in lieu thereof "$13,000 ($11,000 in the case of taxable years beginning in 1982)", and

(B) by striking out "$6,000" and inserting in lieu thereof "$8,000 ($7,000 in the case of taxable years beginning in 1982)".

(2) PARAGRAPH (2) OF SECTION 3507(C) (RELATING TO EARNED INCOME ADVANCE AMOUNT TABLES) IS AMENDED—

(A) by striking out "10 percent" each place it appears and inserting in lieu thereof "13 percent (11 percent for taxable years beginning in 1982 and 12 percent for taxable years beginning in 1983)",

(B) by striking out "$6,000 and $10,000" and inserting in lieu thereof "$8,000 ($7,000 in the case of taxable years beginning in 1982) and $13,000 ($11,000 in the case of taxable years beginning in 1982)", and

(C) by striking out "$3,000 and $5,000" and inserting in lieu thereof "$4,000 ($3,500 in the case of taxable years beginning in 1932) and $6,500 ($5,500 in the case of taxable years beginning in 1982)".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) AMENDMENTS OF SECTION 3507.—The amendments made by subsection (c)(2) shall apply to remuneration paid after December 31, 1981.

(e) RECONCILIATION OF COSTS.—

It is the sense of the Senate that the total tax reductions in this legislation, including the additional tax reductions provided by amendments adopted by the Senate, shall not exceed the total tax reductions contained in the bill reported to the Senate by the Senate Committee on Finance. The Senate conferees are instructed to reconcile the provisions for tax reductions to meet this requirement.

Mr. BUMPERS. Mr. President, I am proposing this amendment on behalf of myself and the Senator from Massachusetts, Mr. KENNEDY. Senator KENNEDY and I offered this same amendment in 1978 and it passed the Senate rather overwhelmingly.

It is designed to do something that we have talked about ever since we started on this tax bill. It is designed to protect those people in the lower income categories.

This amendment covers the full 3-year period of the Kemp-Roth amendment. It is a 3-year tax cut. I am opposed to the President's plan for a 3-year tax cut for a whole host of reasons, but a 3-year tax cut amendment is going to pass in the Senate.

The reasons for passing this amendment are even more compelling because Senator BRADLEY's amendment to limit the tax cut to 1 year and to help those people who make less than $20,000 a year has been defeated. In my opinion, the amendment to limit the tax cut to 2 years and condition the third year on achieving all the economic goals the President says this tax cut will accomplish will also be defeated.

Nobody in the Senate is deluding himself into believing that we are not going to have a 3-year tax cut even though it will be wildly inflationary and will not result in a balanced budget. However, if we are going to have to have a tax cut of $333 billion, the least we can do is to try to be fair about where that tax cut is going.

I intend to support the amendment which adds the triggering mechanism for the third year. Under that amendment, this tax cut will not be operative until the unemployment rate has reached what the President says it will be in 1984; until the inflation rate is down to what the President says it will be in 1984; until the interest rate is down to what the President says it will be in 1984; and until the 1983 budget deficit is as low as the President said it will be. That is a separate amendment and I am not going to spend the 1 hour on our side allotted to the Senator from Massachusetts and myself debating that amendment.

This tax cut is bad economics. But I am more concerned that this bill is a bad piece of morality for the U.S. Senate to impose on 62 percent of the people of this country.

Mr. President, you can see from the chart on the left that 62 percent of the tax returns filed in this country are filed by people who make less than $22,000 a year. In my State, admittedly a poor State, 50 percent of the people make less than $16,000 a year.

Nationwide, 50 percent of the people make less than $21,000 a year.

Who comes out worse under the President's tax proposal? It seems that this information never seems to penetrate. It never seems to be understood. I believe this country has a conscience. I do not believe the American people would opt for this tax cut if they could hear this debate. Even if you asked the people making $100,000 a year, they will not say "I want to make this at the expense of the working people and those having the toughest time paying their gasoline bills and their electric bills."

But what does the Senate Finance Committee bill do? I will tell you what it does. For the people in this country making between $5,000 and $10,000 a year, this tax cut leaves them with 126 percent less in 1984 as a result of inflation. In other words, inflation and social security taxes go up enough so that people in that income category get 126 percent less after the tax cut.

As the simple rhetorical question and the answer is in the question: Who is having the toughest time dealing with inflation in this country? Is it the people who are making over $100,000 a year and who in 1984 will get a $5,396 tax cut, more in tax cuts than the people in the low end of the category even make?

If you happen to be in that $10,000 category in 1984 you get a $114 tax cut. But if you happen to have been born rich, you get a $5,396 tax cut. The simple question is: Is that fair? Is that what this country is about?

Let us assume you make between $10,000 and $15,000 a year with a family of four. You are going to be 13.1 percent worse off as a result of the tax cut at the end of 3 years. If you make $20,000 a year or less, the category which includes 50 percent of the people in this country, you will be worse off by 0.6 of 1 percent.

Those are the three categories: 5 to 10, 10 to 15, 15 to 20. Fifty percent of the American people will have more inflation, more social security tax increases, than the tax cut gives them. But if you make $100,000 a year, you will be 15 percent better off at the end of 3 years.

I know what the vote is going to be on this amendment, but everyone in this body ought to know what they are voting for. That is the reason I am standing here. The statistics are on these charts at the back of the Chamber. They are not in the Senate Finance Committee's report. When the distinguished Senator from Louisiana was chairman of that committee, and I do not mean this personally, the Finance Committee used to include all these statistics that are now provided by the Joint Committee on Taxation. All the statistics I have been citing to you cannot be found in the committee report this year. You have to go to the Joint Committee on Taxation to find those figures.

But they are there. They are irrefutable.

Let me talk a little bit about the politics of the problem. Politics is the name of the game around here. If you want to go home and tell the folks you gave them a big fat tax cut, do you know how I would answer that? I would like to debate that person before a crowd of people and have him stand up first and say, "I voted to cut your taxes. I gave you a big tax cut."

I would follow him, and would say, "I want everybody in this audience that makes $50,000 to $100,000 a year to hold up their hand." In a crowd of 5,000, if the statistics held out, 250 people would hold up their hand, roughly 5 percent of the people. I would say, "My opponent gave those 250 people a tax cut. Now all you folks who made less than $50,000, hold up your hand. I will tell you what he did for you."

I just want everybody to know that

politics is not one-sided on this issue. Sometimes the information is slow to penetrate. The press does a lousy job of communicating anything except the politics of this problem.

But it is going to penetrate. The American people expect a tax cut. In 1984, maybe there will be another Presidential debate and then the challenger to the incumbent will say, "All you people who think you are better off than you were 4 years ago, do you feel you are better off than you were 4 years ago?"

The question will be posed again, but the answer at that time will not be based on the way they feel. You can hold up the charts and say, "I do not have to ask whether you are better off because here is what the U.S. Congress did to you the first year of this administration and here is how much worse off you are."

It is a mathematical certainty. Not only do I think it is bad economics, but it is totally unfair to the vast majority of the people of this country who are having such a tough time.

I had a man in my office the other day who said, "Do you know, Senator, I am so tired of hearing about poor people, I hope I never hear about poor people again." I said, "I am just like you. I am tired of hearing about poor people. But as a Member of the U.S. Senate I do not have the privilege of forgetting the same people who are where I was 30 years ago."

More than anything else, I am disturbed about the developing ethic in this country. Those people who have it made seem to kick those who are reaching for the first rung on the ladder. I want everybody to have the same opportunity as I have had.

I talked yesterday afternoon about a benevolent Government paying tuition to undergraduate school and to one of the finest law schools in the country. I am sure I could not have attended that law school if it had not been for the GI bill of rights.

When people like David Stockman go on television and say: "This Government does not owe a service to anyone" I want to ask him, "Do you have a sister, mother, grandmother, or anyone in a nursing home? Let us take her out and let you take care of her."

The idea of saying the Government owes nobody anything, whether they are ill, handicapped, black, white, Hispanic, or whatever—is offensive to me.

I agree that Government spends too much money. I agree that we ought to cut back on a lot of programs and a lot of expenditures which are of marginal value. But even George Will, one of the most conservative columnists in this country, warned a lot of his cohorts recently:

> Do not get carried away with this anti-Government thing because you may get a lot more than you are asking for and then we are really going to be in a pickle.

I am not defending the abuses of Government, I am not defending the high spending policies of the Democratic Party. I am here defending the principles that I learned as a Methodist Sunday school boy in Charleston, Ark., population 1,700. I was taught to love thy neighbor. I was taught to be sensitive to those less fortunate. I was even taught something about feeding the hungry and clothing the naked.

In this religious era of this country, where you hear so much about politics and religion being mixed, I do not hear so much about the Beatitudes. I hear a great deal about what I always heard in the Marine Corps, "Pull up the ladder, Jack, I am on board."

Well, Mr. President, I cannot predict with any degree of certainty, nor can any other economist, what is going to happen in the country. My friend from South Carolina, Senator HOLLINGS, tells me that a group of economists testified in the Budget Committee the other day, and he asked all of them, "What do you think the deficit will be in 1984?" The lowest figure they predicted, except for one person who thought the budget would be balanced, was $40 billion. Most said it would be $60 to $80 billion.

If you believe inflation is caused by deficit spending, you are going to get a big dose of it after this tax bill passes. There is no earthly way the President can balance the budget in 1984. Book it. Remind me that on July 23, 1981, I said it on the floor of the U.S. Senate. If he gets this tax cut and if he gets all the defense expenditures he wants, he is not going to balance the budget. That is an absolute, ironclad certainty with this Senator.

Mr. President, what is going on where this policy has been pursued? The closest parallel is the government of Margaret Thatcher in England, where the unemployment rate now reaches almost 11 percent. They talk about the inflation rate in England going down. It is going down here, too, because the OPEC cartel has given us a little breathing room. The Saudi Arabians said, "We are going to hold production up so that some of our neighbors cannot raise the oil price," and that is one of the good things that has happened in this country.

The other is that interest rates are so high, nobody can buy anything. Of course the inflation rate is going to go down.

The inflation rate is going down and interest rates are going up. What a dichotomy.

Mr. President, if there were an election held in England today, I dare say the conservative government of Margaret Thatcher would be overwhelmingly defeated. Those people are in big trouble.

The other day, I watched the Secretary of the Treasury, Donald Regan, on one of the Sunday talk shows. Somebody asked him: "Mr. Secretary, do not you think this tax is unfair to the vast majority of the American people? Is not it really a tax that benefits the very wealthiest people in American society?"

He said, "Well, we are giving about the same amount, about 38 percent, of this tax cut to people who make over $50,000 a year, and they now pay about 34 percent of the taxes. They will save it and they will invest it and we will become more productive and we can compete with the Japanese," and on and on.

He said, "You know, we do not say this is a redistribution of income tax."

Redistributing income is supposed to be a really dirty word. But, you know, Mr. President, that is precisely what this tax bill does. For the first time in history, we are redistributing the income from the poorest of the people, the working and middle-income people, and giving it to the wealthiest. That is the kind of redistribution of income this tax cut provides.

Mr. President, there is only one country which has a higher income inequality than the United States. That is France, and they just turned socialist. Whether they turned socialist because the rich just kept getting richer and the poor kept getting poorer, I am not in a position to say. All I know is that the top 20 percent of people in this country make 11 times more than the bottom 20 percent make, and France is the only place where the income inequality is worse than that. It has been getting worse in France and maybe that is the reason they turned to socialism.

I do not want a socialist government here, Mr. President. I want the one we have. But I want it to be responsible, thoughtful, and economically sound. And this one is not.

Mr. President, there is one other point I want to make that I have not heard made any time during the debate on this tax bill. I want to give some selected figures on what has already happened in the past 10 years in this country, I want to show you that this is just the icing on the cake for a trend that has been continuing for 10 years.

We have an effective tax rate in this country. The lowest rate anybody pays is 14 percent and the highest anybody pays is 70 percent under today's law. This amendment cuts that marginal rate from 70 percent to 50 percent. I support that change. That is also going to reduce the capital gains rate, and I am not enthusiastic about this change.

Our amendment contains a cut from 70 percent to 50 percent on those ultra-high incomes because nobody pays any tax in that income category anyway. We have so many tax loopholes and shelters in this country. A man the other day told me he made $208,000 in income last year and paid $88,000 in tax. I said:

> You have to be the dumbest man I have heard in a long time. I do not know anybody making $208,000 that cannot get by with $5,000 or $10,000 in income tax.

There are so many tax shelters to avoid paying that kind of income tax, an accountant would go crazy telling him all of them.

I think we ought to reduce it just so people can quit pointing at it. Less than one-half of 1 percent of the Federal budget comes from the income category of 50 to 70 percent. So get rid of it so people cannot sit around and say, "I am not going to work any more; the Government takes 70 cents of every dollar I make." Nobody much is paying it anyway.

Mr. President, most people do not know the effective tax rates that are paid. These are selected figures from the Joint Committee on Taxation. In 1970, people who made $20,000 to $25,000 a year paid an effective tax rate of 15.4 percent. That is the tax they paid on their adjustable gross income. When people tell you about paying that 70 percent, they are talking about the upper level of their income.

Maybe they paid 70 percent or even 50 percent on the top dollars of their income, but they paid 14 percent on that first $5,000, just like everybody else does.

We have a progressive tax system, Mr. President. When you average 14 percent on the taxpayer's first $5,000 and 16 percent on his next $2,000, and 18 percent on his next $2,000, he is not paying an effective rate of 70 percent or even 50 percent. I dare say it is impossible. Nobody in this country can pay an effective tax rate of 70 percent. He can pay 70 percent on the top part of his income, but he pays the same rate on the first 20 that the guy making $20,000 pays.

What has happened in the last 10 years, Mr. President? Those people who make between $20,000 and $25,000 a year in 1970 paid an effective rate of 15.4 percent and in 1980, they paid an effective rate of 13.6 percent. That means people in that $20,000 to $25,000 income category in the past 10 years have had an effective tax cut of 1.68 percent. That is not very much, is it? It is sure not enough to get excited about.

But the people who make between $50,000 and $100,000 paid an effective tax rate in 1970 of 36 percent and, in 1980, they paid 23.6 percent. Those people have had a 12.4 percent effective tax cut already in the last 10 years. And those people making $100,000 to $200,000 in 1970 paid an effective tax rate of 41 percent in 1970 and in 1980, they paid an effective tax rate of 32.9 percent.

These are the people who talk about paying 70 percent, Mr. President. In 1980, they paid 32.9 percent. They had an effective tax cut in the last 10 years of 7.1 percent.

It is hard to make these arguments without everybody saying, "He is antibusiness. He is antirich. He is anti everything." I am not antibusiness or antirich. I am pro fairness. I am pro justice. I am pro equity. I am against something that looks so appealing.

The other day the President called one of the Democratic alternatives a wolf in sheep's clothing. I thought that was really interesting, for the President to call somebody else's tax cut a wolf in sheep's clothing. If there ever was a wolf in sheep's clothing, this tax bill is it.

I yield the floor, Mr. President.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The proponents have 36 minutes remaining.

Mr. KENNEDY. I yield myself such time as I may use.

Mr. President, so far in this tax debate, the Members of the Senate have gone on record on a number of different amendments.

As my colleague Senator BUMPERS has pointed out, the Senate has spoken, and spoken quite clearly, about the timing and some aspects of the distribution of the tax reduction.

First, we had a Bradley amendment to provide a 1-year tax cut and fairer tax relief for middle-income families. That amendment was defeated.

Later, we had a Hollings amendment that scaled down the tax reductions over a 3-year-period to bring the budget into balance by 1984, and also to provide fairer tax relief for average families. I supported the Bradley amendment. I supported the Hollings amendment. But they were defeated.

Then, we had another Bradley amendment earlier today, to keep the 3-year tax cut, to keep the reduction in the tax rate on unearned income from 70 percent to 50 percent, and to provide fairer tax relief for the middle-income brackets by redistributing incomes from the upper brackets. We have just voted on that measure, and it was defeated.

Now, Senator BUMPERS and I are offering an amendment that seeks to achieve the goal of fairness by a different method, a method that preserves the principle of a 3-year tax cut, and that does not involve taking anything from upper income groups.

The Bumpers-Kennedy amendment is designed to provide tax cuts to lower- and middle-income individuals, to insure that they have a net tax cut after taking into account inflation and the social security tax increase which took effect in January 1981.

For 1982, the amendment would increase the zero bracket amount—formerly the standard deduction—and the earned income tax credit. The ZBA would be increased from $2,300 to $2,600 for single persons and from $3,400 to $3,600 for married couples filing joint returns. The rate of the earned income credit would be increased from 10 percent to 11 percent, and the phaseout of that credit would be increased from the range $6,000 to $10,000 of income to the new range $7,000 to $11,000. This is exactly the same increase in the earned income credit which was approved by the Finance Committee in 1980.

For 1983, in addition to the increase in the ZBA, there would be a rate restructuring in the middle-income brackets to provide more middle-income tax reduction without raising anyone's taxes. In addition, the rate of the earned income credit would be raised to 12 percent, and the phaseout range to $8,000 to $13,000 of income.

For 1984, there would be further rate cuts in the middle-income brackets. Also, the rate of the earned income credit would be raised to 13 percent.

The Bumpers-Kennedy amendment adopts the approach that the Senate accepted in 1978 as the fairest way of providing tax relief for individuals. The purpose of the amendment is a very simple one—to insure that all taxpayers actually receive a net tax cut. Whatever additional tax relief we provide for upper income taxpayers, we should at least guarantee that all taxpayers receive a net tax cut.

Middle income taxpayers, as well as upper and lower income families, have been heavily impacted by inflation and by increases in social security taxes. If the Senate is going to truly provide tax equity, tax justice, and tax fairness, we have a responsibility to taxpayers across the economic spectrum to relieve them of the burdens of increased taxes caused by inflation and social security taxes. Whatever additional tax relief we provide, we must at least offset these tax increases. If we fail to do so for any income group, then we are actually legislating a tax increase for that group.

There may be other economic arguments that can be advanced that say, after we meet this principle, that there are economic justifications for additional tax relief for the highest income groups. That is the economic policy of the administration—tax relief for the rich, as carried out under the banner of supply-side economics.

Under the Finance Committee bill, when the effects of inflation and social security tax increases are taken into account:

In 1982, 47 million taxpayers with incomes of $15,000 or less will have a net tax increase of $1.3 billion.

In 1983, these same taxpayers will have a net tax increase of $2.7 billion.

In 1984, 58 million taxpayers with incomes of $20,000 or less will have a net tax increase of $4.7 billion.

By contrast, the 4 million taxpayers with incomes over $50,000 will receive a net tax decrease of $7.2 billion in 1982, $10.2 billion in 1983, and $10.1 billion in 1984.

In short, under the Finance Committee bill, those most hurt by inflation and social security tax increases receive the least protection, and those hurt the least receive the most protection.

The Bumpers-Kennedy amendment provides additional and more equitable tax relief to offset the effects of inflation and social security taxes, so that essentially all taxpayers receive a net tax cut.

In 1982, all taxpayers receive a net tax cut.

In 1983 and 1984, the $10,000 to $20,000 income groups receive a net tax cut. For the $5,000 to $10,000 income group, the impact of inflation and social security taxes is almost completely offset in 1983, and is reduced dramatically in 1984.

The additional tax relief is provided through rate cuts, increases in the standard deduction, and increases in the earned income tax credit.

The amendment contains a specific "sense of the Senate" instruction that in the final legislation the total tax reductions shall not exceed the level reported by the Finance Committee. The total tax reductions in the Senate bill, therefore, including those provided in this amendment, will thus be reconciled by the conferees to meet this target.

Mr. President, I ask unanimous consent that four tables illustrating the amendment may be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE I.—INDIVIDUAL INCOME TAX CUTS COMPARED TO INFLATION AND SOCIAL SECURITY TAX INCREASES UNDER SENATE FINANCE COMMITTEE BILL AND BUMPERS-KENNEDY AMENDMENT

[Dollar amounts in millions, 1981 income levels]

Expanded income class (thousands)	Inflation and social security increases	Net tax reduction under Senate Finance Committee bill		Net tax reduction under Bumpers-Kennedy amendment

$20 to $30	13,164	1,729	(3.8)	3,340	(7.4)
$30 to $50	18,101	4,419	(6.5)	5,605	(8.2)
$50 to $100	9,448	3,807	(9.0)	4,084	(9.7)
$100 to $200	2,640	2,756	(12.8)	2,798	(13.0)
$200 plus	873	3,540	(17.5)	3,548	(17.5)
Total	60,289	11,558	(5.2)	20,159	(9.0)

TABLE II.—COMPARISON BETWEEN SENATE FINANCE COMMITTEE AND BUMPERS-KENNEDY PERCENTAGE DISTRIBUTION OF TAX CUTS BY INCOME CLASSES

Expanded income class (thousands)	1982			
	Percentage of tax returns		Percentage of SFC cuts	
Below $5	19.4		0.1	
$5 to $10	17.2	50.9	2.5	8.0
$10 to $15	14.3		5.4	
$15 to $20	11.6		7.6	
$20 to $30	18.1	44.3	19.2	55.9
$30 to $50	14.6		29.1	
$50 to $100	3.9		17.1	
$100 to $200	.7	4.8	7.9	36.0
$200 plus	.2		11.0	

TABLE III.—PERCENTAGE OF INFLATION AND SOCIAL SECURITY TAX INCREASES OFFSET BY SENATE FINANCE COMMITTEE TAX CUTS

Expanded income class (thousand)	1982 (percent)
Below $5	12.9
$5 to $10	50.1
$10 to $15	91.6
$15 to $20	110.0
$20 to $30	120.5
$30 to $50	132.6
$50 to $100	167.3
100 to $200	297.6
$200 plus	1,292.4

TABLE IV.—COMPARATIVE COSTS (INDIVIDUAL TAX CUTS)

[In billions]

	Finance Committee	Additional relief under Bumpers-Kennedy amendment
Fiscal year:		
1982	$26.8	$1.2
1983	70.6	4.4
1984	114.1	7.7

TABLE V.—TAX CUTS FOR A FAMILY OF 4 UNDER THE FINANCE COMMITTEE BILL

	1982 tax cut	1983 tax cut	1984 tax cut
Earned income:			
$5,000	0	0	0
$10,000	52	78	83
$15,000	151	226	281
$20,000	228	371	464
$30,000	405	744	914
$40,000	639	1,188	1,438
$50,000	947	1,754	2,158
$60,000	1,255	2,370	2,928
$100,000	2,137	4,648	5,822
Investment income:			
$100,000	2,793	5,304	6,478
$200,000	11,555	15,002	17,514
$500,000	56,155	59,602	62,204
$1,000,000	133,155	136,602	139,204

Mr. KENNEDY. Mr. President, I might point out that you do not find any of these tables in the Finance Committee bill. The committee is not anxious to display these figures, because they demonstrate the unfairness of their tax relief.

For the first time in the recent history of major Senate tax bills, the report of the Finance Committee fails to include the customary tables showing the effect of the bill in reducing the tax burden on individuals in various income categories. It is easy to understand the embarrassment that led to the omission—because the tables irrefutably demonstrate the fundamental unfairness of the proposed Kemp-Roth tax cuts to middle-class families, and the excessive benefits conferred on the highest income groups.

Under the Bumpers-Kennedy amendment, all groups of taxpayers—low-income, middle-income, and upper-income—will be held harmless from the increase in inflation over these next 3 years and from the increase in social security taxes. That is something on which we should be able to develop a broad consensus in the Senate.

This amendment does not reduce the tax relief for the upper-income brackets, as the Bradley amendment did. We are adding additional relief under the Bumpers-Kennedy amendment to hold harmless the middle-income groups and the lower-income groups against inflation and social security tax increases. With this amendment, we are also instructing the conferees to come back to the Senate, after the conference, with the same amount of dollar loss for tax reduction as was recommended by the Senate Finance Committee. We leave up to the conferees to determine how the relief in the final bill will be allocated. But we urge the Members of this body to accept the fundamental principle of fairness and equity, by at least holding harmless the families of this country against the burdens of inflation and increases in social security taxes.

This is a concept which has been accepted in the past by the U.S. Senate. It is not a new one. It is identical to the concept that was accepted by the full Senate in 1978.

I also want to review briefly with the Members of the Senate why this particular amendment is necessary. There has been a considerable amount of distortion and a considerable amount of misrepresentation put out by the administration when it comes to the allocation of tax reductions.

First of all, Mr. President, one of the tables to which I have referred indicates the percentage of tax returns in each income group, and the tax relief provided to each group by the Senate Finance Committee bill. Those earning $15,000 or less make up 50 percent of all taxpayers, yet they receive only 8 percent of the committee's tax relief.

At the same time, the 5 percent of individuals with income over $50,000 a year receive 36 percent of the tax cut.

The average family income in the United States today is about $20,000 a year. That is the median income. Half of all the families in the United States earn $20,000 a year or less.

Under the administration's program and the Finance Committee bill, these average income families will not even get a tax cut. When inflation and social security tax increases are taken into account. They will get no tax cut at all. They will get a tax increase.

A family earning $20,000 a year gets tax relief of only $1,000 over the next 3 years—not even enough to offset inflation and social security tax increases.

But if you have investment of $500,000 a year, you get a tax cut worth $50,000 or $60,000 in each of those 3 years. Individuals with $500,000 in income, will get $175,000 in tax cuts over the next 3 years—while the family that earns $20,000 a year, the basic median family in this country, gets only $1,000. That

is not fair, and that is why I oppose the Reagan plan of tax relief only for the rich.

In the 19 years that I have been in the Senate, we have seen tax reduction programs on many different occasions. But no other tax cut was as unfair as this one. This is the largest tax cut in our history. It is the largest tax cut in our history. And it is the most unfair tax cut in our history. It is a bloated bonanza for the wealthiest individuals in this country, and it gives only crumbs in tax relief for the middle-income families, the working class families, and the neediest people in this society.

There is a pervasive misunderstanding about the reality of the administration's tax cuts. The President says he is cutting taxes for everyone. But half the country is not getting a tax cut at all. They are getting a tax increase, because of the burden of rising inflation and rising social security taxes. The Reagan-Kemp-Roth plan gives a real tax cut to only some taxpayers. And the richer you are, the more you get.

But if you are earning $20,000 a year or less, you do not get a real tax cut at all. No matter how the administration tries to present its case, these facts tell the true story. Only if the Bumpers-Kennedy amendment is adopted will middle-income and low-income families get the tax relief the administration has promised.

The administration is trying hard to persuade middle-income families that they are the real beneficiaries of this bill. But nothing can get around the fundamental facts that this tax program is skewed to the most powerful individuals and the wealthiest individuals in this country, and that it shortchanges everyone else.

The Bumpers-Kennedy amendment corrects this basic injustice in the President's plan. This may well be the last chance for the Senate to provide some degree of real tax relief to middle-income families. We take away nothing from the upper-income brackets. The upper income brackets are going to receive their tax relief. But let us make sure that, for middle-income individuals, the $20,000 a year worker in this country the family of four, let us make sure that they are going to receive a tax cut, too. They are not receiving it under the proposal that is before the Senate.

We are adding additional tax relief to the bill. But included in the amendment which has been offered by Senator BUMPERS and myself are these words: "It is the sense of the Senate that the total tax reduction in this legislation, including the additional tax reductions provided by amendments adopted by the Senate, shall not exceed the total tax reductions contained in the bill reported to the Senate by the Senate Committee on Finance. The Senate conferees are instructed to reconcile the provisions for tax reductions to meet this requirement."

We are committed to the principle that the total reductions in this bill will not exceed the amount that came out of the Finance Committee. The conferees will implement that principle, which is stated specifically in our amendment. I hope the Senate will accept the amendment.

I withhold the remainder of the time.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, I yield myself such time as I may require, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I yield myself such time as I may require.

I see the chairman of the Finance Committee is in the Chamber at this time.

I just wanted to express the appreciation of the Senator from Arkansas and myself for the support of this concept back in 1978. I hope that the same good judgment he showed at that time will apply to the current amendment.

Mr. DOLE. I appreciate it very much. In fact I am sorry I missed the statements of both Senators. I was very honestly in conference on another amendment we are trying to negotiate with the Senator from Massachusetts. I hope it was not lost time.

Mr. KENNEDY. I am surprised the Senator still did not hear it.

Mr. DOLE. I like the charts. I do not understand the numbers.

But I would just say again that this is a basic departure from the President's plan and I certainly understand it is well-intentioned, if misdirected.

Mr. President, this amendment is similar to that offered by the Senator from New Jersey. The amendment would offer a 3-year tax cut for individuals as in the President's program and the Finance Committee bill. The difference is that the cut would also be redistributive: it would attempt to skew the tax cut toward low-income groups, allegedly affected most by inflation and social security increases. In this case, that means taxpayers with incomes of $20,000 or less. Some of the tax cut would be shifted each year from taxpayers above that cutoff point to taxpayers below that level. The changes are made primarily by increasing the standard deduction and the earned income credit.

Mr. President, I will say that this is a very straightforward, simple amendment. The Senator asks us to engage in income redistribution rather than across-the-board rate cuts. The President, and the Finance Committee, have made a commitment to an across-the-board tax cut. They have done so in the expectation that such a cut will restore incentives to work, save, and invest, and help get the economy moving. To the extent the individual tax cut is artificially structured to help this group or that—as the Senators propose—it sacrifices those goals and runs a greater risk of merely stimulating demand and fueling inflation. The latest reports show good news on the inflation front, but that does not mean that we should cease to be concerned about the threat of renewed inflation.

This may be a well-intentioned amendment but it is misdirected. The cost for directing more dollars and a greater percentage cut to the lowest income groups is to sacrifice the across-the-board principle, and the across-the-board cut is what we are counting on to increase productivity and savings in the economy. I do not think that change is worth the price, particularly if it means more demand-fueled inflation that will eat away at the value of those extra dollars of tax reduction.

In addition, this amendment would cost an additional $13.3 billion over the next 3 years. This must come out of some other part of the bill.

Mr. President, there are many ways to skew a tax reduction proposal to favor certain groups. We hoped to avoid that in this bill, and we have succeeded so far with respect to individual rate cuts. There are some in the other body who would prefer to give more to commodity traders, or to $5 million estates, or to oil producers generating 500 barrels a day. Those are all examples of skewing that are not in our bill. But if we want equitable, across-the-board, sustained tax relief, the Finance Committee bill—and the President's proposal—are a superior alternative. I am confident that the Senate will continue to express its preference for a better product.

I do not think we should extend the debate any further.

I am ready to have a vote. Do Senators wish an up and down vote?

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts. On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN) is absent due to death in the family.

Mr. CRANSTON. I announce that the Senator from Vermont (Mr. LEAHY) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators who have yet to vote?

The result was announced—yeas 22, nays 76, as follows:

[Rollcall Vote No. 213 Leg.]

YEAS—22

Baucus	Inouye	Pryor
Biden	Jackson	Randolph
Bumpers	Kennedy	Riegle
Cranston	Levin	Sarbanes
Dodd	Matsunaga	Tsongas
Eagleton	Metzenbaum	Williams
Glenn	Mitchell	
Hart	Proxmire

East	Melcher	

NOT VOTING—2

Garn	Leahy

So Mr. BUMPERS' amendment (UP No. 267) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The amendment of the Senator from Kansas is the pending business.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment be temporarily laid aside. I understand the Senator from Colorado wants to proceed with this amendment.

UP AMENDMENT NO. 268

(Purpose: To replace individual rate reductions with indexing of such rates)

Mr. HART. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes an unprinted amendment numbered 268.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. EAST). Without objection, it is so ordered.

The amendment is as follows:

On page 4, beginning with line 10, strike out all through page 26, line 2, and insert in lieu thereof the following:

INDEXING OF INDIVIDUAL INCOME TAX RATES, ETC.

SEC. 101. (a) ADJUSTMENTS TO INDIVIDUAL INCOME TAX RATES.—Section 1 (relating to tax imposed) is amended by adding at the end thereof the following new subsection:

"(f) ADJUSTMENTS IN TAX TABLES SO THAT INFLATION WILL NOT RESULT IN TAX INCREASES.—

"(1) IN GENERAL.—Not later than December 15 of 1981 and each subsequent calendar year, the Secretary shall prescribe tables which shall apply in lieu of the tables contained in subsections (a), (b), (c), (d), and (e) with respect to taxable years beginning in the succeeding calendar year.

"(2) METHOD OF PRESCRIBING TABLES.—The table which under paragraph (1) is to apply in lieu of the table contained in subsection (a), (b), (c), (d), or (e), as the case may be with respect to taxable years beginning in any calender year shall be prescribed—

"(A) by increasing—

"(i) the maximum dollar amount on which no tax is imposed under such table, and

"(ii) the minimum and maximum dollar amounts for each rate bracket for which a tax is imposed under such table,

by the cost-of-living adjustment for such calender year,

"(B) by not changing the rate applicable to any rate bracket as adjusted under subparagraph (A) (ii), and

"(C) by adjusting the amounts setting forth the tax to the extent necessary to reflect the adjustments in the rate brackets.

If any increase determined under subparagraph (A) is not a multiple of $10, such increase shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $5, such increase shall be increased to the next highest multiple of $10).

"(3) COST-OF-LIVING ADJUSTMENT.—For purposes of paragraph (2), the cost-of-living adjustment for any calendar year is the percentage (if any) by which—

"(A) the CPI for the preceding calendar year, exceeds

"(B) the CPI for the calendar year 1980.

"(4) CPI FOR ANY CALENDAR YEAR.—For purposes of paragraph (3), the CPI for any calendar year is the average of the Consumer Price Index as of the close of the 12-month period ending on September 30 of such calendar year.

"(5) CONSUMER PRICE INDEX.—For purposes of paragraph (4), the term 'Consumer Price Index' means the Consumer Price Index for all urban consumers published by the Department of Labor.".

(b) DEFINITION OF ZERO BRACKET AMOUNT.—Subsection (d) of section 63 (defining zero bracket amount) is amended to read as follows:

"(d) ZERO BRACKET AMOUNT.—For purposes of this subtitle, the term 'zero bracket amount' means—

"(1) in the case of an individual to whom subsection (a), (b), (c), or (d) of section 1 applies, the maximum amount of taxable income on which no tax is imposed by the applicable subsection of section 1, or

"(2) zero in any other case.".

(C) PERSONAL EXEMPTIONS.—

(1) GENERAL RULE.—Section 151 (relating to allowance of deductions for personal exemptions) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount".

(2) EXEMPTION AMOUNT.—Section 151 is amended by adding at the end thereof the following new subsection:

"(f) EXEMPTION AMOUNT.—For purposes of this section, the term 'exemption amount' means, with respect to any taxable year, $1,000 increased by an amount equal to $1,000 multiplied by the cost-of-living adjustment (as defined in section 1(f)(3)) for the calendar year in which the taxable year begins. If the amount determined under the preceding sentence is not a multiple of $10, such amount shall be rounded to the nearest multiple of $10 (or if such amount is a multiple of $5, such amount shall be increased to the next highest multiple of $10).".

(d) RETURN REQUIREMENTS.—

(1) AMENDMENTS TO SECTION 6012.—

(A) Clause (i) of section 6012(a)(1)(A) is amended by striking out "$3,300" and inserting in lieu thereof "the sum of the exemption amount plus the zero bracket amount applicable to such an individual".

(B) Clause (ii) of section 6012(a)(1)(A) is amended by striking out "$4,400" and inserting in lieu thereof "the sum of the exemption amount plus the zero bracket amount applicable to such an individual".

(C) Clause (iii) of section 6012(a)(1)(A) is amended by striking out "$5,400" and inserting in lieu thereof "the sum of twice the exemption amount plus the zero bracket amount applicable to a joint return".

(D) Paragraph (1) of section 6012(a) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount".

(E) Paragraph (1) of section 6012(a) is amended by adding at the end thereof the following new subparagraph:

"(D) For purposes of this paragraph—

"(i) The term 'zero bracket amount' has the meaning given to such term by section 63(d).

"(ii) The term 'exemption amount' has the meaning given to such term by section 151(f).".

(2) AMENDMENTS TO SECTION 6013.—Subparagraph (A) of section 6013(b)(3) is amended—

(A) by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount",

(B) by striking out "$2,000" each place it appears and inserting in lieu thereof "twice the exemption amount", and

(C) by adding at the end thereof the following new sentence: "For purposes of this subparagraph, the term 'exemption amount' has the meaning given to such term by section 151(f).".

(e) WITHHOLDING TABLES.—

(1) DETERMINATION OF WITHHOLDING.—Section 3402(a) (relating to requirement of withholding income tax at source) is amended to read as follows:

"(a) REQUIREMENT OF WITHHOLDING.—

"(1) IN GENERAL.—Except as otherwise provided in this section, every employer making payment of wages shall deduct and withhold upon such wages a tax determined in accordance with tables or computational procedures prescribed by the Secretary. Any tables or procedures prescribed under this paragraph shall—

"(A) apply with respect to the amount of wages paid during such periods as the Secretary may prescribe, and

"(B) be in such form, and provide for such amounts to be deducted and withheld, as the Secretary determines to be most appropriate to carry out the purposes of this chapter and to reflect the provisions of chapter 1 applicable to such periods.

"(2) AMOUNT OF WAGES.—For purposes of applying tables or procedures prescribed under paragraph (1), the term 'the amount of wages' means the amount by which the wages exceed the number of withholding exemptions claimed multiplied by the amount of one such exemption. The amount of each withholding exemption shall be equal to the amount of one personal exemption provided in section 151(b), prorated to the payroll period. The maximum number of withholding exemptions permitted shall be calculated in accordance with regulations prescribed by the Secretary under this section, taking into account any reduction in withholding to which an employee is entitled under this section.".

(2) WAGES PAID FOR PERIOD LESS THAN 1 WEEK.—Section 3402(b) (relating to the percentage method of withholding) is amended—

(A) by striking out paragraph (1), and redesignating paragraphs (2) through (5) as paragraphs (1) through (4), respectively; and

(B) by striking out paragraph (3), as redesignated by subparagraph (A), and inserting in lieu thereof the following:

"(3) In any case in which the period, or the time described in paragraph (2), in respect of any wages is less than one week, the Secretary, under regulations prescribed by him, may authorize an employer to compute the tax to be deducted and withheld as if the aggregate of the wages paid to the em-

ployee during the calendar week were paid for a weekly payroll period.".

(3) ZERO BRACKET AMOUNT.—Paragraph (1)(G) of section 3402(f) (relating to withholding exemptions) is amended by inserting "(or more than one exemption if so prescribed by the Secretary)" after "one exemption".

(4) CHANGES IN WITHHOLDING.—Section 3402(i) (relating to additional withholding) is amended to read as follows:

"(i) CHANGES IN WITHHOLDING.—

"(1) IN GENERAL.—The Secretary may by regulations provide for increases or decreases in the amount of withholding otherwise required under this section in cases where the employee requests such change.

"(2) TREATMENT AS TAX.—Any increased withholding under paragraph (1) shall for all purposes be considered tax required to be deducted and withheld under this chapter.".

(5) WITHHOLDING ALLOWANCES.—

(A) IN GENERAL.—Paragraph (1) of section 3402(m) (relating to withholding allowances based on itemized deductions) is amended to read as follows:

"(1) GENERAL RULE.—Under regulations prescribed by the Secretary, an employee shall be entitled to additional withholding allowances or additional reductions in withholding under this subsection. In determining the number of additional withholding allowances or the amount of additional reductions in withholding under this subsection, the employee may take into account—

"(A) the excess of his estimated itemized deductions or other estimated deductions (as prescribed by the Secretary) over his zero bracket amount (as defined in section 63(d)),

"(B) such tax credits to which he is entitled as specified in the regulations prescribed by the Secretary, and

"(C) such additional items as specified in the regulations by the Secretary.".

(B) TABLES.—Paragraph (4) of section 3402(m) is amended to read as follows:

"(4) AUTHORITY TO PRESCRIBE TABLES.—The Secretary may prescribe tables or computational procedures pursuant to which employees shall determine the number of withholding allowances or the amount of reduced withholding to which the employees are entitled under this subsection.".

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

On page 25, line 3, strike out "103" and insert in lieu thereof "102".

Mr. HART. Mr. President, earlier in the consideration of this bill, the Senate adopted an amendment, which I strongly supported to provide for indexing of personal income taxes in 1985. Fifty-seven Senators support this amendment.

Therefore, they went on record favoring the concept of indexation in the personal income tax code. If tax indexing is right in 1985, Mr. President, it is right today.

The amendment I am offering substitutes indexing of personal income taxes for the personal income tax cuts provided by the Senate Finance Committee bill. Indexing is a good public policy for several reasons. The tax indexing provided by this amendment represents a tax reduction that is less inflationary and more fairly distributed than the Senate Finance Committee proposal.

If our objective is to reduce taxes in a way that will protect taxpayers from inflation and allow wiser decisions about long range savings and investment, then indexing is our most effective tool. By automatically adjusting income tax brackets for inflation, indexing would prevent increases in a taxpayer's liability when the taxpayer has had no increase in real income.

The chairman of the Senate Finance Committee said it best during debate on indexing earlier this week:

While Congress periodically cuts taxes and offsets much of the inflation increase, those adjustments have not compensated all taxpayers equitably across the income scale. . . . The Committee concluded that built-in adjustments for inflation in the individual income tax would be a preferable means of stabilizing the tax burden for most taxpayers, and would be consistent with the goals of administrative simplicity and equity in the tax code.

Mr. President, indexing is essential if we are to have a tax system based on equity. Congress has a responsibility to act now so that future inflation does not increase the average American's tax bill when there has been no real increase in his income. It is fundamentally wrong for the U.S. Treasury to be reaping a windfall in increased revenues each year without ever having to enact a tax bill, or to undertake the very difficult political judgment of increasing taxes.

The hidden tax increase caused by inflation is a dramatic example of taxation without legislation.

Mr. President, let me cite just a few examples of how much revenue will go to the Federal Government in the next few years because of inflation induced tax increases:

In fiscal year 1982, the Federal Treasury will reap a windfall of $14.6 billion because of the bracket creep caused by inflation.

In fiscal year 1983, the Federal Treasury will take in $39 billion in additional taxes because of the hidden inflation tax.

And in fiscal year 1984, the Federal Government will receive $67.8 billion worth of taxes never expressly legislated by Congress.

Mr. President, to remedy the perverse and automatic response to the rising cost of living embodied in the hidden inflation tax, we must begin indexing in 1982, not 1985.

This Senate has gone on record in support of tax indexing in 1985. Those Senators who supported indexing and believe it to be a necessary and sound remedy to inflation-caused tax increases, should support this amendment. My indexing amendment represents a tax reduction for millions of Americans that is less expensive, less inflationary, and more fairly distributed than the Finance Committee tax cut.

Mr. President, a number of my colleagues have gone on record in support of the concept of indexing and have supported strongly and vigorously on this floor the idea of indexing the tax cut.

Earlier in our debate, the distinguished Senator from Minnesota (Mr. DURENBERGER) said:

Mr. President, none of the tax reform measures we have considered this week are as desperately needed, or as long overdue, as the tax indexing.

My distinguished colleague from the State of Colorado (Mr. ARMSTRONG), who has long been a proponent of tax indexing, has said:

Indexing is the cure for these economic ills. Indexing permanently reduces tax rates, prevents the Federal Government from profiting from the inflation it creates, is honest, is a true tax reform, creates tax certainty, and stops taxflation cold.

The distinguished Senator from Kansas, who is chairman of the Senate Finance Committee (Mr. DOLE), said indexing is—

a major step forward as Congress reasserts its control over tax and fiscal policy. For too long we have allowed inflation to dictate tax rates and blot Federal spending.

Mr. President, the list goes on and on of statements by supporters of the amendment earlier this week with the concept of tax indexing. This amendment simply permits those who believe in that concept to advance their support by some 4 years.

Mr. President, the tax reduction provided by indexing from 1982 through 1984 has nearly $90 billion less Treasury impact than the Finance Committee tax cut. For example, in the year 1982, tax indexing would have an impact of $14.6 billion in reduced revenues compared to the Finance Committee tax cut of $26.8 billion. Tax indexing in fiscal year 1983 would cost the Treasury $39 billion compared to the Finance Committee tax cut of $70.6 billion. Tax indexing in fiscal 1984 would have a negative impact on Treasury revenues of $67.8 billion compared to the Finance Committee tax cut of $114.1 billion.

Mr. President, over the 3-year period which this amendment would affect—1982, 1983, and 1984—the impact on the Federal Treasury by indexation would be less than the revenue measure proposed by the Finance Committee to the tune of over $70 billion. That would enhance the possibility of the Congress and this Government to balance the Federal Government by that amount over the next 3 years. Therefore in the interest of a balanced budget, this amendment goes much farther in that direction than the Finance Committee bill.

In addition, Mr. President, the tax reduction provided by indexing in 1982, 1983, 1984 would be more fairly distributed than that of the committee bill. For example, in the Finance Committee bill, 32.6 percent, almost one-third, is directed to those with incomes of $50,000 or more. With tax indexing, less than one-quarter—23.5 percent—of the benefits of the tax reduction would be directed toward those of a similar income level, $50,000 or more, and a full 77 percent of those tax reduction benefits would go to those with incomes under $50,000.

To take another example, the Finance Committee targets about 37 or 38 percent of its tax cut to those with incomes of $30,000 or less. This indexing proposal that I have submitted targets almost 50 percent of the tax rate reduction to the $30,000 and below income brackets. Mr. President, as these statistics demonstrate, personal income tax indexing, beginning in 1982, would not only have less

budget impact and therefore be less inflationary than the committee's tax cut but would also be more fairly distributed to those in the middle and lower income classes.

Over the past several days, as we have approached the issue of tax indexation, some have made arguments that we should not go down this road. For example, some have argued that tax indexing has greater benefits for those in upper income brackets than in lower. As I have already indicated, the statistics and the facts are otherwise. Mr. President, I ask unanimous consent to have printed two tables prepared by the Joint Tax Committee which demonstrate that, in fact, indexation of the tax code would benefit those in the lower- and middle-income brackets more than it would those in the upper income brackets.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 3.—TAX INCREASES FROM INFLATION: [1] AGGREGATE TOTAL AND PERCENT OF INCOME TAX LIABILITY UNDER PRESENT LAW BY INCOME CLASS (1981 INCOME LEVEL)

Expanded income (thousands)	Aggregate total (millions)	Percent of income tax liability
Below $5	$168	[2]
$5 to $10	1,232	19.3
$10 to $15	1,365	8.4
$15 to $20	1,570	6.8
$20 to $30	3,703	6.3
$30 to $50	5,268	6.1
$50 to $100	2,781	5.4
$100 to $200	771	3.2
$200 and over	253	1.2
Total	17,110	6.0

[1] Revenue gain from not adjusting personal exemption, earned income credit, zero bracket amount, and rate brackets by 9.14 percent.
[2] Individual income tax liability is negative for this group because earned income credits exceed tax.

TABLE 4.—SCHEDULED TAX INCREASES FOR 1981: AGGREGATE CHANGE IN REVENUE AND AS PERCENT OF TAX LIABILITY AND AFTER-TAX INCOME, BY INCOME CLASS (1981 INCOME LEVEL)

Expanded income [1] (thousands)	Aggregate change in revenue (millions)					Total increase as percent of tax liability	Total increase as percent of after-tax income
	Inflation increase [2]	Interest and dividend exclusion [3]	Net income tax increase	Employee and self-employed social security increase [4]	Total increase		
Below $5	$168	−$25	$143	$228	$371	[5]	1.0
$5 to $10	1,232	−141	1,091	530	1,621	25.4	1.5
$10 to $15	1,365	−208	1,157	742	1,899	11.6	1.4
$15 to $20	1,570	−222	1,348	880	2,228	9.7	1.4
$20 to $30	3,703	−564	3,139	2,011	5,150	8.8	1.5
$30 to $50	5,268	−862	4,406	2,692	7,098	8.3	1.8
$50 to $100	2,781	−391	2,390	926	3,316	6.4	1.9
$100 to $200	771	−83	688	175	863	3.6	1.5
$200 and over	253	−21	232	44	276	1.3	.6
Total	17,110	−2,517	14,593	8,227	22,820	8.0	1.6

[1] Expanded income is equal to adjusted gross income plus excluded capital gains and various tax preference items less the smaller of investment interest paid or investment income.
[2] Revenue gain from not adjusting personal exemption, earned income credit, zero bracket amount, and rate brackets by 9.14 percent.
[3] Revenue loss from expanding the $100 dividend exclusion to the $200 interest and dividend exclusion.
[4] Revenue gain resulting from ad hoc increase in the wage base (to $29,700) above what would occur under indexing ($28,200), and from increase in rate to 6.65 from 6.13 percent for employees and to 9.3 from 8.1 percent for the self-employed.
[5] Individual income tax liability is negative for this group because earned income credits exceed tax.

Mr. HART. Further, Mr. President, I ask unanimous consent to have printed a similar table that demonstrates statistically that the budget impact from indexation in the next 3 years is some $70 billion less than the Finance Committee bill.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 10.—COMPARISON OF AGGREGATE REVENUE LOSS OF ADMINISTRATION PROPOSAL, INDEXING, AND REPEAL OF SOCIAL SECURITY INCREASES [1]

[In billions of dollars]

	Calendar year liabilities						Fiscal year receipts					
	1981	1982	1983	1984	1985	1986	1981	1982	1983	1984	1985	1986
Indexing [2]	8.9	31.5	57.0	87.5	123.6	166.1	3.2	25.1	47.2	75.8	109.7	149.7
Repeal 1981 social security increase [3]	7.4	16.0	17.7	20.0	21.8	24.4	2.9	15.6	17.2	19.1	21.1	23.5
Total	16.3	47.5	74.7	107.5	145.4	190.5	6.1	40.7	64.4	94.9	130.8	173.2
Administration proposal	14.6	48.7	92.9	129.8	152.8	178.9	6.4	43.9	80.8	119.8	146.6	171.9

[1] July 1, 1981, effective date assumed for all proposals.
[2] Adjustment of the personal exemption, the earned income credit, rate brackets, and the zero bracket amount by the rate of growth of the GNP deflator over the preceding fiscal year. The following inflation rates were assumed for fiscal years 1980 through 1985: 9.14, 10.38, 8.53, 8.07, and 7.51 percent, respectively. The revenue estimate for 1981 assumes an adjustment for half the first year's inflation, i.e., 4.57 percent.
[3] Repeal of 1981 ad hoc base increase above what would occur under indexing and 1981 increase in rate. Figures include employer portion of tax.

Mr. HART. Mr. President, it has been argued that indexation would put handcuffs or a stranglehold on the Treasury, would legislate inflexibility, would take away Congress ability to legislate either increases in domestic programs or increases in our defense budget. The facts are otherwise. A Congress, at any time that it decides it is in the national interest, can vote a tax increase. That may be laughable in some political circles because of the negative effects politically of voting for a tax increase, particularly in these days. Mr. President, what is in the interest of maintaining and organizing a democracy but taking the case for national priorities to the American people? That is, in effect, what I think tax indexation would require.

If we, for example, wanted to vote increases in social security in good time but that was going to require additional revenues that we would otherwise be receiving from bracket creep and inflation, why not take that issue by way of mandate to the American people and actually propose an increase in taxes to pay for that program?

To the contrary, if we decide we need to spend, in a 4- to 5-year period, $1 trillion additional funds for our national security, we can cut the budget and take the money from other domestic programs as this administration has proposed and still come up short, as I think we will and as I think the data suggests for the next few years, to pay the bill for increased defense. We have another option and that is to go to the American people and tell them bluntly, frankly and candidly that we think it is in the Nation's interest to increase expenditures for national defense and we are going to pay for it, pay for it above the table, with a tax increase if necessary to balance the Federal budget and pay the defense increase, and not below the table because of inflation-caused bracket creep and unlegislated taxation.

Others have argued, including the very distinguished Senator from Louisiana,

the expert on revenues (Mr. LONG), that this would eliminate political judgments, that it takes out of the hands of legislators the options that are available to us and that we are really elected to vote for. I think to the contrary, Mr. President. I think if Members of Congress were forced to go to the American people and say, "We don't have enough tax revenues, we are going to have to raise your taxes and we believe they should be raised," either for some domestic or some defense agenda, then we take the case directly to our constituents. We are trusting the American people. We are not asking them to give us a blindly-authorized arbitrary tax increase caused by inflation that we alone have the judgment to determine how it should be spent. We are going to the American people, either as an administration or as Members of Congress, and saying, "If we adopt this list of priorities, whether it is a domestic list of spending priorities or a defense or national list of priorities, here is what it will cost you in increased taxation. You tell us whether you think it is worth it."

Mr. President, since the rate of inflation went up almost a decade ago, the Government of the United States has realized tens of billions of dollars in windfall taxation. Given that windfall taxation, we have not had to make hard choices. I must say that even this administration, which has told the American people that it is making hard choices, has not really done so. It has cut some programs to provide funding for others that are its priority and are on its agenda, but it is not taking that case to the American people and saying, "If we want a balanced budget and if we want increased defense spending, taxes must go up, and we will have to vote for those tax increases."

Instead, we are going to accept bracket creep and not have tax indexation and a fair and just tax system for 3 or 4 more years.

Mr. President, I do not think that is being candid with the American people, and I do not believe it is fair.

We have seen a record created in the last 3 or 4 days by a majority of Members of the Senate, some very visibly and very vocally on the floor of the Senate, as to why tax indexation is a good thing, why it is important to maintain a democracy, why it is important not to collect moneys we have not voted for, and I subscribe to every one of those arguments. But if those arguments are valid, they are valid in 1984, 1983, and 1982.

Tax indexation is not an economic measure. It is a tax reform measure. It is a tax justice measure. It is a measure designed to support and strengthen the democracy.

We should not have taxes that are not legislated, and that is the system we have presently, in a high inflation period.

Mr. President, based on all these arguments and all these contentions, I hope those who voted in the majority the last time for tax indexation in 1985 will see their way clear, for all the same reasons, to vote for tax indexing in 1982, 1983, and 1984.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. WALLOP. I yield myself such time as I may use.

Mr. President, the Senator from Colorado, in proposing his amendment, makes an interesting argument, but he makes an argument we have continued to hear from the Democratic Party, and that is that they are against stabilizing the tax system and providing real tax decreases for Americans.

In effect, what this would do would be to ratify the unjust circumstances that bring us to the floor of the Senate and to the consciousness of America today and have made tax reform and tax legislation a matter of wide political commentary and discussion.

To index now and fail to make the adjustments in the tax structure that are proposed by the Finance measure and proposed by a majority of Republicans and Democrats in that committee is to say to the American people, in essence, "You have recognized, by subscribing to the debate, that there is a need for tax reform, but we are not going to give it to you. We are just going to index what is in place and unfair today."

I do not believe that is what brings us here. To say that this would be less of an impact on the budget is to admit to the American people that those tax increases, those radical tax increases, which have been scheduled in income taxes and in social security taxes, are given the stamp of approval of the Senate and Congress; that we are going to have all those tax increases, the high taxes that bring us here, and we are going to ratify that out into time by merely indexing it.

I do not believe that is what the argument is all about. The argument is about trying to achieve some real reductions for Amreicans in a tax burden which is too heavy. I believe everybody feels that it is too heavy. It is too heavy because we have had too great an appetite to fund programs and unfund deficits. It really does not do anything about the rate of inflation that is created by a tax burden that is already overpowering. That is the problem with the suggestion of the Senator from Colorado.

Part and parcel of the President's economic program is first, the reduction in spending and second, a real, honest-to-God tax cut for Americans over the course of the next 3 years, to put them in front of the curve of inflation; and part of fighting inflation is to put money, earned money, into the hands of wage earners. This does not do that. This simply ratifies the position in which the country finds itself today, which lends credibility to the argument about the need for a tax cut.

So I have to oppose the amendment. Also, it does one other thing that I believe is wrong. If the Senator has at all followed the discussions in the Finance Committee and some of those on the floor, he must realize that part of the need to delay the indexing proposal is to deal with the indexing itself: the index that takes the rise in the price of Scotch whiskey and adds it to the cost of living, the rise in all kinds of other things which are not part and parcel of necessity for a standard of living in this country. They are a standard of luxury, but they go into that index.

We simply cannot ratify the means by which we adjust the cost of living by going into tax indexing on that basis right now.

The cost-of-living indexing absolutely has to be dealt with and we have time to deal with it in a rational way and to make real, honest-to-God judgments as to what is the cost of living. There is opposition, as the Senator well knows, to making rational judgments in the cost-of-living index because they come from labor, whose contracts are tied to that index, and they want everything that is inflationary on that thing, because it has a direct and immediate benefit to wage contracts that are based on that index.

The Senate, Congress, and the United States have some major and serious problems to resolve before the indexing is a valid standard, anyway; and the indexing tied to the present means of computing the cost-of-living index is not a valid standard. It is not valid for the United States as a government, and it certainly is not valid as a means to base a present tax reform, as the Senator from Colorado suggests.

For that reason, plus the fact that it ratifies the inequitable tax burden that brings us here and brings legitimacy to the argument for the need for a tax cut, we have to oppose the amendment.

I reserve the remainder of my time.

Mr. HART. Mr. President, I ask unanimous consent that the name of the Senator from Arizona (Mr. DECONCINI) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, I will yield in a moment to the Senator from Arizona for remarks he may make in connection with this amendment. However, I wish to respond, first, to the Senator from Wyoming.

He says this amendment would ratify current injustice and would do nothing about the inflation that has brought us here today. This amendment, I will confess, is not an amendment to solve the problem of inflation. However, I believe that the Senator from Wyoming and many others, on both sides of the aisle, have said that the cause of inflation is budget deficits.

This amendment will have $70 billion less negative budget impact over the next 3 years than the one he supports. So if we are worried about inflation, let us balance the Federal budget. Let us not cause $70 billion more deficit in the next 3 years.

If the Senator from Wyoming or anyone else can explain to me, with any degree of cogency and persuasiveness, how increasing the Federal debt is going to do something about inflation, I would like to hear it.

I will confess that this amendment is not designed to solve the problem of inflation, but I submit, further, that the measure the Senator from Wyoming supports is designed to make it worse.

It is going to fuel the Federal debt

which is going to fuel Federal borrowing which is going to fuel inflation and keep interest rates high.

The Senator is right. This amendment is not going to solve the problem of inflation. But I say to our colleagues that the language in the committee bill is going to make it worse.

The time to change the tax structure is when this economy is on an even keel. If the price of changing the tax rates is to increase inflation, we have done very little for the American taxpayers and citizens.

Mr. President, what good does it do the average taxpayer to get a tax cut of $200 or $300 or $400, or even more, if at the same time the rate of inflation takes away $1,000, or $1,200, or $1,500 in spending power? We have done that taxpayer no good. We have done him or her harm.

We have yet to hear an argument by proponents of Kemp-Roth other than speculation, other than hope, that that money that is going to be returned in tax rate reductions is going to be saved and invested in a hilly inflationary period in a way that is going to return revenues to the Federal Treasury and close the budget gap by 1984, balance the Federal budget and thus reduce inflation.

Mr. President, I think the majority of the people in this country think that is nothing but a theory, think it is nothing but speculation, and they do not think it is going to work.

They know if their spending power is reduced by an amount of $1,000 or $1,500 and they get $200 or $300 back in taxes they are worse off rather than better off, and they are not going to invest that money. They are going to use it to pay their bills and to stay even. We are going to end up in 1983 or 1984 or 1985 with a huge Federal deficit, very high rate of inflation, and very high interest rates.

The question is in the meantime are we going to protect the taxpayers against the reason that we are here debating this issue today and that is an unfair and unjust and unlegislated tax increase?

Mr. President, I would bet my life savings on the fact that if we had indexed the tax code 10 years ago we would not be here debating this issue today. The American people know that their taxes have been increased unfairly, they know that Congress has not had the courage to vote a tax increase to pay our bills. And they know that all this mumbo-jumbo about tax cuts and rate reductions and pie-in-the-sky supply-side economics is nothing but more politics. In the meantime, they want a just and fair tax code.

The way we are going to get that is not some speculative economic theory. It is to index the brackets for personal income taxation, and that is what this amendment does.

No; the Senator from Wisconsin is absolutely correct. This amendment is not going to solve the problem of inflation. But it is also not going to make it worse.

Mr. President, I yield to the Senator from Arizona.

Mr. DECONCINI. Mr. President, I thank the Senator from Colorado, and let me compliment him on being one of the leaders in this body long before I got here on the necessity for indexing. There has been a lot of talk about it, just like there is a lot of talk about balancing the budget and then when it comes down to doing it do we have the courage to do it?

I am pleased to join my distinguished friend from Colorado, Senator HART, as cosponsor of this amendment. The rationale for adjusting the personal income tax system to offset the effects of inflation is well known. The issues involved have been thoroughly discussed on numerous occasions in this Chamber and, judging by last Wednesday's vote on the Dole amendment, a majority is now persuaded that the arguments in favor of indexing are, on balance, more compelling than those against, and that we should proceed. The only problem I have is that we have put this off for a long, long time.

This result, Mr. President, which I believe represents a new milestone in Federal tax policy, is due in no small part to the forceful and persistent advocacy of the indexing concept over the past several years by the distinguished chairman of the Finance Committee, Senator DOLE.

Those of us who have favored this change are in his debt for offering it many times on the floor since this Senator has been in the body.

Those of us who have favored this change are here now favoring it once again, at least I hope we will be.

No one has made the case for the tax indexing more effectively than the chairman of the Finance Committee. Indeed, Mr. President, I know of no better support for the pending amendment than the statement of the chairman with respect to a similar proposal on October 6, 1978.

I ask unanimous consent that a copy of that statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DOLE, OCTOBER 6, 1978

Mr. DOLE. Mr. President, the No. 1 problem in our tax system is inflation. During periods of inflation, the net effect of the current tax system is to push low- and middle-income taxpayers into higher tax brackets, without any corresponding increase in the real purchasing power.

DOUBLE DIGIT INFLATION

Mr. President, it is certainly no secret that we are in the midst of an inflation crisis. During the last two quarters, the inflation rate in this country has been at double-digit levels. Yesterday, the administration announced that the wholesale price index increased at nine-tenths of 1 percent, which means we can expect more inflation in future months. The inflation rate for 1978 will be substantially higher than that over the previous year. In fact, the inflation rate under the Carter administration is almost twice as high as it was in the last year of the Ford administration.

TAXFLATION

Mr. President, taxflation is a cruel tax. As an individual earns more money to keep up with the continuing rise in the cost of living, he is pushed into a higher tax bracket. Although he receives an increase in his gross income, there is actually a decrease in his real purchasing power, because he must pay a greater percentage of his income in Federal taxes. Let me give you an example how tax inflation works. A taxpayer who earns $15,000 in 1978 will have to earn $16,200 in 1979 just to maintain his purchasing power with our 8 percent inflation rate. However, the taxpayer's real tax liability will be increased $260. An individual earning $30,000 will have to increase his income up to $32,400 just to stay even with inflation, but his tax bill will rise by $850. Taxflation is easy to understand and the Senator from Kansas believes it is easy to stop.

FINANCE COMMITTEE AMENDMENT

During the markup on the Revenue Act of 1978, I introduced a program to make periodic inflation adjustments in our tax system. My proposal, which is similar to the amendment pending today, called for an inflation adjustment for 2 years, effective 1980, to the personal exemption, the tax brackets, and the zero bracket amount. Unfortunately, the proposal was narrowly defeated.

INDEXING

Mr. President, periodic inflation adjustments to the tax system—indexing—would help neutralize the tax impact of inflation by maintaining the effective rate of taxation for any given income level at the rate originally legislated. The bill reported by the Finance Committee does not adequately protect taxpayers against tax increases caused by inflation.

UNLEGISLATED TAX HIKE

Taxflation is an automatic, unlegislated and unsigned tax hike that cheats the American worker. Government revenues increase at a greater rate than inflation. A report by the Joint Committee on Taxation estimated that a 10-percent inflation rate will increase Government revenues by 12.5-percent. Other economists have said that the windfall profit for the Government is even greater. Dr. Emil Sunley of the Department of the Treasury has stated that tax receipts increase by 1½ times as fast as the rate of inflation. According to the Congressional Budget Office, tax inflation will take as much as $45 billion in 1983 from the American taxpayer. We must put a stop to the effects of tax inflation. I believe that the appropriate vehicle is to adopt the amendment providing for an annual tax inflation adjustment.

INDEXING IS FAIR

Mr. President, there is no tax reform that is more important to the American taxpayer than the tax equalization amendment. Periodic inflation adjustment is fair. It is equitable. It is simple. It is an idea whose time has come.

TREASURY OPPOSITION

The Treasury Department told the Finance Committee in a hearing last April on a proposal which I introduced, S. 2738, the Tax Indexation Act of 1978, that there is no need to index the tax system, because Congress periodically reduces taxes. However, I say that the need for indexing has been underlined by congressional action that has enacted yearly tax cuts for the last 3 years. Now, we have another major tax bill before us. It is true that Congress has tried to keep tax inflation under control by periodically cutting taxes. However, this system has not worked. Furthermore, periodic reduction is deceiving. When the economy becomes too distorted by inflation and taxes are rising too rapidly, Congress tells the American taxpayer that it is going to reduce his taxes.

Congress pats itself on the back and gives itself credit for this "enlightened action." However, the taxpayer is usually in no better condition than if the taxflation were eliminated. The Senator from Kansas does not believe that we are fooling the American taxpayer.

NOT A TAX CUT

Mr. President, the legislation before the Senate is not a tax cut. This legislation is before the Senate, because tax inflation has put an onerous burden on the American tax-

payer. In effect, past tax reduction by Congress in the bill before the Senate is nothing more than a repeal of the automatic tax increases caused by inflation.

Mr. President, there are those in this Chamber who would say that indexing the tax system would be the acceptance of inflation. This, of course, is not true. The fact is, the Federal Government is the benefactor of tax inflation. It is the Federal Government that receives the yearly windfall bonus of tax inflation. Each year, the Government receives billions and billions of dollars in new revenue. I believe that this vested interest should stop.

Mr. President, indexing does not mean that Congress will not have the authority to reform the tax laws or to provide for real tax cuts. Indexing would mean that Congress would have to muster the political courage to raise the money to front new spending programs. Indexing would bring discipline back to the Federal budget process.

I might say this is an idea that has been around for some time. It is one Milton Friedman advanced some years ago. It was first called to my attention by our former distinguished colleague from New York, Senator Buckley. I remember going to a breakfast meeting with Milton Friedman and Senator Buckley some 4 years ago or more. One of the leaders in that effort was Senator Bob Taft, of Ohio. Senator Taft and Senator Buckley are no longer in this body, but other leaders have taken their places; and one who has been very active over the years has been the Senator from Michigan (Mr. GRIFFIN). It has been his efforts and initiative, and the efforts and initiative of the distinguished Senator from Massachusetts (Mr. BROOKE) and the distinguished Senator from Colorado (Mr. HART) that have kept the idea alive.

I think it is fair to predict—it may not happen today, but I would wager that within the next 4 or 5 or 6 years we are going to have indexing, because as more and more States adopt indexing, there will be more and more pressure upon the Members of Congress to do the same thing.

We have indexing in California, in a modified way. The distinguished Senator from Colorado has pointed out how well it is accepted in the State of Colorado. We have indexing in the State of Arizona. It is being considered by a number of other legislative leaders across the country.

It seems to me that one thing the American people understand—they know that taxes may be necessary, they know that inflation may not be desirable, but sometimes it happens, but it is pretty hard to understand or explain to the taxpayer why that taxpayer, man or woman or both, must pay taxes on inflation.

All we are suggesting is that starting in 1980—it does not affect this tax bill; we just suggest that starting in 1980, for a period of 4 years, we are going to index just three areas—not everything, but three areas.

For example, if we have a $1,000 personal exemption, as we will if this bill passes, as I assume it will, and the inflation rate should be 6 percent in 1979, then we would increase that personal exemption by $60. That is just how simple it is. I repeat, there have been a lot of examples given about what happens to the wage earner if he is making $15,000, with 8 percent inflation. The wage earner gets the cost-of-living increase and his income goes up to $16,200, but that is not all that goes up. The taxes go up. He does not have any more earning power, no more real dollars, but he gets a tax increase of 19 percent, and pays $260 more in taxes.

It just seems to me that, when we look at taxflation costing the American people $9 billion a year—we heard the distinguished Senator from Massachusetts this morning, in discussing his good amendment, say that we were not addressing the problem of inflation; we have heard our distinguished chairman on the floor indicate that we are probably going to take care of inflation and the increased social security costs and that is about all; we have heard our distinguished colleague from Delaware, the author of the so-called Roth-Kemp bill, discuss inflation and the need for substantial tax reduction—but I would just suggest that though this particular approach to tax relief has not gotten as much publicity and probably has not been talked about as much as other proposals, it has a great deal of merit. The American people understand it. There are not any curves. We are just saying, "You don't pay taxes on inflation."

As the Senator from Massachusetts pointed out, those who suffer the most are those at the lower end of the economic scale, and they will benefit most from this proposal, the Griffin-Brooke-Hart proposal.

So it seems to me that we have a real opportunity. We have a bipartisan opportunity. This matter was raised in a Republican administration, the Ford administration. We lost. We could not get the support of those who now tell us they cannot support it in the Treasury Department. They have not changed. The same people there make the basic decisions. They were there in the last administration, and they are there in this administration.

But now we have some precedents for indexing, because of an outstanding Member of Congress on the House side, Representative BILL ARCHER, from Texas. He offered an indexing proposal on capital gains, and it was adopted by a vote of almost 2 to 1 in the House of Representatives. So I suggest that Members of Congress understand indexing, and the American taxpayer understands inflation. The American taxpayer does not understand why he has to pay taxes on inflation, and all we say, "You just take out inflation and pay taxes on the rest."

For those who say that indexing takes away discipline, it does not take away the discipline. If we are going to have inflation, it is still going to inflate the cost of everything you buy. We just say that when it comes to paying taxes for the Federal Government, we are going to try to keep you whole.

It is going to be automatic. We are not going to have the ritual every year or every 2 years of Congress saying, "We are going to cut your taxes" when we do not cut your taxes. As I say, though we call this measure before us a tax cut bill, it is not a tax cut bill. Anybody who might be under the impression that he is going to get a tax cut, if he will just add up the total of what inflation will cost, along with the increase in social security costs next year, when you add that up and compare it with what you are going to get in a tax cut next year, if you break even you are lucky.

That is some help. I do not suggest that it is not a help, but it is not a generous act of the Government, because it is the taxpayers' money. But it will be of some help to the taxpayers.

I think it is time that we stopped the endless cycle of illusory tax cuts. We have had tax cuts for each of the past 3 years. If we could have a system of indexing, and we indexed the personal exemption, we indexed the tax brackets to take care of that so-called bracket creep, and we indexed the zero bracket, it seems to me that if we would do that we would address the problem.

Let me suggest that this is not a narrow position. It is not an effort to offend the President of the United States. It is not an effort to offend anyone on this floor. It has a number of cosponsors, including the Senator from Arizona who has just spoken (Mr. GOLDWATER), the Senator from Idaho (Mr. MCCLURE), the Senator from California (Mr. HAYAKAWA), the Senator from Missouri (Mr. DANFORTH), the Senator from New Mexico (Mr. SCHMITT), the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), the Senator from New Mexico (Mr. DOMENICI), the Senator from Minnesota (Mr. ANDERSON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Indiana (Mr. LUGAR), the Senator from Illinois (Mr. PERCY), the Senator from Delaware (Mr. ROTH), the Senator from Arizona (Mr. DECONCINI), and the Senator from Oregon (Mr. MARK O. HATFIELD).

That is a rather broad-based group of Senators of different philosophical approaches, from different parts of the country, all concerned about taxes, all concerned about the proper way to address the problem.

Let me also add this, and then I will yield to the distinguished Senator from Wyoming.

Indexing is not a new concept. Sixty-three percent of all Federal expenditures are indexed, as are some of the current provisions in the Tax Code. Indexing takes place in the food stamp program, social security program, SSI, civil service salaries. Current pension tax laws are indexed, as is the excise tax on the use of oil and natural gas, currently pending in the tax conference, which may or may not become law. Indexing does help keep down Federal expenditures.

Canada, since adopting tax indexing, has experienced a decline in the real rate of Government spending. In Canada real growth in Federal spending declined from 15.9 percent in 1974 to 2.7 percent in 1976.

Indexing is simple. It does not complicate the tax laws. It applies to all taxpayers. All taxpayers suffer from inflation, so all taxpayers benefit from indexing.

Mr. President, I ask unanimous consent to have printed in the RECORD a very eloquent statement delivered by former Senator Jim Buckley in which he outlines his long-held views on indexing. The statement he made at the time is somewhat broader than the proposal before us, but I believe it indicates another former outstanding Member of this body who was known for his conscience of conservatism, a conscience regarding responsible spending, concern about a way to approach taxes and tax cuts with proper adjustments. I believe the statement might be of interest. I ask unanimous consent that it be made part of the RECORD following my remarks.

The PRESIDING OFFICER (Mr. PELL). Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOLE. As far as this Senator is concerned all the points have been covered. I would just reemphasize that indexing is not complicated. It would help the taxpayers cope with some of the problems of inflation. It would eliminate the annual ritual in the Congress. It would end the congressional vested interest in the yearly taxflation windfall profits. Somebody has to pay when we have inflation and it is always the taxpayer. It is not the Government. The Government is the beneficiary. The chief beneficiary of inflation is the U.S. Government. I would hope that we would indicate by our vote that there is broad support for this concept.

EXHIBIT 1

STATEMENT OF JAMES L. BUCKLEY

I am pleased to have this opportunity to address the Finance Committee on a subject which I advocated for a great many years. While in the Senate, I was actively involved in the efforts to introduce indexing into the tax system. I continue to be committed to that objective.

S. 2738, the Tax Indexation Act of 1978, is similar to legislation that I proposed in the 94th Congress. Senator Dole has expanded the concept and made some improvements which I would like to discuss later. What needs to be addressed first is the major inequities that tax inflation introduces into the tax system.

During periods of inflation, the net effect

of the current system of taxation is to push low and middle-income taxpayers into higher tax brackets without any corresponding increase in their real purchasing power. Tying the Federal income tax to the cost-of-living index would help neutralize the tax impact of inflation by maintaining the effective rate of taxation for any given level of income at the rate originally legislated.

An example will illustrate the point. Suppose an individual is earning $10,000 per year in 1978 and that inflation averaged 7 percent per year for the next ten-years. If that taxpayer receives cost-of-living pay increases which keep pace with inflation, his income would be $20,000 in 1988. Yet, that $10,000 increase in income would not be able to buy any more than his lower salaries. In fact, his income would have less purchasing power because of the increase in Federal tax rates.

Assuming the taxpayer is the head of a typical family of four, he would be required to pay approximately 6 percent of his 1978 earnings in Federal income tax. However, because inflation would have the effect of lifting this same individual into ever higher tax brackets, by 1988 he would be required to pay over 13 percent of his earnings to the Federal Government. Thus, although his real income in terms of purchasing power remains unchanged, his increase in "money" income will cause him to pay more than twice as much in taxes leaving him poorer in 1988 despite a doubling of his dollar income.

Another point to make is that tax inflation has the most adverse effect on those in low and middle income tax brackets. An individual whose $100,000 is doubled to $200,000 in ten years would have his taxes increased from 43 percent to 54 percent.

I believe that Congress should enact appropriate legislation to protect the individual taxpayer from the consequences of inflation. The Government is principally responsible for inflation, yet, it is the only one whose income is not hurt by that inflation.

Indexing the tax system would eliminate this windfall profit for the U.S. Treasury. If Congress wants to spend more money in real terms, it should have to make the decision to tax people at higher rates to pay for the increased spending. The tax benefits from inflation in the present system are a disincentive for Congress to control inflation.

The most indefensible inequity of inflation is that the Government profits from the inflation it causes. Tax indexation would require Congress to show the political courage to vote for tax increases if new Government revenues are desired. Hopefully, this situation would make Congress less eager to spend the public's money.

Some have argued that indexing is in itself inflationary. Indexing does not in any way affect inflation nor does it imply a willingness to "live with" inflation. To lower inflation, other monetary and fiscal remedies should be pursued. What indexing can do is to reduce the adverse consequences of inflation for individuals and business while other anti-inflation efforts are put into effect. If indexing acts as a curb on congressional spending habits, that is an extra bonus that can only help in the fight against inflation.

The need for indexation has been underlined by congressional action in enacting yearly tax reductions for the past three years. Passage of indexing legislation would bring stability to our tax system. Taxpayers, both individual and corporate, would not have to wait for Congress to act to offset the bigger bite of inflation. No more would American taxpayers be bounced up and down by the yearly game of tax increase/tax reduction.

The need for indexing is emphasized by the administration's tax program. President Carter's tax proposal has been billed as an offset for higher social security taxes and inflation. However, the President failed to tell us that his tax cut would only keep many Americans even and then only for a short time.

The Congressional Budget Office has predicted that Tax inflation will swell the U.S. Treasury by $45 billion in 1983. The President's tax cut will barely make a dent in that figure. Even if adopted in its present form, the President's package would leave the vast majority of Americans paying more taxes than they are now.

S. 2738 is an excellent first step to take in adoption of indexing for our tax system. The bill indexes the most important sections of the tax code. Under S. 2738, the zero bracket amount, the tax rate tables, the personal exemption, the corporate surtax exemption, individual retirement accounts and Keogh contributions, the gift exclusion, the unified estate credit, the general tax credit, the earned income tax credit, the tax credit for the elderly, the child care tax credit, the limitations on investment tax credit, the minimum tax threshold, the current exempt amount for the exchange of personal residences by individuals over age 65 and the basis of assets would all be adjusted.

Many of these sections have substantial impacts on the most vulnerable group in our society to inflation, the elderly. Those on fixed incomes do not even receive the advantage of cost-of-living increases as do many workers. Therefore, indexing such items as the tax credit for the elderly and the exempt amount on home sales are particularly important in restoring tax equity for this group.

The bill provides for increases in allowable contributions to IRA's and Keogh plans. I believe that it is important for the government to provide the proper incentive for individuals to plan for their own retirements. If inflation continues at present rates for 20 years, the present limit on IRA contributions will certainly be inadequate to meet future living expenses.

The earned income credit was added to the code to eliminate any work disincentives that receiving welfare payments might have for low income individuals. Yet, as welfare payments have increased with inflation, the earned income credit has not kept pace. Indexing this credit will ensure that having a job will always be more profitable than taking welfare.

The Dole bill also acknowledges the importance of the business community in establishing a stable, non-inflationary growth in the economy. Corporate tax rates will not be indexed but several tax sections important to businesses will. Small business will benefit from indexing of the corporate surtax. The surtax amount has been raised in the past but never in an orderly fashion that reflects the changing needs of business.

The other business provisions that are indexed are the limitation on investment tax credit and the basis of assets. The investment tax credit is particularly important in promoting the capital expansion which is needed for future business expansion. This bill would also adjust the cost basis of an asset to reflect changes in the purchasing power of the dollar. Thus an individual would pay capital gains tax on the sale of a capital asset only on the real increase in value and not on a fictitious inflationary gain. Adjustments to basis for inflation would benefit individuals who dispose of their assets as well as businesses.

Indexing has worked well in other countries. Canada is an excellent example of the benefits derived from indexing the tax system. Yet, indexing has not been tried in a tax system and economy as complicated as ours. While I believe that indexing will be successful, Senator Dole has taken a cautious approach in his bill.

The inflation adjustment in S. 2738 would only be equal to two-thirds of the increase in the consumer price index. This percentage is large to curb tax inflation. Yet, by being less than the rate of inflation, no charges that indexing is itself inflationary can be made.

The indexing authority will automatically expire after 5 years. Thus, the Congress can review the success of the program. The increases will be made only once a year, which is no more often than recent major tax legislation.

The adjustments will be automatically put into effect each year. There is another safeguard built into the bill at this point. The President could, by executive order, stop the increase for any year. That decision would be subject to a one-House veto by Congress.

This legislation is an important reform for every taxpayer. No longer would Congress be able to hide tax increases behind the mask of inflation. Since tax indexing was first proposed, the principle has gained increasing support from business as well as academic quarters. In the two years since I left Congress, I have found evidences of that support from many different sources. I am certain that the country would benefit from indexation of taxes and the Dole bill. S. 2738 is a good place to start.

Mr. DECONCINI. Mr. President, I just wish to underscore some of the remarks that the distinguished chairman of the Finance Committee made back on October 6, 1978, because I believe they are relevant today as they were then. Here is just a brief summary but it is quoted from the actual text of the RECORD:

Mr. President, taxflation is a cruel tax. As an individual earns more money to keep up with the continuing rise in the cost of living, he is pushed into a higher tax bracket. Although he receives an increase in his gross income, there is actually a decrease in his real purchasing power, because he must pay a greater percentage of his income in Federal taxes. Let me give you an example how tax inflation works. A taxpayer who earns $15,000 in 1978 will have to earn $16,200 in 1979 just to maintain his purchasing power with our 8 percent inflation rate. However, the taxpayer's real tax liability will be increased $260. An individual earning $30,000 will have to increase his income up to $32,400 just to stay even with inflation, but his tax bill will rise by $850. Taxflation is easy to understand and the Senator from Kansas believes it is easy to stop. . . .

Mr. President, this is Senator DOLE repeating again:

Mr. President, periodic inflation adjustments to the tax system—indexing—would help neutralize the tax impact of inflation by maintaining the effective rate of taxation for any given income level at the rate originally legislated. The bill reported by the Finance Committee does not adequately protect taxpayers against tax increases caused by inflation.

Taxflation is an automatic, unlegislated and unsigned tax hike that cheats the American worker. Government revenues increase at a greater rate than inflation. A report by the Joint Committee on Taxation estimated that a 10-percent inflation rate will increase Government revenues by 12.5 percent. Other economists have said that the windfall profit for the Government is even greater. Dr. Emil Sunley of the Department of the Treasury has stated that tax receipts increase by 1½ times as fast as the rate of inflation. According to the Congressional Budget Office, tax inflation will take as much as $45 billion in 1983 from the American taxpayer. We must put a stop to the effects of tax inflation. I believe that the appropriate vehicle is to adopt the amendment providing for an annual tax inflation adjustment.

Mr. President, there is no tax reform that is more important to the American taxpayer

than the tax equalization amendment. Periodic inflation adjustment is fair. It is equitable. It is simple. It is an idea whose time has come. . . .

Mr. President, the legislation before the Senate is not a tax cut. This legislation is before the Senate, because tax inflation has put an onerous burden on the American taxpayer. In effect, past tax reduction by Congress in the bill before the Senate is nothing more than a repeal of the automatic tax increases caused by inflation.

The chairman goes on:

Mr. President, there are those in this chamber who would say that indexing the tax system would be the acceptance of inflation. This, of course, is not true. The fact is, the Federal Government is the benefactor of tax inflation. It is the Federal Government that receives the yearly windfall bonus of tax inflation. Each year, the Government receives billions and billions of dollars in new revenue. I believe that this vested interest should stop.

Mr. President, indexing does not mean that Congress will not have the authority to reform the tax laws or to provide for real tax cuts. Indexing would mean that Congress would have to muster the political courage to raise the money to front new spending programs. Indexing would bring discipline back to the Federal budget process. . . .

All we are suggesting is that starting in 1980—it does not affect this tax bill; we just suggest that starting in 1980, for a period of 4 years, we are going to index just three areas—not everything, but three areas."

That is the chairman in his statement on indexing on October 6, 1978.

In sum, Mr. President, the rationale for indexing personal taxes turns on the validity of four simple propositions:

1. Indexing controls bracket creep and thus helps to preserve the integrity of the more or less progressive distribution of the tax burden which has been explicitly agreed to in the regular legislative process.

2. Indexing eliminates the inflation dividend to Government resulting from bracket creep and thus promotes greater fiscal discipline.

3. Indexing, by doing away with unlegislated tax increases, forces the Congress and Administration to make explicit choices regarding the level and distribution of the burdens of public finance and thus improves the prospects for public accountability for tax policy.

4. Indexing, by keeping real tax liabilities the same in the absence of either a change in real income or an explicit change in tax policy, is conducive to the kind of stable economic and tax environment preferred by investors.

Now, Mr. President, if these assertions were valid in 1977 and 1978 and if they will be valid in 1985 (as the Dole amendment implies), then it is hard to see why they are not valid now. Mr. President, I urge adoption of the amendment.

Mr. President, during the 4½ years the Senator from Arizona has been in this body we have had an opportunity to vote for this four times, to my recollection, and it will be interesting to see the vote today because I think this is a test of whether or not the rhetoric that has been put forward here over the several years, and probably many years before I ever became a Member of this body, about indexing, doing something for that poor taxpayer who gets moved into the next bracket due to inflation holds true. Now we are going to see a test.

The Senator from Colorado has shown courage today in bringing this forward, and not wait to have a bill reported hopefully from the Finance Committee. I suspect that we will have an opportunity to join the Senator from Colorado again and again in offering indexing, because I am fearful when the shoe is on the other foot indexing sounds OK, but let us not push it across now.

So, Mr. President, I now hope the American public will look carefully at this vote and carefully discern those who have voted for indexing in the past and see if they can be consistent, see if those arguments which have been made time and time again are now going to be voiced and put forward in a vote in favor of the amendment of the Senator from Colorado.

The PRESIDING OFFICER. Who yields time?

Mr. WALLOP. Mr. President, the Senator from Colorado has the floor. I do not know whether he wants to respond any further.

Mr. HART. Mr. President, I reserve the remainder of my time.

Mr. WALLOP. Mr. President, I will be brief in my response to what has been said.

First of all, the Senator from Wyoming is not one of those who has said the sole cause is budget deficits. I happen to believe that is a cause, and a major cause, but I do not believe it is by any stretch of the imagination the sole cause. A good deal of it is lack of savings in this country, a good deal of it is lack of investment in this country, a good deal of it is lack of productivity due to starvation of capital, which is due primarily to high tax rates, and we are not going to, as has the majority party, try to fight inflation on only one battleground and use that as the sole argument. It just simply will not work. It has not worked, and it brings us here today. It has given us the highest rates of inflation we have ever had.

He says—there is nothing but speculation, no proof, no argument—that these tax savings will result, these tax decreases will result, in increased savings or investments. There are polls after polls that have been taken that say Americans, if they get ahead of the marginal curve, will—Americans responding to these say that they will. But we can, if we adopt this indexing amendment and drop the rate reform that is in the Finance Committee resolution, insure that those savings will not take place because they cannot, because we have got to the point right now where the tax burden is such on Americans that they are not saving. They are slipping behind in their standard of living.

It is the same old argument that comes along about this unlegislated tax increase that is inherent, and that argument I subscribe to on the argument of an indexing proposal.

But, on the other hand, we are actually here, if we were to adopt this amendment, seeking a legislated approval of the tax increases that have taken place.

What has taken place, and what we are gathered to do right now, is a legislative tax decrease not an unlegislated ratification of the tax increases that we have had.

The effect of the Senator from Colorado's amendment would be that $70 billion more of the Treasury—that is $70 billion more that Congress will indulge itself in, and it will balance the budget, if it does at all, on the backs of the wage earners and not on their productivity and not on their ability to get ahead of the margin, and not on their ability to improve their standard of living. If we do that, that is crazy.

Then they approach Senator DOLE and they say that he made the case for tax indexing way back in 1978. But he did not make the case for ratifying the burden, unjust as it has become right now. He never has done that. Since 1978 we have had roughly a 30-percent increase in the rate of inflation, and we have had since 1977 the greatest tax increase in the history of this country in the form of social security tax increases, and those are taken into account, so we are here, if we adopt this amendment, simply ratifying the burden and telling the American wage earner to lump it. We are not interested in a tax reduction for him.

It makes the point that there is no tax reform that is more important. I suggest that we have made this tax reform, but there is one thing that is more important, and that is to stabilize the rate of taxation before this thing takes place rather than ratifying the unjust burden that has brought us to this floor. Let us at least adjust the rates before we do that.

Finally, the Senator from Arizona makes the case that it will control bracket creep. Well, it will from here on out, but it ratifies the brackets already crept, and I do not think that is what gathers us here. We are gathered here to try to do something about the injustice of what has taken place, and then when we have made those rate reductions we will indulge ourselves in the indexing.

Mr. HART. Mr. President, will the Senator yield for a question?

Mr. WALLOP. I will.

Mr. HART. The Senator in his discussion of this amendment has somehow implied or suggested or even flatly stated that Congress has been increasing people's taxes. When did we do that? When did we increase income taxes?

Mr. WALLOP. Does the Senator not consider the social security taxes as an income tax?

Mr. HART. A payroll tax. I am talking about the income tax. You are talking about ratifying the income tax increases.

Mr. WALLOP. I am talking about the brackets already crept, the so-called tax-flation argument the Senator makes. I am saying we have permitted this thing, and people have brought this argument to the floor time and again because they sensed that it was happening. But it has gotten to the point where we have to reduce that. The brackets have already been crept.

Mr. HART. Has the Congress increased the tax brackets?

Mr. WALLOP. No, they have not increased them. The people have been

having that increase by virtue of the fact that we have had 30-percent inflation, and that has put people into the position where they are paying more taxes. You are trying to ratify that circumstance. I am saying we must undo what we have done and then do what the Senate has already done, and that makes sense.

It is absolutely sheer rhetorical nonsense to say this would put people to the test of their rhetoric on indexing. We have met that test. The Senate has voted to go to indexing, and there is no test left. The real test now is whether or not people recognize that the American public, the wage earners of this land, are unfairly taxed now and are entitled to a tax reduction before we begin indexing.

On that I would rest the case of the majority. If the Senator has any more statement, I would be glad to hear him. Otherwise I am prepared to yield back the remainder of my time.

Mr. HART. Well, I think the Senator from Wyoming is just clearly wrong, and the Senator from Arizona is just clearly right.

To pick some year way out in the future and vote for something for the American people, the people that Senators have been arguing for for years around here, and say how we have satisfied our commitment is patent nonsense.

Why not 1995? Let us vote for indexing in 1995 and, therefore, we are all on record for indexing.

That is ridiculous. If all the arguments that I and the Senator from Arizona cited, that proponents of the concept of indexing have said over the years that we must have it now—they said that this week; they said that in 1979; they said it in 1978, the year that I first introduced, with the Senator from Michigan, the first bipartisan indexing proposal 4 years ago; we must have indexing now—if all those arguments 3 days ago about it were fair and just and it is the thing we had to do—and then 1985. Well, that is no record. That is not satisfying any commitment. That is postponement.

Now, I do not want to get into a dispute with the Senator from Wyoming about who has approached inflation on one level or several levels. But I think the record of the party on this side of the aisle has been that inflation is caused by a variety of factors and ought to be treated accordingly—exported dollars for imported oil, wages and prices, and other factors are involved.

The incumbent President of the United States gets up before the Congress and says, "'There is only one cause of inflation and that is the Government." Now, who is approaching inflation on only one level? "The Government causes inflation," the President of the United States says.

The Senator from Wyoming talks about getting ahead of the marginal curve, whatever that means. I agree with him. People will invest when they get ahead of the curve. But the Finance Committee's bill is not going to get them ahead of the curve. They are going to fall farther behind.

Inflation is going to go up because of budget deficits created by this bill. It will pick their pockets to a much greater extent than the tax cut that is argued and we are presenting, and they are going to be worse off than better off.

It is on that basis that we will rest our case. The Senator from Colorado is prepared to vote.

Mr. DECONCINI. Will the Senator yield for a question?

Mr. HART. I yield.

Mr. DECONCINI. It is my understanding that the amendment of the Senator from Colorado only goes to the personal, across-the-board income tax offered by the committee and does not reduce any of the other proposals that have already been recommended or adopted so far. Is that correct?

Mr. HART. The Senator from Arizona is absolutely correct. I thank him for raising the question which has not been addressed today.

The Senator from Wyoming properly said what we need are incentives for investment. The amendment the Senator from Colorado has offered and the Senator from Arizona supports keeps all the business incentives and deductions and incentives to invest in the bill and this would merely index the personal income tax rate.

Mr. DECONCINI. I thank the Senator from Colorado. I just wanted to make a point that I think this amendment offers us what the distinguished chairman of the Finance Committee has been talking about for years, as the junior Senator from Colorado, as well as my distinguished colleague and the author of this amendment. We have an opportunity here to continue what I consider and what I think many consider some real positive approaches toward the business community, toward incentives for savings, toward the ultimate elimination of the marriage penalty, for estate taxes, and for depreciation. And yet when we come to the individual, we now have a chance to do what has been argued here for 4½ years, the most cogent argument being the one from the Senator from Kansas on October 6, 1978, which I read and listened to and was so convinced and became such a zealot on indexing that I think the Senator's amendment ought to be accepted.

I cannot imagine even asking for a vote, because it makes so much sense and there is so much support, at least until this date. I thank the Senator.

Mr. HART. Mr. President, I am prepared to yield back the remainder of my time.

Mr. DOLE. Mr. President, does the Senator want the yeas and nays on this amendment?

Mr. HART. Yes. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, we will yield back the remainder of our time.

Mr. HART. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Colorado (Mr. HART). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Alaska (Mr. STEVENS) is necessarily absent.

I also announce that the Senator from Utah (Mr. GARN) is absent due to death in the family.

Mr. CRANSTON. I announce that the Senator from Vermont (Mr. LEAHY) is necessarily absent.

The PRESIDING OFFICER (Mr. SIMPSON). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 4, nays 93, as follows:

[Rollcall Vote No. 214 Leg.]

YEAS—4

Cranston	Hart	Levin
DeConcini		

NAYS—93

Abdnor	Glenn	Murkowski
Andrews	Goldwater	Nickles
Armstrong	Gorton	Nunn
Baker	Grassley	Packwood
Baucus	Hatch	Pell
Bentsen	Hatfield	Percy
Biden	Hawkins	Pressler
Boren	Hayakawa	Proxmire
Boschwitz	Heflin	Pryor
Bradley	Heinz	Quayle
Bumpers	Helms	Randolph
Burdick	Hollings	Riegle

East	Metzenbaum	Zorinsky
Exon	Mitchell	
Ford	Moynihan	

NOT VOTING—3

Garn	Leahy	Stevens

So Mr. HART's amendment (UP No. 268) was rejected.

Mr. DOLE. I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Kansas (Mr. DOLE).

The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENMENT NO. 269

(Purpose: To extend and revise the targeted jobs credit)

Mr. HEINZ. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 269.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle F of title II, insert the following new section:

EXTENSION AND REVISION OF TARGETED JOBS CREDIT

SEC. . (a) EXTENSION OF CREDIT TO INDIVIDUALS HIRED BEFORE JANUARY 1, 1983.—

(1) IN GENERAL.—Paragraph (1) of section 51(d) (defining members of a targeted group) is amended by inserting "such individual first begins work for the employer before January 1, 1983, and" after "if".

(2) CONFORMING AMENDMENT.—Subsection (c) of section 51 (defining wages) is amended by striking out paragraph (4).

(b) INDIVIDUALS QUALIFYING AS MEMBERS OF A TARGETED GROUP.—

(1) IN GENERAL.—Paragraph (1) of section 51(d) (defining members of targeted groups) is amended by striking out subpargraphs (D) and (E) and inserting in lieu thereof the following:

"(D) an eligible work incentive employee.

"(E) an involuntarily terminated CETA employee,".

(2) DEFINITIONS.—

(A) IN GENERAL.—Subsection (d) of section 51 is amended by striking out paragraphs (5) and (6) and inserting in lieu thereof the following new paragraphs:

"(5) ELIGIBLE WORK INCENTIVE EMPLOYEES.—The term 'eligible work incentive employee' means an individual who has been certified by the designated local agency as—

"(A) being eligible for financial assistance under part A of title IV of the Social Security Act and as having continually received such financial assistance during the 90-day period which immediately precedes the date on which such individual is hired by the employer, or

"(B) having been placed in employment under a work incentive program established under section 432(b)(1) of the Social Security Act.

"(6) INVOLUNTARILY TERMINATED CETA EMPLOYEE.—The term 'involuntarily terminated CETA employee' means an individual who is certified by the designated local agency as having been involuntarily terminated after December 31, 1980, from employment financed in whole or in part under a program under part D of title II or title VI of the Comprehensive Employment and Training Act.".

(B) CONFORMING AMENDMENTS.—

(i) Subsection (a) of section 50B (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(5) TERMINATION.—The term 'work incentive program expenses' shall not include any amount paid or incurred in any taxable year beginning after December 31, 1981.".

(ii) Subsection (c) of section 51 (defining wages) is amended by striking out paragraph (3).

(3) REMOVAL OF AGE LIMITATION ON VIETNAM VETERANS.—Paragraph (4) of section 51(d) (relating to Vietnam veterans) is amended—

(A) by inserting "and" at the end of subparagraph (B),

(B) by striking out ", and" at the end of subparagraph (C) and inserting in lieu thereof a period, and

(C) by striking out subparagraph (D).

(c) CERTIFICATIONS.—

(1) CERTIFICATIONS MUST BE MADE BEFORE EMPLOYEE BEGINS WORK, ETC.—Subsection (d) of section 51 is amended by adding at the end thereof the following new paragraph:

"(13) SPECIAL RULES FOR CERTIFICATIONS.—

"(A) IN GENERAL.—An individual shall not be treated as a member of a targeted group unless, before the day on which such individual begins work for the employer, the employer—

"(i) has received a certification from a designated local agency that such individual is a member of a targeted group, or

"(ii) has requested in writing such certification from the local designated agency.

"(B) INCORRECT CERTIFICATIONS.—If—

"(i) an individual has been certified as a member of a targeted group, and

"(ii) such certification is incorrect because it was based on false information provided by such individual,

the certification shall be revoked and wages paid by the employer after the date on which notice of revocation is received by the employer shall not be treated as qualified wages.".

(2) CERTIFICATION OF ECONOMICALLY DISADVANTAGED FAMILIES.—Paragraph (9) of section 51(d) is amended to read as follows:

"(9) MEMBERS OF ECONOMICALLY DISADVANTAGED FAMILIES.—An individual is a member of an economically disadvantaged family if the designated local agency determines that such individual was a member of a family which had an income during the 6 months immediately preceding the month in which such determination occurs, which, on an annual basis, would be 70 percent or less of the Bureau of Labor Statistics lower living standard. Any such determination shall be valid for the 45-day period beginning on the date such determination is made.".

(d) ELIGIBILITY.—Section 51 is amended by adding at the end thereof the following new subsection:

"(i) CERTAIN INDIVIDUALS INELIGIBLE.—

"(1) RELATED INDIVIDUALS.—No wages shall be taken into account under subsection (a) with respect to an individual who—

"(A) bears any of the relationships described in paragraphs (1) through (8) of section 152(a) to the taxpayer, or, if the taxpayer is a corporation, to an individual who owns, directly or indirectly, more than 50 percent in value of the outstanding stock of the corporation (determined with the application of section 267(c)),

"(B) if the taxpayer is an estate or trust, is a grantor, beneficiary, or fiduciary of the estate or trust, or is an individual who bears any of the relationships described in paragraphs (1) through (8) of section 152(a) to a grantor, beneficiary, or fiduciary of the estate or trust, or

"(C) is a dependent (described in section 152(a)(9)) of the taxpayer, or if the taxpayer is a corporation, of an individual described in subparagraph (A), or, if the taxpayer is an estate or trust, of a grantor, beneficiary, or fiduciary of the estate or trust.

"(2) NONQUALIFYING REHIRES.—No wages shall be taken into account under subsection (a) with respect to any individual if, prior to the hiring date of such individual, such individual had been employed by the employer at any time during which he was not a member of a targeted group.".

(e) LIMITATIONS ON QUALIFIED FIRST-YEAR WAGES.—Section 51(e) (relating to limitation on qualified first-year wages) is amended by inserting "the greater of $25,000 or" after "exceed".

(f) LIMITATION ON WAGES TAKEN INTO ACCOUNT FOR CERTAIN YOUTHS.—Paragraph (4) of section 51(b), defining qualified wages) is amended to read as follows:

"(4) ANNUAL LIMITATION ON WAGES TAKEN INTO ACCOUNT.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the amount of the qualified first-year wages, and the amount of the qualified second-year wages, which may be taken into account with respect to any individual shall not exceed $6,000 per year.

"(B) LIMITATION IN CASE OF CERTAIN YOUTHS.—In the case of an individual who is a youth participating in a qualified cooperative education program—

"(i) the amount of qualified first-year wages which may be taken into account shall not exceed $3,000, and

"(ii) the amount of qualified second-year wages which may be taken into account shall not exceed $1,500.".

(g) ADMINISTRATION, AUTHORIZATION OF APPROPRIATIONS, AND TELEPHONE EXCISE TAX.—

(1) ADMINISTRATION.—

(A) DESIGNATED LOCAL AGENCY.—Paragraph (12) of section 51(d) (defining designated local agency) is amended to read as follows:

"(12) DESIGNATED LOCAL AGENCY.—The term 'designated local agency' means a State employment security agency established in accordance with the Act of June 6, 1933, as amended (29 U.S.C. 49–49n).".

(B) NOTIFICATION.—Subsection (g) of section 51 (relating to notification of employers) is amended by striking out "Secretary of Labor" each place it appears in the hearing and text and inserting in lieu thereof "United States Employment Service".

(2) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal year 1982 the sum of $30,000,000 to carry out the functions described in paragraph (1), except that, of the amounts appropriated pursuant to this paragraph—

(A) $5,000,000 shall be used to test whether individuals certified as members of targeted groups under section 51 of such Code are eligible for such certification (including the use of statistical sampling techniques), and

(B) the remainder shall be distributed under performance standards prescribed by the Secretary of Labor

(3) EXTENSION OF TELEPHONE EXCISE TAX.—

(A) IN GENERAL.—The table contained in paragraph (2) of section 4251 (a) (relating to imposition of tax on communication services) is amended by striking out the last 2 lines of such table and inserting in lieu thereof the following:

"During 1980 or 1981.....2
"During 1982, 1983 and 1984.....1"

(B) CONFORMING AMENDMENT.—Subsection (b) of section 4251 is amended by striking out "January 1, 1983" and inserting in lieu thereof "1985".

(h) EFFECTIVE DATES.—

(1) AMENDMENTS RELATING TO MEMBERS OF TARGETED GROUPS.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the amendments made by subsections (b), (c) (2), and (d) shall apply to wages paid or incurred with respect to individuals first beginning work for an employer after the date of the enactment of this Act in taxable years ending after such date.

(B) ELIGIBLE WORK INCENTIVE EMPLOYEES.—The amendments made by subsection (b) (2) (A) relating to the designation of eligible work incentive employees (within the meaning of section 51 (d) (5) of the Internal Revenue Code of 1954) as members of a targeted group and subsection (b) (2) (B) (ii) shall apply to taxable years beginning after December 31, 1981. In the case of an eligible work incentive employee, subsections (a) and (b) of section 51 of such Code shall be applied for taxable years beginning after December 31, 1981, as if such employees had been members of a targeted group for taxable years beginning before January 1, 1983.

(2) CERTIFICATIONS.—The amendment made by subsection (c) (1) shall apply to individuals beginning work for an employer after July 23, 1981, except that such amendment shall apply to individuals beginning work for an employer on or before such date

if the employer has not received a certification described in section 51 of the Internal Revenue Code of 1954 with respect to such employee on or before such date.

(3) LIMITATION ON QUALIFIED FIRST-YEAR WAGES, ETC.—The amendment by subsections (e) and (f) shall apply to taxable years beginning after December 31, 1981.

Mr. BAKER. Mr. President, will the Senator yield to me briefly?

Mr. HEINZ. I yield.

Mr. BAKER. Mr. President, I observe that on the list of qualified amendments agreed to last night that might be offered and on which there are time limitations, there appears to be 2 hours, equally divided, for this amendment. I wonder whether the distinguished Senator from Pennsylvania, the distinguished Senator from New Mexico, and the minority manager of the measure will consider a reduction of that time to 1 hour, equally divided.

Mr. DOMENICI. I will be glad to do so.

Mr. BAKER. I thank the Senator.

Mr. BAUCUS. Mr. President, reserving the right to object, I do not know whether the principals on this side would agree to that. I understand that Senator LONG is interested in this amendment, and we are trying to find out now whether he will agree. I cannot say at this point.

Mr. BAKER. I thank the Senator.

Mr. President, I will not now put that request; but I note for the record that the sponsors of the amendment have indicated their willingness to reduce the time to 1 hour, equally divided, and I hope the minority might do so as well.

Mr. BAUCUS. We will do everything we can to do so.

Mr. BAKER. I thank the Senator.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I am advised now that, in addition to the consent to the reduction of time by the distinguished authors of the amendment, Senator HEINZ and Senator DOMENICI, other Senators as well, including the minority leader and the minority manager of the measure, also are agreeable.

Therefore, I ask unanimous consent that the time on this amendment be reduced from 2 hours to 1 hour, equally divided, under the conditions previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I ask unanimous consent that my name be added as a cosponsor on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I very much hope that the Senate will agree to this amendment.

The targeted jobs credit is an approach which uses the tax law to try to see that those unfortunate disadvantaged people who for one reason or another are getting the worst of it in this society will have some consideration beyond that which would otherwise be the case in helping them to find employment.

It gives the employer a tax advantage if he will employ these less fortunate displaced people in our society.

It was given consideration by the Committee on Finance and also by the House Committee on Ways and Means when the matter was considered on an earlier date.

We believe, Mr. President, that this tax advantage for employing the disadvantaged should be continued. I am pleased that the Senators from Pennsylvania and New Mexico have joined in supporting this amendment, and I hope very much that the Senate will agree to it when this matter comes to a vote.

There are many good things in the bill, but I think this certainly would claim a priority along with the best provisions to try to assure an opportunity to those who otherwise would be very badly disadvantaged.

So I wish to add my voice in support of those who are sponsoring this amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT 269 (AS MODIFIED)

Mr. HEINZ. Mr. President, I modify my amendment and send to the desk the modification.

The PRESIDING OFFICER. Is there objection to the modification?

Without objection, the amendment is so modified.

The modified amendment is as follows:

At the end of subtitle F of title II, insert the following new section:

SEC. . EXTENSION AND REVISION OF TARGETED JOBS CREDIT.

(a) EXTENSION OF CREDIT TO INDIVIDUALS HIRED BEFORE JANUARY 1, 1983.—

(1) IN GENERAL.—Paragraph (1) of section 51(d) (defining members of a targeted group) is amended by inserting "such individual first begins work for the employer before January 1, 1983, and" after "if".

(2) CONFORMING AMENDMENT.—Subsection (c) of section 51 (defining wages) is amended by striking out paragraph (4).

(b) INDIVIDUAL QUALIFYING AS MEMBERS OF A TARGETED GROUP.—

(1) IN GENERAL.—Paragraph (1) of section 51(d) (defining members of targeted groups) is amended by striking out subparagraphs (D) and (E) and inserting in lieu thereof the following:

"(D) an eligible work incentive employee,

"(E) an involuntarily terminated CETA employee,".

(2) DEFINITIONS.—

(A) IN GENERAL.—Subsection (d) of section 51 is amended by striking out paragraphs (5) and (6) and inserting in lieu thereof the following new paragraphs:

"(5) ELIGIBLE WORK INCENTIVE EMPLOYEE.—The term 'eligible work incentive employee' means an individual who has been certified by the designated local agency as—

"(A) being eligible for financial assistance under part A of title IV of the Social Security Act and as having continually received such financial assistance during the 90-day period which immediately precedes the date on which such individual is hired by the employer, or

"(B) having been placed in employment under a work incentive program established under section 432(b)(1) of the Social Security Act.

"(6) INVOLUNTARILY TERMINATED CETA EMPLOYEE.—The term 'involuntarily terminated CETA employee' means an individual who is certified by the designated local agency as having been involuntarily terminated after December 31, 1980, from employment financed in whole or in part under a program under part D of title II or title VI of the Comprehensive Employment and Training Act.".

(B) CONFORMING AMENDMENTS.—

(i) Subsection (a) of section 50B (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(5) TERMINATION.—The term 'work incentive program expenses' shall not include any amount paid or incurred in any taxable year beginning after December 31, 1981.".

(ii) Subsection (c) of section 51 (defining wages) is amended by striking out paragraph (3).

(3) REMOVAL OF AGE LIMITATION ON VIETNAM VETERANS.—Paragraph (4) of section 51(d) (relating to Vietnam veterans) is amended—

(A) by inserting "and" at the end of subparagraph (B),

(B) by striking out ", and" at the end of subparagraph (C) and inserting in lieu thereof a period, and

(C) by striking out subparagraph (D).

(c) CERTIFICATIONS.—

(1) CERTIFICATIONS MUST BE MADE BEFORE EMPLOYEE BEGINS WORK, ETC.—Subsection (d) of section 51 is amended by adding at the end thereof the following new paragraph:

"(13) SPECIAL RULES FOR CERTIFICATIONS.—

"(A) IN GENERAL.—An individual shall not be treated as a member of a targeted group unless, before the day on which such individual begins work for the employer, the employer—

"(i) has received a certification from a designated local agency that such individual is a member of a targeted group, or

"(ii) has requested in writing such certification from the local designated agency.

"(B) INCORRECT CERTIFICATIONS.—If—

"(i) an individual has been certified as a member of a targeted group, and

"(ii) such certification is incorrect because it was based on false information provided by such individual,

the certification shall be revoked and wages paid by the employer after the date on which notice of revocation is received by the employer shall not be treated as qualified wages.".

(2) CERTIFICATION OF ECONOMICALLY DISADVANTAGED FAMILIES.—Paragraph (9) of section 51(d) is amended to read as follows:

"(9) MEMBERS OF ECONOMICALLY DISADVANTAGED FAMILIES.—An individual is a member

of an economically disadvantaged family if the designated local agency determines that such individual was a member of a family which had an income during the 6 months immediately preceding the month in which such determination occurs, which, on an annual basis, would be 70 percent or less of the Bureau of Labor Statistics lower living standard. Any such determination shall be valid for the 45-day period beginning on the date such determination is made.".

(d) ELIGIBILITY.—Section 51 is amended by adding at the end thereof the following new subsection:

"(i) CERTAIN INDIVIDUALS INELIGIBLE.—

"(1) RELATED INDIVIDUALS.—No wages shall be taken into account under subsection (a) with respect to an individual who—

"(A) bears any of the relationships described in paragraphs (1) through (8) of section 152(a) to the taxpayer, or, if the taxpayer is a corporation, to an individual who owns, directly or indirectly, more than 50 percent in value of the outstanding stock of the corporation (determined with the application of section 267(c)),

"(B) if the taxpayer is an estate or trust, is a grantor, beneficiary, or fiduciary of the estate or trust, or is an individual who bears any of the relationships described in paragraphs (1) through (8) of section 152(a) to a grantor, beneficiary, or fiduciary of the estate or trust, or

"(C) is a dependent (described in section 152(a)(9)) of the taxpayer, or, if the taxpayer is a corporation, of an individual described in subparagraph (A), or, if the taxpayer is an estate or trust, of a grantor, beneficiary, or fiduciary of the estate or trust.

"(2) NONQUALIFYING REHIRES.—No wages shall be taken into account under subsection (a) with respect to any individual if, prior to the hiring date of such individual, such individual had been employed by the employer at any time during which he was not a member of a targeted group.".

(e) LIMITATIONS ON QUALIFIED FIRST-YEAR WAGES.—Section 51 (e) (relating to limitation on qualified first-year wages) is amended by inserting "the greater of $25,000 or" after "exceed".

(f) LIMITATION ON WAGES TAKEN INTO ACCOUNT FOR CERTAIN YOUTHS.—Paragraph (4) of section 51 (b) (defining qualified wages) is amended to read as follows:

"(4) ANNUAL LIMITATION ON WAGES TAKEN INTO ACCOUNT.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the amount of the qualified first-year wages, and the amount of the qualified second-year wages, which may be taken into account with respect to any individual shall not exceed $6,000 per year.

"(B) LIMITATION IN CASE OF CERTAIN YOUTHS.—In the case of an individual who is a youth participating in a qualified cooperative education program—

"(i) the amount of qualified first-year wages which may be taken into account shall not exceed $3,000, and

"(ii) the amount of qualified second-year wages which may be taken into account shall not exceed $1,500.".

(g) ADMINISTRATION, AUTHORIZATION OF APPROPRIATIONS, AND TELEPHONE EXCISE TAX.—

(1) ADMINISTRATION.—

(A) DESIGNATED LOCAL AGENCY.—Paragraph (12) of section 51 (d) (defining designated local agency) is amended to read as follows:

"(12) DESIGNATED LOCAL AGENCY.—The term 'designated local agency' means a State employment security agency established in accordance with the Act of June 6, 1933, as amended (29 U.S.C. 49–49n).".

(B) NOTIFICATION.—Subsection (g) of section 51 (relating to notification of employers) is amended by striking out "Secretary of Labor" each place it appears in the heading and text and inserting in lieu thereof "United States Employment Service".

(2) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal year 1982 the sum of $30,000,000 to carry out the functions described in paragraph (1), except that, of the amounts appropriated pursuant to this paragraph—

(A) $5,000,000 shall be used to test whether individuals certified as members of targeted groups under section 51 of such Code are eligible for such certification (including the use of statistical sampling techniques), and

(B) the remainder shall be distributed under performance standards prescribed by the Secretary of Labor.

(3) EXTENSION OF TELEPHONE EXCISE TAX.—

(A) IN GENERAL.—The table contained in paragraph (2) of section 4251(a) (relating to imposition of tax on communication services) is amended by striking out the last 2 lines of such table and inserting in lieu thereof the following:

"During 1980 or 1981	2
"During 1982, 1983 and 1984	1"

(B) CONFORMING AMENDMENT.—Subsection (b) of section 4251 is amended by striking out "January 1, 1983" and inserting in lieu thereof "January 1, 1985.".

(h) EFFECTIVE DATES.—

(1) AMENDMENTS RELATING TO MEMBERS OF TARGETED GROUPS.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the amendments made by subsections (b), (c)(2), and (d) shall apply to wages paid or incurred with respect to individuals first beginning work for an employer after the date of the enactment of this Act in taxable years ending after such date.

(B) ELIGIBLE WORK INCENTIVE EMPLOYEES.—The amendments made by subsection (b)(2)(A) relating to the designation of eligible work incentive employees (within the meaning of section 51(d)(5) of the Internal Revenue Code of 1954) as members of a targeted group and subsection (b)(2)(B)(ii) shall apply to taxable years beginning after December 31, 1981. In the case of an eligible work incentive employee, subsections (a) and (b) of section 51 of such Code shall be applied for taxable years beginning after December 31, 1981, as if such employees had been members of a targeted group for taxable years beginning before January 1, 1983.

(2) CERTIFICATIONS.—The amendment made by subsection (c)(1) shall apply to individuals beginning work for an employer after July 23, 1981, except that such amendment shall apply to individuals beginning work for an employer on or before such date if the employer has not received a certification described in section 51 of the Internal Revenue Code of 1954 with respect to such employee on or before such date.

(3) LIMITATION ON QUALIFIED FIRST-YEAR WAGES, ETC.—The amendment made by subsections (e) and (f) shall apply to taxable years beginning after December 31, 1981.

Mr. HEINZ. Mr. President, I rise to offer this amendment on behalf of myself; Senator DOMENICI, the chairman of the Budget Committee; the chairman of the Finance Committee, Senator DOLE; the ranking minority member of the Finance Committee, Senator LONG, together with the following distinguished cosponsors: Senators D'AMATO, ANDREWS, PACKWOOD, BOSCHWITZ, BOREN, SPECTER, SYMMS, PRESSLER, DURENBERGER, ROTH, BENTSEN, MITCHELL, BRADLEY, MATSUNAGA, DANFORTH, RIEGLE, CHILES, MOYNIHAN, DECONCINI, FORD, HUDDLESTON, RANDOLPH, METZENBAUM, SASSER, CHAFEE, HATFIELD, LEVIN, INOUYE, and SARBANES.

Mr. President, what our amendment proposes is a 1-year extension of the successful targeted jobs tax credit program, that would otherwise expire at year end, with some important changes to make it work even better.

The Senate should not permit the targeted jobs tax credit program to die because it offers a way out of poverty and joblessness for the disadvantaged who are looking for private-sector jobs.

Maybe this program should be renamed the "Human Cost Recovery Act" because targeted jobs tax credits can open doors and reclaim lives.

Like the Capital Cost Recovery Act, the Human Cost Recovery Act is concerned with making an investment now for a better future. By lowering taxes on businesses that buy productive equipment, we expect a more prosperous country. By lowering taxes on businesses that hire workers with chronic problems finding work, we can expect a more humane society.

The targeted jobs tax credit helps seven categories of people who are trying to find jobs with less success than anybody else. For those who do succeed, the average pay is less than $8,400 a year.

When the Congress last met in 1978 to discuss the second largest tax cut in history, the Revenue Act of 1978, we adopted a new law to help those in poverty and with few skills find the jobs they were looking for. By yearend, 600,000 will have them. It is fitting then, as we meet here again today, discussing the largest tax cut in history, to reaffirm and improve on our earlier work 3 years ago

The credit helps impoverished Vietnam veterans, 18- to 24-year olds, and ex convicts. It helps the handicapped those on general assistance and those receiving supplemental social security. And it helps those in high school get off to a good start on their first job.

It does so by permitting their employers to take a tax credit worth up to $3,000 the first year of their employment. For major corporations, the figures are just over half this because they lose the right to deduct an amount equal to the credit. In the second year, the credit cannot exceed $1,500.

But whenever it works, those are tax dollars we should be glad not to collect. For the 4 million people who qualify, it is the bridge they have been searching for to join our society, as equal partners. This is the most important reason why the credit should be retained. The Treasury makes an investment only if those in poverty help themselves to escape it by finding and keeping a private sector job.

In a way, the targeted jobs tax credit is a form of justice. For unrelated reasons, the Congress has set the minimum wage at $3.35 an hour, while an employer has to pay a minimum $3.75 an hour due to social security, workmen's compensation, and unemployment taxes. When these people look for work, they cannot leap over that $3.75 hurdle. It is just too high for an employer to gamble.

Therefore, it would be unconscionable if Congress did not take steps to lower the barrier to a productive life it had erected in the way of millions of people. It is only fair that we keep the barrier low by retaining the tax credit.

While this program is worth retaining in its present form, there are ways to make any Government program better. Here are the ones we propose.

First, a new category should be created for CETA workers who have lost their jobs under the budget cutbacks. The human cost recovery concept makes special sense for people the Government previously has invested in. It would be a mistake to build only half a building, and it would be foolish not to complete efforts to guide CETA workers toward self-sufficiency.

Second, the 35 years of age limit is lifted for Vietnam veterans. Soldiers who fought in 1965 and were over 20 years of age at the time are now denied assistance on a technicality despite living in poverty. The limit should be lifted.

Third, we wish to remove a provision in the 1978 law that had the effect of locking many small businesses out of the benefits. Now, wages paid to TJTC eligible workers can never exceed 30 percent of payroll. This makes it impossible for an employer with only three employees to hire even one TJTC eligible worker without violating the ceiling. Instead, under the amendment, the previous limit or $25,000 in eligible wages is permitted, whichever is higher.

Fourth, employers are required to file for the credit before their TJTC eligible employees start working. This will eliminate the current practice where employers can file for the credit although they learn months after the fact that workers hired previously qualify.

Finally, important administrative changes are made, too. Most significantly, we require the Secretary of Labor to distribute administrative funds through the U.S. Employment Service under performance standards he establishes. That way, local employment offices which do the best jobs will receive more resources. Right now, there is no real link between funding and performance.

In addition, the WIN credit program, which works the same way for AFDC recipients who find private-sector jobs, is merged with the larger TJTC program to eliminate employer confusion.

To remove the concern that this valuable program would nevertheless weaken our efforts to eliminate future deficits, we simultaneously propose that the Federal telephone excise tax drop from 2 percent in 1981 to 1 percent in 1982, 1983, and 1984.

I am confident the Senate will reaffirm its view again today that it has an obligation to help those who are trying to help themselves out of poverty through self-supporting work in the private sector. It will do so by agreeing to a 1-year extension of the targeted jobs tax credit as part of the tax bill before us now.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, parliamentary inquiry. How much time remains on the amendment?

The PRESIDING OFFICER. The time remaining on the amendment is Senator HEINZ 16 minutes, and for the other side 22 minutes.

Mr. DOMENICI. Mr. President, I yield myself 5 minutes.

First of all, I want to thank the distinguished Senator from Pennsylvania (Mr. HEINZ) for his diligence and his hard work in perfecting this amendment. It required a lot of work.

I also want to thank the distinguished ranking minority member of the Finance Committee, Senator LONG. He helped us with this and has already spoken in behalf of it.

Mr. President, I can think of no more important task for this body to undertake than to reduce the growth of Federal spending. I am grateful to my colleagues for their help over the past many months and in the future to achieve this goal. Budget reductions are vital to ending inflation and to reviving our economy, but they also can have severe impacts on Americans who have nowhere else to turn but their Government.

It is my hope and the hope of this administration that the private sector of our economy will step forward to create jobs and to offer services for such people. I know some would doubt the sincerity of those who would rely upon the "safety net." This Senator is firmly committed to making the "safety net" a reality.

For this reason, I am offering an amendment today with Senator HEINZ and Senator LONG to extend the targeted jobs tax credit for 1 more year. This provision has already created nearly 600,000 jobs under present law. If we do not act today to extend the life of this program, these jobs will be lost by year-end.

Three-quarters of those who currently qualify for the targeted jobs credit earn the minimum wage. They include economically disadvantaged youth, Vietnam veterans, and exconvicts. Those on general assistance and SSI as well as the handicapped and students in cooperative education qualify also.

By the end of September, budget reductions will have eliminated 300,000 CETA public service jobs. It is estimated that 100,000 of these workers will have difficulty finding alternative employment. This amendment provides the jobs credit to employers who hire these former CETA workers.

The credit amounts to as much as $3,000 in the first year of employment and $1,500 in the second year. This provides a substantial incentive for employers to create jobs for qualified workers.

As Budget Committee chairman, I am concerned that we not increase the revenue loss of this tax bill beyond what President Reagan recommended. For this reason, the amendment proposes to extend the telephone excise tax to pay for the revenue loss of extending the targeted jobs credit. In fact, this amendment actually raises $109 million by the end of fiscal year 1985.

Under present law, the telephone excise is scheduled to phase out by 1983. The amendment extends the excise at 1 percent through 1984.

This amendment also makes important improvements in the targeted jobs tax credit. We would eliminate retroactive certifications to insure that the credit goes to new jobs for qualified workers and not to jobs which would have been available without the credit.

Cooperative education students would receive a credit not to exceed $1,500 in the first year and $750 in the second year.

The present law credit excludes disadvantaged Vietnam veterans who are age 35 or over. Many veterans have been excluded by this provision. The amendment repeals this restriction so that all disadvantaged veterans qualify.

Some employers have been confused by the existence of two employment credits under present law. Therefore, the amendment merges the WIN credit into the targeted jobs credit. We eliminate the general assistance and SSI categories because so few people qualify under these categories today and because the additional administrative burden is large.

Finally, our investigation into the administration of the targeted jobs credit shows that funds are not distributed by the number of certifications or other appropriate measures of performance. The amendment calls upon the Secretary of Labor to establish performance standards and to distribute administrative funds to the U.S. Employment Service based upon those standards.

I urge my colleagues to support this amendment. Let us demonstrate that the truly disadvantaged have not been forgotten.

Mr. President, I do not have to explain to this body that I have been one who, for the last 5½ months, has been devoting his time to cutting the Federal budget, to removing programs from that budget that have been extremely costly and ineffective. I have done much of that for two reasons: First, because we cannot continue to spend as much as we have been spending, and, second, because I am convinced that with budget cutting and tax reform, the American economic ssytem can be revitalized and can provide far more jobs to our people.

But as I return to my State, my constituents, even those who wholeheartedly support what I have just said, ask one very simple question, and it is: "Senator, we agree, but certainly you are not going to turn this economy around in 1 week or 1 month, and it might not even be turned around in 1 year. What is going to happen since you have cut Federal programs? What is going to happen to those who lose public sector jobs? What is going to happen to those people?"

I am hard pressed, Mr. President, to say to them that my enthusiasm for this new approach, in which I wholeheartedly believe and in which I have faith, is going to work miracles. When I came back to my State, and as I looked at the President's economic package, I had to answer that question. A few years ago many of us on this side of the aisle, joined by many Senators on the other side, advocated a private sector jobs approach through the tax bill. That was when we began to cut back on the CETA jobs program.

My recollection is that a number of us asked Senator BENTSEN to work on a targeted jobs credit bill which would provide employers with a tax break if they hired the hardcore unemployed.

That law has been in existence for 4 years now. I do not think the Carter ad-

ministration liked it very much. Nonetheless, it worked.

Our amendment pays for itself with a simple change in the telephone excise tax. We will extend it at 1 percent through 1984. It will pick up a little bit of extra revenue.

The key to this amendment is that a CETA worker who cannot find work and who is certified can go to work for a private sector employer. Also we have made the full credit available to all employers. Before they had to have three employees to get the full credit. An employer who hires one of these workers gets up to a $3,000 tax break in the first year and $1,500 in the second year.

We all know ex-convicts have a difficult time finding a job. We provide for them in this amendment. If an employer will hire them he will get a break for giving them an opportunity to be permanently employed in the private sector.

We have also provided for students in vocational education. Many of them are disadvantaged—in fact vocational educators tell me that over 50 percent of their placements are of disadvantaged youth. We are saying, "Let us make it easier for vocational educators to find jobs for those young people."

We are aware that they are mostly part-time workers. So we have cut that tax break in half. For a full year they can only get $1,500 of the credit. In the second year it is $750.

I am excited about this amendment, because I can go home now and say, in response to those questions: "If we are having problems in one of our cities, large or small, our leadership can get the business community into a meeting and say, 'Have you considered this job tax credit? You get a break. You get up to $3,000 as a break on your tax returns if you hire one of these people: an ex-CETA employee, an underprivileged youth, a vocational education youth, somebody who came out of prison or off of welfare, and a handicapped person.' "

From my standpoint, those of us who believe in the President's program ought to encourage the private sector across this land to provide jobs in the hard core areas.

I would submit that those who support a lower minimum wage for young people such as Senator LONG can find a solution for that problem in this amendment. The disadvantaged youth and students in cooperative education can get the same wage as adults, but their employers will get a significant tax break. So there is a reason to hire them.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. DOMENICI. I would be pleased to yield.

Mr. LONG. Does not this amendment also provide that where people are on the welfare rolls, the breadwinner can be hired, and that the family can have the benefit of this job credit when the employer hires people who otherwise were on welfare?

Mr. DOMENICI. Absolutely.

Mr. LONG. So that instead of just paying a greater amount of money to keep those people on the welfare rolls, we provide a very generous tax credit to help the employer to move those people into private employment.

A great number of people, of course, who are on the welfare rolls have tried to continue welfare benefits and still work. But this would provide a possibility of the employer paying enough money, and also a way their earnings could be checked, so that the person would come off the welfare rolls, but the tax subsidy would help see to it that they would live adequately, that the employer could pay them enough so that they need not be in poverty, and they would do a lot better by their family to move into legitimate, proper private employment rather than working covertly or rather than remaining on the welfare rolls.

Mr. DOMENICI. The Senator is absolutely correct. I would just make two additional points.

Will the Senator yield me 1 additional minute?

Mr. HEINZ. I yield 1 minute to the Senator.

Mr. DOMENICI. There has been some confusion under present law between the targeted jobs tax credit and the WIN credit. Our amendment merges those two credits so that there no longer should be any confusion there. Is that not correct?

Mr. HEINZ. The Senator is correct; we do.

Mr. DOMENICI. And there is one other issue. A number of people have been concerned that some employers have taken advantage of the program by claiming the credit long after they hired a qualified worker. As I understand it, the Senator and I have modified the law so that on the day employment starts, the worker has to be certified by the Department of Labor as a person who qualifies under this bill. Is that not correct?

Mr. HEINZ. The Senator is correct. One of the problems with the program as it has been administered until now is that retroactive certification has been permitted. With this amendment we require that people be properly certified before they begin work.

Mr. DOMENICI. One other point that comes to mind is that there is a great concern in this body and in our country about our Vietnam veterans. There is much higher unemployment among our Vietnam veterans than among other classes of people. Under the old law, as I recall, if you were more than 35 years of age and a Vietnam veteran, you did not qualify. We have eliminated that age restriction.

Mr. HEINZ. The Senator is correct. Our amendment lifts all age limits on Vietnam veterans who are impoverished.

Mr. DOMENICI. Let me close by saying that I am not one who will add revenue loss to this tax bill. I do not want our good chairman, Senator DOLE, to go to conference with a bill that cuts taxes more than the Finance Committee wished to when they brought the bill here to the floor. I would not be a part of this amendment if it did that, but it does not. It can accomplish our job creation objective and actually raise revenue, with a 3-year extension of the telephone excise tax. This amendment more than pays for itself. So I hope the Senate goes along with us and adopts this measure.

Mr. HEINZ. Mr. President, I would just observe that the Senator from New Mexico has made many invaluable contributions along the way in developing this legislation. He shared his views with me when we held hearings, when we later introduced S. 1347, a simple 1 year of the credit and during the last 2 weeks leading up to today. I am also indebted to Senator LONG. As Senator DOMENICI points out, he has been a strong supporter from the beginning. I am also indebted to Senator DOLE who facilitated this legislation. He sponsored hearings we had, and he has been very supportive again today. I am deeply grateful to him.

Mr. President, before I yield the floor, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MATSUNAGA. Mr. President, will the Senator from Louisiana yield me 3 minutes?

Mr. LONG. Mr. President, I believe the time is in the control of the manager. Who has control of the time, Mr. President?

The PRESIDING OFFICER. The minority leader or his designee, since Senator DOLE is, apparently, in favor of the amendment.

Mr. LONG. Do I have control of the time? Then I yield 3 minutes to the Senator from Hawaii.

Mr. MATSUNAGA. I thank the Senator for yielding.

Mr. President, as a cosponsor of the Heinz amendment, I rise in its strong support. The targeted jobs tax credit is an important private sector incentive to hire hard-to-employ individuals. The existing jobs tax credit program will expire this year, and the amendment now before us is essential to extend one of the few remaining programs to combat structural unemployment.

When the original general jobs tax credit terminated, overall unemployment had been reduced. The Congress, therefore, decided to target the credit to certain disadvantaged groups, specifically vocational rehabilitation referrals, economically disadvantaged youths, economically disadvantaged Vietnam veterans, supplemental security income recipients, general assistance recipients, cooperative education students, and economically disadvantaged ex-convicts. People in these disadvantaged groups have had the most difficulty in finding employment in the private sector.

The targeted jobs tax credit was intended to improve the employment chances of these individuals, with the hope that they would acquire useful work habits and work records. That experience would then enable these disadvantaged individuals to enter the mainstream of working society.

The administration of the targeted jobs tax credit program, I must admit, has not been praiseworthy. A year passed, before implementing regulations were issued. Notwithstanding administrative

foot dragging, 450,000 people have been hired under the program.

As our economy slows down—and there are economists who predict a recession coming on—unemployment will increase and the disadvantaged groups will encounter greater problems in securing jobs. The need for the targeted jobs tax credit will become all the greater.

I had hoped that displaced homemakers would be added to the categories now eligible under the program. Most of these women have met serious difficulties in reentering the job market, and they have real economic need to secure employment. However, revenue constraints as well as objections from supporters of this amendment to going beyond the original targeted jobs tax credit, have prevented the inclusion of displaced homemakers. They argued that displaced homemakers are so numerous that the projected revenue loss was unacceptable to the other amendment cosponsors. The large number only stresses the problem faced by displaced homemakers. I truly regret the failure to include this category of needy individuals.

Nonetheless, because of the meritorious purpose of the bill, I urge the adoption of the amendment.

The PRESIDING OFFICER. The time allotted to the Senator from Hawaii has expired.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. HEINZ. Mr. President, I yield such time as the Senator from Kansas requires.

Mr. LONG. Mr. President, if the Senator needs his time, I would be happy to yield to the Senator such time as he requires.

Mr. DOLE. Mr. President, I wish to congratulate the distinguished Senators from Pennsylvania, New Mexico, and Louisiana, not only for bringing this matter to the floor but for working it out with Secretary Regan, so that we now believe we have a better program. I think everybody—most everybody—would agree that there have been some abuses in the program. It has been too closely drawn and too loosely administered. In fact, there was some doubt it was being administered at all.

It would be my hope that with this new approach we could move ahead with something that has the chance of becoming a great program. It should not be a subsidy for Burger King or McDonald's or the fast food chains. It should be a program to help the chronically unemployed—we have a new classification because the Senator has included displaced CETA workers, which I think is an excellent idea—and to take care of unemployed young Americans and others in this country who qualify under the law.

I do not have any quarrel with the idea of fast food employment, but I suggest that in some respects the law was so loosely drawn you were getting the credit whether you were going to hire someone or not. By removing the retroactive provisions, we will make a great improvement.

It seems to me that this is an idea that has been around for some time, as I was just telling the distinguished Senator from Pennsylvania (Mr. HEINZ). I think about 14 years ago, or maybe longer ago, when I was in the House of Representatives, we had a proposal much like this called the Human Investment Credit Act. That, in essence, as the Senator from Pennsylvania pointed out, is how this program should be regarded, because it has great potential. It was an idea, very honestly, that a number of Republicans and Democrats in the House at that time thought had a lot of merit. It took years and years for it to be enacted. Now we have had some good experience and some bad experience. It would be my hope that with the tightening up that has been done by the Senators involved, principally the Senator from Louisiana, the Senator from Pennsylvania, the Senator from New Mexico, the Senator from Hawaii and others, that we will have an outstanding program.

I might add it is very helpful to me as manager of this bill to have it paid for by extending the excise tax on telephones at a 1-percent rate through 1984.

I commend those who have brought this matter to the floor. I think this revised proposal has great merit.

The Secretary of the Treasury discussed this program yesterday with the Senator from New Mexico, and I hope we will have his personal attention directed to this program.

The provisions of this amendment have been agreed to by the Treasury, and I believe it is a sensible proposal.

PROVISIONS OF THE AMENDMENT

The targeted jobs credit expires at the end of this year. Most people agree that the credit has failed to fulfill our expectations, partly because the present law allows retroactive certifications and includes groups that may not be truly disadvantaged, and who would be hired in any event. There is no value in a wage subsidy that does not increase employment.

Mr. President, this amendment addresses some of these problems. It would renew the jobs credit for 1 year, so that any eligible individual hired before the end of 1982 would be qualified for the full credit. However, the problem of retroactive certifications would be dealt with by requiring that a certification or a request for certification be made before the employee begins work. This will prevent employers from claiming the credit for workers already on the rolls who would have been hired anyway.

In addition, the revised credit would apply to former CETA workers who have been discharged because of the budget cutbacks that have pared back that program. This is consistent with the goal of placing people in the private sector with what we hope will be permanent employment. At the same time, it should do so in a less expensive manner than the CETA program.

The amendment would also lift the age limitation on qualifying Vietnam veterans, fold in the win credit for AFDC recipients, and provide some administrative tightening, including giving the U.S. Employment Service the authority to implement the program. It is also important to note that the amendment cuts back on the amount of the credit for cooperative education youth who are hired. This group has accounted for 47 percent of the certifications in the program. There is little evidence that these students have been hired because of the credit; it is likely they would have been hired anyway.

They are not a particularly disadvantaged group, and in any event, the credit already covers economically disadvantaged youth under a separate category. In fact, the cooperative education programs have declined somewhat in recent years, so it appears the credit has not even gave them a boost. All it has done is provide a cheap source of subsidized labor for employers who offer high-turnover, short-term jobs.

Mr. President, the amendment addresses this problem by cutting the amount of the credit in half for cooperative education youth. The credit will be limited to $1,500 for the first year of employment and $375 for the second year. This is a big step in the right direction, but more should be done about this group, and hopefully will be in the future. With these changes, I believe the amendment is a good bet. During the 1-year extension we will have time to reexamine and rethink the jobs credit program and, I would hope, be able to devise an incentive that will really increase employment among groups with chronic employment problems. It is certainly worth the effort to try to meet the goals we originally set for this program.

Mr. HEINZ. I am grateful to the Senator from Kansas for his comments.

Mr. MOYNIHAN. Will the Senator yield?

Mr. LONG. I yield 1 minute.

Mr. MOYNIHAN. Mr. President, I associate myself altogether with this enterprise which has been a matter of genuine concern in the Finance Committee, which has supported it for years, though without the results we hoped for. I ask to be added as a cosponsor.

I hope this time we can get the attention of the Department of Labor to see that these opportunities are known about and used.

Mr. LONG. How much time remains?

The PRESIDING OFFICER. The Senator has 4½ minutes remaining.

Mr. LONG. I yield myself 2 minutes.

Mr. President, many years ago we had a debate on the family assistance plan. Some of us in the Senate developed some doubts about that measure after it passed the House, so it never became law. But we did find some aspects of it that we liked, which we did support as time went by. In the course of seeking to develop some constructive alternatives at that time we suggested in the Senate Finance Committee that we ought to have a tax advantage or a refundable tax credit, if need be, for a low-income person to seek employment and obtain it.

That found its way into law and became what is known as the earned income tax credit.

At that time, we also proposed that

there should be a tax advantage for those who would employ persons who were disadvantaged, persons who found themselves in need and on the welfare rolls. To some degree, that suggestion was the same philosophy as is expressed here, to try to provide private employers a special incentive to employ these people who are most in need of employment, both for their personal income as well as for the dignity and the satisfaction of being a part of the mainstream of America.

This concept has continued to move forward.

At one point I was afraid it was not being administered as well as we would like to see it administered and it was therefore being recommended to be phased out or terminated. I am pleased that the Senator from Pennsylvania has seen fit to provide us with his leadership and I am pleased that he was joined by the Senator from New Mexico in fighting to see that this program is continued and that the administration will be tightened up to meet some of the objections that have been made to the program.

I am very hopeful that more employers will know about it. It is my understanding that in the hearings on this subject, which I was not privileged to attend this year, the point was made time and again that there would be a great number of additional people who need jobs and would have them if the employers had more widely known about this. I hope those who administer the program the next year will make a special effort to see to it that employers know that this program is here and that it is available to help hire these people.

In many instances, this might not be the most desirable or productive employee from the point of view of the employer. But these are people who need the jobs the most. These are people we ought to be moving into mainstream employment.

Take the case of a person who has been convicted of a felony, for example, a person who is trying to redeem himself and make a good life for himself or herself in society. When those people have to answer the question on just the ordinary standard form presented to them when they seek employment. "Have you ever been convicted of a felony?" and if they have to answer yes to that question, they will not get the job in some cases.

This tax credit gives a special incentive to the employer to consider hiring this person and it also shows that we in government believe that employers should hire those people. The alternative is those people returning to a life of crime.

It does help to redeem people in many situations, and properly administered I believe it has tremendous hope for this country.

Mr. BOREN. Will the Senator yield me 1 minute?

Mr. LONG. I yield.

Mr. BOREN. Mr. President, I associate myself with the remarks which have been made by the Senator from Pennsylvania, the Senator from Louisiana, the Senator from Hawaii, the distinguished chairman, and others. I commend the Senator from Pennsylvania for taking the lead in making sure that we continue a program that can be a very valuable one in increasing employment opportunities for our people and using the private sector to do it. I commend him for the changes he has proposed and the suggestions he has made for tightening up the program to make it work.

I am very pleased to support it. I ask the Senator from Pennsylvania if he will add me as a cosponsor.

Mr. HEINZ. Mr. President, I ask the Senator from Oklahoma (Mr. BOREN) be added as a cosponsor, and also the Senator from Tennessee (Mr. SASSER).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I am cosponsoring the amendment offered by my distinguished colleague from Pennsylvania and others which would renew the targeted jobs tax credit for 1 year. If Congress does not act swiftly this fledgling program will expire on December 31 of this year.

Congress created the targeted jobs tax credit in 1978 to provide employment in the private sector through tax incentives to individuals who have difficulty finding jobs in both good and bad times. Under the program, if a firm hires an eligible individual, the credit in the first year amounts to 50 percent of the first $6,000 of the employee's wages. In the second year, the credit is 25 percent of the first $6,000.

Mr. President, the program serves a valuable purpose. Youth in work-study programs and economically disadvantaged youth make up the majority of the population eligible for the targeted jobs tax credit. In this Nation, unemployment among teenagers stands at a shockingly high rate. For all workers, unemployment over the first 6 months of this year averaged 7.4 percent; teenage unemployment was 19.2 percent.

The targeted jobs tax credit makes it a little easier for a young person to find that important first job where he begins to acquire the skills that allow him to establish independence and attendant self-esteem.

The annual cost of the program is $300 million. And although this seems a large sum, it is, in fact, relatively small in comparison to other jobs programs. Outlays for public service employment in fiscal year 1981 are expected to be $4.4 billion.

Mr. President, the program is yielding results. By the end of 1981, 600,000 persons will have found private sector jobs as a result of the targeted jobs tax credit. This is despite the fact that the Treasury did not offer final regulations on the proper use of the credit until 18 months after the law became effective. Employers have indicated to me that such a failing makes them hesitant to implement a new program.

Mr. President, I believe that Congress should proceed with speed to extend the targeted jobs tax credit. Time is short and the calender is crowded in this legislative session. We must take this opportunity to renew the worthwhile program before us.

● Mr. D'AMATO. Mr. President, I support the targeted jobs tax credit. This is a truly excellent program. It well reflects the spirit of the current administration's economic policies. It will encourage job training and reduce unemployment through the provision of tax incentives. It is much more proper for our Government to provide encouragement to business for the creation of new jobs in this way, rather than serve as the employer of last resort itself. This is a reasonable response to the problem of chronic unemployment by certain groups in our society and it deserves the support of every Member of this Chamber. This is not a partisan amendment.

Even without taking into account the feedback effects of increased Government revenue resulting from the new and increased income and social security taxes that will be paid by those hired under this program, this amendment is a net revenue raiser to the tune of $183 million over the next 3 years. Thus no one need fear that a vote in favor of the targeted jobs tax credit will "bust the budget."

Nearly 5 million people will be eligible for employment and job training under this program. Targeted groups include: Poor and disadvantaged youths, Vietnam veterans, and ex-felons who have met, or are meeting, the conditions of their parole; handicapped individuals who have completed a vocational rehabilitation program; our Nation's poor who are recipients of supplemental security income or general assistance; CETA workers who have been laid off due to budget cuts; and high school students enrolled in cooperative education programs. Frequently, these are the groups which are hired last. But this should not be. These people have a lot to contribute to our, and their, society if they are only given a chance. The targeted jobs tax credit will provide them with this chance.

Compared to the massive bureaucracies necessary to provide employment through public service jobs, administration of the targeted jobs tax credit is amazingly simple and generates considerably more employment for substantially less Federal money. Under this program an eligible individual needs only to be certified and obtain a voucher to that effect from the U.S. Employment Service. This voucher is then presented to a potential employer and serves as a substantial inducement for the employer to grant the applicant a job. The employer then files the voucher with the Department of Labor within 30 days of hiring and receives a tax credit in return. The tax credit equals 50 percent of the first $6,000 in wages paid that employee during his or her first year and 25 percent of the first $6,000 in wages paid that employee during the second year. The tax credit is then eliminated. By this time the employee should have made himself or herself a valuable part of the organization whose retention would need no further inducement from the Federal Government. Thus, the total tax credit per employee would be a maximum of $4,500 over 2 years. During this period when these credits are taken by employ-

ers, their customary deductions for wages paid are reduced by the amount credited as a partial offset to prevent double counting.

Mr. President, this is an extremely worthwhile proposal which belongs in this tax reduction package. It has my fullest support and I urge its immediate adoption.●

Mr. SYMMS. Mr. President, I am very pleased to join my colleagues in supporting the targeted jobs tax credit amendment to expand private sector employment by offering tax incentives to employers who hire members of particular targeted groups.

This amendment represents a positive, workable solution toward providing an advantage in the labor market for individuals from certain groups who have the most difficulty in securing employment.

The targeted jobs tax credit program reduces employment; creates new jobs; creates better quality, permanent jobs; increases the cash flow for businesses needing expansion capital; and offers sufficient incentives to businesses, thereby creating special interest in hiring and retraining targeted groups. This amendment will improve the living standards in local communities by putting people to work on a permanent basis, allowing them the opportunity to improve their social status within those communities.

As Senator HEINZ so aptly indicated in an editorial in the Washington Star, this amendment would target job assistance to America's boat people, without the boats.

There are three basic principles incorporated in this amendment:

Work as a way for the disadvantaged to gain the skills, training, and experience they need to succeed;

Employment in the private sector, as the most efficient way of solving the problems of structural unemployment; and

Resources targeted on those candidates most in need.

The targeted jobs tax credit program has been well received in the private sector, and has helped hundreds, perhaps thousands of disadvantaged employees that would not have otherwise been employed. The TJTC program represents the most equitable employment device now in effect and I strongly urge my colleagues to support this amendment.

Mr. SPECTER. Mr. President, I am pleased to cosponsor this amendment which seeks to reauthorize the targeted jobs tax credit by my colleague from Pennsylvania, the distinguished chairman of the Budget Committee, the Senator from New Mexico, and the ranking Minority member of the Finance Committee, the Senator from Louisiana.

I strongly support efforts which encourage employers in the private sector to hire disadvantaged workers. Under this program, seven categories of workers in groups which have experienced historically high rates of unemployment are given the opportunity to place a foot on the ladder of economic opportunity. This program encourages these people to participate in our economic system in productive jobs. It offers them the opportunity to earn valuable skills and a chance for advancement. And it does it at a lower cost than public service employment programs.

Currently, this program provides assistance to handicapped people, youth between the ages of 18 and 24 from economically disadvantaged families, Vietnam-era veterans under age 35, general assistance recipients, supplemental security income recipients, students between the ages of 16 and 18 participating in cooperative education programs, and ex-convicts.

This credit produces jobs by providing employers a tax credit equal to 50 percent of the first $6,000 in annual wages earned during the first year of employment and 24 percent of the first $6,000 earned during the following year. In my home State of Pennsylvania, of which I am most familiar, over 7,000 economically disadvantaged persons have benefited from this program since its inception in 1970.

In addition to the above groups, I have particular concern for individuals who are currently employed under title II–D and VI of CETA, which will be eliminated later this year. As such, I strongly support the provisions of this amendment which will extend the targeted jobs tax credit to these individuals. As well, this amendment will include Vietnam-era veterans over 35 who currently earn less than a poverty income. As a member of the Veterans Affairs Committee and through by travel in Pennsylvania, I have become acutely aware of their plight.

I believe that this amendment addresses criticisms of this program which were raised in the past. Employers would be required to file for the credit within 30 days of hiring an employee in order to prevent the granting of "retroactive certification." It would also require the Secretary of Labor to establish a quality control system. And further, this amendment will raise over $100 million of revenues through 1985, lowering the Federal debt and aiding our efforts to reduce inflation.

Mr. President, I believe that if we are going to turn our economy around and make America more competitive in the world economy, we must increase productivity and create jobs in the private sector. This program, which encourages the employment of disadvantaged individuals and gives them the first opportunity to participate in productive work, makes much sense from this point of view. I am pleased to join in with my colleagues from Pennsylvania, New Mexico, and Louisiana in cosponsoring this important amendment.

Mr. HEINZ. Mr. President, I am prepared to yield back the remainder of my time.

Mr. LONG. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. GARN) is absent due to death in the family.

Mr. CRANSTON. I announce that the Senator from Vermont (Mr. LEAHY) is necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. LEAHY) would vote "yea."

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 95, nays 3, as follows:

[Rollcall Vote No. 215 Leg.]

YEAS—95

Abdnor	Ford	Moynihan

NOT VOTING—2

Garn	Leahy

So the amendment of Mr. HEINZ (UP No. 269), as modified, was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PENDING AMENDMENTS TO THE TAX MEASURE

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time to ask the distinguished majority leader what the program will be for the remainder of today and for tomorrow and Monday, if he can inform us.

Mr. BAKER. Mr. President, I thank the Senator for his inquiry.

There are 101 amendments that are on the list of amendments attached to the unanimous-consent agreement that was given last evening. So far today notwithstanding our best efforts we have only disposed of eight. We have 93 remaining.

In addition to the amendments that we have disposed of, a number of Senators have indicated that they will require only a brief time for their amendment, in a few cases that they will not offer their amendment, and in still other cases that they will not require a rollcall.

So even though we have disposed of only eight amendments, I suppose there is room for some slight optimism that we

have done a higher percentage of that 101 than I had thought.

Mr. President, we have not done well enough. We have in only one case of which I am aware reduced the time allocated under the order and that was a 2-hour limitation given to the amendment to be offered and indeed offered by the Senator from Pennsylvania and the Senator from New Mexico. That was reduced voluntarily and at my request from 2 hours to 1 hour.

Mr. President, if we are going to finish this joint resolution and do so without having a stampede on Wednesday at 3 p.m., we are going to have to do better and what that means is that Senators are going to have to be here to offer their amendments, that they are going to have to consider reducing the time available for debate on those amendments, to forego offering those amendments if it is possible to do so, to forego record rollcall votes when that is possible, to negotiate with the managers of the joint resolution on both sides to try to reach accord where that is possible, and in addition to all of that, Mr. President, to stay late tonight and the Senate is always on notice that Thursday is our late night, but I say to my colleagues that this is going to be a late, late night.

I think it is absolutely essential that we be here at least until 11 p.m. and perhaps later than that, depending on how much we can stand. But there is no other alternative, Mr. President, except to stay late this evening and I urge that Senactors take account of the fact that we will be here until 11 p.m. or 12 o'clock tonight.

We have disposed of, as I say, eight amendments. We have to do more than that. We have to do them at a better rate than that. We have an order to convene at 10 a.m. tomorrow. I intend to ask the Senate to modify that request to take into account any special orders that Senators may request and to convene the Senate early enough so that we can be on this joint resolution again at 10 a.m. tomorrow and we will run tomorrow all day. Senators should not assume because it is Friday or because we have vitiated the order for a Saturday session that it is going to be an easy day. It is not going to be an easy day. I do not know yet how long we will be in, Mr. President, but anyone who is planning on a 6 or 7 p.m. plane is in trouble in my opinion.

So, Mr. President, I say to my friend, the minority leader, that it looks like we will be in very late tonight. We will have a long day tomorrow. We will convene again at—Mr. President, do we have an order for 10 a.m. on Monday?

The PRESIDING OFFICER. The order is for 12 noon on Monday.

ORDER TO CONVENE AT 10 A.M. ON MONDAY

Mr. BAKER. Mr. President, I ask unanimous consent that we change that to 10 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. We have an order for 10 a.m. on Monday and, Mr. President, as much as I regret to say so, I must tell my friend, the minority leader, that if we do not make better progress than we are making so far, the Senate should be on notice that they should expect late evenings, and I mean 11 p.m. or 12 o'clock evenings on Monday and Tuesday, so that we can avoid that stampede of amendments yet undisposed of beginning at 3 p.m. on Wednesday, which the order requires.

So, Mr. President, I regret to give this report to the minority leader and to the Senate, but I think I have no other alternative except to state the situation as I see it and urge Senators to cooperate in every possible way in trying to improve the rate of disposition of amendments.

Mr. ROBERT C. BYRD. Mr. President, the majority leader indeed has no alternative.

I am somewhat surprised to hear that we still have 101 amendments. On yesterday, I thought there were 90 amendments at the time we had our agreement.

Mr. DOLE. Mr. President, will the minority leader yield?

Mr. ROBERT C. BYRD. I yield.

Mr. DOLE. There were 10 added while we were getting the agreement. [Laughter.]

Mr. ROBERT C. BYRD. I am not surprised.

Mr. BAKER. Mr. President, it finally got to the place, if the minority leader will permit me, where I tried to gather up all copies of the lists and destroy them except one but even with that I did not succeed in keeping diligent staff people from scribbling amendments on the list and we ended up with 101.

Mr. ROBERT C. BYRD. Mr. President, it is not my desire to attempt to tell the majority leader what to do. I am really concerned about the number of amendments. Most of them are on my side of the aisle. So I think I am justified in saying this: I suggest that my side at least—I will not tell the majority leader what to do on his side—but I am going to ask my side to contact via the cloakroom, via the hot line, Senators to see if they would have any objections to cutting down the time on 30-minute amendments to 20 minutes, and let us start there and perhaps the majority leader would want to think about having 10-minute rollcalls after the first rollcall tomorrow and each day because I can see right now we are going to be in one big squeeze and someone is going to get squeezed if we do not take action early, and most of the amendments being on my side I feel I am justified in making this suggestion because it is going to cut most deeply on my side.

Mr. BAKER. Mr. President, I thank the minority leader for that suggestion, and I can only urge Members on this side to consider that request which indeed I will make and I propose to make that request immediately after the next rollcall vote this afternoon so Senators will have an opportunity to comment on it.

But I serve notice now that after the next rollcall vote I will propound a unanimous-consent request to reduce the time on all amendments unspecified for a time from 30 to 20 minutes.

Mr. President, I will discuss this with the minority leader, but I am inclined to try to reduce the time on rollcalls to 10 minutes tonight instead of tomorrow, and we might do that at about 7 p.m. tonight because by then all committees will have met and discharged their duty for today, I trust, with the exception perhaps of the conference committees and subconferences, but everyone then would be on notice that beginning at 7 p.m. rollcall votes will be only 10 minutes in duration. Members should take account then that I will most likely make that request after the next rollcall.

Mr. DOLE. Mr. President, will the majority leader yield?

Mr. BAKER. I yield to the Senator from Kansas.

Mr. DOLE. I know of 90 amendments pending. It may appear to be gloomy but I think it is better than it may appear at first blush. We have a lot of negotiations going on. Some you can never satisfy, and I am probably in that category, but there are some that just keep coming and coming. We hope to negotiate three or four areas that involve a number of Senators and a number of amendments. We hope to also find out how many are willing voluntarily just to let me say that that amendment is no longer going to be called up and we are working on that list. I hope by tonight at 11 p.m. we will be down to 50 amendments.

Mr. BAKER. Mr. President, if the Senator can do that I will add another medal to his array and cluster of medals because that would be a great contribution to the Senate, to the country, and certainly to the tranquility of our weekend.

Mr. President, I am prepared now to yield the floor and to urge once again all Senators to take account of the announcements that I have made and make their plans accordingly.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. It is my understanding that the distinguished Senator from Mississippi (Mr. STENNIS) now wishes to call up an amendment or address a matter that is of much concern to him.

The PRESIDING OFFICER. The Senator from Mississippi.

NATIONAL COMMISSION ON INTEREST RATES

Mr. STENNIS. Mr. President, I thank the Senator from Kansas.

Mr. President, I have an amendment prepared here that relates to the interest rates and it would call for the creation of a commission and undertake to designate the members of the administration that would be on that commission, including, of course, the Secretary of the Treasury and then provide certain other outside members.

In consideration of this matter and in conference with the Senator from Kansas, the chairman of our valued Finance Committee, and the ranking minority member, the Senator from Louisiana (Mr. LONG), the former chairman, we have talked this matter over. I have talked it over with Mr. Regan, the Secretary of the Treasury, who is very much interested in the subject matter and concerned. Considering the time element, even though the subject matter is of the utmost importance, but the time element

involved in trying to put it on this joint resolution, as an amendment, I have concluded that I want to present my amendment and then withdraw it and make these remarks and have a colloquy with the chairman of the committee and the ranking minority member as I have related already that will concern a hearing by the committee. That will take place sometime soon, at their convenience and with their arrangement, of course. They will go into this subject matter.

I want to take just a very few minutes of time to relate just why I am doing this. It is certainly not a jumped-up affair, and I am most grateful to the chairman and the ranking member for their willingness to discuss and advise on this matter, and Mr. Regan, the Secretary of the Treasury, and others.

I feel this very keenly as a Member of this body. I had a chance to talk with President Reagan while he was President-elect. He asked me what I thought was the most demanding, the most urgent, and the most immediate point concerning our economy, and I told him these high interest rates.

The Senator from Oregon (Mr. HATFIELD) held hearings, as the Appropriations Committee chairman, this January. I attended every minute of those hearings. We heard many of the economists there, and on down the line no one had a full answer or a full explanation of this problem of interest rates.

Even though this general debate here this year on the budget and on the tax bill and on related matters I believe has been the best I have had the privilege of hearing since I have been in the Senate, and the caucuses were good, constructive, and these debates have been good and there has been much expression of concern, I feel one thing we have not exhausted the subject matter on is the matter of these interest rates.

I do not know a thing about economics. I am not a financier. But I feel that I know something about the problems that people who work for a living are up against, and little businessmen and little shopowners and small automobile dealers and everybody along that line; I know their problems, and I know what they are up against.

This economy cannot live with the interest rates they are having to pay now. I know it is absorbing their savings, and it is going to bankrupt them. It is stagnating the young fellows who are trying to get a start by way of buying a home, a shop or anything else.

I do not have any full remedy, but I have written it down this way in my own writing, that any economic system which does not afford the people with a stable, moderate interest rate is inadequate, unsound, and defective, and unstable high interest rates will eventually bring a collapse of the free enterprise system.

The yearly takeout in the form of interest is too much for the borrower to ever get ahead under present conditions. The profits of investment in enterprise are taken by the lender. The incentive to invest in productive capacity is lost to the money speculator. All the lenders are not money speculators, and I did not mean it that way. But an individual consumer cannot carry the load of these high interest rates. Many consumers have exhausted their savings—and that is going on every day—by paying high interest rates because of necessities, and these necessities have increased greatly in price.

The Federal Government itself cannot continue to pay an annual interest payment which is now approaching $100 billion on the public debt, and which continues to grow. It just seems to me that 13 or 14 or 15 years ago, it was in 1960, I believe, that we first hit a total budget of $100 billion. Now the takeout is close to $100 billion a year just for interest on that debt.

Mr. President, as the debate on the legislation before us has highlighted, many serious economic problems have developed over the past decade. Interest rates at unprecedented levels is the greatest concern. High interest rates and high inflation are twin devils that have combined to undermine confidence in the economy and in the Nation's capacity for growth.

The situation is serious. These high and volatile interest rates have caused speculation in money, with a corresponding decline in productive investment. The high cost of money has seriously hurt the basic industries which contribute directly to the quality of American life. The producers of homes, automobiles, home appliances, and home furnishings are suffering a serious business downturn and the thousands of small businesses which are the backbone of our Nation's commerce and basic to the free enterprise system are drying up, selling out, and going bankrupt at an alarming rate.

We must be concerned. Any economic system which does not afford the people with a stable, moderate interest rate is inadequate, unsound, and defective. Unstable high interest rates will eventually bring a collapse of a free enterprise system. The yearly takeout in the form of interest is too much for the borrower to ever get ahead. The profits of investment in enterprise are taken by the lender. The incentive to invest in productive capacity is lost to the money speculators.

A ceiling on interest rates, an allocation of credit and money, and a total control of credit for major items will, of course, be severe, unpopular, difficult to administer and in the long range undesirable. However, some remedy is necessary to save us from a gradual deterioration of our economy which could lead to a sudden and catastrophic loss of confidence in our economy and could bring about a collapse of our markets. Small businesses are the most vulnerable and they would fall first, but eventually all segments of our economy would necessarily tumble.

The individual consumer cannot carry the load of these high interest rates. The consumers have exhausted their savings by paying high interest rates for necessities and these necessities have increased greatly in price, adding to the financial misery of the American people. The Federal Government itself cannot continue to pay an annual interest payment which is now approaching $100 billion on the public debt, which continues to grow. Something must be done.

Earlier this year, on January 27, 28, 29, and 30, I joined in hearings on the national economy with the chairman of the Senate Appropriations Committee, Senator HATFIELD. These hearings were very thorough. Some of the most knowledgeable people on the economy appeared before the committee and testified concerning their sense of what was wrong with the economy and what cure should be proposed. I asked each of the witnesses what we should do about high interest rates. Most of the spokesmen were at a loss to suggest a specific plan. Most acknowledged that if the rate of inflation were reduced, interest rates would come down. Now we find that even though the rate of inflation has moderated somewhat, interest rates continue at high levels.

I met with the President right after he came into office and expressed my concern about these high interest rates. I urged him to act promptly to bring interest rates under control. I said that it must be a top priority of his administration and the 97th Congress to reduce the high interest rates which are stifling our economy. I believe the President and the chairman of our committees have made a good start, but the question is, where are we headed? How long will it take to restore moderate and more stable interest rates in our economy?

Mr. President, there is much about this economy that is not understood. The general condition in which we find ourselves now of stagnation, inflation, high interest rates, nonproductive investment, and low savings, is not the result of a recent turn of events. The economy during this last decade has been marked by severe economic shocks. Economic changes have occurred with great rapidity and the laws and regulations put on the books designed to cope with such changes have been approved at a pace which defies a clear understanding of their impact on the economy.

In my view, the time has come for a comprehensive examination the high level of interest rates and the impact of our monetary and fiscal policies on such rates. It is my belief that we have got to give the American people some assurance that something will be done to bring interest rates down, reduce inflation and restore growth to our economy. I believe we need to bring together the finest minds and experts in this field and ask them to carefully look at the situation and recommend steps which may be taken that would lead to a reduction in interest and inflation rates.

I have prepared an amendment to this resolution under consideration which would establish a National Commission on Interest Rates for the purpose of achieving a greater understanding of the complex factors which govern our national economy and would bring before the Congress and the President for consideration administrative and legislative proposals which would address the health of the Nation's economy.

In discussions with the Secretary of

the Treasury, the chairman of the Finance Committee, Senator DOLE, and the ranking minority member, Senator LONG, I have agreed to hold this amendment with their assurance that they would join with me in pursuing this problem of high interest rates by holding hearings on this subject upon return of the Congress in September. I will place in the RECORD a bill which would establish such a Commission, with an explanation of its purpose for consideration of the Senate. It is my intention to submit this bill for consideration of the Senate if the hearings on our economy indicate that such a Commission would be warranted.

Mr. President, I ask unanimous consent to insert in the RECORD at this time a bill to establish a National Commission on Interest Rates, followed by an explanation of the bill,

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. ——

A bill to establish a National Commission on Interest Rates

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Commission on Interest Rates Act".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) interest rates charged by lenders have reached levels which threaten the health of the Nation's economy;

(2) high interest rates have contributed to price inflation, a reduction in the supply of goods and services, economic stagnation, and a higher Federal deficit;

(3) the volatility of interest rates has created business uncertainty, encouraged speculation, and deterred investment in productive capacity;

(4) existing monetary, credit, banking, and fiscal policies have not stabilized interest rates at beneficial levels; and

(5) the development of policies to restore stability and confidence in the financial markets is necessary to the economic security of the United States.

(b) It is the purpose of this Act to establish a commission to investigate and recommend methods of promoting moderate and stable interest rates.

ESTABLISHMENT

SEC. 3. (a) There is established as an independent instrumentality of the United States a commission to be known as the National Commission on Interest Rates (hereafter in this Act referred to as the "Commission").

(b) The Commission shall be composed of the following members:

(1) The Secretary of the Treasury, or his delegate.

(2) The Chairman of the Council of Economic Advisers, or his delegate.

(3) The Comptroller of the Currency, or his delegate.

(4) The Chairman of the Federal Home Loan Bank Board, or his delegate.

(5) The Administrator of the National Credit Union Administration Board, or his delegate.

(6) The Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, or his delegate.

(7) The Chairman of the Securities and Exchange Commission, or his delegate.

(8) The Chairman of the Federal Trade Commission, or his delegate.

(9) Two members appointed by the President, one of whom is an official of a State agency that regulates banking or similar financial institutions, and one of whom is an official of a State agency that regulates savings, thrift, or similar financial institutions.

(10) Five members appointed by the President from private life who are not officers or employees of the Federal Government or of any State or local government.

(c) The Commission shall consult with the Board of Governors of the Federal Reserve System in carrying out its functions.

(d) Upon the appointment of the members described in paragraphs (9) and (10) of subsection (b), the President shall designate a member of the Commission to be Chairman of the Commission. This designation shall be made by and with the advice and consent of the Senate unless the individual designated already holds an office to which he was appointed by and with the advice and consent of the Senate.

(e) A vacancy on the Commission shall not affect its powers and shall be filled in the same manner in which the position was originally filled.

DUTIES

SEC. 4. (a) The Commission shall make a full and complete investigation of and make recommendations with respect to ways to establish moderate and stable interest rates. In conducting this investigation, the Commission shall consider—

(1) the upward ratcheting of interest rates;

(2) the "crowding out" of private borrowing and lending;

(3) the unprecedented volatility of interest rates;

(4) the high cost of long-term borrowing;

(5) the impact of international financial conditions on the domestic economy;

(6) the increase in speculative investment;

(7) the expansion of consumer credit;

(8) the expansion of housing credit; and

(9) any other problems relating to the establishment of moderate and stable interest rates.

(b) Not later than one year after the date on which the last member of the Commission is appointed pursuant to section 3(b), the Commission shall submit to the President and to the Congress a final written report concerning its investigation and make such recommendations for administrative action and legislation as the Commission finds appropriate.

(c) Not later than 6 months after the date of enactment of this Act, the Commission shall submit an interim report to the President and to the Congress, describing the activities of the Commission during the period prior to the submission of such report.

(d) The Commission shall cease to exist sixty days after it submits its final report to Congress under subsection (b).

POWERS

SEC. 5. (a) The Commission or, on the authorization of the Commission, any member thereof, may, for the purpose of carrying out the provisions of this Act, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such evidence as the Commission or an authorized member may find advisable.

(b) (1) Subpenas may be issued only under the signature of the Chairman or any member of the Commission designated by him and shall be served by any person designated by the Chairman or any members. The attendance of witnesses and the production of evidence may be required from any place in the United States at any designated place of hearing in the United States.

(2) Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission.

(3) The provisions of section 1821 of title 28, United States Code, shall apply to witnesses summoned to appear at any such hearing. The per diem and mileage allowances to witnesses summoned under authority conferred by this section shall be paid from funds appropriated to the Commission.

(4) Any person who willfully neglects or refuses to qualify as a witness, or to testify, or to produce any evidence in obedience to any subpena duly issued under the authority of this section shall be fined not more than $500, or imprisoned for not more than 6 months, or both. Upon the certification by the Chairman of the Commission of the facts concerning any such willful disobedience by any person to the United States attorney for any judicial district in which such person resides or is found, such attorney may proceed by information for the prosecution of such person for such offense.

(c) The Commission may acquire from the head of any Federal agency available data, reports, and other information which the Commission considers useful in the discharge of its duties. Each such agency shall cooperate with the Commission and furnish all information requested by the Commission to the extent permitted by law.

ADMINISTRATION

SEC. 6. (a) Subject to such rules and regulations as may be adopted by the Commission, the Commission is authorized to—

(1) appoint and fix the compensation of an Executive Director, by and with the advice and consent of the Senate, and such additional staff personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at such rates not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of such title;

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $200 a day for individuals;

(3) procure supplies, services, and property, and make contracts; and

(4) enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.

(b) The Comptroller General is authorized to make detailed audits of the books and records of the Commission, and shall report the results of any audit to the Commission and the Congress.

COMPENSATION

SEC. 7. Each member of the Commission not otherwise employed by the United States shall be compensated at the rate of $200 per day for each day, including traveltime, that he is engaged in the actual performance of his duties as a member of the Commission. A member of the Commission who is an officer or employee of the United States shall serve without additional compensation. All members of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties as members of the Commission.

ASSISTANCE

SEC. 8. (a) Upon the request of the Commission, the head of any Federal agency shall furnish the Commission with available data, reports, and other information to the extent permitted by law.

(b) Upon the request of the Commission, the head of any agency, department, or other instrumentality of the United States may furnish personnel and services to the Commission, with or without reimbursement.

AUTHORIZATION

SEC. 10. There are authorized to be appropriated without fiscal year limitation such sums, not to exceed $2,000,000, as may be necessary to carry out the provisions of this Act.

Mr. STENNIS. This bill, to which I refer today, would permit a body of our finest and most knowledgeable experts to consider in a total way the Nation's economic situation and examine those problems which have emerged in recent years. This bill would establish a National Commission on Interest Rates for the purpose of investigating and recommending to the President and the Congress administrative and legislative changes to bring about moderate and stable interest rates.

By adopting this bill the Congress would find and declare that interest rates charged by lenders have reached levels which threaten the health of the Nation's economy. It would find that high interest rates have contributed to price inflation, a reduction in the supply of goods and services, economic stagnation, and a higher Federal deficit.

The Congress would find that the volatility of interest rates has created business uncertainty, encouraged speculation, and deterred investment in productive capacity.

The Congress would find that existing monetary, credit, banking, and fiscal policies have not stabilized interest rates at beneficial levels, and by adoption of this bill the Congress would declare that it is necessary to develop policies to restore stability and confidence in the financial markets in order to guarantee the economic security of the United States.

This Commission would be an independent instrumentality of the United States. The membership would consist of 15 members, with a chairman appointed by the President. The membership would consist of the Secretary of the Treasury, the Chairman of the Council of Economic Advisers, the Comptroller of the Currency, the Chairman of the Federal Home Loan Bank Board, the Administrator of the National Credit Union Administration Board, the Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, the Chairman of the Securities and Exchange Commission, the Chairman of the Federal Trade Commission, two members appointed by the President, one of whom is an official of a State agency that regulates banking or similar financial institutions, and one of whom is an official of a State agency that regulates savings, thrift, or similar financial institutions, and five members appointed by the President from private life who are not affiliated with, do not represent, and hold no substantial interest in banking, savings, thrift, or financial institutions.

In recognition of the independent nature of the Federal Reserve System, the Chairman of the Federal Reserve is not included as a member of the Commission, and therefore would not be bound by any recommendations made by the Commission. However, this act directs the Commission to consult with the Board of Governors of the Federal Reserve System in carrying out its functions.

The Commission would be directed to make a full and complete investigation of and make recommendations with respect to ways to establish moderate and stable interest rates. I have been advised by experts in the economic and financial management field that in conducting this investigation the Commission should consider certain significant economic problems which have been particularly prevalent in the past decade.

The areas are mentioned in this bill, but of primary importance the Commission has been given broad authority to consider any economic problem which relates to the establishment of moderate and stable interest rates.

The Chairman is to provide a written report 1 year from the date of his appointment, and an interim report not later than 6 months after the date of enactment of this act.

I have proposed a focus on interest rates because this economic measure is accepted universally and traditionally as the yardstick of a market economy. Interest rates and usury predate economics as a formal discipline.

Indeed, the learned philosopher and economist from Scotland, Adam Smith, writes in his treaties on economics, "The Wealth of Nations," concerning interest, that:

The profits . . . must vary with it, must sink as it sinks, and rise as it rises. The progress of interest, therefore, may lead us to form some notion of the progress of profit.

I want to repeat now that there has been an effort here—the committees have worked, all of them that pertain to this field—and I have talked to many Senators, and I find and I have never seen a matter which has searched the souls of the membership here as has this one, just this matter of these interest rates. No one can find a full answer.

So I thought, as I said in the beginning, that something more should be tried, and these committee chairmen and the ranking members are concerned, and they were willing to take any reasonable steps. I talked to my fellow Senators about it. I wish we could just create a commission now that represented a cross section.

But I believe this hearing will be very valuable. I have a high regard for our Finance Committee, not just this year but other years, too, and I now want to yield to the chairman of the committee, if he is ready to express his feelings here in response to this matter.

As I say, as those Senators know, I expect to finally withdraw the amendment in time. But that will carry with it the intention to introduce it again after these hearings are concluded sometime around the end of September.

Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, let me say, first of all, I appreciate the fact that the distinguished Senator from Mississippi has taken an interest, and has a long-time interest, in this problem. I also appreciate the fact that he is willing to discuss the amendment at this time and then withdraw it, based upon the fact and the promise, which will be pursued, to have hearings.

I had hoped to discuss this matter today with the distinguished Senator from Utah (Mr. GARN) about joint hearings with the Banking Committee and the Finance Committee. But he is in Utah today attending a funeral.

I am certain we can work that out. If not, there will be hearings in the Finance Committee, hearings that we hope will be productive, not just a media event but hearings on a very deep-seated, deep-rooted problem which affects every one of our States, particularly small businessmen, farmers, housewives, working men and women who must either buy things on time or borrow money to exist or borrow money for their businesses or borrow money for any other purpose.

It is my intention and my hope that we can hear at that time not only someone to tell us again about the problem but maybe help address something we might do, if there is anything we can do from a legislative standpoint, to help address the problem.

There have been others who have expressed a deep interest in this problem. I know the distinguished Senator from South Dakota (Mr. PRESSLER) has been discussing this at length, and certainly at this time any other Senator who had an interest would be welcome to participate.

But I will say to the Senator from Mississippi that the problem is real. I have asked the distinguished chairman of the Budget Committee to be here, along with the chairman of the Joint Economic Committee and, of course, the distinguished Senator from Louisiana (Mr. LONG) to express not only our concern but our commitment to make certain that this is not forgotten after the amendment is withdrawn.

I thank the distinguished Senator from Mississippi. Could I yield first to the Senator from Louisiana?

Mr. STENNIS. I would like to yield to the Senator from Louisiana. I thank the Senator from Kansas.

Mr. LONG. Mr. President, as one Member of this body, I am convinced that interest rates should be below where they are at this time. I say that because I believe that the effort to curb inflation and turn it around is bearing fruit. Indications are that the administration's efforts to fight inflation by all the methods that have been taken have been showing some results. Partly the result is what we are doing on the Hill and partly the result of what the President is doing.

We are told that inflation will not exceed 10 percent this year. I am led to believe that the long-term trend on interest rates tends to be about three points above inflation for prime loans. If that is the case, we have a right to expect interest rates of around 13 percent rather than the much higher rates that exist at this time, 17 to 20 percent. And it is a favorable trend in curbing inflation to bring

interest rates down and should be paying off already.

But if the banking community is not convinced at this point, it should be convinced within a month or so, and interest rates ought to be lower than they are, and they ought to be coming down.

Now, bankers can give us a lot of conversation to indicate that they really do not want to charge all these high rates. But the fact is that most bankers enjoy charging high rates. It makes more money. And if you read what their corporate charters say, they say about the same thing every other corporate charter says. Those people are in business to make a profit. When they report to their shareholders, they proceed on the theory that they are to make the best profit they can for their stockholders.

This Government has the power within it to do a great deal about interest rates. A lot of that power has been vested in the Federal Reserve Board by an act of Congress, not by the Constitution of the United States.

And when people say that nothing can be done about it, the fact is that this Government has more power over interest rates than any bank or any group of banks if it wants to exercise its power. If you want interest rates to be at a level that is in accordance with the national interest, that level should be influenced by the activities of this Government acting through its Federal Reserve Board. Now, that is an instrumentality of the Government. The bank exercises a power and a function that is placed in the Congress under the Constitution and it ought to be doing what the Congress thinks is correct. The President is part of this procedure.

If these interest rates are too high, then Congress has to take the responsibility, because, in the last analysis, the power to do something about it was put in the Congress by the Constitution. And insofar as we have farmed it out to the Federal Reserve Board and other instrumentalities of this Government, we cannot exercise a responsibility for the action of those who are supposed to be doing what we want them to do and we should be looking at it.

The Secretary of the Treasury, I thought, was very considerate, and I believe the Senator from Mississippi would agree that he was conciliatory. He indicated that he, too, would like to see interest rates lower and that he wants to do what is best for the 230 million people of this country. He indicated he would welcome a hearing on the subject to discuss the subject and he would be happy to report and listen to everybody's suggestions, including those that he would make himself.

So I would be happy to cooperate in any way that I can to see that Congress does exercise its responsibility and that we discuss the matter and that we do consider what can be done and perhaps what should be done about this situation.

May I say that I would be glad to cooperate with the chairman of the committee and with the Senator from Mississippi in any way that I can to help see that this matter is properly discussed and, hopefully, suggestions might be made and considered.

Mr. STENNIS. I thank the Senator very much. I take quite seriously what you gentlemen say and always do, and all of us do. The two of you can be very helpful, I am sure.

Mr. PRESSLER. Will the Senator yield?

Mr. STENNIS. Yes, I am happy to yield to the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I would like to join as a cosponsor of the interest rate amendment which the distinguished Senator (Mr. STENNIS) is offering. Let me indicate at the outset that I also have a Senate resolution to make the interest rate issue the top priority of the Congress which I will be offering shortly. I believe it is important that the Senate address this question quickly because I think that the White House and the Congress are not fully aware of the devastating impact that high interest rates are having on the economy.

I commend the Senator for his action today and also the committee chairmen who have promised to hold hearings, but let us hope that the action taken is more than just merely hearings. Today, small businessmen and farmers are in a near state of revolt regarding interest rates. Some of the larger corporations can pass the cost of interest on to the consumers, but small farmers and businessmen cannot.

It should be understood that the deduction for interest rates cannot be enjoyed unless one has an income to mark it off against. So, therefore, many smaller operators cannot even deduct the interest rates because they do not have any income against which to mark it.

Let me say that I sense that those in the highest positions of the Federal Reserve are not at all aware of the damage the high interest rates are having on individuals and small business across the country. When the Federal Reserve was established, it was done so with the idea that it would be politically independent. But I am not sure economics should be independent of politics. There is nothing wrong with the political situation being responsive to the needs of the people. Members of Congress hold listening meetings and we are supposed to respond to our constituents and the problems that are out there in our home States and districts.

Mr. President, I do not believe that the highest levels of the Federal Reserve or, indeed, of Congress and the White House have done much to date to limit the impact of high interest rates. I know there is talk of removing the Chairman of the Federal Reserve or of curtailing the Board's power. On the long-range basis, it is a valid question whether Congress should have given this power to the Federal Reserve or if we should now take it back.

Of course, we in Congress also have a responsibility to move toward a balanced budget for which the huge deficit the Federal Reserve feels makes the taking of these actions necessary. At present, however, the Board has set the rates at a much higher level than the current rate of inflation dictates.

The damage that is being done all across our country by the staggering interest rates is far greater than is realized in Washington. Those damages will be felt in 2 and 5 and 10 years, by the loss of family farms and small business today and in the next few months.

Once again, the damages are falling heaviest on working people, working women and men, on small operators who must pay the interest and do not have an income sufficient to deduct the income tax deduction and also who cannot pass the cost of higher interest rates on to consumers.

Too often Washington hears from great corporations or great labor unions who can pass on or absorb, temporarily, such increases. I think we are overlooking the really staggering impact that this has on small individuals in more remote areas of our country.

I join in the request to the various committee chairmen for hearings. I commend the Senator from Kansas for his commitment. I know my distinguished colleague from Iowa, the chairman of the Joint Economic Committee, is here and the chairman of the Budget Committee is here. Their concern for this subject is indeed encouraging. I believe they share my sense of urgency regarding this matter.

I brought this subject up with the President when he was before our conference just a week ago because I sensed that some of his advisers may not have fully shared the urgency of the crisis of high interest rates. I believe the action we are taking today can only heighten the awareness of members of his administration to this subject.

Therefore, I join in cosponsoring this amendment which would create a commission. I understand it is being withdrawn in exchange for a commitment to hold hearings. I join in that request and I applaud the Senator from Kansas for making the commitment.

Mr. JEPSEN. Will the Senator yield?

Mr. STENNIS. I am happy to yield and then I will yield next to the Senator from New Mexico.

Mr. JEPSEN. Mr. President, I thank my distinguished colleague from Mississippi, and I commend him for discussing probably the most important and crucial economic issue that is facing this country today. As President Reagan found out the other day when he got an earful in Ottawa, it is also an international problem that affects this country.

We have heard about how high interest rates hurt the people who want to buy homes, the homebuilders, and the realtors. It carries on down in that chain to where a person who has received an offer of a promotion from one city to another is not sure whether to accept the move. The new job he might take now has to be considered in the light of whether the home that he has can be sold and, if it can be sold, whether he will be able to afford to buy a home in the new place that he is moving.

It affects everyone at all levels of our economy.

My question is a $64,000 question that we all have to get to on the bottom line: How do we bring the interest rates down? That is the question. We can print money. Money actually creates inflation and inflation is what causes high interest rates. I think there is some misunderstanding in that. You can blame the Federal Reserve Board or whoever you want to about high interest rates, but high interest rates are primarily caused by inflation. High interest rates do not fight inflation; they are caused by it.

I think among other things we should study the root causes of inflation. Then we can get at interest rates and then recommend steps on how to get them down.

I can assure the distinguished Senator from Mississippi that the Joint Economic Committee will be holding hearings and we will counsel with, consult, and cooperate in every way with the distinguished Senator from Mississippi at the time of these hearings and the calling of witnesses to make sure that his interests are considered and that he is totally involved. I thank the distinguished Senator for bringing this up at this time.

Mr. STENNIS. I thank the Senator.

I am glad to yield to the Senator from New Mexico for his comments.

Mr. DOMENICI. I thank my friend for yielding. Might I say in all honesty, the issue of interest in our country, is one that is so significant and so volatile that many who would come to the floor with an amendment such as the one proposed and which is to be withdrawn might be confronted with an attitude on my part that it was done merely for some political kind of propagandizing.

I want to say to the Senator from Mississippi that that is not his case. I have never found him to do that.

What brings the Senator from Mississippi to the floor is the utter feeling of frustration about this situation.

There are a couple of historic facts that are so frustrating that we ought to have the brightest people in the world attending hearings. For instance, never in the history of our country have we had such a big difference between inflation and interest. Perhaps the distinguished Senator who chairs the Joint Economic Committee is correct, that interest and inflation are in some way tied. But we now have for certain inflation which is no longer double digit. Let us say it is 9.3. We have interest which is twice as high, 18 or 19. Never in the history of America have we had such a big difference between inflation and interest.

As the Senator knows, in my committee, where we have to set the targets, where we have to estimate how we will get to the balanced budget at some point in time, there is no fact that is more devastating to our efforts to attempt to predict a balanced budget than inflation. The Senator is absolutely correct; it is approaching $100 billion. The interest is approaching $100 billion.

The biggest political problem of Lyndon Johnson was how did he tell Americans that he was going to have a $100 billion budget. Now we have $100 billion in interest this year.

There is no question but this is the Achilles heel. Our President must know it; those who advise him must know it. This economic recovery plan will not work if we have interest rates at this height for very much longer. We are going to have a tax package that stimulates growth, budget cutting that attempts to bring excessive Government spending under control, but the Senator from Mississippi knows, and everyone here knows from talking to their constituents, be they the small businessman, big business, the farmer, the one who buys a car or the one who sells it, activity will begin to drop off unless we find an answer.

I think I know some of the reasons, I will say to the Senator from Mississippi. It will be my privilege to await these hearings. I would like to attend them. We will have to be producing the second budget resolution soon and we will have to predict for the Senate for all of 1982. The Senator will have to stand here and vote on his best estimate of what that should be.

There are some real anomalies. While the interest rates are this high, the American people would assume that the banking institutions would be flourishing. The Senator and I know that the savings and loan institutions of America have never been in such a precarious position in terms of potential insolvency since the Great Depression. The savings and loans, which make the long-term mortgages for our homes, are just almost out of business. Who is going to give them money to loan for 30 years? When the interest rate was 18 or 20 percent some 20 months ago, it dropped precipitously some 10 or 12 points, but in a few months it was back up. Who will lend money at a fixed rate for 30 years? Where will that money come from?

I commend the Senator from Mississippi for his attitude and his genuine concern.

Mr. STENNIS. I thank the Senator very much. The Senator has given an excellent summary of the situation.

What concerns me, too, is I think the Senator is correct when he said this high rate of interest is a roadblock to the success of the Reagan plan, the Reagan package, whatever you want to call it. We are not going to get out of this predicament until we get something done about these interest rates. I feel very strongly about that.

I want to make clear that I am not blaming the Federal Reserve Board or its Chairman. I put in the resolution that the Commission would consult with him since he has responsibilities of his own.

The attitude of the Senator from New Mexico is very helpful in trying to solve this problem.

Mr. President, I want to emphasize, too, that I was impressed with the concern of Mr. Regan, the Secretary of the Treasury. I again express my faith in him in trying to find a way through this darkness of these repeated high, high, high rates. I have confidence in his ability.

I believe, Mr. President, with reference to the financial community of this Nation, that they have the ability and the know-how, and, based on their experience, their indepth learning in this field, they will be helpful to the Secretary of the Treasury, to the President, or anyone. I suppose some have volunteered but it seems to me that they should all volunteer to make suggestions as to what they think might pull us out of this 20-percent interest rate which is the roadblock to the success of this plan.

There is another thing that drove me to this conclusion. I realize that at the very best this plan takes time. I want to warn the American people again, do not expect too much at the end of the first year or even at the end of the second year, or the third year. But we cannot wait that long on reduction of this 20-percent interest rate, the 18-percent interest rate, the 16-percent interest rate. The ordinary business of the country cannot make it, as I see it.

We have to stay with this problem until we find something to resolve it.

Mr. President, I do not have any specific remedy, but I do know that we could put caps on interest rates, devise some kind of a system to do that.

We had, in the Eisenhower administration, I believe it was, regulation W. That was put on for a while and that put a limitation on amounts, I do not remember the exact numbers. As I recall, it did a lot of good. So we cannot just stand back and wait for 2, 3, or 4 years and say the free enterprise system must have a free swing. We just cannot last that long. If people ever generate a sense of real fear, because normal business conditions cannot function, then semi-pandemonium can break loose at any time. I speak from experience on that, having come through the Depression. I was practicing law when the Depression started. In fact, it came in about the time I came into the profession and I felt the first wave. But when the institutions begin to fail they can fall like dominoes—and I am not predicting they will, but the failures can spread almost overnight.

So, Mr. President, I find a great interest and a great preoccupation about this problem, that it cannot be permitted to last, but we are all short on real remedy. I am pleased, as I said again Mr. President, to have the active cooperation of the committees, the agencies of the Government, the membership, or anyone outside, of course, that will get at this matter and try to come up with something on the positive side.

I think, Mr. President, for the RECORD, I understand that I ought to introduce this amendment now, and I have sent it to the desk. Then, as I said, I shall withdraw it.

Mr. DOLE. Mr. President, is the amendment at the desk?

UP AMENDMENT NO. 270

(Purpose: To establish a National Commission on Interest Rates)

The PRESIDING OFFICER. It is. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Mississippi (Mr. STENNIS), for himself, Mr. PRESSLER, and Mr. SASSER, proposes an unprinted amendment numbered 270.

After title V, insert the following new title:

TITLE VI—COMMISSION ON INTEREST RATES

SEC. 601. NATIONAL COMMISSION ON INTEREST RATES.

This title may be cited as the "National Commission on Interest Rates Act".

SEC. 602. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds and declares that—

(1) interest rates charged by lenders have reached levels which threaten the health of the Nation's economy;

(2) high interest rates have contributed to price inflation, a reduction in the supply of goods and services, economic stagnation, and a higher Federal deficit;

(3) the volatility of interest rates has created business uncertainty, encouraged speculation, and deterred investment in productive capacity;

(4) existing monetary, credit, banking, and fiscal policies have not stabilized interest rates at beneficial levels; and

(5) the development of policies to restore stability and confidence in the financial markets is necessary to the economic security of the United States.

(b) PURPOSE.—It is the purpose of this title to establish a commission to investigate and recommend methods of promoting moderate and stable interest rates.

SEC. 603. ESTABLISHMENT.

(a) IN GENERAL.—There is established as an independent instrumentality of the United States a commission to be known as the National Commission on Interest Rates (hereafter in this Act referred to as the "Commission").

(b) MEMBERSHIP.—The Commission shall be composed of the following members:

(1) The Secretary of the Treasury, or his delegate.

(2) The Chairman of the Council of Economic Advisers, or his delegate.

(3) The Comptroller of the Currency, or his delegate.

(4) The Chairman of the Federal Home Loan Bank Board, or his delegate.

(5) The Administrator of the National Credit Union Administration Board, or his delegate.

(5) The Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, or his delegate.

(7) The Chairman of the Securities and Exchange Commission, or his delegate.

(8) The Chairman of the Federal Trade Commission, or his delegate.

(9) Two members appointed by the President, one of whom is an official of a State agency that regulates banking or similar financial institutions, and one of whom is an official of a State agency that regulates savings, thrift, or similar financial institutions.

(10) Five members appointed by the President from private life who are not officers or employees of the Federal Government or of any State or local government.

(c) CONSULTATION.—The Commission shall consult with the Board of Governors of the Federal Reserve System in carrying out its functions.

(d) CHAIRMANSHIP.—Upon the appointment of the members described in paragraphs (9) and (10) of subsection (b), the President shall designate a member of the Commission to be Chairman of the Commission. This designation shall be made by and with the advice and consent of the Senate unless the individual designated already holds an office to which he was appointed by and with the advice and consent of the Senate.

(e) VACANCY.—A vacancy on the Commission shall not affect its powers and shall be filled in the same manner in which the position was originally filled.

SEC. 604. DUTIES.

(a) IN GENERAL.—The Commission shall make a full and complete investigation of and make recommendations with respect to ways to establish moderate and stable interest rates. In conducting this investigation, the Commission shall consider—

(1) the upward ratcheting of interest rates;

(2) the "crowding out" of private borrowing and lending;

(3) the unprecedented volatility of interest rates;

(4) the high cost of long-term borrowing;

(5) the impact of international financial conditions on the domestic economy;

(6) the increase in speculative investment;

(7) the expansion of consumer credit;

(8) the expansion of housing credit; and

(9) any other problems relating to the establishment of moderate and stable interest rates.

(b) FINAL REPORT.—Not later than one year after the date on which the last member of the Commission is appointed pursuant to section 603(b), the Commission shall submit to the President and to the Congress a final written report concerning its investigation and make such recommendations for administrative action and legislation as the Commission finds appropriate.

(c) INTERIM REPORT.—Not later than six months after the date of enactment of this Act, the Commission shall submit an interim report to the President and to the Congress, describing the activities of the Commission during the period prior to the submission of such report.

(d) TERMINATION OF COMMISSION.—The Commission shall cease to exist sixty days after it submits its final report to Congress under subsection (b).

SEC. 605. POWERS.

(a) IN GENERAL.—The Commission or, on the authorization of the Commission, any member thereof, may, for the purpose of carrying out the provisions of this Act, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such evidence as the Commission or an authorized member may find advisable.

(b) HEARINGS.—

(1) SUBPENAS.—Subpenas may be issued only under the signature of the Chairman or any member of the Commission designated by him and shall be served by any person designated by the Chairman or any members. The attendance of witnesses and the production of evidence may be required from any place in the United States at any designated place of hearing in the United States.

(2) OATHS.—Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission.

(3) ALLOWANCES.—The provisions of section 1821 of title 28, United States Code, shall apply to witnesses summoned to appear at any such hearing. The per diem and mileage allowances to witnesses summoned under authority conferred by this section shall be paid from funds appropriated to the Commission.

(4) REFUSAL TO TESTIFY.—Any person who willfully neglects or refuses to qualify as a witness, or to testify, or to produce any evidence in obedience to any subpena duly issued under the authority of this section shall be fined not more than $500, or imprisoned for not more than 6 months, or both. Upon the certification by the Chairman of the Commission of the facts concerning any such willful disobedience by any person to the United States attorney for any judicial district in which such person resides or is found, such attorney may proceed by information for the prosecution of such person for such offense.

(c) COOPERATION OF OTHER AGENCIES.—The Commission may acquire from the head of any Federal agency available data, reports, and other information which the Commission considers useful in the discharge of its duties. Each such agency shall cooperate with the Commission and furnish all information requested by the Commission to the extent permitted by law.

SEC. 606. ADMINISTRATION.

(a) IN GENERAL.—Subject to such rules and regulations as may be adopted by the Commission, the Commission is authorized to—

(1) appoint and fix the compensation of an Executive Director, by and with the advice and consent of the Senate, and such additional staff personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at such rates not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of such title;

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $200 a day for individuals;

(3) procure supplies, services, and property, and make contracts; and

(4) enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.

(b) AUDITS.—The Comptroller General is authorized to make detailed audits of the books and records of the Commission, and shall report the results of any audit to the Commission and the Congress.

SEC. 607. COMPENSATION.

Each member of the Commission not otherwise employed by the United States shall be compensated at the rate of $200 per day for each day, including traveltime, that he is engaged in the actual performance of his duties as a member of the Commission. A member of the Commission who is an officer or employee of the United States shall serve without additional compensation. All members of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties as members of the Commission.

SEC. 608. ASSISTANCE.

(a) INFORMATION.—Upon the request of the Commission, the head of any Federal agency shall furnish the Commission with available data, reports, and other information to the extent permitted by law.

(b) PERSONNEL AND SERVICES.—Upon the request of the Commission, the head of any agency, department, or other instrumentality of the United States may furnish personnel and services to the Commission, with or without reimbursement.

SEC. 609. AUTHORIZATION.

There are authorized to be appropriated without fiscal year limitation such sums, not to exceed $2,000,000, as may be necessary to carry out the provisions of this title.

Mr. DOLE. Mr. President, let me say we have heard not only from the Sen-

ator from Mississippi (Mr. STENNIS) but we have heard from the ranking member of the Finance Committee, the chairman of that committee, the chairman of the Budget Committee, the chairman of the Joint Economic Committee, and the Senator from South Dakota (Mr. PRESSLER), who has an interest in this. The Senator from Mississippi did meet personally with the Secretary of the Treasury, Don Regan, yesterday. He has a special interest in this.

It affects our economy, affects everything that happens. So I would say at the outset, I shall be in touch with the distinguished Senator from Utah (Mr. GARN) to see if we cannot arrange joint hearings sometime around mid-September.

Mr. STENNIS. Mr. President, I certainly am grateful.

Mr. President, there is no backing up on the part of any of us who are interested in this matter at all but, as a matter of expediency, I am convinced that we would get along better, get results faster, by going this route, a route that I would like very much to go. Then we reserve the right to examine it and I can reintroduce it then. I would like the right, at a preliminary point in time, for us to have a report on it next year—not a final report, but an interim report of some kind. I wish that we had more attendance here and maybe more of a debate, but I think they key points have come in from the key people on this amendment.

Mr. DOLE. I thank the Senator.

Mr. President, do I understand that the Senator will withdraw the amendment, based on the discussion?

Mr. STENNIS. That is correct.

Mr. President, in keeping with what I have already said, I withdraw this amendment with the understanding that I can reintroduce it later.

The amendment was withdrawn.

Mr. DOLE. I thank the distinguished Senator from Mississippi.

Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending question is an amendment numbered 508, offered by the Senator from Kansas.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Let me say for those who may be listening, Mr. President, if Senators have an amendment that may be technical or minor in nature, if they would please come to the floor, we might be able to accommodate that amendment. There are a number in the negotiation stage, and certainly we are not going to preclude negotiations.

Senator PACKWOOD, I understand, is on his way with a noncontroversial minor amendment. Senator TOWER has an amendment he would like to offer, which may be controversial. He is discussing that with Senator METZENBAUM. Senator KENNEDY has 11 amendments. Hopefully, they will not all be offered.

We are negotiating in a couple of areas with Senator KENNEDY, negotiating with Senator DODD and Senator HEINZ. We are negotiating with the Senator from Hawaii.

The list may appear to be long, Mr. President, but if we could resolve three or four of these areas with multiple sponsors, the list would shrink considerably and maybe rapidly. Hopefully, we can do those before 11 or 12 o'clock tonight.

The Senator from Kansas has a fiscal responsibility amendment which would indicate the sense of the Senate that we are going to come back within the numbers, that will limit the revenue loss in accordance with the administration's numbers, but I think we may not offer that until a later time.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is amendment No. 509 proposed by the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there is a supplemental appropriation bill which is essential, I believe, to deal with at this time and which has been cleared on both sides and cleared with the minority leader, with the distinguished chairman of the Appropriations Committee, and I believe all Senators who are concerned.

I apologize to the distinguished managers of this joint resolution that we interrupt the proceedings on the joint resolution for this, but I believe it is essential.

SUPPLEMENTAL APPROPRIATIONS FOR THE DEPARTMENT OF HEALTH AND HUMAN SERVICES—HOUSE JOINT RESOLUTION 308

Mr. BAKER. Mr. President, I ask unanimous consent that the House Joint Resolution 308 now at the desk be laid before the Senate and that debate thereon be limited to 10 minutes equally divided with time controlled by the majority and minority floor managers of this joint resolution and that no amendment thereto be in order and no motions, points of order, or appeals be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 308) making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consideration of the joint resolution.

Mr. BAKER. Mr. President, the Senator from New Mexico (Mr. SCHMITT) will manage on behalf of the majority.

Mr. SCHMITT. Mr. President, I believe the distinguished Senator from Wisconsin is certainly aware of the measure and we have had no objection from him.

I ask the Senate to adopt the pending supplemental appropriation of $16.8 million which is needed to keep the U.S. Public Health Service hospital and clinic system in operation until the end of the fiscal year.

The supplemental has been recommended by the House Appropriations Committee and passed by the House. The administration requested the funds.

In approving the rescission/supplemental appropriations bill in June, Congress directed the Department of Health and Human Services to keep the hospitals open until October 1 of this year and to permit any community to submit a plan for community use of these facilities.

Now the administration claims that because of the shortage of funds that neither goal can be achieved and that the $16.8 million supplemental is "critical" to continued operation of the hospital and clinic system for the remainder of fiscal 1981.

The administration states that unless the funds are appropriated, it will be necessary for the eight general medical-surgical hospitals and 27 outpatient clinics to close next month. For example, Dr. Edward N. Brandt, Jr., the Assistant Secretary for Health, testified before my subcommittee on July 20 that without the funds the administration will be forced to terminate inpatient care by August 1 and outpatient care on September 1.

In addition, according to Dr. Brandt, more than 4,000 civil service and wage grade employees will have to be furloughed and will not receive any severance pay or lump-sum leave pay until next fiscal year when funds become available.

The source of the administration's problem appears to be the decrease in third-party payments, particularly those from the Department of Defense for beneficiaries who may receive care at the PHS facilities, but who do not qualify for free care under the merchant seaman's entitlement.

Third party payments to the hospital and clinic system have dropped off from the $67.2 million anticipated this year, to the $54.7 million now projected. About 71 percent of all such payments come as reimbursements for Defense Department beneficiaries, including retired military personnel.

The Department of HHS estimates a total shortfall of $12.5 million in reim-

bursements from fee-paying patients served by the system. The reason for the fall off in such payments doubtless is the administration's plan to shut down the hospitals by the end of the fiscal year in any event, driving prospective fee-paying patients to other facilities for their health care.

The $16.8 million supplemental will provide a funding level of $145,199,000 for the hospital and clinic system exclusive of income it still will be able to derive from a $40 million supplemental provided by Congress in June and from whatever third-party payments it continues to collect.

I might add that this supplemental will not breach the budget ceiling provided by the third concurrent resolution. Much as we do not wish to add to Federal spending, there is sufficient margin left under the ceiling to take care of this supplemental.

I have become convinced that it will be extraordinarily difficult and disruptive to solve this problem through a simple reprograming.

Mr. President, the pending bill is also of great importance to the community efforts that are attempting to take over the management of these hospitals in an expeditious fashion and with great thought in mind.

I yield to the distinguished junior Senator from Washington for any comments he may wish to make.

Mr. GORTON. I thank the Chair.

Mr. President, House Joint Resolution 308 is very important to the communities in which the eight public health service hospitals are located. It means that the Congress is keeping its promise to those communities to allow them the opportunity to assume the operation of the hospitals.

It is unfortunate that a supplemental appropriation is necessary but the merits of the case clearly call for its approval.

I am delighted with the prompt response this matter has received from both Houses of Congress. The leaders of the House Labor HHS Appropriations Subcommittee, Representatives NATCHER and CONTE are to be commended on the superb job they did in getting this matter through the House this morning. Quite frankly, I was surprised when I heard that the matter was concluded this morning. I was expecting that it would take several more days before this body had the opportunity to act.

I would also like to express my deep appreciation to Senator SCHMITT. We would not be before you now if it were not for his attentive and sympathetic response to this request. Likewise, I would like to thank Senators HATFIELD and PROXMIRE for their cooperation.

I hope that the efforts that have been expended to date by the affected communities will bear fruit. We have a tough job ahead of us to effectuate the plans proposed by the communities, but it is clear that there would be no such opportunity if it were not for this supplemental appropriation. I thank all those who contributed to the effort.

This bill represents the only emergency supplemental appropriation which has been approved by this administration and which is about to be approved by this Congress. That illustrates the truly unique nature of the problem which these hospitals face.

This proposal recognizes the promise made by the administration in its determination to close down Public Health Service hospitals to the people of the communities losing those hospitals that they would be both allowed and encouraged to assume the operation of what up until the end of this fiscal year will be the eight Public Health Service hospitals.

It recognizes as well the mistakes made by the Department of Health and Human Services in estimating the needs for the balance of fiscal year 1981 in the rescission bill which recently passed this Congress.

This supplemental appropriation will allow the operation of the eight hospitals and the clinics through the end of September of this year. After that point only those communities which have valid plans will be eligible for continuing supplemental funding under appropriations yet to be adopted for fiscal year 1982 while they go into complete and full community control. Without this supplemental appropriation that promise to the communities could not possibly be carried out.

I should like personally to thank the distinguished majority leader and the distinguished minority leader for their willingness to consider this bill through special and extraordinary fashion. I should like to thank the distinguished chairman of the Appropriations Committee for his willingness to facilitate it, as well as Senator RUDMAN, Senator PROXMIRE, and, of course, my own colleague from the State of Washington.

I should like to point out, Mr. President, that the work of the distinguished Senator from New York (Mr. D'AMATO), who is now the Presiding Officer over this body, has also been vital to the saving of these hospitals for community use. But, most of all, we all owe a debt of gratitude to Senator SCHMITT who was willing in a very extraordinary fashion to deal objectively and affirmatively with this matter. He has my thanks and, I am sure, the thanks of all other Senators who are concerned with these hospitals.

I have been privileged and honored to work with my senior colleague, Senator JACKSON, in complete harmony toward this important community goal, and I hope the Chair will now recognize him.

Mr. SCHMITT. Mr. President, I yield time, if I have time remaining, or I am sure by unanimous consent, I will yield time to the senior Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. JACKSON. I thank the distinguished junior Senator from New Mexico for yielding to me.

Mr. President, this emergency supplemental budget request is a very important measure. Last week the employees of the Public Health Service hospitals were sent furlough notices. When the Senate passes this measure, it will enable Secretary Schweiker to rescind those notices. And it will give the hospitals the much needed time to finish working on the plans for community takeover.

Just this morning the House passed this measure. I want to commend Congressman NATCHER, the chairman, and Congressman SILVIO CONTE, the ranking minority member of the Labor, Health and Human Services Subcommittee of the House Appropriations Committee for their quick response to this request from the administration. I want to commend Senator SCHMITT for his foresight in holding a hearing on this issue last Monday. And I want to thank Senators HATFIELD and PROXMIRE for their cooperation in bringing this to full Senate consideration. Senator GORTON, too, worked long and hard to put this all together and I thank him.

I have long been concerned for the future of the Public Health Service hospitals. I do not agree with the administration's policy to close them. Seattle's hospital has focused its resources on the unmet health needs of the Pacific Northwest. In short, we need our hospital. Just this morning in Seattle, the mayor was presented with a charter to establish a public authority to operate the hospital. The task force which developed this charter was acting in reliance on both the administration's and Congress assurances that we would aid in the transition from Federal to local control.

The Senate needs to pass this $16.8 million supplemental to get the hospitals through to October 1, 1981. The employees are in a state of limbo now, with furlough notices pending. They deserve this peace of mind.

The conferees to the reconciliation are currently working on the next step—fiscal year 1982 funds. Even now I look for support as the Congress considers that step because I believe the investment would represent substantial savings to the Federal Government. Whether or not the Federal Public Health Service hospital system exists, the Federal Government will continue to be obligated to provide health care to many groups now being served by the PHS hospitals—defense and other Federal personnel, retirees, dependents, and Native Americans. This emergency supplemental, as well as other such funds as may be necessary, will help the now-Federal institutions be turned over to local entities which would be capable of serving Federal beneficiaries at a lower cost than would otherwise be possible.

The need is realistic. And the transition needs to be consistent with the assurances of the administration that it would ease the way for the creation of a viable new entity.

I urge the Senate to follow the House action of this morning, and pass this budget request.

Mr. President, I want to especially thank the distinguished chairman of the subcommittee, Senator SCHMITT, for his foresight in holding a hearing on this issue last Monday.

I want to thank also, of course, Senator HATFIELD, the chairman of the Appropriations Committee, and the ranking minority member, Senator PROXMIRE; the majority leader, Senator BAKER, and the minority leader, Senator ROBERT C. BYRD,

as well as my colleague, Senator GORTON, who has worked with all of the Senators involved in the hospital closures in an effort to do equity and justice to the employees who are caught in this current situation.

The communities that are involved here are trying to play an important role to provide for continuity of service based on the opportunity that we can create with this measure to provide services for those who are eligible under the entitlement programs.

So I express my special appreciation to the distinguished Senator from New Mexico for acting so expeditiously.

Mr. SCHMITT. I thank the two Senators from the great State of Washington for their compliments and for their cooperation in this matter.

Mr. SARBANES. Mr. President, I rise in support of House Joint Resolution 308, the fiscal year 1981 emergency supplemental request for the Public Health Service hospitals and clinics system. It is important that this supplemental appropriation be approved and I want to commend the managers of the bill for bringing it to the floor as quickly as they have. The urgency of the supplemental request of $16.8 million to enable the PHS hospitals and clinics to operate for the balance of fiscal year 1981 rests on the fact that several communities have been preparing to take over the PHS hospitals in their area. Lack of funds to operate the PHS hospitals for the balance of the current fiscal year would thwart those plans, furlough 4,000 employees, and literally destroy the PHS hospitals as an important community health resource.

Failure to provide the operating funds would have a severe impact on the Baltimore PHS Hospital and the people it serves. The hospital currently provides acute inpatient medical, surgical, psychiatric, and alcoholism services, a wide range of specialty and ancillary services, as well as several special programs such as a geriatric day treatment center for occupational and environmental health. Many of the Baltimore Hospital's services are provided jointly with such community and academic-based agencies and institutions as the North Baltimore Community Mental Health Center, the North Central Baltimore Health Corporation—which since 1978 has run the Hampden, Woodberry, Remington Community Health Center, and the Johns Hopkins University School of Medicine and School of Hygiene and Public Health. These institutions and services are particularly important to the 50,000 residents of neighborhoods near the hospital designated as a medically underserved area, as well as to the primary beneficiaries.

Since the announcement by the administration of its intent to terminate the PHS hospital system, the patient advisory group for the Baltimore Hospital began to plan for the hospital to be taken over by a local, nonprofit organization, the Wyman Park Health System (WPHS). The conversion proposal, submitted to Secretary Schweiker, was prepared in conjunction with the Johns Hopkins University, the North Baltimore Center, the North Central Baltimore Health Corporation, and the city of Baltimore. Also joining the effort are many civic and community associations; and the Governor of Maryland, the Honorable Harry R. Hughes, has expressed his strong support.

In utilizing the Baltimore PHS Hospital, it is the goal of the WPHS to maintain the fine medical care which is currently provided to merchant seamen, Coast Guard, Department of Defense, and NOAA personnel, PHS officers, and the central Baltimore City communities. The Baltimore PHS Hospital has a highly regarded staff of great dedication and enjoys broad community support and use. The WPHS will draw on these strengths to provide accessible, high-quality comprehensive health care while assuring continuity of the staff, services, and care now delivered to its patients. The hospital will also serve as a center for medical training and research with a close affiliation with the Johns Hopkins University. Its extended system of community health and mental health centers will be retained and expanded focusing on primary ambulatory care, preventive and therapeutic medicine, and health and social services.

It will be impossible to carry out this goal if the present staff of the Baltimore PHS Hospital is furloughed because of lack of operating funds for August and September. Already, the impact of the administration's plan for the PHS hospital system has caused attrition in staff, particularly in new PHS doctors. The Baltimore PHS Hospital presently employs over 600 people; and the great fear is that these employees, if furloughed, will obtain other jobs and be lost to the hospital. Continuity of the staff is absolutely critical to the well thoughtout conversion plan, so widely supported by the community, Baltimore City, and the State. Termination of the operating funds before the end of the fiscal year also runs counter to the conversion process outlined in both the Senate and House versions of the reconciliation measure. It is, therefore, vital to this effort that the supplemental request be approved; and I urge the Senate to support the committee's action.

Mr. SCHMITT. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. JACKSON. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on the third reading of the joint resolution.

The joint resolution (H.J. Res. 308) was ordered to be read a third time, was read the third time, and passed.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ECONOMIC RECOVERY TAX ACT OF 1981

The Senate continued with the consideration of the joint resolution.

Mr. DOLE. Mr. President, I know there are at least two Members headed in this direction with amendments, one which may require a rollcall and one which will not. In fact, there may be three Members who are, hopefully, headed in this direction. So while they are proceeding to the floor I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. Amendment No. 508 proposed by the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 271

(Purpose: To extend the prepaid legal services tax exclusion for three years)

Mr. DOLE. Mr. President, I send to the desk an amendment on behalf of Senator PACKWOOD for himself, Senators KASTEN, STEVENS, DURENBERGER, CRANSTON, HEINZ, and D'AMATO.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) for Mr. PACKWOOD and others proposes an unprinted amendment numbered 271:

At the end of the bill, add the following:

SEC. ——. PREPAID LEGAL SERVICES.

Paragraph (1) of section 2134(e) of the Tax Reform Act of 1976 (relating to the effective date) is amended by striking out "1982." and inserting "1985.".

Mr. DOLE. Mr. President, I am offering this amendment for Senator PACKWOOD. I have discussed it briefly with the distinguished Senator from Louisiana, Senator LONG. It has been discussed with Senator METZENBAUM who has no objection.

What it does is simply extend for 3 years an existing tax provision on prepaid legal services, Internal Revenue Code section 120. This provision was enacted in 1976 and expires December 31, 1981.

The current law does encourage employers to provide legal services to employees. The purpose of the section is to encourage employers to provide legal services to employees. It does this by providing that employees are tax free on the value of legal services provided for them by the employer.

It will make available legal services for divorces, wills, contract disputes, and other typically personal legal problems for the working class that may have an income too high for free legal services provided by localities but not enough assets to afford the astronomical prices often charged by those in private legal practice not working through a group plan.

As far as I know, there is no opposition to the amendment. Does the Sena-

tor from Louisiana have any objection to the amendment?

Mr. LONG. I have no objection. If anyone wishes to speak against the amendment, I will be happy to yield time, but I personally have no objection.

Mr. DOLE. Mr. President, I ask unanimous consent to be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I am prepared to yield back my time.

Mr. ROBERT C. BYRD. Reserving the right to object.

Mr. DOLE. The Senator from Ohio has been contacted.

Mr. ROBERT C. BYRD. Then I have no objection.

Mr. LONG. I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment offered by the Senator from Kansas (Mr. DOLE) on behalf of the Senator from Oregon (Mr. PACKWOOD).

The amendment (UP No. 271) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 511

Mr. LONG. Mr. President. I have an amendment at the desk. I ask for its immediate consideration.

Mr. DOLE. Mr. President, I ask unanimous consent that my amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an amendment numbered 511.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 77, after line 7, insert the following:

SEC. 201A. EXPENSE-METHOD DEPRECIATION.

(a) IN GENERAL.—Part VI of subchapter B of chapter 1 (relating to itemized deductions for individuals and corporations) is amended by inserting after section 168 the following new section:

"SEC. 168A. EXPENSE-METHOD OF DEPRECIATION.

"(a) ALLOWANCE OF DEDUCTION.—There shall be allowed as a deduction an amount equal to the basis of each expense-method property placed in service by the taxpayer during the taxable year.

"(b) EXPENSE-METHOD PROPERTY DEFINED.—Except as otherwise provided in this section, for purposes of this title, the term 'expense-method property' means section 38 property which is either 3-year or 5-year recovery property (within the meaning of section 168(c)).

"(c) SPECIAL RULES.—

"(1) DISPOSITIONS WITHIN ONE YEAR AFTER PLACED IN SERVICE.—The term 'expense-method property' shall not include any property if such property is disposed of by the taxpayer before the date one year after the date on which such property was placed in service.

"(2) NONCORPORATE LESSORS.—In the case of a person other than a corporation, the term 'expense-method property' includes property with respect to which such person is the lessor only if subparagraph (A) or (B) of the first sentence of section 46(e)(3) is met with respect to such property.

"(3) PROPERTY WHICH CEASES TO BE EXPENSE-METHOD PROPERTY.—If any expense-method property for which a deduction was allowable to the taxpayer under this section ceases to be expense-method property with respect to the taxpayer—

"(A) the taxpayer shall be treated as having disposed of such property for an amount equal to its fair market value as of the date of such cessation, and

"(B) the basis of such property in the hands of the taxpayer after the date of such cessation shall be treated as equal to such fair market value.

"(d) PHASE-IN.—

"(1) IN GENERAL.—In the case of an expense-method property placed in service before 1986, the first-year deduction for such property shall be allowed for the taxable year in which placed in service and for succeeding taxable years in accordance with the following table:

"In the case of property placed in service during:	The following percentages of the first-year deduction with respect to the property shall be allowed: For taxable year in which placed in service:	For first succeeding taxable year:	For second succeeding taxable year:	For third succeeding taxable year:	For fourth succeeding taxable year:
1981	20	20	20	20	20
1982	25	20	20	20	15
1983	30	20	20	20	10
1984	30	25	25	20	
1985	35	30	20	15	
1986	40	30	30		
1987	55	25	20		
1988	70	20	10		
1989	85	15.			

"(2) FIRST-YEAR DEDUCTION.—For purposes of paragraph (1), the term 'first-year deduction' means, with respect to any property, the amount allowable as a deduction under this section with respect to such property for the taxable year in which such property was placed in service (determined without regard to this subsection).".

(b) EXPENSE-METHOD DEDUCTION TREATED AS COST RECOVERY.—Subsection (a) of section 168 (relating to cost recovery) is amended by adding at the end thereof the following new sentence: "In the case of expense-method property (as defined in section 168A(b)), the deduction allowable under section 168A shall be deemed to constitute the reasonable allowance provided by this section.".

(c) REPEAL OF SECTION 179.—Section 179 (relating to additional first-year depreciation allowance for small business) is hereby repealed.

(d) CLERICAL AMENDMENTS.—

(1) The table of sections for part VI of subchapter B of chapter 1 is amended by inserting after the item relating to section 167 the following new item:

"Sec. 168A. Expense-method of depreciation.".

(2) The table of sections for part VI of subchapter B of chapter 1 is amended by striking out the item relating to section 179.

(e) PHASE-OUT OF REGULAR INVESTMENT TAX CREDIT FOR EXPENSE-METHOD PROPERTY.—Subparagraph (B) of section 48(a)(2) (relating to regular percentage for investment tax credit) is amended by striking out the period at the end thereof and inserting in lieu thereof ", except that in the case of expense-method property (within the meaning of section 168A(b)), the regular percentage for any period after 1980 shall be determined in accordance with the following table:

Calendar year:	*Percentage*
1981	9
1982	8
1983	7
1984	6
1985	5
1986	4
1987	3
1988	2
1989	1
1990 and thereafter	0

EXPENSING IS THE ANSWER

Mr. LONG. Mr. President, from the time the President first submitted his tax proposals to Congress, it has been clear that one of the chief objectives of the administration has been to increase very substantially the tax incentives for investing in machinery and buildings. A similar objective was reflected in the bill reported by the Finance Committee last September.

This provision may turn out to be the most important benefit to the country in the entire bill.

My purpose today, however, is not to praise these provisions because they are good, but to criticize them because they are not good enough. This is an area which challenges our ability as legislators to do the best possible job, not merely a good job. This is an area where B minus is not good enough. The country needs a bill that earns an A.

For over a year it has been clear that there has been substantial dissent in the academic community. Recently all of the members of the American Economic Association listing themselves as working in the areas of fiscal policy and monetary policy, were polled on a choice between 10–5–3 on the one hand and a first-year recovery system on the other. Almost 200 responses were received. Of the 200, only one of those responses favored the 10–5–3 over the first-year approach.

Given the difficulty in obtaining agreement among economists on anything at all, this degree of unanimity cannot be lightly dismissed. This is particularly true since some of the economists involved are considered, at least by academic standards, conservative thinkers.

As this Senator has listened to the discussions on this subject, two main criticisms have impressed me over and over in reference to the new system. The first criticism is that the 10–5–3 tends to distort investment decisions. The second is that it is too complex.

In reference to the first criticism, the committee bill preserves the concept of the tax life of an asset, but pays no attention to economic life. As a practical matter, almost all machinery and equipment is depreciated over the same term of years even though actual economic lives are quite different.

Using a term of years which has a different relationship to economic life for different assets means that the economic effect on these assets is different. It may be true that the bill increases the tax incentive for investing in almost all kinds of machinery and equipment, but the degree of incentive varies substantially from one kind of equipment to another and from one industy to another.

It is elementary textbook economics that real wealth consists not only in having a large number of assets but in having the right combination of assets.

Those of us who believe in a free-market system think the best way to determine the right combination of assets is to look to the laws of supply and demand in a free market. The artificial differences in incentive created by 10–5–3 produce a different pattern of investments and, by definition, a less efficient and productive pattern.

Turning to the second criticism, I believe that the 10–5–3 system is simpler than present law, but it is not as simple as it could be and should be.

The 10–5–3 system means that business will have to keep track of when its assets were purchased, the so-called vintage accounts, because the depreciation rate varies year by year. Depreciation schedules will be simpler than under existing law but they will continue to exist. Furthermore, the entire complicated structure of the investment tax credit will have to be retained. Granting the credit, and recapturing the credit. again means that records as to date of purchase must be maintained, and the law must remain filled with complex provisions for carryovers and carrybacks of credit, for the stacking of credits and the mechanics of recapture.

Depreciation, at least accelerated depreciation. and the investment tax credit are both designed to do exactly the same thing, namely, to stimulate investment in fixed assets. To have two parallel systems using different concepts and different rules is more than twice as complicated as using one system.

If we were to scrap accelerated cost recovery and the investment tax credit and substitute a system whereby machinery and equipment was treated as a current expense in the year purchased. both of the objections to 10–5–3 would disappear.

The first objection was that 10–5–3 distorts the mix of assets in which our economy invests. Under an expensing system the effective tax rate is the same for all assets and all industries. at least as to machinery and equipment. Therefore investments will be made according to the laws of supply and demand and not according to accidental discrepancies in effective tax rates.

Turning to the question of simplicity, the use of current expensing eliminates the need to keep vintage asset accounts. It eliminates the need for the entire investment tax credit structure with its carryovers, carrybacks, and recaptures. It is hard to imagine a simpler system than expensing.

The whole history of the relationship between expensing and 10–5–3 is ironic. The business community had originally sought to have Congress adopt expensing. They were told that expensing was politically impossible and hence 10–5–3 was developed as first step toward expensing. Even today I think most of the business community would prefer expensing to a combination of 10–5–3 plus the investment credit.

Human nature being what it is there are some in the business community who today would prefer the economically less desirable and intellectually less defensible combination of 10–5–3 plus the investment credit than simple expensing simply because it is a richer package. Nevertheless, business support for expensing is still sufficiently strong and the advantages sufficiently great so that it is likely that eventually we will end up with expensing, whether or not as part of this package.

In addition to the question of whether expensing is ultimately the way we should go, there have been substantial questions as to how it should be phased in. Under the amendment I have submitted there would be a 10-year phase in period to meet budgetary requirements. During that phase in period the taxpayer would refer to just one simple table to determine the depreciation allowance on any piece of machinery. Over the phase in period the investment tax credit would decline as depreciation became more and more accelerated. After 1989, expensing would completely take the place of the existing two systems.

I ask unanimous consent that the table showing the determination of the depreciation allowance during the phase in period be printed as part of my remarks, Mr. President.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

AMENDMENT BY SENATOR LONG—EXPENSE METHOD OF DEPRECIATION FOR EQUIPMENT

In the case of property placed in service during:	The following percentage of the first-year deduction with respect to the property shall be allowed: For taxable year in which placed in service:	For first succeeding taxable year:	For second succeeding taxable year:	For third succeeding taxable year:	For fourth succeeding taxable year:	The following percentage investment tax credit shall be allowed:
1981	20	20	20	20	20	8
1982	25	20	20	20	15	8
1983	30	20	20	20	10	7
1984	30	25	25	20		6
1985	35	30	20	15		5
1986	40	30	30			4
1987	55	25	20			3
1988	70	20	10			2
1989	85	15				1
After 1989	100					0

Mr. LONG. Mr. President, the effect of my amendment on the revenue is to slightly reduce the revenue loss under the committee bill for the years 1981 through 1984. In some later years it would slightly increase the loss.

In conclusion, the importance of this legislation for capital formation in the American economy is hard to overstate. All of us have been working hard on the tax bill and would like to get it over with. We must resist the temptation to be too hasty, and should attempt to produce in this important area the highest quality system we know how to do. There is very little question that if we hew to that standard, expensing is the answer.

Mr. President, it is not common in this room this year to refer to Mr. Reagan's predecessor, but one phrase of President Carter's appeals to me, when he asked "Why not the best?"

What I am suggesting here, Mr. President, is that business should be able to expense its purchases of machinery in the year the purchases are made. That is the best answer. While I have no doubt that the Senate is not ready to do that today, I am confident that the time will come when we will conclude that this is the way we must go.

Mr. DOLE. Mr. President, I appreciate the statement made by the distinguished Senator from Louisiana, who knows more about the tax code than any other living person in America. It is a matter that he discussed in great detail in the Committee on Finance. I might add that it makes a great deal of sense. The more you look at expensing, the more appeal it has. I am not certain what may happen in conference, but when we come back, we may see a program with 10–5–3 and expensing that might be even better than the House bill or the present Senate bill. I am prepared to go to conference with an open mind and I appreciate the comments of the distinguished Senator from Louisiana.

Mr. LONG. Mr. President, the chairman of the committee has been most considerate of every Senator on the committee, especially the Senator from Louisiana. I do not care to increase his burden at this point. I hope we will have the opportunity of looking at expensing again in conference. In any event, I believe this is the direction we must go sooner or later, and the sooner we make that decision, the better off we will be. I do appreciate the comments of the chairman of the committee and I look forward to a further occasion to look at this approach.

Rather than complicate the issue, Mr. President, I withdraw my amendment.

The amendment was withdrawn.

Mr. DOLE. Mr. President, as I under-

stand, we have two amendments that are ready to go. I promised the distinguished Senator from Connecticut.

Mr. DODD. Mr. President, the Senator from Pennsylvania will be here momentarily.

Mr. DOLE. Mr. President, I ask unanimous consent to temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

PENDING AMENDMENTS

Mr. DOLE. Mr. President, I say to Senator BYRD that we are about to take an amendment that we have been negotiating. This will take care of three or four names on the list. We hope to follow that with another amendment that will take care of three or four names on the list.

I appreciate the patience of the distinguished Senator from Connecticut in the past few days, because I know this is a matter of great importance and concern to him. I appreciate not only his patience but his leadership.

Mr. BAKER. Mr. President, will the Senator yield to me for a brief moment?

Mr. DODD. I am happy to yield.

Mr. BAKER. Mr. President, I hope that other Senators will follow the good example of Senators who have now consolidated their amendments and eliminated a number of amendments that now appear on the list. If we can continue to do that, there is a good chance we can finish these amendments in far less time than expected.

It is 6 p.m. now. What I would like to do is, at 8 o'clock, meet with the distinguished minority leader and see what progress we are making. If we are making enough progress, by following this example, perhaps we can shorten the estimate for the end of this session today. I should like to do that, but it depends on what progress we are making. We shall check a little later.

Mr. PERCY. Mr. President, on the tax straddle, on which we have 60 minutes for colloquy and 30 minutes for an amendment, it is my estimate that we can wrap that up in 30 minutes total and save an hour.

Mr. BAKER. Mr. President, I express my appreciation to the Senator from Illinois and point to that as an indication of what we can do if we want to.

UP AMENDMENT NO. 272

(Purpose: Relating to the application of section 189 of the Internal Revenue Code of 1954)

Mr. DODD. Mr. President, I sent an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. DODD) for himself and Mr. HEINZ, proposes an unprinted amendment numbered 272.

Mr. DODD. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle F of title II, insert the following new section:

SEC. . AMENDMENTS TO SECTION 189.

(a) TAXABLE YEARS BEGINNING BEFORE 1990.—Subsection (b) of section 189 (relating to amortization of amounts charged to capital account) is amended by striking out the table contained in such subsection and inserting in lieu thereof the following:

"If the amount is paid or accrued in a taxable year beginning in—		The percentage of such amount allowable for each amortization year shall be the following percentage of such amount
Nonresidential real property	Residential real property (other than low-income housing)	
1976		(See subsec. (f).
	1978	25.
1977	1979	20.
1978	1980	16⅔.
1979	1981	14⅔.
1980	1982	12½.
1981		11⅓.
After 1981		10.
	1983	12½.
	1984	16⅔.
	1985	25.
	1986	50.
	After 1986	100"

(b) EXCLUSION—Subsection (d) of section 189 is amended to read as follows:

"(d) EXCLUSION OF CERTAIN REAL PROPERTY.—This section shall not apply to construction period interest and taxes paid or accrued for, and with respect to—

"(1) any real property acquired, constructed, or carried if such property is not, and cannot reasonably be expected to be, held in a trade or business or in an activity conducted for profit, or

"(2) low-income housing."

(c) REPEAL OF SECTION 189 IN 1991.—

(1) IN GENERAL.—Section 189 is hereby repealed.

(2) CONFORMING AMENDMENT.—The table in sections for part VI of subchapter B of chapter 1 is amended by striking out the item relating to section 189.

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a) and (b) shall apply to amounts paid or accrued in taxable years beginning after December 31, 1981.

(2) REPEAL OF SECTION 189.—The amendments made by subsection (b) shall apply to taxable years beginning after December 31, 1990.

Mr. DODD. Mr. President, I ask unanimous consent that Senators CRANSTON, TSONGAS, WILLIAMS, JACKSON, RIEGLE, D'AMATO, and DURENBERGER be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I yield myself such time as I may consume.

Let me say at the outset that the distinguished Senator from Kansas has been gracious in talking about my patience. He has demonstrated even greater patience in dealing with a plethora of amendments to this bill. I know I speak for myself and, I am sure, the distinguished Senator from Pennsylvania, my principal cosponsor for this effort, when I say that we appreciate his patience and his willingness to put up with a matter that is of deep concern not only to both of us but to him as well. We are truly grateful for that willingness to work on something as important as this.

Mr. President, this amendment would phase out and eventually repeal the amortization requirements in current law for real property construction period interest and taxes. Unlike other legitimate business expenses, section 189 of the Internal Revenue Code prevents the deduction of these costs when incurred in connection with investments in real property. Instead, this section requires that these items be amortized over a 10-year period.

In cooperation with my distinguished colleague from Pennsylvania (Mr. HEINZ), we are proposing to repeal this provision beginning in 1982 for investments in connection with low-income residential rental housing and to phase out the applicability of this section with respect to other forms of residential real property by 1986. Section 189 would be repealed for investment in connection with all real property in 1990.

The eventual repeal of section 189 will contribute significantly to increased investments in real property and overcome the inequities which currently exist between the real estate and other industries which are not subject to this requirement. Section 189 has the effect of increasing capital needs and decreasing competition for these resources.

As I said, Mr. President, I appreciate the cooperation of the chairman of the Committee on Finance (Mr. DOLE) in coming to a compromise on this issue.

Mr. President, this action is essential if we are to begin to reverse the conditions contributing to a national housing shortage reaching crisis dimensions. The crisis is especially severe with respect to the availability of rental housing. Today, Americans who want to rent housing cannot find decent affordable housing opportunities. The vacancy rate for rental housing shows no signs of improving from the recent record low levels. For the first quarter of 1981, the national vacancy rate was barely above 5 percent. My area of the country, the northeastern region, had a vacancy rate during this past quarter of only 3.7 percent, hardly high enough to handle a minimal level of normal market turnover.

Demographic trends will increase the pressure on the already high demand for rental housing. As the baby boom generation comes of age, and individuals choose to live in smaller households, more and more people will need rental housing.

The problem is not confined to any one region or location. In cities across the Nation, Americans of low and moderate means are finding it impossible to obtain the housing they need. The vacancy rates are dangerously low: in Miami, below 1 percent; in Los Angeles, 1 percent; in Chicago, 2 percent; in New York City, below 3 percent. Boston, Seattle, and Atlanta have vacancy rates below 5 percent. Whether the location is a northeastern industrial center or a western boomtown, prospective renters are finding their mobility severely hampered by the rental housing shortage.

Production of rental housing has fallen off dramatically since the passage of the Tax Reform Act of 1976. In 1977, 203,000 unsubsidized rental units were started. In 1978, the figure dropped to 173,000; by 1979, it had fallen to 125,000, production collapsed in 1980; only 43,000 units

were started—a drop of over 75 percent in production in the space of only 4 years.

The supply of rental housing has been exacerbated further by the loss of existing units as the inventory ages and is not replaced. Anthony Downs in the "Future of Rental Housing in America" estimates that the gap between rental needs and production in the decade of the 1980's will range from 1.1 to 4.6 million units. The study "Housing Needs in the Eighties," published by ICF Inc., predicts a shortage of 3.5 million rental units over the course of the decade.

The crisis in the rental housing industry is real, and the outlook is not encouraging. A 1979 GAO report states that the rental housing market could be likened to "an endangered species." Dangerously low vacancy rates aggravate already inflationary rents, thereby threatening the ability of moderate- and low-income Americans to afford decent housing. An estimated one-half of all renters already pay over one-fourth of their incomes for housing. As rental housing moves out of the price range of middle America, more and more units will be converted to condominiums, thus further reducing the available supply of rental housing units.

While this amendment alone will not solve all the problems of renters and builders of rental housing units, I think it will significantly improve the climate for construction of units, spur productive investment and development in the industry, and help us fulfill the promise of a decent home for every American, rich or poor. Only such action can help us avert the housing crisis that plagues our Nation, and jeopardizes the well-being of our citizens.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. DODD. I yield.

Mr. HEINZ. Mr. President, I compliment the Senator from Connecticut for this excellent amendment. It is one on which he has labored long and hard. I know, because I have been present at some of his labors, not all, and they have been most productive.

We are deeply indebted to the chairman of the Finance Committee, Senator DOLE, for his work on this amendment and his understanding.

I ask unanimous consent that the name of the Senator from Kansas (Mr. DOLE) be added as a cosponsor of the amendment.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

Mr. HEINZ. Madam President, I wish to associate myself with the remarks of the Senator from Connecticut (Mr. DODD). He has clearly set forth the case for this amendment, which is that we have a crisis in rental housing in this country, and we need to do something about it.

This amendment addresses the double crisis of rental housing, low-vacancy and low-production rates, by providing a supplyside stimulus to residental real estate development.

To revive rental housing production—which declined from 185,000 starts in 1977 to fewer than 50,000 in 1980—our amendment repeals section 189 immediately for low-income residential rental property. This will lead to an immediate increase in rental housing production. For example, the forecasting and policy analysis division of the National Association of Realtors estimates that repeal of section 189 for low-income residential rental property would increase housing starts by 16,000 units in fiscal year 1982, and just under 19,000 units in fiscal year 1983.

Besides repealing section 189 immediately for low-income residential rental real property, this amendment phases out the 10-year amortization requirement for all other residential property. Instead, it requires amortization over 8 years in calendar 1983, 6 years in 1984, 4 years in 1985, 2 years in 1986, and expensing in 1987 and beyond. In addition, section 189 is repealed in its entirety in 1990.

Nobody can really argue with the equity of this proposal. When an investment is made in just about anything else, interest costs can be deducted immediately. Yet this is not the case with investments in rental housing or commercial structures. Therefore, our amendment will make it more financially attractive to start building residential housing once again by raising the reward for doing so.

Madam President, everybody is familiar with the fact that the price of housing in the last 4 or 5 years has shot right off the map, to the point where perhaps fewer than 10 percent of the people of this country can now afford that which they used to think of as part of the American way of life—their own home.

This amendment takes pressure off the single-family housing market by allowing people who are not yet ready to finance their own home to find rental housing. So we really strike two blows here. First, we help those who must rent by increasing the number of apartments. Second, we help them by keeping the price of owner-occupied housing lower than it otherwise would be, letting people acquire the means to buy their own homes.

Of course, containing the price explosion in residential real estate carries with it a budgetary advantage, too. Since housing costs weigh heavily in the CPI calculation, by lowering them, we lower the CPI and the cost of Federal programs indexed in the CPI. That helps close the deficit.

To sum up, Madam President, I believe that this amendment is a very good one. I salute all Senators who have been helpful in advancing it, particularly the Senator from Connecticut, who really has been in the forefront of this matter, and Senator DOLE, who has worked along with us and who is a cosponsor of the amendment.

I thank the Senator from Connecticut for yielding.

Mr. DODD. Madam President, I deeply appreciate the assistance of the distinguished Senator from Pennsylvania. He has worked tirelessly as well over the last 3 or 4 days to work out a compromise that will meet the needs of people who are suffering from inadequate housing in this country, and he has worked hard to try to achieve a compromise with the distinguished Senator from Kansas. This would not have been possible without the valiant efforts and assistance of the Senator from Pennsylvania, and I deeply appreciate it.

Madam President, I yield to the distinguished Senator from New York.

Mr. MOYNIHAN. I thank the Senator from Connecticut.

Madam President, I ask unanimous consent that my name be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Madam President, I congratulate the Senator from Connecticut and the chairman, who have made this possible. I affirm everything the Senator from Connecticut has said on this subject, so far as my own knowledge of it extends.

I particularly point out the condition of rental housing in the city of New York, where the vacancy rate is below 3 percent and, in fact, it is disappearing.

Not only the effects of the Revenue Act of 1976 and section 189 but also a combination of other things means that in the Nation's largest city, a city which historically has been a place of entry, a place of a great movement and churning of population, rental housing is disappearing, and this will be for the first time in three centuries. We will find ourselves in the city of New York in very much the condition Paris has been since 1920, for the past 60 years, with consequences.

You cease to be a center of commerce, of arts, of the creative functions in the world, when young people cannot come and when old people dare not move, when the sort of elemental fact of having a place to live is not possible. The society freezes. It becomes a society of key money, of landlords and tenants and a preoccupation with that which should be only an amenity and is, indeed, a necessity.

Much more is at issue than the tax costs and carrying costs of certain kinds of construction. What is at issue is whether cities become places young people can go to in order to establish themselves, or whether they become walled cities, walls of condominiums and cooperative apartments.

There is a large social purpose beyond this. The Senator knows it. That is why he so valiantly and successfully worked to bring it about, and I congratulate him for his role in this matter.

Mr. DODD. Madam President, I thank the Senator from New York for his compliments. I would be remiss if I did not point out that the distinguished Senator from New York (Mr. MOYNIHAN), over the years, has been forthright and courageous in talking about the plight of our urban centers, not merely because he represents the largest city in our Nation but also because of his deep commitment to the issue of adequate housing for people, regardless of where they live.

His voice and his support for this amendment is something that I deeply appreciate, and I am delighted that he has cosponsored this amendment.

Mr. MOYNIHAN. I thank the Senator.

Mr. DODD. Madam President, I yield the floor at this time.

Mr. DOLE. Madam President, let me again congratulate and commend the Senator from Connecticut (Mr. DODD) and the Senator from Pennsylvania (Mr. HEINZ), and others, who played a role in negotiating what I think is a pretty good amendment.

I think we all understand the present law and we all understand that there was a change made in 1976. We now have the present rule because of a number of real estate tax shelters that were springing up and because there were some abuses in the program.

This will give us an opportunity to take a look at the new provision as it is phased in.

The Senator from Kansas supports the amendment.

PRESENT LAW

Construction period interest and other charges must be added to a capital account and amortized over a period of up to 10 years. This provision was added to the Tax Code to close real estate tax shelters.

I commend the Senators from Connecticut and Pennsylvania for modifying their original proposal. The phaseout of the restrictions of section 189 will give us an opportunity to study the effects of this change on construction and the Tax Code. If abuse develops, we will have time to make corrections and perhaps review the effect of this provision and the exemption from the at-risk rules for real estate.

COMPROMISE

Low income—Present section 189 from applying, scheduled to begin in 1982.

Residential—Phase out section 189 beginning in 1983 over 5 years.

Commercial—Section 189 repealed at the end of 1990.

I know of no other speakers on this side. I am prepared to accept the amendment.

I know the distinguished Senator from Louisiana is prepared to accept the amendment.

Mr. MOYNIHAN. The distinguished Senator from Louisiana is more than willing to accept the amendment, and we yield back all time on this side.

Mr. DOLE. I yield back our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Connecticut.

The amendment (UP No. 272) was agreed to.

Mr. MOYNIHAN. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Madam President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 273

(Purpose: Providing transition rules for the tax straddles provisions)

Mr. MOYNIHAN. Madam President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 273.

Mr. MOYNIHAN. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 284, after line 4, insert the following:

SEC. 509. ELECTION FOR EXTENSION OF TIME FOR PAYMENT AND APPLICATION OF SECTION 1256 FOR THE TAXABLE YEAR INCLUDING JUNE 23, 1981.

(a) ELECTION—

(1) IN GENERAL.—In the case of any taxable year beginning before June 23, 1981, and ending after June 22, 1981, the taxpayer may elect, in lieu of any election under section 508(c), to have this section apply to all regulated futures contracts held during such taxable year.

(2) APPLICATION OF SECTION 1256.—If a taxpayer elects to have the provisions of this section apply to the taxable year described in paragraph (1).—

(A) the provisions of section 1256 of the Internal Revenue Code of 1954 (other than section 1256(e)(2)(C)) shall apply to regulated futures contracts held by the taxpayer at any time during such taxable year, and

(B) for purposes of determining the rate of tax applicable to gains and losses from regulated futures contracts held at any time during such year, such gains and losses shall be treated as gain or loss from a sale or exchange occurring in a taxable year beginning in 1982.

(3) DETERMINATION OF DEFERRED TAX LIABILITY.—If the taxpayer makes an election under this subsection.—

(A) the taxpayer may pay part or all of the tax for such year in two or more (but not exceeding five) equal installments;

(B) the maximum amount of tax which may be paid in installments under this section shall be the excess of—

(i) the tax for such year, determined by taking into account paragraph 2, over

(ii) the tax for such year, determined by taking into account paragraph (2), and by treating all regulated futures contracts which were held by the taxpayer on the first day of the taxable year described in paragraph (1), and which were acquired before the first day of such taxable year, as having been acquired for a purchase price equal to their fair market value on the last business day of the preceding taxable year.

(4) DATE FOR PAYMENT OF INSTALLMENT.—

(A) If an election is made under this subsection, the first installment under subsection (a)(3)(A) shall be paid on or before the due date for filing the return for the taxable year described in paragraph (1) and each succeeding installment shall be paid on or before the date which is one year after the date prescribed herein for payment of the preceding installment.

(B) If a bankruptcy case or insolvency proceeding involving the taxpayer is commenced before the final installment is paid, the total amount of any unpaid installments shall be treated as due and payable on the day preceding the day on which such case or proceeding is commenced.

(b) FORM OF ELECTION.—An election under this section shall be made not later than the time for filing the return for the taxable year described in subsection (a)(1) and shall be made in the manner and form required by regulations prescribed by the Secretary. The election shall set forth—

(A) the amount determined under subsection (a)(3)(B) and the number of installments elected by the taxpayer,

(B) each regulated futures contract held by the taxpayer on the first day of the taxable year described in subsection (a)(1), and the date such contract was acquired,

(C) the fair market value on the last business day of such taxable year for each regulated futures contract described in subparagraph (B), and

(D) such other information for purposes of carrying out the provisions of this section as may be required by such regulations.

Mr. MOYNIHAN. Madam President, this is an amendment prepared by the Finance Committee and modified by a group of Senators, a number of our distinguished colleagues in the Chamber today, the distinguished Senator from Illinois (Mr. PERCY), the junior Senator from Illinois (Mr. DIXON), the Senator from Idaho, the distinguished member of the Finance Committee (Mr. SYMMS).

It has to do with the transition rules that will govern the law that will put an end to commodity tax straddles as they are known.

This is an important provision of our joint resolution. It will gain for the Treasury some $1.3 billion in revenue the first year, as we understand, and will put an end to a practice which was spreading at an alarming rate which in the words of one New York tax attorney "threatens to zero out the revenue system."

Madam President, there are a number of measures. The one that we send on behalf of the committee has to do with the amount of time that taxpayers would have in the terminology of this practice, the argot, if they have rolled income into 1981 and are not able to do that again into 1982.

There are persons who sometimes legitimately have rolled income from one year to another for long periods of time and who have large amounts of income accumulated liable to tax.

All of a sudden the tax code will not make it possible to roll into another year and large amounts of tax would be owing. Many of these persons will for one reason or another find that burden too great to pay at once. We, having no desire to be punitive with respect to anyone who has been abiding by the laws as they have been, propose that for any liabilities from this commodities straddle sequence, the tax be declared in 1981, and then the taxpayer will be given 5 years in 20 percent units, if he or she so chooses, to pay that tax.

There will be interest due at the regular IRS rate on delinquent taxes. These are not delinquent taxes, however. These are taxes that have been formally declared and the law will provide a 5-year period if the taxpayer so chooses for which to pay.

This we think will be a just treatment. It is a reasonable treatment, and it seems to meet the concerns of persons who are involved here.

Madam President, there is another question having to do with whether the taxpayer can elect to have the new rules applied to his entire 1981 tax year. We wish to make the point that the amendment would allow such an election.

Then there is a third matter which

has to do with the question of what will be the rate for 1981, the top rate. That has not been established. The committee bill says that 60 percent of one's income is taxed as long-term and 40 percent as short-term capital gain. That produces a 32-percent rate for 1982.

The modification offered makes that rate available for 1981 as well.

We first of all agree that the taxpayer can have the new rules apply for his entire 1981 tax year. The question is whether the lower tax rate will apply if he chooses, and I understand the modification offered is to have the lower rate apply if the taxpayer so elects.

Mr. PERCY. Madam President, according to my understanding that is correct. I would first like to express my appreciation to Senator MOYNIHAN for the understanding that he has shown for the problem. He recognizes that all of us are attempting to accomplish the same thing with this amendment; namely, to make this the best possible bill. We also share an interest in removing the possibility that nontraders can take advantage of the markets. It would be scandalous if nontraders were to continue to avoid paying taxes by using this as a tax-avoidance mechanism.

We all understand the fundamental nature of the commodities market. My distinguished colleague, Senator ALAN DIXON, with whom I have worked closely on this matter, thoroughly is conversant with the markets. He understands agriculture; he understands the impossibility of marketing without a futures market.

Mr. MOYNIHAN. Yes.

Mr. PERCY. If we did not have futures markets we would have to invent them tomorrow; otherwise, there would be utter chaos in the farm commodity market. We are certainly very dependent on it in Illinois and we are very grateful indeed for the understanding that Senator SYMMS of Idaho has shown for this matter. We are joined by other Senators, the chairman of the Agriculture Committee, Senator HELMS, Senator TOWER, Senator HAYAKAWA, Senator JEPSEN, the ranking Democrat on the Agriculture Committee, Senator HUDDLESTON, Senator D'AMATO, and Senator BURDICK, expressing their concern.

Madam President, as I stated previously, I am fully supportive of the committee's intention to close a loophole in the law that allows nonprofessionals from abusing the commodity markets. Board of Trade President Robert Wilmouth has voiced a similar support for ending abuses.

My concern is that title 5 strays from the original intent of this legislation.

Earlier this year the Senate considered this issue in a different context. Senator METZENBAUM offered an amendment to the budget that would have required the Finance Committee to end tax shelter items as part of its reconciliation package.

During debate on this amendment, the Senator from New York, Senator MOYNIHAN, said that:

> The commodities tax straddle is a very simple device for putting off paying taxes for an extended period of time or reducing income from the regular income tax rates to capital gains tax rates.
>
> It has been carried out by people who are not in the commodities market for any economic purpose of any kind. They are there very solely for the purpose of avoiding taxes or minimizing taxes, and they are doing this with the help of elaborate arrangements that professionals in this field have developed . . . The tax straddle serves no economic purpose. It has no redeeming social value.

Senator MOYNIHAN also noted that:

> I am not suggesting anything illegal has taken place, but the presumption is that these taxes are owed and should be paid.

I know from our extended conversations that my good colleague from New York is aware of the distinction between the tax straddle and the commodity straddle.

The commodity straddle, as I have pointed out in my remarks yesterday, and as Senator DIXON and Senator SYMMS have frequently pointed out, is a legitimate economic trading device. It is not at all what Senator MOYNIHAN has been talking about. It does perform a valuable function. It is just as valuable in the commodity field as the bond and stock markets are in their respective fields. It does serve an economic purpose when it is used by commodity traders in their normal line of business. Let me reiterate the types of individuals Senator MOYNIHAN said he was interested in closing the loophole on: "People not in the commodities market for any economic purpose of any kind. They are there solely for the purpose of avoiding taxes and minimizing taxes * * *."

With that we agree completely. But if the committee bill stands as now written, without modification that the distinguished Senator sent to the desk, it would literally force these accumulated taxes to be suddenly due and payable in 1981. In order to pay those taxes it would bankrupt many brokers. It would force liquidation of existing businesses that have conducted business on the basis that, in their legitimate and legal function, they would not have those taxes due and payable in 1981.

Now, as the distinguished Senator knows, we started out with "well, all right, we will recognize that, and it was laid down that a 3-year transition rule would be permitted." All of the sponsors of the amendment—which I discussed on the floor last night—felt that 10 years would be a more reasonable period of time.

However, in order to have comity, in order to move along on this, and in order to have an understanding with the committee on this, we have now discussed and feel that the 5-year period, taking everything into account, is acceptable. Under this amendment, tax liability would be fixed in 1981. In each of the next 5 years, 20 percent of the amount would be paid. Taxpayers would be subject to the regular IRS interest cost which at the present time is approximately 12 percent.

Mr. MOYNIHAN. That is correct.

Mr. PERCY. This is not a burden that cannot be borne. It is a change; it is a change in the rules of the game, in functions legitimately carried on. But in order to move ahead we will accept this compromise.

In forging this compromise, we have taken into account my extended discussion the night before last with Alan Greenspan, and the statement he made on this. I put this statement in the RECORD yesterday so that Senators could read it today. He is extraordinarily concerned that we not move precipitously in this area; that we move in a way taking into account the sensitivity of commodity markets; that we move in such a way as to give time, provide a transition period, and then hold hearings in depth that will really accommodate this point sometime in the future, so that we have a thorough understanding of it.

He feels we should not in any way imply we are going to move in an adverse way to destroy one of the most valuable functions performed today in the business world, the futures commodity trading function. It is absolutely essential to the position not only of agriculture but many of our minerals, lumber, and even Government securities.

So I express my appreciation to my distinguished colleague. With the assistance of the majority leader and the manager of the bill, we did reserve last night 60 minutes so that my distinguished colleagues would have adequate time to speak on this issue. A half an hour ago we notified all those Senators who have an interest that we would be taking up at this particular time this matter. I am very pleased indeed, to say that I do not think we will need anywhere near that time now.

I would yield back my time. I thank my distinguished colleague for yielding to me, and I would appreciate his yielding to my distinguished colleagues who are on the floor so that they might also express their very strong feelings about this important issue.

I express my deep appreciation to them for their cooperation, support, and leadership they have taken on this particular matter.

Mr. MOYNIHAN. Madam President, before turning to our distinguished colleague I would like to thank the learned and gracious chairman of the Committee on Foreign Relations for his remarks, to affirm precisely his point that commodity futures trading which involves straddles and hedging is an altogether necessary economic function. It brings order and predictability to the market for producers and consumers.

An alternative arrangement was once tried in the 1850's in Illinois where a person found guilty of trading an agricultural future got 6 months in the Cook County slammer. Such was the farmers' mistrust of the process.

Well, we have come a long way, and we have learned that to the contrary it is in the very deep interest of farmers, of miners, of millers, of consumers, that prices for commodities be stable.

The commodity exchanges do this. Floor traders do it with wear and tear on their voices that I can certainly not sustain. The exchanges are altogether desirable, valuable, and indispensable institutions.

Mr. PERCY. Madam President, will the distinguished Senator yield so I can make a comment to Senator DOLE? With 92 pending amendments you would almost think it impossible to know everything about those amendments, especially when you have a bill of this magnitude.

I may not have an opportunity in the future, but I would like to simply say that I am filled with admiration for the way this bill has been handled. I am very grateful for the comity shown by the committee, not only for the consideration the chairman has always given to his fellow committee members, but also for the consideration he has given to the Members of the Senate who are not on the Finance Committee. He has been willing to spend the time, energy, and thought to talk to the people involved in trading those commodity futures in order to determine what we must plug up as unwarranted loopholes.

We express deep appreciation to him for his leadership and guidance and congratulate him for what I consider to be an absolutely outstanding bill when we come to third reading at 3 p.m. on Wednesday next.

Mr. MOYNIHAN. Madam President, I see the Senator from Illinois has risen.

Mr. DIXON. Madam President, may I express my personal appreciation to my friend, the distinguished senior Senator from New York, for the accommodation of many of us who were concerned about this so-called transitional amendment.

I want to thank the distinguished chairman of the Finance Committee, the manager of the bill on the floor, who has been most accommodating. I know I speak for my dear friend and colleague, the senior Senator from Illinois, and my friend, the Senator from Idaho, Senator SYMMS, the ranking member of the Committee on Agriculture, Senator HUDDLESTON, on this side, Senator BURDICK from North Dakota, and others who are interested in what I say, that we appreciate the modifications accepted in this transitional amendment which help address the concerns we all have that are raised by title V in this bill.

I do want to make it very clear, as I have on so many occasions to the Senator from New York, the Senator from Kansas, and others, that title V is certainly not acceptable to us.

We stongly feel that the provisions adopted in the bill in the House Ways and Means Committee are by far the more acceptable measure if something is necessary.

I understand the case to be—and this is something I would like to address in the form of a question to the senior Senator from New York—that we are going to move ahead and adopt this transitional amendment and there will be time remaining for the senior Senator from Illinois, the Senator from Idaho, and myself to make some brief remarks in a colloquy concerning this subject matter.

Mr. MOYNIHAN. The Senator is entirely correct. That is so ordered.

Mr. DIXON. I want to express my appreciation once again and reserve that time later in the allotted time for the colloquy to make my further views known about title V. I thank the Senator for his courtesy over a period of many days in giving us this opportunity to adopt a transitional amendment to title V of the bill.

Mr. MOYNIHAN. The Senator is most generous. I thank him for his remarks.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Madam President, my understanding was that we would go ahead and pass the amendment and the Senator from Idaho would want to have an exchange with the Senators from Illinois.

But I also would commend the Senator from New York and others who helped work out this amendment.

I would make only two comments. First, I want to confirm that this Senator does not believe that the only abuse is the use of commodities markets by outsiders to pay no taxes. I regard it as an abuse for any American to earn $1,000,000 and pay no taxes. My distinguished colleagues from Illinois wish to finesse this point. But the issue is simple: Can any American earn a high income and pay no taxes? This Senator believes that any American earning $1 million must pay taxes. The Senate bill, unlike the House bill, prevents possible abuse in this area.

The second point I make is that the averaging provision of the amendment is indeed novel. This Senator cannot recall another occasion in which, on closing a tax loophole, we provided a new income averaging rule for those who were avoiding tax. I might note, finally, that this transition rule will apply to all commodities gains on exchanges, not only to the traders.

I just believe, as I say in my statement, that if you are out there making a million dollars, I do not care if you are a trader or not a trader, you ought to pay some taxes. It just seems to me that is what we are going to try to make certain happens. It has been a difficult job. I know some of the people involved are very distressed with those of us who found it necessary, at least as we perceived the problem, to take some action. Others would have waited until next year, or others would not have done anything. Others would exempt certain groups.

But I think, in the final analysis, the committee acted responsibly with the direct and total assistance from the senior Senator from New York.

I do support the amendment. I am pleased that other Senators who have an interest in this matter, members of the committee, and those not on the committee, believe that we have reached an agreement that might be somewhat satisfactory.

Mr. MOYNIHAN. Madam President, may I ask the distinguished Senator from Idaho, would he be prepared to have the measure adopted and then the colloquy commence?

Mr. SYMMS. I prefer to do it that way. I would just like to voice my support for the amendment and thank the Senator and the chairman of the committee for sponsoring and supporting this amendment. I suggest we pass the amendment and have our colloquy.

Mr. MOYNIHAN. The Senator is most gracious.

Madam President, I yield back all time on this side.

Mr. DOLE. Madam President, I yield back all time on this side.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New York (Mr. MOYNIHAN).

The amendment (UP No. 273) was agreed to.

Mr. MOYNIHAN. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Madam President, I ask that we lay aside the pending amendment so that the Senators may engage in a colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Madam President, I did speak last night on this amendment. I would like to yield the majority of the time to other Members with whom we have worked so closely.

I would like to say, however, that the committee may have overlooked the impact this legislation will have on forward contracts.

I ask unanimous consent that an explanation of forward contracts be printed in the RECORD.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

A bank forward contract is a contract to purchase or sell a specific quantity of a foreign currency at future date for a specified price.

It is like a regulated futures contract traded on an organized exchange.

Both are contracts for the purchase or sale of a specific quantity of a foreign currency, such as pounds-sterling or Swiss francs, at a future date at a specified price. By their terms, both contracts call for delivery of the foreign currency, but in practice they are commonly closed out by offsetting contracts. However, bank contracts are traded through banks, acting as dealers. Futures are traded on exchanges.

Futures contracts are regulated by exchanges and the Commodity Futures Trading Commission. These contracts require the deposit of margin and appreciation or depreciation in the contracts results in decreases or increases in margin accounts.

Forward contracts are made with any of a number of commercial banks which, while not a part of a regulated exchange, comprise a centuries-old, highly liquid market. Last year this market traded contracts wih a total value of $70 trillion. Brokerage firms which trade in the interbank market for the customers speculating in foreign currencies establish lines of credit with banks against which forward contract positions are debited or credited.

It is common for firms to shop both ex-

changes and the interbank market to achieve the best price.

Corporations and banks use the market to hedge currency risks. Governments use the market to stabilize their currency, and speculators provide risk capital hoping to profit from changes in the values of currencies.

As in other futures markets, speculators' risk capital provides liquidity. They assume the risks that corporations, governments and other hedgers wish to avoid. The market could not exist without speculative capital.

Under the Finance Committee bill, regulated futures contracts would be taxed under the so-called mark-to-market approach at the rate of 32 percent without regard to the period the position was held. At the end of the year, a taxpayer would determine his gains and losses in open positions by valuing them at market. Any unrealized gain would be added to net gains from closed positions and taxed.

Forward contracts would be taxed when gains and losses are realized and gain or loss would be long- or short-term depending upon the holding period. Typically, gains will be short-term and taxed at the rates up to 50 percent for individuals and 46 percent for corporations. Losses from straddle transactions would be disallowed.

Valuation would be based upon quotations of prices for the particular currency for the particular delivery date. These quotations are available from commercial banks and many of them are published each day in the Wall Street Journal and other financial publications. For example, if on July 17 one had a contract to purchase the pound-sterling for delivery in six months, the Wall Street Journal reported that on July 17, 1981, the value of the pound six months in the future was $1.9235.

The essential terms of these contracts are the same as those traded on regulated exchanges: The purchase or sale of a specific quantity of currency on a specified date in the future for a price in U.S. dollars. Because the interbank market is much larger than the exchange which trades foreign currency contracts, investors may acquire positions for a greater number of delivery dates in the interbank market than on the International Monetary Market.

Within the limitations imposed by the relative sizes of these two markets, money can flow freely from one market to another and differences in prices are largely eliminated by arbitrageurs.

Mr. PERCY. Madam President, Senator HAYAKAWA is in California and is necessarily absent from the Senate. He has asked me to present on his behalf a statement on the commodity straddles. I submit the statement for the RECORD.

The statement follows:

● Mr. HAYAKAWA. Madam President, I join with my colleagues from Illinois, Idaho, North Carolina, Texas, Iowa, and others to express my concern that a provision in this tax bill will have a devastating effect on the stability of the Nation's agricultural industry. As a Senator from the largest agricultural producing State in this country, and a member of the Committee on Agriculture, I am surprised and distressed that the Finance Committee has included a provision which has the effect of taxing unrealized gains in the name of closing a tax loophole.

Madam President, I do not believe that a commodity straddle is a tax loophole; it is a means of hedging in a market which provides stability for the agricultural industry. Holders of commodity straddles, or spread traders, are motivated by economic considerations rather than tax advantages, and provide a vital function to futures markets.

Spread traders provide nearly all of the market liquidity for the months farther from delivery months. Because these speculators trade in distant months the market is considerably more stable—the greater the number of competing bids and offers the narrower the price range of trading. Were spread traders forced out of the market, as the committee provision would do, there would be higher prices to consumers and lower prices to producers created by a volatile market.

I am not saying that there is no abuse of this mechanism. There are no doubt, examples of individuals carrying huge incomes over into future taxable years, and covering them with current losses. The answer to these abuses is not taxing all spread trading out of existence by taxing unrealized gains—a very dangerous precedent; the answer is attacking the problem.

Instead of crippling all spread trading, perhaps we ought to change the tax procedures to reflect the differences between a spread and a tax loophole. One such method is allowing losses from straddles to be offset only against commodity related income and prohibiting spreads from being used to convert unrelated income into long-term capital gains.

This method will, I believe, solve the problem of abuse in the market without driving all the capital generated by straddles out of the market. However, if the committee provision is accepted, those currently providing a stabilizing effect to the commodity market will devote their capital elsewhere; and when that happens there will be no tax revenue increase. because former traders will find tax shelters in other markets. So the Treasury will reap no increase in revenue, but the futures markets will lose a vital stabilizing element. Therefore, I urge my colleagues to oppose the commodity straddle provision in the tax bill, and adopt a more reasonable solution.●

● Mr. HUDDLESTON. Madam President, I wish to express my concern about the treatment of commodity futures transactions in the Finance Committee bill.

Futures markets are an essential part of our food chain. They are used by seed producers, farmers, grain merchandisers and food processors. These markets serve two functions that are necessary to the orderly functioning of our food and agriculture sector—price discovery and hedging.

Producers can tell the approximate worth of their crop at any given moment by checking the price at the futures exchange as listed in the daily newspaper. This helps the farmer plan his marketing far into the future. Without access to a viable futures market, the price of grain a few months hence would simply be a guessing game between the seller and the buyer.

The second primary function of a futures market is hedging. Commodity ownership carries with it the inherent risk of adverse price changes. The practice of hedging allows merchants and processors to transfer this risk to speculators who are willing to assume it. This promotes efficient management and frees up capital that would otherwise be tied up in risky positions in actual commodities.

The presence of the speculator is essential to the hedging process. Speculators provide liquidity to the market and keep it functioning smoothly. When a grain merchandiser wishes to hedge his export sale, he moves quickly to place his buy order in the market. He is depending on a speculator being there to accept the other side of his contract. Any delay in executing the order leaves the merchandiser vulnerable to adverse price changes.

Speculators may hold outright long or short positions or hold spread positions. When a person enters a spread they are long one contract and short another. While there are several types of spread positions, all are speculating on the price range or spread between different contracts. It is not a riskless venture. Spreaders or straddlers are vulnerable to changes in interest rates and storage costs. I do not think I need to remind you of the volatility of interest rates in the past year.

Madam President, I am worried that title V of the Finance Committee bill will damage the liquidity of the futures markets. I have yet to see any proof that there will be no harm done to these markets as a result of this measure.

The "mark-to-market" rules are a radical departure from current methods of taxation. No other market is subject to taxes on its unrealized profits. Yet that is what we are proposing to do today. At the end of each year, market participants will pay taxes on all profits whether realized or not. As we all know, what was a profit on December 31 can easily be a loss on January 1 in commodity markets.

Contrary to popular belief, Madam President, this proposed rule does not apply only to spread transactions, but to all market transactions. I cannot believe that will not harm the market volume in the future.

Another detrimental factor in the proposed rule is the 32-percent tax rate. In another action, the Finance Committee has lowered the long-term capital gains rate to 20 percent. Commodity speculation is a risky business at best. This 12 percent differential will cause speculative capital to flee the futures market in search of a more favorable tax rate.

I am not in favor of continuing a tax haven for the rich in the commodity markets. However, I am afraid we may have moved too far and too fast in our eagerness to close this tax loophole. We need to consider the ramifications of our actions. Although I may support this bill, I urge the Finance Committee conferees to look closely at the measure adopted by the Ways and Means Committee. This approach seems to have less onerous consequences for the commodity markets. I am afraid we may find ourselves back on this floor next year trying to solve a problem that we ourselves have created. We should think twice before we allow this to happen.●

Mr. PERCY. Madam President, I am

happy to yield to my distinguished colleague from Idaho.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SYMMS. I thank the distinguished Senator from Illinois.

Madam President, on the subject of the commodity straddles, section 5 of the Senate Finance Committee bill, I wish to join with my colleague, the Senator from Illinois, Senator PERCY, and others who have voiced some concern about this issue.

In the Finance Committee markup of this section, I was amazed at the apparent lack of knowledge or experience that some of the supposed Government commodity experts had while recommending major tax law changes that significantly impact on a very vital and crucial industry. Our supposed experts could not identify the differences between straddles, hedges, or butterflies. Yet, they were proposing changes that will have major repercussions on the timber, mining, and agricultural industries—industries who rely on stable price discovery mechanisms in the futures market and who use the futures market to spread the risk.

The futures market is in the business of providing risk management capabilities to farmers, to mineral producers, and to timber producers. I am very concerned and actually opposed to this particular section of the bill.

My State's economy is dependent on the extraction industries—agriculture, mining, and timber. These products are all linked directly and traded in the commodity markets.

The principal economic purpose of the futures market is to provide a place for a producer or commercial user to transfer risk to someone else. It allows the farmer or the grain elevator to sell to someone else. It allows the farmer or the grain elevator to sell his grain at a definite price before the crop is ready for delivery to market, and at the same time, allows the miller or the processor to purchase today their futures needs at a certain price.

A secondary purpose of the market is to provide pricing information for commodities at a future point in time. Both of these functions are very important to the production, processing, marketing, and distribution of agricultural, as well as many other commodities.

It is true that the present tax law treatment of commodity futures has made it possible for taxpayers who have gains from real estate, securities and other capital assets unrelated to commodities, to use the futures market to defer the tax on these unrelated gains into future years and, in some cases, to convert short-term gains from these unrelated gains into long-term gains. It should also be pointed out that the present law treats Treasury bills and certain other Government obligations as ordinary assets rather than capital assets. This has made it possible for a taxpayer to shelter ordinary income, such as wages, if the price of the bill goes down and to defer the corresponding gain from the futures contract to the subsequent year.

I am not in any way opposed to changes in the tax law which would prohibit the use of the futures market as a tax shelter for gains from income which are unrelated to commodity transactions.

I commend the chairman of the Finance Committee, the distinguished Senator from New York, and others for their attempt at closing a tax loophole.

However, it is very clear that the intention of the tax straddle legislation that is incorporated in the Senate Finance Committee's tax bill is not to simply close the loophole in the present tax law, but to change the tax treatment of all transactions in the futures industry. Ironically, the language in the Senate Finance Committee's tax bill still does not entirely close the tax straddle loophole, but it does seriously impair the ability of our Nation's commodities markets to function.

The Senate Finance Committee's tax bill has taken what is popularly known as the "mark-to-market" approach in attempting to solve this issue. This approach constitutes a tax on unrealized gains. With a few minor exceptions, this is a concept which—for very good reasons—has never been followed in the Tax Code. From the standpoint of sound tax policy, there would seem to be innumerable reasons for rejecting it.

If unrealized gains in the futures industry are to be taxed, why not do the same in the securities industry? Or on a house? Or on appreciation in any other investment? Any of these would provide a windfall to the Treasury, but with tremendous consequences to the functioning of the American economy. For those who state that taxing the equity in a home is not probable, they need simply to examine the Carter administration's fiscal year 1981 budget recommendations very clearly proposes that concept.

The mark-to-market concept will, in my opinion, inevitably distort the Nation's futures markets. Futures markets now constitute the major risk management mechanism available to U.S. farmers, businessmen, and financial institutions.

Senator PERCY, mentioned that the distinguished economist, Alan Greenspan stated that the Senate Finance Committee position might increase the cost of financing the Federal debt by $2 billion—$3 billion due to market distortions caused by illiquidity in the Government securities markets. Since the Treasury is supposed to gain approximately $1.3 billion in trying to close the loophole, the Treasury might very well stand to lose more than it has gained. This is a classic case of overkill—of throwing the baby out with the bath water—while trying to solve a problem.

Annual volume turnover is literally in the trillions of dollars. The distortion in the mark-to-market concept is inherent in of itself. The concept imposes a Federal tax liability based on one's open positions in the futures market as of December 31 each year. That means that tax considerations are likely to overwhelm basic supply-demand fundamentals in the final weeks and days of each calendar year as taxpayers are saddled with the enormous risk of having open positions on which their tax liability has already been determined. This will cause many individuals and institutions to liquidate those positions because of the inordinate risk involved, and because of the cash flow problems that result from having to pay taxes on a still unrealized gain.

I can site, Madam President, a good example: If an investor purchased silver contracts at $15 an ounce in 1979 and those contracts closed at $30 an ounce on December 31, 1979, and by March 16, 1980, those contracts were priced at $10 an ounce, that taxpayer would be liable for the taxes in the difference between $15 an ounce and $30 an ounce where it closed on December 31, 1979, even though the investor had actually lost money on his contracts by March 1980.

The mark-to-market concept will distort the agriculture markets, the metal markets, the timber markets because everybody will naturally start thinking, "I have a profit in this position and maybe I better close out my position on December 31 because I cannot afford to have that position go against me on January 1."

We are implementing a system that will cause distortions in the markets and cause a great deal of problems in the last 2 weeks of the year, doing damage to the farmers, the lumberjacks, the timber producers, the miners, and the metal producers who use those markets.

For instance, if a real estate developer, that is in a limited partnership, decides to build a building in the next calendar year, he will go to the bank to secure a loan. The bank will agree to lend a prime plus 2 percent in most cases. Since the developer does not know that the prime rate will not be higher next year, he is forced to go into the futures market to protect his loan at today's interest rate. Under the Senate Finance Committee proposal, that real estate developer will have to pay a tax on his open positions in the commodities markets, which are still unrealized, and he will still not have obtained the loan or even started building the building.

Futures markets provide an inexpensive means by which farmers, businessmen, and financial institutions can shift some of the price risk inherent in the businesses to other individuals or firms willing to bear such risk. In agriculture, for example, firms throughout the entire marketing chain use futures markets for hedging price risks. The ability to reduce risks by hedging in liquid markets enables marketing margins to be small, which results in higher producer prices and lower consumer prices. I predict that if the Senate Finance Committee proposal is enacted into law, without a major change in conference. The liquidity in the futures markets will decline significantly and producers will receive much lower prices and consumers will be paying much higher prices because we will be distorting the finest market system that any nation has ever developed in the world to market agricultural and other commodities.

The Senate Finance Committee approach on this issue will greatly increase

79-059 O - 85 - 22 (Vol. 127) Pt. 13

the costs of trading in futures markets and will reduce the flow of speculative and investment capital into the process of determining efficient prices.

Farmers call it price discovery. We know what the price of our commodity is on whatever given day at any given time. The only efficient price discovery mechanism is a very liquid market where there are a significant number of traders. The market-to-market concept will reduce the number of trades in the futures industry and create market distortion. This proposal does not adequately address the issue of eliminating the exploitation of futures markets for tax shelters purposes, but seriously jeopardizes the legitimate economic function of futures markets.

Furthermore, I would like to mention that there have not been any economic impact studies completed on this proposal. There have been a lot of overnight experts working on this issue, very diligently I might add, but many of the people who actually wrote the language have never traded a commodity and basically did not know how the markets functioned until several weeks ago.

The Senate Finance Committee proposal will have a devastating impact on the use of the futures markets as a risk transfer mechanism for the commercial world.

For the RECORD, I shall submit a summary of futures markets techniques, as well as an analysis of the sources which give rise to market liquidity.

I ask unanimous consent to have printed in the RECORD at this point an article from the July 20, 1981, issue of Barron's editorial commentary entitled "Bad Speculation, Proposal To Tax Commodity Straddles Is Fraught With Risk."

I also ask unanimous consent to have printed in the RECORD 12 letters so that our colleagues will have an opportunity to adequately study this issue.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PROPOSAL TO TAX COMMODITY STRADDLES IS FRAUGHT WITH RISK

To the layman, the subject of taxes on commodity straddles beckons like a dark alley. Just the thing to know nothing about, the sensible man might say. Exactly the thing to be left to the experts. Perhaps, but in the past few weeks that dusty subject has captured the imagination of the Fourth Estate. Even as the House and Senate made ready to vote on such portentous fiscal matters as indexed marginal brackets and the All Savers' Certificate, stories kept surfacing about commodity straddles and taxes. In an investigative vein, for example, The Wall Street Journal disclosed from Washington that lobbyists for commodity speculators had been seen aboard yachts as well as on dry land in the act of buttonholing legislators. Dispatches have traced the progress of alternate bills, in the House Ways and Means Committee and the Senate Finance Committee, that would close the straddle "loophole." Then, on Wednesday, a coincidence: The New York Times and Washington Post, in separate editorials, endorsed the Senate bill, which is the Administration's. Even casual observers began to gather that (a) Donald T. Regan, the Treasury Secretary and former chief of Merrill Lynch, believes that "2,500 wealthy commodity speculators" are getting away with something; (b) the Administration means to do something drastic about it; because (c) the cost in forgone revenues runs (by the government's estimate) to $1.3 billion a year.

Yet one small detail largely escaped comment if the Administration gets its way, commodity positions would be marked to market value at the end of each year and taxed on the basis of profits, whether realized or not. Speculators, that is, would be taxed on paper profits.

The best place to start this peculiar story is at the beginning. A commodity straddle, or spread, is a trading technique. It is invidiously defined as a "tax gimmick." By the same token, a fork might be defined as a "bean spear." Some people spear beans with forks; some speculators use spreads, or straddles (the terms are synonymous) to defer taxes. The definition is wrong because it is incomplete. A spread is a technique that involves the purchase of one futures contract and the sale of another. The second contract, the one (in this example) that is sold, may be in a different commodity. For example, a man might buy beans and sell silver. Or, the second contract might be in the same commodity but in a different delivery month. Thus, a speculator might buy October gold and sell December gold.

Spreads have many uses. The first is to reduce risk. It is obviously safer to stake out a long position in beans if one were also short a bit of them (or some wheat or corn). A second use is to profit by an expected change in price relationships, for example, between bills and bonds or between beans and silver. A third reason to put on spreads is to put off taxes, which is the cause of the row in Washington and all that ink in the papers.

Anyone with income to shelter can set up a commodity spread on which a profit (it is hoped) will be largely offset by a loss. He, or she, can buy gold futures for delivery in one contract month and simultaneously sell in another contract month. The chances are that, no matter which way gold goes, one "leg" of the spread will show a profit and the other leg a loss. The tax angle is to realize the loss but to postpone the gain. If the gold price rises, the short leg yields the loss. Thus the short sale is closed out and the long leg is protected with another spread. The profit isn't realized until the following year, or perhaps the year after that. Perpetual postponement is unlikely, however, because market risk tends to outweigh the benefit of tax postponement. The idea is to push a gain forward until it becomes a long-term gain, then to sell and pay taxes at the reduced rate.

All of which has elicited considerable indignation and one exceptionally bad piece of legislation. The bill (by number, S. 626) would close the straddle loophole by requiring that speculators mark their positions to market at the end of the year. Real and paper profits alike would be taxed at a rate of 32 percent or so (income would also be offset by past losses). This way, say proponents, profits would be captured in the year in which they were earned.

Obviously nothing of the kind has been done before. In no market are paper gains subject to tax. A precedent to the contrary would open vast possibilities for mischief in financial markets and real estate. If unrealized gain in gold contracts and T-bond futures are to be taxed, then why not in bullion and bonds, or in houses and common stock? Equity in a house can be borrowed and spent but it isn't taxed as income until the place is sold. Why not mark houses to market? At yearend, an investor with a profit in stock can sell short "against the box," or against his long position. He thus can "cash out" his gain but pays no tax until he delivers the stock to close out the transaction next year. Why not tax unrealized gains in stocks and bonds? By closing one such "loophole," the Administration, by force of logic, must close more, until it draws a loop tight around the neck of all risk capital.

What consequences might spring from this essay in "reform" are anybody's guess. The nature of tax reform is that everyone wants it but nobody has time to read the legislation, or, finding the time, can't make heads or tails of it. A case in point is the bill at hand, S. 626, to wit: "In general—In the case of any offsetting position in personal property—(1) that portion of any loss—(A) which is incurred in connection with the sale or exchange of any position held as part of such offsetting position, and (B) which exceeds any gain recognized in connection with the sale or exchange of any other position held as part of such offsetting position, shall be treated as incurred as of the close of the balanced period; and (2) the holding period (as determined under section 1223) of any position held as part of any offsetting position shall not include any portion of the balanced period with respect to the position." The words make sense separately but somehow not en masse.

The possible financial consequences of this crusade, in any case, strike us as horrific. If futures markets alone were taxed on paper profits, capital would fly elsewhere. Gold is an example. If futures contracts were liable to tax on unrealized gains, but mining shares and coins were not, capital would sensibly shift to shares and bullion. As New Year's Eve drew near, moreover, speculators would distractedly trade with an eye to taxes as much as to supply and demand. Prices would tend to become untrue. The business of futures exchanges—to shift market risk from hedgers to speculators—would be impaired. A futures industry handout raises an interesting point: "Should mark-to-market legislation adversely affect [financial futures] markets—as we believe it would—the cost would far exceed the benefits. Only a very slight widening of bid-ask spreads will add millions of dollars to the Treasury's costs in a new debt issue. We close a $1.3 billion dollar straddle loophole . . . and in the process increase the cost of Treasury financing by many times that amount." Yet the Treasury, unhedged, wants to make just that speculation.

This disaster in the making, oddly, isn't born of ignorance. The Treasury Secretary, Donald T. Regan, knows that if paper profits were profits, many would be the rich man at the bar at Harry's. (Merrill Lynch, which under Regan's stewardship helped to develop a type of straddle that was subsequently challenged by the IRS, now is helpfully advising clients on "alternate income sheltering strategies.") Moreover, a friend of S. 626, Sen. Daniel Patrick Moynihan (D., N.Y.) knows a thing or two about the commodity pits. The Senator's financial statements seem to show that a trading profit of roughly $60,000 was pushed into 1980 from 1979 as the result of some pork-belly spreads designed by his broker, Maduff & Sons. (An aide of Moynihan's was asked for comment on the Senator's apparent first-hand experience with the object of the ire of S. 626; but no comment was forthcoming.) In fairness to Moynihan, his was a managed account and the spread was far from riskless. But, then, most spreads involve risk. When the Administration argues the opposite, it is misinformed.

Thus the Treasury's honorable course is surrender, S. 626 should be given up for dead. In the House, the Ways and Means Committee has passed a bill that would limit the tax benefit of spreading to income earned in commodity futures trading. It would impose no mark-to-market rule. If a bill must be passed, let it be that one.

The timeless lesson in this political dustup is that the tax law is far too complicated. The only known tangible result of the parade of "tax reforms" from 1954 to date is the burgeoning fees of lawyers and accountants. A while ago, Alvin Rabushka, senior fellow at the Hoover Institution at Stanford University, proposed a simple flat-rate system. If everybody paid 11 percent, he said, the Treasury would take in as much as it does today under the current gimmick-ridden regime. Nothing against lawyers and accountants, but the more we think of that reform, the better we like it.

AMERICAN FARM BUREAU FEDERATION,
Washington, D.C., May 28, 1981.

Hon. DAN ROSTENKOWSKI,
Chairman, Committee on Ways and Means, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The American Farm Bureau Federation is the nation's largest general farm organization with over three million member families in 48 states and Puerto Rico. Many Farm Bureau members use the commodity futures market as an important tool in marketing their commodities. We are concerned that pending legislation would change the tax treatment of an important part of the hedging technique through the elimination of commodity straddles or spreads.

The need to prevent abuse in the futures market, and specifically to prohibit the use of the market as a tax shelter for gains from income unrelated to commodity transactions, is important. However, in attempting to prevent abuses, we urge you to consider that not all commodity spreads are motivated by tax avoidance. To determine that all spreads are suspect could penalize market participants such as farmers by forcing legitimate speculative capital from the market. The loss of such capital would affect the volume of trade as well as prices received by farmers.

Therefore, we urge that any corrective legislation be targeted toward eliminating the use of futures markets to offset nonrelated income in other fields, rather than hampering the continued use of futures markets by commercial hedgers and professional traders who are a vital part of any viable futures market.

Sincerely,

VERNIE R. GLASSON,
Director, National Affairs Division.

April 29, 1981.

Hon. DAN ROSTENKOWSKI,
Chairman, Committee on Ways and Means, Washington, D.C.

DEAR MR. CHAIRMAN: The Committee on Ways and Means has scheduled hearings on April 30 on H.R. 1293 and other bills affecting tax treatment of commodity straddles. The American Soybean Association takes this opportunity to offer comments on those bills. We ask that our comments be made part of the hearing record.

The American Soybean Association is a national non-profit volunteer, single-commodity association organized to assure the opportunity for a profitable soybean industry. ASA has approximately 20,000 dues-paying members and ASA is supported by over 460,000 soybean producers who voluntarily invest in ASA programs through 23 separate statewide soybean checkoff programs. ASA seeks to maintain soybean profitability through its foreign market development, research, producer and public information, and government relations programs.

ASA does not condone the use of futures straddles as a means of avoiding federal income taxes. However, we are concerned that the Congress not unintentionally reduce overall speculation in futures in its attempt to curtail the use of commodity straddles. The futures markets are essential to the marketing of soybeans and soybean products both within the United States and in the international market. Speculators are essential to the proper functions of the futures markets.

Producers, merchandisers, processors and users of soybeans and soybean products use the futures markets both as a mechanism of price discovery and as a means of reducing the risk of price fluctuations. Farmers use the futures markets to "lock in" a future price for delivery of their production. By doing so they are better able to plan cash flow and project potential profits. Merchandisers, processors, and end-users use the futures market to "lock in" a future delivery price for such commodities. The ability to assure future prices and delivery of soybeans and soybean products greatly reduces the risk of doing business and allows substantially reduced trading margins to the benefit of both producers and consumers.

The futures markets allow hedgers to reduce their risk only because speculators seek out such risk in the futures markets. The capital infusion into the markets by speculators is essential to their liquidity. When one considers that the value of the 1980 soybean crop was approximately $16 billion, only a small portion of which was consumed directly on the farm, it is apparent how much speculator capital is needed to maintain soybean market liquidity. The overall value of the commodities traded on futures exchanges not including financial futures, in 1980 was in excess of $100 billion.

We agree that tax abuse in the use of commodity futures should not be permitted. However, we are opposed to any legislation that would, as some have suggested, result in all profits from commodity futures transactions being considered unearned income and, thus, taxable at up to 70 percent. Also, we oppose a speculator being unable to balance out profits and losses from one year to the next. Such tax statutes would have the effect of forcing many speculators to turn to other investments where they would be eligible for taxation of the profits at the lower capital gains rates. The result could be a general reduction in market liquidity with higher risks for commercial hedgers. Faced with greater risk, the commercial hedgers would most likely increase their margins to the producers and consumers. Since over $8.6 billion of U.S. soybeans and soybean products were exported in 1980 any decrease in U.S. export competitiveness resulting from higher margins could impact the entire U.S. economy.

In conclusion, ASA urges extreme caution by the Congress in attempting to eliminate the use of futures markets as a means of tax avoidance. Futures markets are essential to farmers, processors, merchandisers, and end-users. They should not be needlessly interrupted. Soybean farmers need a strong and viable futures market to help assure their profit opportunity. The continued profitability of our nation's 630,000 soybean producers will help assure a stronger U.S. economy.

Sincerely,

FRANK RAY, *President,*
American Soybean Association.

VALLEY VIEW CATTLE CO.,
Dallas, Tex., May 22, 1981.

Hon. KENT HANCE,
House Ways and Means Committee, Washington, D.C.

DEAR REPRESENTATIVE HANCE: As a member of the Agri-business community and a Director of the Chicago Board of Trade, I have become concerned over proposed legislation before the Congress which will impact heavily on the marketplace of farmers and Agribusiness.

The thrust of the legislation is to deal with tax avoidance occasioned by commodity straddles which shelter unrelated income. This is fair and proper and I certainly support such a change.

I am deeply concerned that legislative language could be so broadly constructed that it could virtually destroy the ability of our grain futures markets to perform their economic function. The language must not obstruct or interfere with much needed spread trading which the futures markets depend on for life and breath.

Futures markets provide the ability to transfer price risk. If only hedgers used the futures markets they would be illiquid as the production cycle causes overwhelming selling at harvest and concentrated repurchase during the consumptive periods.

For viable futures markets, it is absolutely essential that speculative trading, and specifically spread trading, be maximized to provide both liquidity and stability to the marketplace.

Hedgers can pay a higher cash price to producers and demand a lesser price from buyers if our price risk is minimized in a liquid futures market. If spreaders were discouraged out of the market by this proposed legislation, our competitive margins would be jeopardized requiring a reduction in bids to farmers while escalating our offers to importers to compensate for the substantially greater price risk and the unhedgeability factor.

It is most certainly reasonable to correct abuses as applied to unrelated income. Hopefully you will consider arguing for maintaining futures market liquidity by assuring the legislative language in no way impedes legitimate economic activity, specifically that of the all-important speculative spreader.

If I can answer any questions related to this legislation, please give me a call.

Sincerely yours,

EDWIN L. COX, Jr.

NEW OLEANS COMMODITY EXCHANGE,
New Orleans, La., May 20, 1981.

Hon. W. HENSON MOORE,
2404 Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN MOORE: I have had the opportunity to review the transcript of the hearing held before the Committee on Ways and Means held on April 30, on legislative proposals relating to commodity "tax straddles." I noted that your commitment to the agricultural sector of our economy, of which I'm well aware, was reaffirmed by the statement that you "have no intentions of destroying the farmer's ability to market his crop." Unfortunately, the various tax straddle proposals presented to date would do just that.

The thrust of the proposals by the Treasury Department, by Senator Moynihan, and by Congress Rosenthal and Broadhead is to deal with tax avoidance occasioned by commodity straddles which shelter unrelated income. We would like to see such abuse corrected just as much as would the Congress. But those proposals, instead of applying only to situations in which futures markets are exploited for tax shelter purposes, are far too encompassing. If enacted, they will vastly reduce the amount of spread trading conducted for profit and thus reduce the liquidity in futures markets. Legislation following these proposals could literally destroy U.S. futures markets as they exist today.

Futures markets provide an inexpensive means by which farmers, businessmen, and financial institutions can shift some of the price risk inherent in their businesses to other individuals or firms willing to bear such risk. In agriculture, for example, firms throughout the entire marketing chain use futures markets for hedging price risks. The ability to reduce risks by hedging in liquid markets enables marketing margins to be

small, which results in higher producer prices and lower consumer prices.

Futures markets must be liquid, however, to permit industry members to hedge at minimal cost. Because hedging needs are not uniform, speculative trading—and particularly, spread trading—is necessary to provide market liquidity. Spreading provides much of the needed liquidity in deferred contract months in which there is frequently little trading. As a result, members of the industry can establish a price for their products or their input needs many months into the future. Spreading also often enables industry members to roll hedges with minimal price effects. In the absence of spreading, it would be virtually impossible to hedge effectively.

Futures markets play an especially vital role in the efficient operation of U.S. agriculture. In particular, the prices disseminating from our grain futures markets serves as a basing point from which grain is priced throughout the world. Because these prices provide signals for production and inventory management decisions, accurate prices are necessary to promote efficiency. Currently, futures markets disseminate accurate prices because of their market liquidity. If markets were not liquid, the prices disseminating would not accurately reflect supply and demand. Even relatively small discrepancies in price would have serious ramifications. Because U.S. farm income was $150 billion, a downward price distortion of only 1 percent would have resulted in a reduction in farm income of $1.5 billion.

The hedging and price discovery benefits which futures markets provide are vitally important to U.S. agriculture. Any actions which reduce the liquidity and competitiveness of futures markets will certainly have a disastrous impact on the U.S. competitive advantage in agriculture. Because agriculture is so important to the U.S. economy and our balance of payments, any legislation which adversely affects futures markets may adversely affect not only all agribusiness, but all U.S. citizens as well.

Agricultural futures contracts have traded for well over a century. During that time, futures markets have become an integral component of the agricultural industry and have helped U.S. agriculture become the envy of the world.

Only in recent years have futures markets in financial instruments been introduced. Now members of other industries have an opportunity to experience the same benefits from futures markets as members of the agricultural industry have had. Mortgage bankers, portfolio managers, corporate bond dealers, etc. can use futures markets to reduce the risk of adverse interest rate changes. Any action which is detrimental to futures markets would be detrimental to these industries as well.

In conclusion, the tax legislation proposed by Senator Moynihan, Congressmen Rosenthal and Brodhead, and the Treasury Department will have significant adverse impacts, either directly or indirectly, on numerous and various business transactions. These proposals will greatly increase the costs of trading in futures markets and will reduce the flow of speculative and investment capital into the process of determining efficient prices. Because these proposals will drastically reduce the profitability of futures trading relative to other potential income sources, fewer trades will be conducted resulting in less market liquidity. Caution must be taken before any legislation is passed which cripples our futures markets.

Industry representatives have been working with tax counsel on this issue and will soon make available an alternative proposal which is carefully constructed to prevent spread transactions which are largely motivated by tax considerations to shelter unrelated income—a proposal which would eliminate the exploitation of futures markets for tax shelter purposes without jeopardizing the legitimate economic function of futures markets.

We appeal to you to carefully review this issue and to give support to our alternative proposal. If you have additional questions, please feel free to call.

Sincerely,

C. C. ODOM II.

MID-STATES TERMINALS, INC.,
May 22, 1981.

Hon. DONALD J. PEASE, M.C.,
Committee on Ways and Means, 1102 Longworth House Office Building, Washington, D.C.

DEAR MR. PEASE: As a farmers export grain cooperative, we market grain produced on Ohio farms in the magnitude of a half billion dollars annually.

We are the export arm of both Landmark, and Ohio Farmers Inc. and, in effect, owned by those 65,000 farmer members.

We are vitally concerned about some proposed legislation before your Committee which will impact heavily on the marketplace of farmers and Agri-business. This legislation seeks to deal with tax avoidance occasioned by commodity straddles.

Our appeal to you is to monitor the legislative language so that it is not so broadly constructed that it could destroy the ability of our grain futures markets to perform their economic function. The language must not obstruct or interfere with much needed spread trading which the futures markets depend on for life and breadth.

It is one thing for commodity straddles to be used to shelter unrelated income and we in cooperative activities support your changing the law to prohibit such maneuvers.

However, legitimate spread trading is absolutely essential to our futures markets and must be maximized to provide both liquidity and stability to the marketplace.

Throughout the entire marketing chain—farmer, country elevator, miller, processor, exporter, foreign importer and others—all desperately need the futures markets to transfer price risk by hedging. Unfortunately, if only hedgers used the futures markets they could be illiquid as the production cycle causes overwhelming selling at harvest and concentrated repurchase during the consumptive periods. Speculative trading and specifically spread trading balance out and minimize wide pricing swings.

We hedgers can pay a higher cash price to producers and demand a lesser price from buyers if our price risk is minimized in a viable and liquid futures market. If your legislation discourages spread traders out of the market, our margins and hedging capabilities would be jeopardized, requiring a reduction in bids to farmers to offset losses due to the unhedgeability factor.

Please construct your strongest argument for maintaining futures market liquidity by assuring the legislative language in no way impedes legitimate economic activity, specifically that of the all-important speculative spreader.

We should like to further assist your Committee with documentation and outline the serious, unfavorable consequences if the legislation is poorly drafted.

Sincerely,

CLAYTON W. JOHNSON.

MID-STATES TERMINALS, INC.,
May 11, 1981.

Hon. JOHN BLOCK,
Secretary of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: There is proposed legislation before the Congress which will impact heavily on the marketplace of farmers and Agri-business. Your Department of Agriculture will be asked (or perhaps has already been asked) to prepare a position paper for the Committee on Ways and Means as it applies to taxation of commodity spreads and straddles.

The thrust of the legislation is to deal with tax avoidance occasioned by commodity straddles which shelter unrelated income. This is fair and proper and we in farmer cooperative activities support such a change.

However we are deeply concerned that legislative language could be so broadly constructed that it could virtually destroy the ability of our grain futures markets to perform their economic function. The language must not obstruct or interfere with much needed spread trading which the futures markets depend on for life and breath.

Throughout the entire marketing chain—farmer, country elevator, miller, processor, exporter, foreign importer and others—all desperately need the futures markets to transfer price risk by hedging. Unfortunately, if only hedgers used the futures markets they would be illiquid as the production cycle causes overwhemling selling at harvest and concentrated repurchase during the consumptive periods.

For viable futures markets, it is absolutely essential that speculative trading, and specifically spread trading, be maximized to provide both liquidity and stability to the marketplace.

We must emphasize that we hedgers can pay a higher cash price to producers and demand a lesser price from buyers if our price risk is minimized in a liquid futures market. If spreaders were discouraged out of the market by this proposed legislation, our competitive margins would be jeopardized requiring a reduction in bids to farmers while escalating our offers to importers to compensate for the substantially greater price risk and the unhedgeability factor.

Our appeal to you is to support the correction of abuses as applied to unrelated income.

Simultaneously, please construct your strongest argument for maintaining futures market liquidity by assuring the legislative language in no way impedes legitimate economic activity, specifically that of the all-important speculative spreader.

If we can assist your Department in formulating its response to the Committee, either by the way of documentation or outline of unfavorable consequences if the legislation is poorly drafted, we would be pleased to do so.

Sincerely,

CLAYTON W. JOHNSON.

BREED, ABBOTT & MORGAN,
Washington, D.C., June 18, 1981.

Re: Commodity Straddles—S. 626; Prior Year Transactions.

Hon. STEVEN D. SYMMS, Jr.,
452 Russell Senate Office Building, Washington, D.C.

DEAR SENATOR SYMMS: On Friday, June 12th, the Taxation Subcommittee and Energy and Agricultural Taxation Subcommittee of the Finance Committee held a joint hearing on the question of the proper tax treatment for investments in commodities and commodity futures, as framed by Senator Moynihan's proposal, S. 626.

During the course of their presentations to you, the spokesmen for the various domestic exchanges on which the subject investments are placed made a number of references to the nature of the activities in their marketplaces and to the substantial tax planning orientation of certain of this activity. Whatever view you may eventually adopt regarding the basic economic value of investments in commodities and the merits of related tax ramifications, we believe it is important to keep in mind, as stated in the Joint Committee's pamphlet describing the issues in this area, that: "The tax potential of certain transactions in commodity futures . . . has been recognized by the investment industry for decades."

For these "decades", it seemed to be well established that investment in commodity straddles could result in the deferred recognition of income and even the conversion of income to long-term capital gain. However, in 1977, evidently distressed by what it perceived as an accelerating expansion of knowledge regarding the tax potentialities of these investments to a universe of citizens larger than just the professional investment community, the I.R.S. decided to "crack down." In May of 1977, the I.R.S. issued a ruling (Rev. Rul. 77–185) declaring that losses generated from commodity straddles could not be deducted from income for tax purposes.

Rev. Rul. 77–185 is in our judgment seriously defective as a matter of legal reasoning. We have supplied extensive legal and economic analyses establishing this conclusion to the Finance Committee's staff and would be pleased to share them with your office, should you so desire. However, the fact that the government is now so actively seeking an elaborate legislative solution to a problem it declared to be clearly determined as a matter of present law in its 1977 ruling may be the best evidence of the weakness of the position taken therein.

Perhaps even more stunning in some respects than the issuance of the ruling by the I.R.S. is the fact that it was made retroactive to all open tax years. Despite what the Joint Committee has portrayed in its explanatory material as practices in the commodities' markets extending over a great many years, I.R.S. did not make the virtually unprecedented conclusion in its 1977 ruling applicable just to taxable years ending after the year of the ruling. As a result of this retroactivity and the aggressive enforcement posture adopted by I.R.S., a great many taxpayers now face serious disputes on this matter. These controversies in many instances will involve tax years preceding or perforce including the year of the ruling and will impact on taxpayers who have already closed their commodity transactions and recognized for tax purposes any gains inherent in their commodity straddle positions. It is assured that such a situation will generate acrimonious dispute between citizens and the I.R.S. and that a substantial portion of I.R.S.' enforcement capacity will be occupied by litigation on this issue.

Congress has in the past shown itself sensitive to the predicament of taxpayers who find themselves in this type of confrontation with I.R.S. For example, in connection with changes in the applicability of the investment tax credit for movie and television films enacted as part of the 1976 Tax Reform Act, Congress included special rules for prior taxable years specifically designed to avoid costly litigation with respect to the past. This express rationale would appear to be equally applicable to the structuring of any legislation relating to commodity straddles, and we urge that consideration be given to the question of past year transactions.

If you or your staff have any questions about the concerns raised by this letter, I would be pleased to make myself available to respond to them.

Sincerely,

LAWRENCE F. O'BRIEN, III.

MUCH, SHELIST, FREED, DENENBERG, AMENT, & EIGER, P.C.

July 15, 1981.

In Re: Senate bill 626/House bills 1293 and 1338 commodities straddles.

Hon. STEVEN D. SYMMS,
Senate Finance Committee,
Washington, D.C.

DEAR SENATOR SYMMS: I am opposed to the legislation now pending in Congress identified by the above bills.

First, as an attorney whose practice is concentrated in the area of taxation, I believe that all the pending bills depart from long-established tax theory and concepts, namely, income or loss is not realized and recognized until there is a "closed transaction". By "marking to market" on the last day of the taxpayer's year, tax may be due on unrealized income or unrealized loss may be deducted from income, when a "closed transaction" will not have taken place.

Second, much-needed capital would be diverted from futures markets. In fact, capital and liquidity deficiencies have been major problems for certain exchanges, such as the New York Futures Exchange which was opened more than a year ago as an adjunct to the New York Stock Exchange. These deficiencies endanger its continued operations. Other exchanges have closed because of capital deficiencies and liquidity, among other problems, i.e. the West Coast Commodity Exchange.

Third, market efficiency may be severely hampered, by lack of liquidity.

Fourth, to single out this industry, while not using similar proposed legislation to tax unrealized securities income from stocks, bonds, options, mutual funds, or other investments which also have an ascertainable value constitutes gross discrimination against one successful industry. Equal application of the law should be given to other similar industries and factual circumstances where margin accounts, open positions, short positions, selling short against the box, and other techniques are regularly used, and which do not result in gain or loss realization or recognition until there is a "closed transaction".

Fifth, curtailing the commodities industry will inevitably cause investors to seek other industries which now employ techniques for tax deferral in large dollar amounts, such as tax-free exchanges of like property in which millions or, perhaps, billions, of dollars of taxes are deferred.

My opposition is primarily the selection of one industry to change long standing tax theory while leaving other situations open to continued benefits where gross discrimination will result only against commodity futures transactions.

Very truly yours,

JOSEPH D. AMENT.

Hon. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SYMMS: Although I am sure you're aware of the potential damaging impact of various legislative proposals aimed at curbing tax abuses related to commodity spread transactions, I am compelled to reiterate the extent of that impact.

The United States has the most efficient grain marketing system in the world—a system in which futures markets play a vital role. Enactment of current legislative proposals would literally destroy that system by removing from the futures markets any incentive for participation by speculative investors.

An essential element of any successful futures market is liquidity, much of which is provided by speculation. A liquid market allows commercial users to hedge with minimal costs. Prices accurately reflecting supply and demand are disseminated through a liquid market.

The market illiquidity that would result from a lack of speculative participation would destroy the legitimate economic functions of futures markets and therefore seriously jeopardize the agricultural marketing system of this country.

Various organizations, such as the American Farm Bureau Federation, the National Farmers Organization, and the American Soybean Association, have expressed grave concern about the detrimental effect to agriculture that legislative proposals presented by the Treasury, Senator Moynihan, and Congressmen Rosenthal and Brodhead would have. I add to those my own concerns and appeal to you to give careful consideration to this issue.

Yours sincerely,

PIERRE ROCHON,
President,
Drexel Burnham Lambert S.A. France.

ELMHURST, ILL., *July 17, 1981.*

Hon. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SYMMS: In the attempt to close certain tax loopholes and present abuses in commodity straddles, the recent tax package passed by your committee, in my opinion, will have a most adverse and damaging effect on the commodity futures industry and is a prime example of overkill. The Treasury, in its quest for additional revenues, combined with certain members of your committee, have conceived a bill whose impact will have far reaching adverse effects on our export markets and the ability of the federal government to fund its financial needs.

Our grain industry is the most efficient producer of food that the world has ever known. Those acquainted with the economics of the agriculture industry realize the important part that the futures markets play. To disallow interest write-offs vs. ordinary income will simply reduce the farmers profit and will force the commercial cash grain industry to be the sole carriers of our largest export item. To force the market participants to mark-to-market, which incidentally is an unprecedented approach for taxation of unrealized profits, will simply reduce the liquidity of the commodity markets. It would appear that stocks, real estate or any other personal property could soon be subject to this form of taxation to which I am unalterably opposed.

It is my strong conviction that there were times in the past two years that the government would not have received competitive bids for the entire amount of bonds that they were auctioning on a given day without the futures market to absorb the hedge selling.

I think if you will take the time to understand the vital role the futures market plays in the grain and financial industry, you will see the economic cost of your bill will be far greater than any monies the Treasury may gain.

Sincerely,

JOHN R. KINSELLA.

JUNE 30, 1981.

Hon. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SYMMS: The one thing all Americans can agree on is that we need a strong and vigorous economic system. For 150 years the commodities futures markets have been an essential and integral part of our grain marketing and pricing system. These markets were established by the agricultural industry to provide orderly markets; prices which adequately reflected the actual situation of demand and supply; and, most importantly in a business which is constantly at the mercy of uncontrollable natural forces: protection against undue losses.

This protection the people in the agribusiness achieve through hedging their crops and inventories, transferring their risks to the professional speculators who thus become part of the agribusiness complex. Since large losses, as well as gains, may be incurred in any given year, the industry has used spreads in futures positions to help balance loss years with profit years and to help make tax costs commensurate with the large risks involved.

In the last few years, outside elements

have entered the futures markets in order to capitalize on tax laws which are foreign to their own business. There is no doubt that the use these elements have made of the tax laws governing bona fide hedging operations is a severe breach and misuse of the original intention of these laws. There is no economic justification for this abuse, and the whole agricultural complex, including the commodities futures industry, strongly supports efforts by the legislature to put a stop to such practices.

There is, however, grave concern that the legislators, in trying to smoke out the wasp nest, will burn down the whole house. The health and very life of a major part of our national economic system is involved in this issue, and extreme care must be taken that, while abuses are corrected, the industry is not crippled in the operation. It is not overstating the case to say that the health and vitality of the American agricultural system will be deeply affected by the final form of this legislation.

Sincerely yours,

ROBERT COLE,
Chicago Board of Trade Member.

BACHE HALSEY STUART SHIELDS INC.
Pittsburgh, Pa., July 1, 1981.

Hon. STEVEN D. SYMMS,
U.S. Senate, Washington, D.C.

DEAR SENATOR SYMMS: Although I'm sure you're aware of the potential damaging impact of various legislative proposals aimed at curbing tax abuses related to commodity spread transactions, I am compelled to reiterate the extent of that impact.

The United States has the most efficient grain marketing system in the world—a system in which futures markets play a vital role. Enactment of current legislative proposals would literally destroy that system by removing from the futures markets any incentive for participation by speculative investors.

An essential element of any successful futures market is liquidity, much of which is provided by speculation. A liquid market allows commercial users to hedge with minimal costs. Prices accurately reflecting supply and demand are disseminated through a liquid market.

The market illiquidity that would result from a lack of speculative participation would destroy the legitimate economic functions of futures markets and therefore seriously jeopardize the agricultural marketing system of this country.

Various organizations, such as the American Farm Bureau Federation, the National Farmers Organization, and the American Soybean Association, have expressed grave concern about the detrimental effect to agriculture that legislative proposals presented by the Treasury, Senator Moynihan, and Congressmen Rosenthal and Brodhead would have. I add to those my own concerns and appeal to you to give careful consideration to this issue.

Sincerely,

ROBERT N. HUTCHISON,
Vice President.

[Memorandum]

HOPKINS & SUTTER,
Chicago, Ill., July 23, 1981.

To: Thomas A. Davis.
From: Bradford L. Ferguson.

Alternative I would permit "cash and carry" interest and carrying charges to be deducted to the extent of interest earned by a commodity trader on funds held in customer accounts or on funds held for collateral or to meet other capital requirements of the commodity trading business.

Alternative II would permit "cash and carry" interest and carrying charges to be deducted by any taxpayer to the extent that taxpayer has included any interest in gross income.

Draft floor statements will follow:

On page 268, lines 14 and 15, strike out "with respect to the property described in subparagraph (A)".

Mr. SYMMS. Madam President, the United States has the most efficient grain marketing system in the world—a system in which futures markets play a vital role. Enactment of current legislative proposals will literally destroy that system by removing from the futures markets any incentive for participation by speculative investors.

An essential element of any successful futures market is liquidity, much of which is provided by speculation. A liquid market allows commercial users to hedge with minimal costs. Prices accurately reflecting supply and demand are disseminated through a liquid market.

LIQUIDITY

The success of any market, especially a futures market, is largely dependent on its liquidity. Simply defined, liquidity is the quantity of bids and offers flowing to a given market. It is axiomatic to markets that the more bids and offers competing with each other, the narrower the spread between them. Obviously, the narrower the spread between bid and offer, the more viable and efficient the market.

Conversely stated, an illiquid market is one where the spread between bid and offer is wide and where, as a result, there are large price gaps between sales.

It should be obvious that the more liquid a market is, the less impact a large buying or selling order will have on the price. This is of critical importance to commercial users of the markets. A commercial hedger cannot be certain of the prospective "basis" for his hedge unless he can with some degree of certainty be assured of the price level at which his order will be consummated. Similarly, a speculator must know that he can buy or sell a quantity within the futures market without adversely affecting the price structure, lest he injure his own position in the process. Thus, illiquid markets are generally shunned by both the commercial user and the speculator.

SOURCES OF LIQUIDITY

Bids and offers, the basis of liquidity, are the result of orders flowing to the market. This is true whether the orders come in written form over electronic equipment or whether they originate in the mind of the member standing on the floor of the exchange; this is true whether the orders are at a price certain—a price order—or whether they are to be executed at the going market price—a market order. In every case, orders are, in effect, the underlying source of bids or offers.

Broadly speaking, orders flowing to a futures market can be placed in two general categories: first, orders originating "off" the floor of an exchange, and second, orders originating from members "on" the floor of an exchange.

Analysis made at both the Chicago Board of Trade (CBOT) and at the Chicago Mercantile Exchange (CME)—which together represent about 75 percent of this Nation's futures business—indicate that between 40 percent and 60 percent of daily transactions originate on the floor of the exchanges. As a general rule, the more active the floor participation is, the more liquid the market. Thus, some of the less active exchanges have, as a percentage of their total volume, a much lower percentage of floor-originating daily transactions. In any discussion of liquidity, it is therefore imperative to understand the importance of "on-the-floor" order flow and the methodology which generates these transactions.

The primary source of on-the-exchange order flow comes from exchange members who act for their own account; a secondary source of on-the-exchange-order flow comes from "order-fillers"--brokers who are also capable of acting for their own account from time to time. Together, these exchange members. "locals," create and maintain a very significant proportion of the daily liquidity in any successful market.

TRADING TECHNIQUES

There are only a few basic techniques for trading futures markets, and they can all be used by participants whether they are "off" or "on" the floors of the exchanges. There is, in practice, a marked difference in the application of these techniques between the two categories, which will be explained.

These techniques are broadly defined in the following manner: "position traders," "scalpers"—market makers—and "spreaders."

A. "POSITION TRADERS"

These are market participants who take either a long or short—buy or sell—position in the market and intend to stay with the position for an undetermined length of time. Their theory is to stay with their position until either the market reaches their price level objective or the market moves adversely against them to a point that they feel they must liquidate the position. They may stay in positions for as little as 1 day or as long as several months. It is not time, but rather price level or market economics which dictates when they assume and when they liquidate positions.

Hedgers and commercial users are predominantly position traders. By definition, their futures position is linked to a nonfutures commercial transaction; therefore, they will maintain their futures position until their price-hedge need has been satisfied or until market economics dictate a different posture. Commercial traders are, generally speaking, off-the-floor participants.

Similarly, there are many speculators, both on and off the floor, who are position traders. Although in their case, their market decision is not based on a tangential commercial transaction—as with hedgers—they too will stay in a position until market conditions have changed considerably and as a consequence, their opinion has either been fulfilled or changed.

Position traders are a very important segment of futures market business. They provide the market with stability as their position account for a major

portion of the "open commitment" [1] of futures contracts. However, by definition, position traders do not often move in and out of the market; they are not, therefore, in the idividual sense, the principal source of continuous daily liquidity.

B. "SCALPERS"—SHORT TERM POSITION TRADERS

Unlike market-makers in securities, scalpers are under no obligation to make a market in futures; yet, that is exactly their function. Their motivation is profit. The scalper, in its purest sense, is a trader who always bids the market and simultaneously offers. His trading procedure is geared to make small profits on each transaction. Thus, he attempts to limit his risk—and at the same time his profit potential—on each transaction by his immediate willingness to offset an assumed position as soon as he profitably can. Similarly, he will attempt to immediately offset a losing position as quickly as he can. In other words, his methodology is primarily based on volume rather than on large profit potential of any given transaction.

There are many types of scalpers. Some operate along classical lines by buying and selling between the smallest increment allowed by contract specifications. Others attempt to profit by buying and selling between larger daily market gyrations. Most scalpers fall somewhere between these two methods or combine the two. In every case, however, the scalper attempts to flow with the immediate market movement: being among the first to sell as the market is falling, and the first to buy when the market is rising.

In most cases, the scalper liquidates his position as soon as the minor market movement has ended or as soon as he finds that his purchase or sale is in danger of turning into a loss. Thus, a scalper will institute and liquidate a small position many, many times during one day. Scalpers seldom leave the pit during trading. As a general rule, most scalpers will keep only a very small, if any, open position. Their methodology does not generally allow for the risk exposure assumed by an open position.

It will be clear that scalpers are predominantly "on-the-floor" participants. A nonmember could not possibly conduct this type of market trading. As an obvious consequence of this methodology, the scalper is a constant and continuous source of bids and offers. Daily liquidity is, therefore, to a large extent, dependent on such traders.

C. SPREADERS

The spreaders' method of futures market trading is to trade the differential [2] between 2 or more contract months in a given commodity. In other words, the spreader will buy a quantity, going long, of one contract of, say, soybeans, cattle or T-bills, and so forth, and simultaneously sell, going short, the same quantity of another month of the same commodity. Thus, his profit potential is not based on whether the price of the commodity will go up or down, as he is both long and short, but rather it depends upon the narrowing or widening of the differential between the contract months which comprise his position.

The professional local spreader is an artist. His aptitude, agility and ability to detect the slightest market shift is extraordinary. He is constantly active performing his transactions, moving as a buyer of 1 month to a seller of another, and immediately back again. In fact, many spreaders perform this activity among 3 or 4 contract months. The object is always to pick up even the smallest increment of profit in the shift of the differential. The spreader is alert to a new offer or bid in 1 given month which could be spread profitably into another month. He is quick to react to any sudden downdraft or updraft in the market so that he can "unwind" one side of his spread for that small moment of market movement and "hook it up" again as soon as the price movement has stopped.

The vast majority of spreaders apply this technique as a consequence of an accumulated spread position. That is to say, a spreader will usually have a theory, based on his analysis of market economics or dynamics, that a certain differential in a given commodity future will—over a period of time—narrow or widen. Thus, he accumulates a spread position commensurate with his opinion and may stay with it for an extended period of time. This spread position becomes his "inventory" upon which he applies his daily spread transactions.

Although often at the end of the trading session his "inventory" may not have changed very much during the course of the day, he has constantly traded the "spread" in question. In other words, during the course of each trading session, a spreader will be constantly offsetting and reinstating portions of his pre-established spread-inventory in an attempt to produce a daily profit as well as to better the overall position.

The techniques of daily spreading against a preestablished inventory is the principal difference between the off-the-floor spreaders and on-the-floor spreaders. Those off the floor rarely attempt this procedure; those on the floor almost always do. Thus, there is a significant difference between the two categories when calculating their respective contribution to liquidity.

The member-group is a much higher contributor to daily liquidity than the nonmember variety. Both categories combined, however, are an extremely important component in the open commitment of futures contracts and are, therefore, a major factor in providing "market thickness" and stability to the price structure. In fact, it is highly doubtful whether any futures market could function effectively without a large pool of participating spread traders, both from "on" as well as "off" the floor.

Spreading is also carried on, although to a lesser extent, on an "intermarket" basis. That is, traders also trade the differential between related commodities, for example, going long corn and short wheat, et cetera. The theory for this type of transaction is based almost entirely on economic analysis. Both commercial users and speculators make exhaustive studies of the price relationships among related commodities—sometimes of three or four different commodities—and then institute spread positions on the basis of their analysis or on the basis of the dictates of their commercial transactions. Again, such spreading contributes to market ability.

Spreaders are the crucial factor in providing bids and offers in forward contract months without which commercial hedging would come to a virtual standstill. It is a fundamental fact in futures markets that the largest transaction activity occurs in the nearby contract months of every commodity. That is, most speculative orders flow to those contract months that have only a few months of life remaining. As a general rule, the further out into time a futures contract month is located, the less the trading activity. As a consequence, forward contract months have much less liquidity than nearby contract months. Therefore, a potential commercial hedger, who often must place his hedge in a very distant contract month, would not be able to effectively do so were it not for spreaders.

Spreaders are virtually the only source of large quantities of bids and offers in forward contract months. As a group, they are the only ones a commercial hedger can depend on to provide bids or offers of sufficient size that can withstand the impact of the intended hedge transaction. The spreader does so as part of his market technique—buying or selling the forward month and simultaneously doing the reverse in the nearby contract month.

The spreader's motivation, of course, is to make a profit on the basis of the differential between the 2 contract months. The hedger is more than happy to offer the spreader a favorable price structure in order to provide the incentive for the spreader to act, for otherwise the hedge cannot be placed at all. There is no way to adequately explain the importance of the spreader in this function. It is a role which no one else can effectively assume and upon it depends the essence of futures markets as a risk transfer mechanism for the commercial world.

Spreading is of such importance to the viability of every market that it is one of the central considerations when designing a "pit"—trading arena. Whenever possible, trading centers are specifically designed to facilitate the spreaders' need to quickly move from the area of trading in one contract month to another. Thus, in most successful markets, the "pit" is essentially circular with a specific area of trading for each contract month at designated points around the circle. The spreader, by standing inside the pit, can therefore hear the bids and offers in all of the contract months and quickly move to buy and sell in two or more of them.

[1] "Open commitment" is the total of open longs and short positions in a given futures contract. This figure is published daily by every exchange.

[2] The differential is the difference between the price of one contract month of a futures market and that of another contract month of the same commodity or, in some cases, of a related commodity.

Spreading is such an important element in futures markets that an active market may have many spread transactions consummated by and between spreaders or spread orders. On any given day, spread traders or brokers with spread orders will execute their spread with another trader or another broker also with a spread order. In such cases, two spreaders are intent on making the exact opposite spread transaction; they each, quite obviously, have a different opinion as to which direction the spread differential is headed. As a matter of fact, there is so much spreading activity in futures markets that the foregoing is not a rare occurrence, rather it occurs often. Spreaders, just like position traders, have differing opinions about the differential.

As a result of the different application, theories, commercial needs and different opinions, there is almost always an active "spread-market" in every futures contract, whereby spreaders seek out their opposites by calling out the differential at which they are willing to do a spread. Indeed, it is customary procedure for a trader or broker to enter a "pit" and inquire what is the going spread to buy 1 given month and sell another or vice versa. If it is a successful market, there is always an available differential for either side of a spread.

There is an erroneous assumption among some unschooled market observers that spreading is virtually a "riskless" procedure. Nothing could be further from the truth. Naturally, spreads, as a market position, carry less risk than an open-ended long or short position. There is no question that as a general rule, when a market is going up or down, all the contract months will move in the same direction.

But the degree of movement is usually different for 1 futures contract month than it is for another. The differential between 2 or more contract months in any given commodity future is constantly changing. In the first place, the differential is consistently subject to different views and applications by market participants. More importantly, however, the differential is constantly affected by supply and demand statistics, prospective anticipations, cyclical considerations, interest rates, general U.S. and world economic conditions, a variety of government reports, technical market dynamics, as well as a host of other factors.

The contention that any spread position differential is "safe" is blatantly absurd as any simple analysis will show. Moreover, such an assumption would belie the fact that the spreading technique is a market procedure of large profit potential. In truth, futures-spreading is a very profitable technique for those market participants who have talent and degree of sophistication that it demands. Obviously, there has to be a considerable and constant change in differential in order for it to offer the profit potential that it does. It is axiomatic that where there is a potential for great reward there is also the danger of great risk.

Actually, there are probably more different theoretical views on spread differentials than there are on whether the market price will be going up or down. There are also a variety of market applications possible via the spread technique which are not as efficient through position trading. For instance, when a trader desires to accumulate a large outright long or short position in a forward month, he frequently cannot easily do so because of lack of liquidity there. In such a case, the trader can generally find another trader seeking to consummate a spread transaction—where 1 of the contract months of the spread is the one the first trader is interested in. In that case, the first trader will make the spread transaction and then gradually liquidate one end of his spread—by offsetting transactions—and end up with the outright long or short position he wanted in the first place.

Although a simultaneous buy and sell transaction is the technique used by the majority of spread traders, as heretofore described, this is not the only form of spreading. Spreading is also a function of a delayed and separate futures transaction. Sometimes a trader who has maintained a long or short position in a given contract month will subsequently establish the opposite position in another month of the same commodity, thereby creating a spread position. In such cases, his motivation is generally twofold; first, to reduce the market risk for his position—he does this by establishing the spread; second, to generate additional profit potential on the basis of the spread differential—obviously, he establishes the spread pursuant to his theory on the direction of the differential. Such delayed spreading techniques—sometimes referred to as straddles—are often also undertaken when the original position is at a loss and the trader does not yet wish to liquidate it.

In such cases the trader still believes that the original position will eventually prove profitable, but until a more favorable market trend develops, he wants to limit his exposure by assuming an opposite position on another contract month. His intention is, at some future date, to liquidate the secondary position, "leg," and reassume his original outright long or short market posture.

Often such delayed spreads are also motivated by tax considerations. For instance, if the original market position has accumulated a substantial profit and if the position has been in existence for several months, in the absence of tax considerations, the trader would liquidate it whenever he feels the market has reached the desired profit potential. However, because of tax considerations, it would behoove the trader instead to institute a spread by buying or selling an equivalent quantity of the same commodity in another contract month. Although the trader now exposes his accumulated profit to the risk of an adverse differential movement, he may thereby establish a long-term capital gain in the original position. In other words, the delayed spread allows the trader to stay with his position for the 6-month time period necessary, but at a reduced market risk.

As a matter of fact, the so-called tax spread is as often as not mistaken with a transaction which was not instituted in the first place because of tax considerations or implications. It simply is most difficult to differentiate one spread from another. As a point in fact, many spread positions, which were originally placed as part of a participant's normal market methodology, may later be motivated by tax considerations and utilized according to the dictates of prudent tax consequence.

In theory, a tax spread is a spread which is motivated solely by tax considerations. It is highly unlikely that in practice such is the usual case since in every situation the market participant will also want to place the spread in a manner that will afford him the potential for a profitable differential. The motivation of spread transactions are, therefore, necessarily coupled with profit considerations. Motivation aside, however, it must be understood that the so-called tax spread is placed in the market with the same rules and in accordance with the same procedural requirements as are all other spread transactions. Furthermore, tax spreads are subject to the same risks as are any other spread positions.

It is not the objective of this analysis to examine so-called tax spreading, but it must be noted that the previous example of a delayed spread motivated as a result of tax considerations is essentially no different than the motivations in many other fields of endeavor. Such similar business decisions legitimately occur in every walk of life and within virtually every form of commerce. Moreover, tax implications are always a critical element and integral consideration for every businessman, in every field, and with respect to every commercial venture or transaction.

There is an opinion held by some that the majority of spread transactions are tax motivated. Such an opinion is pure nonsense and evidence of a total lack of comprehension about the use of spreading as an important and integral futures market technique.

In short, spreading as a futures technique is as old as the markets themselves, and is probably the single largest contributing source of market liquidity, particularly in the forward months. Any diminution in the transaction volume generated by this methodology would have immediate and devastating effects on futures. Indeed, spread participants are the backbone of market liquidity, without which no viable futures market can exist.

Finally, it must be noted that most market participants utilize all of the different market techniques from time to time. That is to say that there is no exclusivity among the traders; scalpers sometimes act as position traders as well as spreaders; spreaders often take on outright positions and so on and so forth. The combination of all of the techniques by all of the participants is what results in transaction volume and liquidity.

SUMMARY

The success of a futures market is critically dependent on liquidity. Liquidity, the quantity of bids and offers flowing to

the market, is achieved by active participation of both commercial and speculative forces from both "off" and "on" the floors of the exchanges; the larger share of daily liquidity is, however, attributable to "locals."

Market methodology which generates liquidity can be broken down into three broad general categories: first, position traders; second, scalpers; and third, spreaders. Of the three categories, scalpers and spreaders are, by far, the most productive contributors of liquidity and of them, spreaders are the most important.

Not only does spreading effectively produce a flow of constant daily bids and offers, but also spreading is virtually the only mechanism which enables commercial participants to place forward hedges in distant contract months.

Any disruption in the technique or motivation of spreading would have an immediate and devastating impact on the use of futures markets as a risk-transfer mechanism for the commercial world.

It is my concerted opinion that the "mark-to-market" approach will significantly disrupt the flow of normal transactions in the futures markets.

Madam President, I would say in closing that I hope that my worst fears will never be realized. I hope that in the course of the next few weeks many Members of the Senate will have an opportunity to study this issue and that some agreement can be worked out so that the language that was adopted by the House Ways and Means Committee will be passed into law.

It is my understanding that that language that passed the Ways and Means Committee had a majority of votes from both the Democrats and the Republicans on the committee. I think their approach closes the tax loophole and does not seriously jeopardize the markets.

Madam President, I would be very concerned that if the Senate language, title 5 of Senate Joint Resolution 266, passes and is signed into law by the President, we stand the risk of having the major grain market in the world be Winnipeg, the major metal market in the world be London, and possibly the major timber market, instead of being Chicago, being in Winnepeg or Hong Kong.

It seems to me that if we are trying to generate economic growth in our economy we should not be passing legislation which has not been carefully studied and on which there are not any economic impact studies.

If the mark-to-market principle were applied to any other item, whether it be a home, a stock, a bond, a farm, a piece of real estate, the mark-to-market concept would be absolutely in the worst interest of this country.

I believe we have to have equity in our tax system, but title 5 of House Joint Resolution 266 does not address this issue.

The real problem is mark-to-market taxes unrealized gains. It is extremely bad tax policy. It sets a precedent that could have a very negative impact on the future of our tax code.

Madam President, I thank the distinguished chairman of the Committee on Foreign Relations for yielding time to me. I thank the distinguished chairman of the Committee on Finance and the majority leader for making the time available for us to voice our concern on this very important issue.

Madam President, I yield back my time.

Mr. PERCY. Madam President, I thank my distinguished colleague very much indeed for an invaluable contribution. I am happy to yield to my distinguished colleague from Illinois.

Mr. DIXON. Madam President, I thank my good friend, the distinguished senior Senator from Illinois, for his efforts on behalf of this question; and my colleague, the distinguished Senator from Idaho, for the remarks he has just made, which I heartily endorse.

Again, I thank the senior Senator from New York for his accommodation in respect to the transitional amendment which is now included in this bill.

Madam President, I want to make clear once again the position of this Senator and his colleague from Illinois and others who join us that the provision adopted by the House Ways and Means Committee concerning this subject matter is entirely more acceptable to us than what is being done in title V, even with the adoption of this transitional amendment, in the Senate.

The colloquy that we are engaged in here, I hope, will make a record for our colleagues in the conference to indicate the views on this matter of many of us on both sides of the aisle, including my distinguished friend, whom I now see on the floor, the ranking member of the Committee on Agriculture, the Senator from Louisiana (Mr. LONG).

First, may I say, Madam President, that we all ought to understand that the bill we have been discussing for some days is a tax relief bill, a bill to reduce taxes for the average citizen in this country, a bill to reduce taxes for the average businessman, a bill that will give benefits to large and small business alike in America, save for one section of the bill, title V, the subject matter we discuss here. That section and that section alone is a part of this bill which increases taxes, increases taxes for one lone sector of the American economy.

Madam President, I ask, why do we do that without adequate hearings? I was delighted to hear my colleague, the Senator from Idaho, suggest the problem we face when we enter so hastily into placing a tax on unrealized income. I wonder how many of my colleagues here really know and understand that that is what we are doing in title V of this bill. We are saying for the future that we are creating another method of taxation, a new method of taxation by taxing unrealized capital gains income. I suggest that that holds certain dangers for a great many important business interests in America.

Madam President, I suggest again, what is our hurry in doing this without sufficient hearings? Some might say it was so much the sense of the Senate that we ought to do it. I say that that is not so, because there were three other votes on this question that have been taken on prior occasions in this session of the Senate.

I invite the attention of my colleagues to Senate vote No. 64 of April 1, 1981, when this very same question came before the Senate. A rollcall was taken and an attempt to adopt this tax was rejected. Fifteen Democrats, 33 percent of this side, voted yes. But 31 Democrats, 67 of us, voted no, and 51 Republicans, or 100 percent of that side, voted no.

But that was not the last time the question came before the Senate. The question came to us again, and I invite my colleagues' attention to Senate vote No. 103 on May 12 of this year, not too long ago. A rollcall was taken on this question, and this tax was again rejected, the Democrats, 29 percent voting yes, the yeas being 32; the Republicans, three voting yes, or 6 percent, the nays being 62.

It was rejected a third time on May 12 in Senate vote 105, again rejected by a majority vote of the Senate.

Madam President, my distinguished friend and colleague, the Senator from Oklahoma (Mr. BOREN), is a member of the Committee on Finance. I have here a statement that he has asked to have printed in the RECORD. I should like to quote from this statement by my distinguished colleague from Oklahoma, who voted for title V in committee:

> Although the "mark to market" approach for taxing futures contracts represents a change that will accomplish an end to tax abuse in the commodities markets, there may be other methods also available to us; for example, another such measure may be contained in the House tax bill.

Madam President, I say very briefly before I close that there are other questions raised by the committee proposal. Bank forward contracts, which are speculative trading devices used by banks in the city of Chicago and other places, are economically identical to regulated futures contracts and are currently taxed in an identical manner. However, as this bill now stands, those transactions, although exactly the same, will be treated differently under the law in the future.

Madam President, I wish to close, if I may, by reading very briefly from a letter from Mr. Hendrik S. Houthakker, Henry Lee Professor of Economics at Harvard University:

> . . . The futures markets do perform vital services, especially the transfer of risk. Speculators, on balance, take on the price risks incurred by the holders of inventories, and by exporters and others who have made forward sales of their products. Since prices on commodity and financial markets are inherently volatile, these risks are large. Insurance companies also take on risks, but they count on the law of averages to limit their exposure; the futures markets obey that law at best in the very long run, in which most risk-takers would be bankrupt.
>
> Risk-bearing can be profitable, but it is discouraged by the Tax Code with its basic principle of "heads I win, tails you lose".
>
> • • • • •
>
> Contrary to what we are now told, it is not among the larger loopholes.

I repeat: it is not among the larger loopholes—

> One need only think about the "underground economy", in which tax losses could

easily exceed one hundred billion per year to put things into perspective. Just to focus on those created by legislation there is the agricultural loophole through which oil men, movie stars, and the like are permitted to masquerade as livestock breeders, incidentally, offering tax subsidized competition to genuine farmers. In the real estate or the oil drilling industries, one tax gimmick is piled on top of another. Each of these loopholes costs much more revenue than the straddle loophole, which has the merit of increasing the supply of risk capital.

Congress created these loopholes either intentionally by giving in to pressure groups or unintentionally by sloppy drafting. . . .

• • • • •

The Finance Committee bill goes farthest in changing the tax treatment of straddles; it would impose "marking-to-market", an accounting method without precedent in the Tax Code which would tax gains before they are realized, while replacing long-term capital gains treatment by a blend of long-term and short-term rates. Its effect on the commodity markets could be devastating because risk capital would be diverted into areas where taxes on gains are paid only after realization and where long-term gains continue to be available.

I appreciate the sincerity of my colleagues who are involved in this subject and the good work they do here. I suggest that it is a complicated field, and that it is a field that requires the additional attention of Congress. If we must act, the approach taken by the House Ways and Means Committee is by far the preferable approach.

I thank the distinguished Senator from New York for the transition amendment. However, I believe a better approach must be found in the conference committee, by the work of that committee.

● Mr. BOREN. Madam President, as a member of the Finance Committee, I was pleased to support Senator MOYNIHAN's proposal to clean up tax abuses which have taken place using the Nation's commodity markets; I particularly commend the chairman and the staff for the excellent work they have done in coming up with a solution to a most technical series of problems. I intend to support title V for final passage.

I do, however, want to clarify my feelings with respect to the "mark-to-market" proposal, both as a member of the Finance Committee and as a member of the Agricultural, Nutrition, and Forestry Committee, which oversees the commodity industry and the Commodity Futures Trading Commission.

Although the "mark-to-market" approach for taxing futures contracts represents a change that will accomplish an end to tax abuse in the commodities markets, there may be other methods also available to us; for example, another such measure may be contained in the House tax bill.

Madam President, the point that I wish to make is that while I supported, and continue to support, the Senate Finance Committee provisions with respect to commodity straddles, I might also support other measures accomplishing much of the same purpose. In such a complex area as we are dealing with here, I hope that my colleagues, conferees on the bill, if and when it reaches conference, will lend their best efforts toward finding the best possible solution to effect an end to the current abuse of the straddle mechanism to avoid the payment of taxes.

The Nation's commodity markets are extremely important to the farmers and ranchers of Oklahoma, and the goal of our efforts to reach tax abuse in the markets should not have the ultimate effect of drying up market liquidity and thereby damaging legitimate hedging and price-discovery mechanisms of the marketplace.●

Mr. PERCY. Madam President, I express appreciation to my distinguished colleague and join him in the expressions of hope that he has evidenced.

Also, I appreciate the cooperation, support, and help of Senator DOLE, Senator MOYNIHAN, and Senator LONG.

Madam President, 60 minutes have been reserved for this colloquy. I know of no other Senator, of the 10 Senators scheduled to speak, who intends to speak. Therefore, I yield back the remainder of our time.

Mr. JEPSEN. Madam President, I rise in opposition to title 5 of the Economic Recovery Tax Act of 1981, which deals with commodity tax straddles undertaken for purposes of income tax avoidance. I want to state clearly at the outset that I totally support the intention of title 5. I take issue only with the specific approach the Senate Finance Committee has chosen to adopt. The arguments against it are compelling.

First, despite the exemption from the provision's terms accorded farmers, grain elevator operators, and other members of the agricultural community, these groups are not protected. Title 5 appears to ignore the dynamics of commodity markets. It is simply not enough to exempt hedgers because they represent only one factor in the complex workings of the market. The fact of the matter is that a hedge contract to deliver corn next March, or hogs next April, or an interest rate in December, at a price fixed today, cannot be sold unless someone will buy it. That someone may be a feedlot operator, a meatpacker or a building contractor, who is hedging too; but it may also be a person willing to assume an unhedged position because he or she feels the price will rise rather than fall. Title 5 penalizes such a person and I believe that penalty will have a serious impact on farmers and their storage facility operators.

Why? In a word, because it may seriously decrease liquidity in the affected markets. At best, the result will be to increase the costs of hedging. At worst, farmers and grain elevator operators will be subjected to price manipulation by large buyers. The latter is not just rhetorical speculation; it is a concrete possibility. If the traders, who assume risks, are driven out of the market by this legislation, we have to ask ourselves a simple question: Who remains? The answer is other hedgers. What happens if they do not want to buy when farmers want to sell? What happens if a few large buyers control the market in a given commodity? What happens if the market effectively disappears?

I think it is important that we think about these possibilities as we consider title 5. For 3.4 million American farmers and 20 million American workers in related industries, they are very important ones.

The American farmer works 16 hours a day, 365 days a year, in a particularly risky business enterprise. Many of the factors which determine whether that effort pays off or not lie beyond the farmer's control: weather, political embargoes, and interest rates.

Furthermore, these uncontrollables are unique to the farmer. The only way he or she can minimize the risk is through hedging. Title 5 threatens to take that insurance away. I am worried that the drafters of the legislation may get more than they bargained for. I am worried that the American farmer will suffer.

The second argument against the provision, as drafted, is that it sets a dangerous and unparalleled precedent. The mark-to-market approach is intended to make tax avoiders pay taxes. I find it difficult to believe that such a result is anything more than idle fantasy. The tax avoiders are going to do exactly what they have done every other time Congress has closed a loophole. They are going to find another one.

No positive result will come of it but a very negative one will. For the first time in the history of this country, we will be taxing unrealized or paper gains. If 1 day after the tax year a previously profitable contract drops dramatically in price, requiring additional margin payments, and the holder sells, he will have effectively paid tax on a concrete loss. It is that simple.

If Congress accepts the taxation of paper profits in commodity markets, how long will it be before that approach is extended to stocks? How long before gold, housing, cattle and who knows what is included? We shouldn't start down this road. Period.

Does the Finance Committee want to stop tax avoidance through commodity straddle schemes? Then, they should provide us with a substitute. Perhaps they can devise legislation which allows commodity losses to be used only against like gains. Such action would protect American agriculture and fulfill the basic intention of the present bill. It sounds like a pretty good solution to me. I urge my colleagues to reconsider title 5.

Mr. DOLE. Madam President, I understand a couple of Senators are on the way to the floor—Senator QUAYLE and Senator BRADLEY—and they have an amendment that might be acceptable. Senator KENNEDY has an amendment which he will offer by 8 o'clock, and it may not be acceptable.

I hope there are other Senators who may be listening. We still have a number of amendments that were listed in last night's agreement. If Senators are listening in their offices, I wish they would come to the floor and dispose of those amendments. This would be an excellent time.

In addition, there are probably a half dozen or so Senators interested in some form of day-care amendments. I understand that their staffs have been meeting, and we hope we might be able to work out something to accommodate six or eight of those amendments.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, according to comments I have heard around the Capitol in the last 30 minutes or so, some people may have misconstrued the remark I made earlier on the floor to the effect that we apparently are making good progress in disposing of amendments and that perhaps we could recess earlier than the 11 or 12 o'clock I announced earlier.

I still hope for that. I should like to improve on that time a little.

I have heard the rumor that there will not be any more votes tonight. There most assuredly will be votes tonight. It is my hope that we will have two, three, or four amendments tonight.

I certainly counsel Senators not to assume that there will be no more votes tonight. I assure them that there will be.

Mr. President, I hope the Senator from Kansas may be in a position to call up another amendment or to call another Senator on the list to do that at this time.

Mr. DOLE. Mr. President, if the distinguished majority leader will yield, I understand Senator ROTH is on his way to bring up an amendment or at least to discuss an amendment.

There are other Senators coming in from different areas and maybe they will all arrive.

I expect at least disposition of three or four amendments and probably a couple of rollcalls and perhaps one major amendment that, as I said earlier, will take care of five, six, or seven amendments on that list.

Mr. BAKER. All right.

Mr. President, I suppose there is no alternative really then except to suggest the absence of a quorum which I shall do in a moment.

May I point out that every time we do that the time on the quorum is charged against something, either a pending amendment or against the 6 hours allocated for general debate on the joint resolution. So it is not a free ride. And if no Senator has an amendment at this time or any statement to make I am prepared to make the suggestion.

Mr. DOLE. Mr. President, I might ask the distinguished Senator from Louisiana. The Senator from Kansas has the fiscal responsibility amendment. I am not certain that this will be the appropriate time, but I guess it is as good as any to offer that.

Mr. LONG. By all means.

I suggest the Senator include me on this as a cosponsor.

Mr. DOLE. I am pleased if the Senator will join me.

Mr. President, I so ask unanimous consent that the distinguished Senator from Louisiana (Mr. LONG) be added as a cosponsor on this proposed amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. So I shall send the amendment to the desk but first I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 274

(Purpose: To express the sense of the Senate relative to limitation of revenue losses)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) for himself, Mr. LONG, and Mr. DOMENICI, proposes an unprinted amendment numbered 274.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the committee amendment, add the following new section:

SEC. . It is the sense of the Senate that the conferees on the part of the Senate shall limit the revenue loss from this bill for the fiscal year 1981 to $1,500,000,000, for the fiscal year 1982 to $38,300,000,000, for the fiscal year 1983 to $91,800,000,000, and for the fiscal year 1984 to $150,000,000,000.

Mr. DOLE. Mr. President, I shall read this amendment very quickly:

It is the sense of the Senate that the conferees on the part of the Senate shall limit the revenue loss from this bill for the fiscal year 1981 to $1,500,000,000, for the fiscal year 1982 to $38,300,000,000, for the fiscal year 1983 to $91,800,000,000, and for the fiscal year 1984 to $150,000,000,000.

Mr. President, I might say this is at the suggestion of my friend, the distinguished Senator from Louisiana (Mr. LONG) to indicate to all those in the Chamber who have all these meritorious, but costly, amendments that, in the final analysis, the conferees expect to come back to this body with a conference report that is within the numbers outlined in that amendment.

I think most Senators hope that we will do that. In fact, I guess that every Senator hopes that we might accomplish that goal, and I also suggest that if we leave to go to conference with numbers in excess of the numbers just read, then I assume everyone will understand that his particular amendment will be subject to close scrutiny and maybe some reduction.

Of course, in a conference itself many matters will be negotiated with the House of Representatives that may have different ideas on what is meritorious and what may not be meritorious.

It is a serious amendment. It is offered in the hope to dispel any doubts that we are not going to violate the numbers that the administration presented to our committee or to cause any anguish to the Senate Budget Committee, its chairman and its ranking minority member, Senator DOMENICI and Senator HOLLINGS.

I hope that maybe we might have a vote on this amendment at 8 p.m.

I ask the Senator from Louisiana if that is how he understands the amendment?

He has used this type of amendment in the past and it has been very effective.

Mr. LONG. Mr. President, I support the amendment. This is an effort to assure Congress and the Senate, in particular, that if the amendments that we have in here exceed what the budget totals expect for this joint resolution we will simply have to stay within that in conference, and we expect to. We have done this before.

Mr. DOLE. That is right.

Mr. LONG. We have in good faith stayed within the expectations submitted, and we expect to do so on this occasion.

I support the Senator from Kansas.

Mr. DOLE. I yield back the remainder of my time.

Mr. LONG. Mr. President, I yield back my time.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, it appears that a number of Senators are away from the Chamber at this time, and it might suit the convenience of Members if we were to set this vote on this amendment at 8 p.m.

Mr. President, I ask unanimous consent that the vote on this amendment occur at 8 p.m., and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Without objection, the vote will occur at 8 p.m.

Mr. BAKER. I thank the Chair.

Mr. President, will it be possible for the Senator from Kansas or the Senator from Louisiana to arrange for another amendment?

The Senate has now a voracious appetite for amendments.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. BAKER. I am happy to yield.

Mr. MELCHER. I thank the distinguished minority leader.

Mr. President, I wish to enter into a colloquy with the distinguished chairman of the Finance Committee if it is possible.

Mr. DOLE. Yes.

Mr. MELCHER. Mr. President, I have an amendment on the computed interest rates that is cosponsored by Senator EXON, Senator JEPSEN, and Senator BOSCHWITZ, which we are prepared to offer at this time.

It is my understanding that the distinguished chairman of the Finance Committee wishes to discuss this matter with the Treasury Department yet again tomorrow morning. If that is indeed the case, could we set a time for bringing up the amendment tomorrow morning so that we could be prepared to do so?

Mr. DOLE. Mr. President, I thank the distinguished Senator for yielding. I also thank him for his patience.

The Senator from Kansas was trying to negotiate with the Treasury today. Unfortunately most of those with authority to negotiate were not available

because they are working on the tax bill reported by the Ways and Means Committee. I hope to discuss this issue tomorrow morning with Secretary Regan and be in a position hopefully to do business with the Senator either tomorrow morning or early afternoon.

Mr. MELCHER. I thank the distinguished chairman for his comments and I appreciate that very much. We will be prepared to act accordingly at noon or shortly after noon.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask that we temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBURGER addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

UP AMENDMENT NO. 275

(Purpose: Relating to the Foundation Payout Rule)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER), for himself, Mr. MOYNIHAN, Mr. PACKWOOD, and Mr. BRADLEY, proposes an unprinted amendment numbered 275.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the resolution insert the following new section:

PRIVATE FOUNDATION DISTRIBUTIONS

(a) GENERAL RULE.—

(1) Paragraph (1) of section 4942(d) of the Internal Revenue Code of 1954 (defining distributable amount) is amended by striking "or the adjusted net income (whichever is higher)".

(2) Paragraph (3)(A) of section 4942(j) of the Internal Revenue Code of 1954 is amended to read as follows:

"(A) which makes qualifying distributions (within the meaning of paragraph (1) or (2) of subsection (g)) directly for the active conduct of the activities constituting the purpose or function for which it is organized and operated—

"(i) equal to substantially all of its adjusted net income (as defined in subsection (f)), or

"(ii) if that amount exceeds substantially all of its minimum investment return (as defined in subsection (e)), equal to substantially all of its minimum investment return, and if its actual qualifying distributions (within the meaning of paragraph (1) or (2) of subsection (g)) exceed its minimum investment return, substantially all of such qualifying distributions (within the meaning of paragraph (1) or (2) of subsection (g)) are made directly for the active conduct of the activities constituting the purpose or function for which it is organized and operated; and".

(b) EFFECTIVE DATE.—The amendment made by subsection (a)(1) shall apply to the determination of a private foundation's distributable amount for taxable years beginning after December 31, 1980. The amendment made by subsection (a)(2) shall apply to the determination of a foundation's status as an operating foundation for taxable years beginning after December 31, 1980.

Mr. DURENBERGER. Mr. President, the Foundation Payout Rule of the present tax law has reduced the ability of our independent foundations to continue their important charitable work. Today, we are offering an amendment that would eliminate the provision that has caused this problem. This amendment would produce minimal revenue loss, if any. The amendment's passage is essential if foundations are to continue as a vital part of American philanthropy and to expand their role in providing innovative and sensitive options to delivery of services by the Government.

THE 1969 FOUNDATION LEGISLATION

In 1969, Congress enacted a comprehensive set of requirements to insure that foundations are operated in the public interest. Unfortunately, as a result of dramatic and unforeseen changes in economic conditions in the years since 1969, one aspect of the 1969 legislation seriously threatens the capability of foundations to expand their role in encouraging alternative delivery systems. Because of the substantial decline since the early seventies in both the real value of foundation assets and the birth rate of new foundations, we simply cannot afford to ignore this problem.

Under present law, foundations must distribute their entire realized income, or an amount equal to 5 percent of their investment assets—whichever is greater. This payout requirement was intended to ensure that every foundation would make reasonable current distributions in support of charitable activities.

However, the payout rule was enacted at a time when double-digit inflation was unimaginable and all prior experience suggested that foundations' current income would fall well below the required percentage. Consequently, as the legislative history makes entirely clear, Congress' primary focus was on fixing the percentage distribution requirement—not in the income payout requirement.

With the sharp rise in both inflation and interest rates since 1969, the impact of the payout rule has changed dramatically. By investing in certificates of deposit and other secure debt instruments, foundations can now earn current incomes far in excess of 5 percent. However, while every other class of charitable institution can use these high current yields to help offset the effects of inflation, foundations cannot.

Instead, a foundation seeking to preserve its grantmaking capability must shift to far more risky equity investments. Thus, by virtue of the present payout requirement foundations enter the fight against inflation handicapped by an artificial—and wholly unintended—investment constraint.

THE SOLUTION

To remove this handicap, the amendment we are offering would eliminate the requirement that foundations distribute any excess of their realized income over 5 percent of their asset value. Foundations would continue to be required to distribute at least 5 percent of the value of their investment assets. This 5-percent payout requirement reflects a somewhat high projection of the real rate of return on foundation investments, and insures that foundations will continue to make substantial current distributions to charity.

Most important, this amendment reflects the importance of preserving and expanding the ability of foundations to respond to human needs. It will give foundations the same flexibility in working to preserve their charitable purchasing power as is currently available to all other charitable organizations. After a short transition period this amendment will produce a substantial and permanent increase in the level of foundation support for charity, and thus help to offset public spending cuts.

FOUNDATION ACCOUNTABILITY

Mr. President, during hearings earlier this year by the Finance Committee's Subcommittee on Taxation and Debt Management, testimony was given that indicated some foundations were not responsive to public inquiries for information on grantmaking and other operational issues. I believe it is imperative that such information be easily accessible to the public in a timely manner and so will be following up on this issue in the Finance Committee.

In the interim, though, the service has the authority to require additional information from foundations on Form 990–PF, copies of which are available to the public. My distinguished colleague from Hawaii, Senator MATSUNAGA, will be discussing the additional information we believe should be required.

SUPPORT FOR THIS AMENDMENT

The Subcommittee of the Finance Committee on Taxation and Debt Management held hearings earlier this year on this proposal. The amendment is strongly supported by the United Way of America, the National Conference of Catholic Charities, the United Negro College Fund, the American Cancer Society, and Independent Sector, the national philanthropic coalition including close to 300 member organizations such as those four charities, the American Red Cross, the National Health Council, the national representative groups for a broad spectrum of church and other religious organizations, colleges, universities, and many others.

CONCLUSION

This tax bill provides incentives for increased productivity. We are permitting individuals and small businesses to retain more of what they make and are increasing the pool of capital needed to create more jobs and build new plants. We have adopted an important amendment for increased giving to charities by those who do not itemize their deductions. This will expand the productivity

of the voluntary sector—their ability to meet the diversity of needs and to provide additional consumer choice in social services.

Our amendment will encourage improved productivity by foundations in providing alternative delivery systems. Throughout this century the thousands of American foundations, large and small, have enriched the lives of all Americans.

Again and again, foundation grants have played a key role in supporting dramatic breakthrough in medicine and in other fields of scientific research; in improving our colleges and universities and other important public institutions; and in responding to basic human needs.

I urge my colleagues to give their support to this amendment to permit foundations to continue their unique role in the delivery of social services.

Mr. President, I yield at this time to the chief cosponsor of this amendment, the senior Senator from New York.

Mr. MOYNIHAN. Mr. President, I rise to join my distinguished colleague from Minnesota in this matter. It is one which has concerned him and concerned others of us for some years as we once again run into the unanticipated consequences of seemingly small changes in the tax code.

Congress enacted the payout rule in 1969. It has been the wholly unexpected and ironic result that, although the law was intended to provide more money for charities and universities, it has had the opposite effect. There is less money, not more money, going to these institutions.

Measured in constant dollars, foundations distributed in 1969 $1.6 billion in grants; in 1979, they distributed only $1.1 billion. There has been a period of steady decline.

Mr. Russell Mawby, the president of the W. W. Kellogg Foundation, told the Senate Finance Committee during hearings which the Senator from Minnesota chaired:

> What is at stake is not the continued existence of any particular foundation, but rather the continued ability of foundations as a whole to support important charitable works.

We heard testimony from representatives of the United Way, the United Negro College Fund, the Girl Scouts, and the National Conference of Catholic Charities. We heard subsequently from the independent sector, an umbrella organization of charitable groups ranging from the Audubon Society to the Salvation Army. They spoke to us in the most urgent terms about this matter.

It took some distress to bring these groups together. It would be a very, very unhappy event if a not well-thought-out law should begin to erode the role of institutions that have been here before our Government and absent which our Government would be a different and less attractive set of arrangements.

Mr. President, I hope that the Senate will support this amendment. I know that my friend, Senator DURENBERGER, has won his side of the aisle in the enterprise and I believe we have won ours, it being a wholly nonpartisan matter.

I see the Senator from Hawaii has arisen. He has been indefatigable in this matter. I yield at this time to him.

Mr. MATSUNAGA. I thank the Senator from New York for yielding. I commend him and the Senator from Minnesota (Mr. DURENBERGER) for the great effort they have exerted in this regard.

Mr. President, I would like to address a matter concerning private foundation requirements under the Tax Code. On March 30, 1981, the Finance Subcommittee on Taxation held hearings on S. 464. That bill chiefly seeks to correct the minimum distribution requirement for foundations. At a time when the Federal Government is slashing social programs and the business community is overwhelmed by aid request from social agencies, the private philanthropic sector must provide increasing support for social services.

I ask unanimous consent, Mr. President, to have printed in the RECORD following my remarks a brief article from the Wall Street Journal on this specific point.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MATSUNAGA. Private foundation grants are crucial for many social agencies, and the mandatory payout rule first enacted in the 1969 Tax Reform Act insures that their tax-exempt status actually advances their stated charitable objectives. The rule establishes minimum levels of financial support expected of foundations to warrant their tax-exempt status. The payout rule requires private foundations to distribute their net income or an amount equal to 5 percent of their asset value, whichever amount is greater, toward their tax-exempt purpose. For operating foundations, the required payout is smaller—net income or 3½ percent of net assets whichever is greater. The needs of social agencies must be considered with these foundations' own stated charitable objectives, before we change the mandatory payout requirements. Moreover, the adverse effect of the payout rule is open to question. Although foundation assets in constant dollar terms have declined from $18.6 billion in 1965 to $16.7 billion in 1979, this amount has remained unchanged since 1965. The dollar amount has actually risen to $38.4 billion in 1979.

I agree with Senator DURENBERGER that some remedial action should be taken and I support his amendment, although I wish time allowed more scrutiny of the problem created by the payout rule.

In addition, at the hearings, on S. 464, the National Committee for Responsive Philanthropy raised some concerns with the public responsiveness of foundations. Robert O. Bothwell, executive director of the committee stated:

> A recent study by the National Committee for Responsive Philanthropy documented that many foundations remain aloof and isolated from the public. Thirty percent of the country's largest foundations refused to provide any information about their grantmaking, finances and operations even after repeated requests, and another thirty percent provided only minimal information. Thirteen (all with assets exceeding $25 million) had unlisted phone numbers. And according to the Council of Foundations, less than 500 of the country's 21,000 foundations voluntarily publish annual reports.

Now these foundations to obtain their Federal tax exemption must be organized for and operated pursuant to their tax-exempt purpose. The Congress in the past has opened these foundations to public scrutiny. The Congress authorized the Internal Revenue Service to obtain pertinent information from the organizations to determine whether they were being managed pursuant to their charitable objectives and also to make available this information to the general public. In this way, a knowledgeable public could determine whether to support these organizations.

With this established congressional policy in mind, I fail to understand the reluctance on the part of many foundations to respond to individuals who inquire about the foundations' programs and grants. Self-promotion should move these foundations to respond to inquiries and publicize their philanthropic activities. I am deeply concerned over foundation secrecy. This secrecy keeps the public ignorant of foundation activities and prevents the community from learning of the charitable assistance made available by these organizations.

At the least, a foundation should make public:

First. Its name, address, and phone numbers.

Second. Its trustees, officers, and key staff members.

Third. Its recent grants, including recipients' name, amounts, and purpose of grants.

Fourth. Its total grants awarded for the year.

Fifth. Its area of grant activity and its general guidelines in awarding financial assistance.

Sixth. Its grant application procedure, deadlines, and contact person.

The first four items are now required on informational tax forms established by the Internal Revenue Service. The Service at one time also required information on the last two items as to grant program areas, selection guidelines, and procedure. The Service viewed this latter information as necessary to determine whether the foundation had been organized for a tax-exempt purpose.

Subsequently, when the Service began to obtain such information from initial application for tax-exempt status, it dropped the requirement for this data on its annual informational return. However, the Tax Code requires not only that a foundation must be organized for an exempt purpose, but also that the foundation must be operated exclusively for their stated tax-exempt purpose.

To make this determination, the Service must obtain information as to foundation's grant guidelines, selection process, and application procedure. The statute authorizes the Service to require such information and the Service at one time did obtain such information. That information remains essential for the Service to administer the Code requirement and to inform the public as Congress directed.

The statutory requirement is plain. The Internal Revenue Service in implementing the statute, should obtain information as to the foundation's grant

guidelines, application process, and selection process.

If the Service does not on its own initiative reinstitute these questions on its informational return, I will join Senator DURENBURGER in obtaining remedial legislation to enforce the public information policy established by the Congress in 1969.

EXHIBIT 1

[From the Wall Street Journal, June 11, 1981]

IN NEED OF CHARITY: NONPROFIT GROUPS SCRAMBLE FOR PRIVATE DONATIONS TO REPLACE FEDERAL MONEY REAGAN WANTS TO CUT

(By Brooks Jackson)

TURKEY RUN FARM, VA.—The federal government used to budget $200,000 a year to operate this working replica of a Colonial subsistence farm, where workers in 18th Century costumes toil to raise tobacco and razorback hogs. Currently, the place is brought to you in part by a grant from Mobil Corp.

Because of budget constraints, the National Park Service last March briefly closed the 120-acre farm, located on a former landfill site just behind Central Intelligence Agency headquarters a few miles up the Potomac from Washington. But the farm is so popular locally, especially for gradeschool field trips, that local citizens quickly raised $30,000, including $2,000 from Mobil, to keep it open.

The money ran out Sunday, but the farm can keep going for now thanks to a little more fund-raising help from the newly formed Friends of Turkey Run Farm. The group has incorporated itself, obtained tax-exempt status and signed a 25-year lease with the Park Service, which is part of the Interior Department. As of this week, the farm's workers aren't government employes; they will be paid by the farm's friends.

But even though the farm's staff has been cut to five from eight, there is only enough money to meet payrolls through June. Current fund-raising efforts figure to bring in enough to keep going through August. The friends figure that they will need $120,000 a year to keep the stripped-down operation going.

MANY PLEAS FOR FUNDS

Turkey Run's friends are just one of many groups seeking private money to offset past government cuts and further cuts proposed by the Reagan administration. Telephones are ringing busily at foundations and at corporate philanthropy offices as supporters of programs ranging from the arts to low-income housing scramble to supplant endangered federal support. And for most of the fund seekers, the outlook is even bleaker than for Turkey Run.

"I've spent a lot of time on the phone saying 'No,'" says Bernard McDonald, a program officer at the Ford Foundation. "We can't possbily replace the federal money. . . . The foundation's entire appropriation for the year (about $100 million) doesn't equal one of the less significant programs that's being cut."

If private philanthropy won't save every federally supported endeavor facing the ax, conservatives such as Sen. John Warner aren't grieving. "Let the private sector be the judge and jury," the Virginia Republican says.

Sen. Warner, who was the administrator of the 1976 Bicentennial Commission, cites the patriotic galas that it helped organize—primarily with private money—as evidence that worthy undertakings will find nongovernmental support.

Many Republicans applaud the idea of substituting private charity for federal support, partly because of a belief that government has intruded too far into areas that are properly the domain of philanthropy. Sen. Warner and Reagan administration officials are optimistic that charitable giving will increase to fill much of the gap left by the budget cuts. The Sentor is so committed to the idea that he has persuaded Interior Secretary James Watt to appear with him at a $100-a-couple dinner tomorrow to raise money for Turkey Run Farm.

And indeed, there are some bright spots on the private fund-raising front. The Netherlands Carillon near Arlington National Cemetery is practically swimming in donations after a nationally broadcast report that, to save $3,000, the Park Service would cancel summer bell-ringing concerts. Nine local savings associations pledged enough to keep the bells clanging this year, and Japan's American Isuzu Motors is considering a donation for future years. "It so happens that 'Isuzu' means '50 bells,'" a company spokesman explains.

The arts also seem to be attracting extra support. Phillips Petroleum Co. was moved to make its first grant to a ballet company by word that President Reagan intends to cut funds for the arts. Phillips gave $125,000 to enable the Ballet West Troupe of Salt Lake City to mount a new production. Phillips, based in Bartlesville, Okla., previously had concentrated its giving on such things as education of geologists and support for the Boy Scouts.

"It doesn't matter if I like (ballet) or you like it," says Phillips' manager of corporate giving, Max Kissell. "It has to be maintained for those who *do* enjoy it."

GIFTS TO PUBLIC TV

Donations to public television are also setting records. Giving by viewers is up 29% this year throughout the Public Broadcasting Service.

But the increase doesn't seem prompted by Mr. Reagan's proposed 25% cut in federal aid to public broadcasting. Donations had increased at about the same rate last year and the year before. Nor are the increases enough to make up for lost federal dollars. "There's a lot of talk about how corporations are going to fill the gap, but it's just hot air," says Ward Chamberlin, president of Washington's public broadcasting station, WETA.

So a few months ago, Mr. Chamberlin set up a profit-making subsidiary, Wetacom Inc., which is expected to bring in about $600,000 this year and perhaps $1,250,000 next year. The company has produced television commercials for, among others, Ronald Reagan's presidential campaign.

LOBBYISTS FOR POOR

Lobbyists for the poor are finding the quest for private money a bit tougher. "The oil companies may be paying for ballet, but so far as we know they aren't giving low-income people reductions on the heating bills," says Catherine Crawford, an official of the National Low-Income Housing Coalition based in Washington.

Corporations and foundations are feeling much of the pressure from groups hoping to get private grants to replace disappearing federal dollars. But these sources of money are being stretched thin.

At RCA Corp., for example, more than 350 requests have poured in since the first of the year. "I would say it's damn close to 50% more than we ordinarily get," says Samuel Convissor, the vice president for corporate relations.

And despite the Reagan administration's optimism about increased private giving, a few stark facts stand out. One is that charitable donations haven't kept pace with inflation for the past two years. Another is that individuals donated only about 1.8% of their income to charity last year, down from 2% a decade earlier.

DROP IN FEDERAL AID

In fact, many nonprofit organizations have become largely dependent on the very kinds of federal dollars that are being cut. An analysis conducted for Independent Sector, a philanthropy lobby, estimates that nonprofit groups would lose $20 billion in federal support over the next four years as a result of the cuts.

The squeeze between rising costs and declining federal support is already pinching painfully in Pennington Gap, Va., where the nonprofit Tri-County Housing Corp. is groping for a way to stay in the business of building subsidized homes for the Appalachian poor. Layoffs of federally paid workers because of cuts in the Comprehensive Employment and Training Act program already have taken six construction workers and soon will remove another six.

Without the subsidized labor, Tri-County's manager, Michael Neff, sees little hope of building homes cheaply enough for low-income people to afford them, even with 1% mortgages from the Agriculture Department.

Like Mr. Chamberlin, Mr. Neff has also set up a profit-making subsidiary in the hope that it can build homes for the well-off and use the proceeds to subsidize the poor. Other nonprofit housing groups are considering this approach.

TWO KNOTTY PROBLEMS

Mr. Neff, however, faces two knotty problems. One is that he would have to build several homes for the rich to make enough money to build one for the poor he really cares about. The other is that so far there aren't any profits anyway. None of the half-dozen bids he has submitted has produced a response. "It's just been gloomy," Mr. Neff says.

Similarly disappointing are results reported in Wichita, where the local child-care association has found little success in getting local businessmen to provide more support for day-care centers.

Using $3,000 donated by the local Junior League, the association assembled a slide presentation to drum in the idea that better care for children makes better employes of the mothers. The association's executive director, Frankie Gibson, says she showed the program "at least 100 times over the last year." But the results, she says, were "pretty negligible."

Meanwhile, Mrs. Gibson says, many of the 26 local day-care centers may be forced to close if Mr. Reagan's proposed cuts in federal social-service programs go through. "I've been attending wakes for two weeks," she says.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. MATSUNAGA. I am happy to yield.

Mr. MOYNIHAN. Does the distinguished Senator think it would be appropriate if the Committee on Finance, or the appropriate subcommittee, were to hold hearings on this particular matter—sometime this fall or possibly early next year when we can bring some numbers together? The Senator raises a serious question which must be dealt with.

Mr. MATSUNAGA. I agree with the Senator from New York that it would be most appropriate to hold such hearings.

Mr. MOYNIHAN. I wonder if the Senator from Minnesota would agree that this is a subject which we should properly pursue and which might be the subject of legislation if that, in our judgment, would be appropriate.

Mr. DURENBERGER. If the Senator will yield, we have discussed this matter and I am very, very interested and very committed to having hearings on this subject. The whole matter of disclosure and other accountability issues are very important. As an interim step we have worked to get the Treasury to adjust the 990 form so that it more simply and adequately reflects this information.

I do intend to hold hearings on the whole issue of disclosure. Those who have the most to gain from these foundations should have greater access to a variety of foundations.

Mr. MOYNIHAN. May I say that has been a forthright response from the chairman. Let us act now if there are foundations that we can inquire into when the time comes.

Mr. DURENBERGER. I thank the Senator from New York. I move adoption of the amendment.

I yield back any remaining time.

Mr. MOYNIHAN. I yield back any remaining time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 275) was agreed to.

Mr. MOYNIHAN. I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. I understand there will be a record vote at 8 o'clock. I understand the distinguished Senator from Tennessee (Mr. SASSER) and the Senator from Arizona (Mr. DECONCINI) have an amendment. If that can be cleared, perhaps we can take care of it before 8 o'clock.

Mr. SASSER. I would say to the chairman that the Senator from Arizona (Mr. DECONCINI) is not on the floor. He wanted to discuss this matter with the chairman of the Finance Committee. As much as I would like to have it completed before 8 o'clock, I must defer until Senator DECONCINI is in the Chamber. I thank the Chair.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. DOLE. I yield.

UP AMENDMENT NO. 274

Mr. BAKER. Mr. President, it is now 2 minutes until 8. Since it is not possible to proceed with the next amendment at this time and since this will be a 15-minute rollcall vote, I ask unanimous consent to proceed with the rollcall previously ordered for 8 o'clock at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Kansas. The yeas and nays have been ordered and the clerk will call the roll.

Mr. STEVENS. I announce that the Senator from California (Mr. HAYAKAWA) is necessarily absent.

I also announce that the Senator from Utah (Mr. GARN) is absent due to death in the family.

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. INOUYE) and the Senator from Vermont (Mr. LEAHY) are necessarily absent.

The PRESIDING OFFICER (Mr. LUGAR). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 95, nays 1, as follows:

[Rollcall Vote No. 216]

YEAS—95

Abdnor	Exon	Moynihan
Andrews	Ford	Murkowski
Armstrong	Glenn	Nickles
Baker	Goldwater	Nunn
Baucus	Gorton	Packwood
Bentsen	Grassley	Pell
Biden	Hart	Percy
Boren	Hatch	Pressler

NAYS—1

Hollings

NOT VOTING—4

Garn	Inouye	Leahy
Hayakawa		

So Mr. DOLE's amendment (UP No. 274) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I indicated earlier that after the 8 o'clock vote——

Mr. ROBERT C. BYRD. Mr. President, may we have order?

Mr. METZENBAUM. May we have order in the Senate?

The PRESIDING OFFICER. May we have order in the Senate?

The majority leader wishes to make an announcement.

The majority leader.

Mr. BAKER. I thank the Chair.

Mr. President, I announced earlier that after 8 o'clock I would try to take stock of the situation and make some estimate of when we could finish this evening.

As I understand the arrangement now, the Senator from Tennessee (Mr. SASSER), my colleague, has an amendment to offer which will probably be accepted and may not take more than 3 to 5 minutes. After that I understand the Senator from Massachusetts (Mr. KENNEDY) will offer an amendment on which there will be a rollcall.

After that, I understand the Senator from Texas (Mr. TOWER) has an amendment, and he will wish a rollcall as well.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. TOWER. I do not wish a rollcall because I think there is widespread support. It is being supported on both sides of the aisle. Unless someone demands a rollcall, I will be prepared to vote by voice vote.

Mr. BAKER. Yes.

Mr. President, in any event it appears that there is time for at least two additional rollcalls tonight, and I estimate then that if we have time of 30 minutes and none yielded off the joint resolution and if the Senate grants the request I am about to make in a moment for 10-minute rollcall votes we should be able to do that and recess about 10 p.m.

That is good progress for this evening, and it is earlier, I think, than most of us thought we could do it. But I think that is a fair arrangement, and I am not going to take any additional time.

I hope that we can do that. I wish to see us be able to conclude action on this joint resolution at least by about 10 p.m. or thereabouts.

At this point, in order to expedite that and to improve the chances that we may realize on that, I ask unanimous consent that any rollcall votes ordered beyond this point this evening before the Senate recesses over until tomorrow be 10 minutes in length.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I wish to inform the Senator, the majority leader, that if it is at all possible I hope to be able to call up the day care amendment yet this evening. I think we are pretty close to agreement on it. If we are, of course, it would not require a rollcall vote. I wish to advise the majority leader.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. DOLE. We hope we can negotiate that. If we are given enough time, maybe we can work this out.

Mr. METZENBAUM. I did not mean to be crowding the Senator from Kansas. I think we are making good headway. I wish to advise the majority leader. I am hopeful we could get to it this evening and without objection accept it as an amendment to the joint resolution.

Mr. DOLE. Mr. President, I understand the distinguished Senator from Tennessee (Mr. SASSER) prefers to go after the amendment to be proposed by the Senator from Massachusetts (Mr. KENNEDY).

I ask unanimous consent that the pending amendment be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 276

(Purpose: To limit the increase in the unified estate and gift credit to estates and donors with interests in small farms and businesses)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 276.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 225, beginning on line 23, strike out all through page 226, line 6, and insert in lieu thereof the following:

(1) IN GENERAL.—Section 2010 (relating to unified credit against estate tax) is amended—

(A) by striking out "$47,000" in subsection (a) and inserting in lieu thereof "$47,000 ($192,800 in the case of a qualified small business estate)", and

(B) by adding at the end thereof the following new subsection:

"(e) QUALIFIED SMALL BUSINESS ESTATE.—For purposes of this section, the term 'qualified small business estate' means the estate of any decedent whose executor is eligible to elect the application of section 6166.

On page 226, strike out lines 9 though 15, and insert in lieu thereof the following:

(1) by striking out "$175,000" in paragraph (1) and inserting in lieu thereof "$175,000 ($600,000 in the case of a qualified small business estate (within the meaning of section 2010(e))"; and

On page 227, strike out lines 1 through 7, and insert in lieu thereof the following:

(1) AMOUNT OF CREDIT.—

(A) IN GENERAL.—Paragraph (1) of section 2505(a) (relating to unified credit against gift tax) is amended by striking out "$47,000" and inserting in lieu thereof "$47,000 ($192,800 in the case of a qualified small business donor)".

(B) QUALIFIED SMALL BUSINESS DONOR DEFINED.—Section 2505 is amended by adding at the end thereof the following new subsection:

"(e) SMALL BUSINESS DONOR.—For purposes of this section—

"(1) IN GENERAL.—The term 'small business donor' means a donor who owns an interest in a closely held business.

"(2) INTEREST IN A CLOSELY HELD BUSINESS.—The term 'interest in a closely held business' means—

"(A) an interest as a proprietor in a trade or business carried on as a proprietorship;

"(B) an interest as a partner in a partnership carrying on a trade or business, if—

"(i) 20 percent or more of the total capital interest in such partnership is owned by the donor, or

"(ii) such partnership had 15 or fewer partners; or

"(C) stock in a corporation carrying on a trade or business if—

"(i) 20 percent or more in value of the voting stock of such corporation is owned by the donor, or

"(ii) such corporation had 15 or fewer shareholders.

"(3) CERTAIN INTERESTS HELD BY HUSBAND AND WIFE.—Stock or a partnership interest which—

"(i) is community property of a husband and wife (or the income from which is community income) under the applicable community property law of a State, or

"(ii) is held by a husband and wife as joint tenants, tenants by the entirety, or tenants in common,

shall be treated as owned by one shareholder or one partner, as the case may be.

"(4) INDIRECT OWNERSHIP.—Property owned, directly or indirectly, by or for a corporation, partnership, estate, or trust shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries. For purposes of the preceding sentence, a person shall be treated as a beneficiary of any trust only if such person has a present interest in the trust.

"(5) CERTAIN INTERESTS HELD BY MEMBERS OF DONOR'S FAMILY.—All stock and all partnership interests held by the donor or by any member of his family (within the meaning of section 267(c)(4)) shall be treated as owned by the donor.

Mr. KENNEDY. Mr. President, as I understand there is a time limitation of a half hour; am I correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. KENNEDY. I will be glad to make it shorter, if there is a chance to get the attention of the Members.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, will the Senator yield.

Mr. KENNEDY. I yield.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I think we could make it short. I think there are a couple Members who asked when the next vote would be and I guessed about 10 minutes until 9. They could still make it if they hurry.

Mr. KENNEDY. I see.

Why do we not proceed and then if there are no other speakers on the amendment I will yield back the time.

Mr. President, this amendment deals with the provisions of the Finance Committee bill that relate to the estate tax exemption.

The Finance Committee proposal raises the estate tax exemption to $600,000 over 5 years. The purpose is to help small businesses and family farms.

The committee report has many references to family farms, closely held businesses, smaller estates, and family enterprises. The clear purpose of this provision is to provide relief to these taxpayers, to help small businesses and family farms. I think they are entitled to that relief.

But the Finance Committee bill phases in this relief over 5 years. And the principal reason for this long phase-in is that only one-third of the relief in the committee bill actually goes to family farms and small businesses. Only 15 percent of the relief goes to family farms, and approximately 15 percent more goes to small businesses.

The remaining two-thirds of the relief in this provision has nothing to do with family farms and small businesses. It goes to the wealthiest 3 percent of the families in this country, the richest individuals in our society.

My amendment grants the relief immediately to family farms and small businesses. It raises the estate tax exemption from $175,000 to $600,000, and it makes it effective next January—not 5 years from now, but immediately. At the same time, the amendment limits the relief to small businesses and family farms, the estates for whom the relief is intended.

In doing so, we will save billions of dollars over the next 5 years.

The Finance Committee's proposal will cost the Treasury over $10 billion between 1983 and 1986. This amendment will cost about $7 billion over the same period. Thus, the amendment saves $3 billion in revenues compared to the committee bill, and it provides faster relief to family farms and small businesses than the committee bill.

If we are really interested in helping the family farmers and the small business men and women, we should not delay that help and assistance. Other wealthy individuals do not deserve the sort of estate tax relief intended for family farms and small businesses.

Effectively we are holding hostage the family farmer and the small businessman until we are able to phase all of that program in to help the wealthiest individuals in this country with their estate programs.

I just do not feel that is warranted or justified, with the kind of costs that we are talking about at this time, given the budget constrictions and given the limitations and given the other provisions that have been accepted in this legislation on the tax rate.

So, Mr. President, I am prepared to withhold the remainder of my time.

Mr. GRASSLEY. Mr. President, I rise in opposition to this amendment, and I do it without reluctance because I remember the debate on the estate tax bill of 1976 when there were efforts to insert special provisions, some of which were untried and untested. One of those new provisions happened to be the carryover basis, and we know how that fouled up the estate tax so that even the best of lawyers could not settle estates. Finally, we had to repeal that terrible provision of the estate tax.

First, I think we ought to be reluctant to move into any areas that are not tried and tested in our reform of the general estate tax.

Second, I think we need to remember that the estate and gift taxes have always been aimed at huge concentrations of wealth. Because of inflation a $600,000 exclusion no longer represents such a large estate, especially when that exclusion will not reach that level until 1986.

There are purposes for estate taxes. One of them is to raise revenue for the Federal Treasury. I suggest to you that the estate tax does not raise much revenue for the Federal Treasury.

Another purpose of the estate tax is to redistribute some wealth, and I would suggest to you that it has done a very poor job of redistributing wealth, and I would suggest that this amendment is not going to do anything in that direction either.

You could raise a basic point here as to whether or not the estate tax is accomplishing its original purposes.

Of course, we must remember that the family farms and small businesses are the backbone of this economy, and I am sure the Senator——

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. GRASSLEY. I would rather not yield at this time.

The Senator from Massachusetts would agree with that statement, and I know that is the point of his amendment, but

you must keep in mind what has happened with estate taxes, with high inflation and high appreciation of property. The estate taxes are focusing on those areas that we originally intended to touch, but because of inflation and appreciation it is getting out of hand to a point where even small farms must be sold and small businesses must be sold to settle estates. If this amendment is passed even middle-income homeowners, who have owned moderate homes of $175,000, may some day be hit by this estate tax if this amendment were adopted.

It was never Congress intent in the original estate tax legislation to affect those estates.

While family farms and businesses are one of the major targets of estate tax relief, the problem is broader than that. The fact is that inflation, by increasing the dollar value of property, has increased the transfer tax burden even where real wealth has not increased.

Raising the estate tax exclusion will give taxpayers less reason to structure their holdings to avoid estate taxes. They may be more likely to undertake wealth-producing activities without fear that their holdings will be taxed away at death.

The present policy of taxing moderate-sized estates has done nothing to prevent the concentration of wealth. There is no justification for continuing that burden.

Estate taxes encourage investment in liquid assets that can be readily utilized to pay the tax rather than illiquid assets, such as physical capital.

In addition, they discourage risk-taking by putting a premium on establishing trusts for tax avoidance.

These problems become more acute when inflation makes estate taxes a significant problem for more people.

The bill simply attempts to address that problem and lessen the inhibiting effect of the estate tax.

Estate taxes need to be significantly reduced for all classes because they discourage savings. In many cases the motive for savings is the desire to leave bequests to ones' heirs. If you know that a bequest will be taxed heavily there is less reason to save, thus limiting estate taxes to moderate-sized estates can encourage savings and help people in long-term planning.

At current rates of inflation even modest family estates will not escape taxation over the next few years unless we make a significant change. Estate taxes are likely to weigh more heavily on these families than on the wealthier families who can afford sophisticated estate tax planning.

Now is the time for not only increasing the exemption so that a smaller number of people will be paying estate taxes, but it is also time to simplify the estate taxes, and this amendment would further complicate them.

I reserve the remainder of our time on this side.

Mr. KENNEDY. Mr. President, I have difficulty in following the logic of the Senator from Iowa. He makes a very strong case for the family farmer and the small businessman and businesswoman of Iowa and the rest of the country.

What possible reason, I ask the Senator from Iowa, is there to say to that family farmer in Iowa "You have to wait 5 years in order to get this estate tax relief," when you have got an amendment that is before the Senate of the United States tonight which says you can have it at once?

This is the approach suggested by one of the leading farm Senators, Senator KASSEBAUM, who has recommended such relief in S. 574. In fact, her bill would raise the estate tax exemption to $750,000, and it would limit the relief to farms.

This idea has been tested and tried and supported by Senators who represent agricultural States, and also, I would expect, by Senators from other parts of the country who are concerned about small businessmen and women. If it is right in 5 years, Senator, why is it not right tonight? That is my question to you.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. I want to remind the Senator from Massachusetts that the very consideration the Senator is talking about is provided for in a special use valuation of the estate taxes. It is the very group of people that you are concerned about helping who are helped right now, today, not 5 years down the road, and those classes deserve that help because they are the backbone of the American economy, the small businesses and the family farms.

But I want to remind the Senator, too, your exemption will not help the middle-income householder. We must implement across-the-board estate tax reform if we are to help the middle-income householder.

Mr. KENNEDY. The Senate Finance Committee itself understood that the special use provision was not adequate, because the committee also raised the exemption to $600,000. They understood the problem, and that is why they raised the exemption to $600,000.

Now, the reason they could not go to $600,000 right away is that two-thirds of the relief is going to other wealthy individuals who have nothing to do with family farms and small businesses. What sense does that make?

Even now, only the wealthiest 3 percent of the estates in the country are taxed at all. The other 97 percent fall below the level of the current estate tax exemption. And the committee bill will reduce this proportion even farther.

Can the Senator from Iowa tell me what percent of estates are going to pay any estate tax whatsoever under the Senate Finance Committee bill?

Mr. GRASSLEY. After 1986, three-tenths of 1 percent.

Mr. KENNEDY. Three-tenths of 1 percent.

Mr. GRASSLEY. Let me suggest to the Senator that when the estate tax reform went through in 1942 it was 1 percent of the estates. Because of inflation during the last 25 or 30 years, that got as high as 12 percent in 1976.

When we passed the 1976 legislation, the percentage of estates taxed worked its way down within a few years to 3 percent. Because of increased inflation and appreciation it is back up to about 8 or 9 percent today.

I would suggest to you that the original intent of the Congress when enacting the estate tax legislation of 1916, 1935, 1942 was to tax 1 percent of estates in this country. If it was a fair guide in terms of redistributing wealth and raising revenue for the Federal Treasury in those years, then it is a fair assumption for 1981 through 1986. Hopefully continued changes in the future will continue to result in that same percentage holding true; in other words, taxing the extremely large estates, not those of middle income Americans, whether they be small farmers or households.

Mr. KENNEDY. How large is the estate of the middle-income American? Does the Senator suggest here that the estate of the middle-income American is $600,000?

Mr. GRASSLEY. Let me suggest to the Senator from Massachusetts, to answer his question, that I do not exactly know what the average estate is, but it is surely higher than the $175,000 that he provides for the mass of the people who will be paying estate taxes.

Mr. KENNEDY. Mr. President, 93 percent of the estates in this country in 1976 were under $90,000. The Senator is hardly talking about a middle-class amendment, when about 90 percent of all the estates in the country are valued at less than half the figure he mentioned.

The objective of the Senate Finance Committee is to help the estates of family farmers and small businesses. We can achieve that goal this year, rather than waiting 5 years while the Senate Finance Committee bill is phased in for all individuals, including the wealthiest individuals and the wealthiest estates in the country. We can afford to do so if we limit the relief to those who deserve it and for whom it is intended—the family farms and small businesses of America.

Under the Senate Finance Committee bill, the cost of increasing the estate tax exemption would be $10 billion. Under the amendment that I offer, we save close to $4 billion, and we give relief much more rapidly to those who need it. There is no 5-year waiting period.

We can achieve the objective of the Senate Finance Committee in helping the family farms and the small businesses of this country. They have a problem—and they are entitled to relief. They are entitled to that relief now, not 5 years from now. Yet, the Senator from Iowa will make them wait 5 years for the relief they deserve today, if the position that he has taken is accepted.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes and 56 seconds remaining.

Mr. KENNEDY. I reserve the remainder of my time.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, this bill does give some advantage to farmers that it

does not give to others. In the valuation section provisions, for example, it gives farmers a better break than people in other lines of endeavor.

Mr. President, I for one would have difficulty understanding why other dedicated citizens are not worthy of equal consideration with farmers. One of my grandfathers was a carpenter and the other was a farmer. I loved them both, and I would think that both of them would have equal treatment before the law.

In my family, we had many lawyers; some of them were very dedicated people. We also had some public servants who were very dedicated people. We had family members who served in the Congress, and a father and uncle who were Governors of a State.

Can you really say that a man who is sufficiently well-thought of by the citizens that elected him Governor, that he was not equally deserving—I am not saying better deserving—of consideration than a farmer, or equally deserving of being considered one of God's children as one who is a small businessman? Any of our own children will be children of a U.S. Senator. My father was a U.S. Senator, a man whom I very much idolized and a very dedicated person—much misunderstood by some, but much beloved by those of us who knew him very well. Can we say that a person who dedicates his life to serving the public in public office is unworthy of equal tax treatment with a small businessman or farmer? I would not want to try to do that.

I would hate to try to go before my State legislature and tell all of those State legislators that, in my judgment, they were unworthy of equal tax treatment with farmers or small businessmen.

Are we to say that one who works for a company is not equally deserving of tax equality as one who happens to be the owner of the company? I would not want to make that case, Mr. President.

Now, the Senator would give one-third of our citizens special tax consideration as being more deserving of favorable treatment than the others.

I did not write the committee report. I just happen to be one who voted to give everybody what amounts to a $600,000 exemption.

I say to Senators, go out there and try to explain to those two-thirds of the people you are discriminating against with this Kennedy amendment why you did that to them. Explain to them why their old mamas and old daddies were not equally as deserving of consideration as other citizens. See if you can explain it to them.

I am not going to have to explain it, because I am going to vote to say that we are all first-class citizens, we are all getting the same treatment, we will all get the same $600,000 exemption. Above that, you pay a lot of taxes.

The Senator is worried about these wealthy people. He need not worry about that. There are a lot of people who have more than $600,000 to leave. They start out paying more than 30 percent and go up to 70 percent. Those people are going to pay a lot of taxes.

I am just saying that there is a lot of taxes to be paid by people who are very wealthy. I think that we would be unwise to try to say that because you are not a farmer or because you are not a small businessman, and because you might be a professional person or even because you might have inherited money from your old father or mother, that you should not be equally deserving of tax treatment on a par with other Americans who were doing the best they could do and what is right as the good Lord gave them the light to see it.

It is difficult for me to see why you should not have tax equality among good Americans who are dedicated to the service of their Nation and their communities and their fellowman, whether they be a farmer, or a small businessman, or professional person, or just some God-fearing person who goes to church and regularly contributes to the things that are good for society. Such a person should be equally deserving of tax equality with others.

Mr. GRASSLEY. Will the Senator yield?

Mr. LONG. I yield to the Senator.

Mr. GRASSLEY. I think the Senator raises a very valid point about treating all classes and occupations in American society equally under the estate tax.

To illustrate the point of the Senator's amendment, the estate of a person might include an average home here in the Washington area, worth approximately $100,000, a little bit of life insurance worth $50,000, household goods of $25,000, and maybe a car worth $10,000. So, you have an estate of $185,000. Let us suppose the mother and father were killed and left two minor children. This amendment would impose taxes on an estate just that modest so that those children would not have the benefit of what little bit of savings that family had.

So, I think the Senator from Louisiana is correct in pointing out that we have had too much special direction in estate taxes where we are experimenting with certain things that are not tried and tested. We really do not know their impact. We get back to the carryover basis, as an example.

The Senator from Massachusetts played a major part in defending the carryover basis. We knew how unworkable the carryover basis was in that 1976 legislation. Is it not possible that something like this may turn out to be as unworkable in 5 or 6 years as the carryover basis and require repeal?

It just seems to me that we ought to simplify estate taxes, not make them more complicated.

Mr. LONG. Mr. President, I have known what it is to go and try to explain to people why they had to pay a tax which they did not think was fair and which they did not think was right.

The PRESIDING OFFICER. The time has expired.

Mr. LONG. I yield myself 1 additional minute from the bill.

Mr. GRASSLEY. I yield time to the Senator from Louisiana.

The PRESIDING OFFICER. From the bill?

Mr. LONG. I yield myself a minute from the bill.

I have known what it is like to explain to people why they have had to pay a tax that was unjust and unfair. I am saying that anyone who wants to vote for this amendment can then go out and try to explain to two taxpayers out of three why they had to be hit with this very heavy tax; why you voted to exempt one taxpayer out of three because they were a farmer or a small business person.

You are not going to be successful. They are going to be very bitter about it, Mr. President, and I would hope that the amendment is not agreed to.

Mr. KENNEDY. Mr. President, I yield myself 2½ minutes.

Mr. President, I have often heard my good friend and colleague from Louisiana tell the story about the parish in Louisiana where half the people thought the world was round, and half the people thought it was flat. One day, they were interviewing a person to be a schoolteacher in the parish, and they told him what the people thought. And he said he could do the job, because he could teach the world round or teach it flat.

Tonight, when I hear the Senator from Louisiana making that strong egalitarian argument about fairness for American industry and fairness for all American taxpayers, I suspect he is teaching that the world is flat. We are all very well aware of the many differences in the way the tax code treats different individuals and corporations. We use the tax code to provide special incentives to some industries and not to others. And there are countless tax provisions that give special relief to those who are the most deserving—and to many who are not so deserving.

The fact of the matter is that the Senate and the Finance Committee have recognized again and again that there is a special merit in the needs of the family farmers and the small businesses of this country. In many important ways, they are different from other taxpayers in our society. With respect to the estate tax, I think we can all agree that no family farm and no small business should have to be sold because the owner has died and the heirs cannot pay the estate tax. Yet that happens all too often under the estate tax laws today. This bill is designed to provide relief to prevent that from happening.

But if people have IBM stock or A.T. & T. stock in their estates, they do not face a similar danger. Their estates have no liquidity problems. They can sell part of the stock in order to pay their estate taxes.

What we are talking about is not the average taxpayer in this country. What we are basically talking about, if this bill is enacted is relief for some of the wealthiest families in the country, disguised as relief for family farms and small business.

The Senate Finance Committee has recognized that there is a special need, because of inflation, to ease the burden of estate taxes on family farms and small businesses.

That is what the committee report says, again and again. They make no case for such relief they provide for the large number of other wealthy individuals who are helped by this bill at a cost of billions of dollars to the Treasury, but who would not recognize a family farm or a small business if they saw one.

So let us deal with the serious problem of family farms and small businesses. Let us deal with it now—not from now. Let us not pretend that we are helping them, when in fact we are only using them as a smokescreen to provide massive relief to others who do not deserve it.

Finally, as to the example that was given by my friend and colleague from Iowa about the two young orphans, I am sure the distinguished Senator from Iowa understands they would pay no estate tax because of the special orphan deduction. I thank the Senator for yielding.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from California (Mr. HAYAKAWA) is necessarily absent.

I also announce that the Senator from Utah (Mr. GARN) is absent due to death in the family.

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. INOUYE) and the Senator from Vermont (Mr. LEAHY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 9, nays 87, as follows:

[Rollcall Vote No. 217 Leg.]

YEAS—9

Dodd	Kennedy	Metzenbaum
Eagleton	Levin	Sarbanes
Exon	Mathias	Williams

NAYS—87

Abdnor	Ford	Nickles

Durenberger	Moynihan	
East	Murkowski	

NOT VOTING—4

Garn	Inouye	Leahy
Hayakawa		

So Mr. KENNEDY's amendment (UP No. 276) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The vote now recurs on the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent to lay that amendment aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 277

(Purpose: Allowing each member of an affiliated group to make certain ACRS elections)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ) for himself and Mr. BENTSEN proposes an unprinted amendment numbered 277:

At the end of the bill, add the following new title:

TITLE VI—SAVINGS AND LOAN ASSOCIATIONS

SEC. 601. REORGANIZATIONS INVOLVING FINANCIALLY TROUBLED THRIFT INSTITUTIONS.

Amendment of section 368(a)(3)(D).—Section 368(a)(3)(D) of the Internal Revenue Code of 1954 (relating to agency receivership proceedings which involve financial institutions) is amended to read as follows:

"(D) Agency proceedings which involve financial institutions.—

"(i) For purpose of subparagraphs (A) and (B)—

"(I) In the case of a receivership, foreclosure, or similar proceeding before a Federal or State agency involving a financial institution to which section 585 applies, the agency shall be treated as a court, and

"(II) In the case of a financial institution to which section 593 applies, the term 'title 11 or similar case' means only a case in which the Board (which will be treated as the court in such case) makes the certification described in clause (ii).

"(ii) A transaction otherwise meeting the requirements of subparagraph (G) of paragraph (1), in which the transferor corporation is a financial institution to which section 593 applies, will not be disqualified as a reorganization if no stock or securities of the corporation to which the assets are transferred are received or distributed, but only if all of the following conditions are met:

"(I) the requirements of subparagraphs (A) and (B) of section 354(b)(1) are met with respect to the acquisition of the assets,

"(II) substantially all of the liabilities of the transferor immediately before the transfer become, as a result of the transfer, liabilities of the transferee, and

"(III) the Board certifies that the grounds set forth in 12 U.S.C. § 1464(d)(6)(A) (i), (ii), or (iii) exist with respect to the transferor or will exist in the near future in the absence of action by the Board.

"(iii) For purposes of this subparagraph, the Board means the Federal Home Loan Bank Board or the Federal Savings and Loan Insurance Corporation or, if neither has supervisory authority with respect to the transferor, the equivalent State authority."

SEC. 602. LIMITATIONS ON CARRYOVERS OF FINANCIAL INSTITUTIONS.

Section 382(b)(7) of the Internal Revenue Code of 1954 (relating to reduction of net operating loss carryovers in title II or similar cases), as added by section 2(d) of P.L. 96-589, is amended to read as follows:

"(7) Special rule for reorganizations in title II or similar cases.—For purposes of this subsection—

"(A) a creditor who receives stock in a reorganization in a title II or similar case (within the meaning of section 368(a)(3)(A)) shall be treated as a stockholder immediately before the reorganization and

"(B) in a transaction qualifying under section 368(a)(3)(D)(ii)—

"(i) a depositor in the transferor shall be treated as a stockholder immediately before the reorganization of the loss corporation,

"(ii) deposits in the transferor which become, as a result of the transfer, deposits in the transferee shall be treated as stock of the acquiring corporation owned as a result of owning stock of the loss corporation, and

"(iii) the fair market value of the outstanding stock of the acquiring corporation shall include the amount of deposits in the acquiring corporation immediately after the reorganization.

SEC. 603. RESERVES FOR LOSSES ON LOANS.

Paragraph (1) of section 593(e) of the Internal Revenue Code of 1954 (relating to distributions to shareholders of a domestic building and loan association) is amended by striking out "applies." in the last sentence thereof and substituting therefor the following: "applies, or to any distribution with respect to an interest in an association, if such interest was originally received by the Federal Savings and Loan Insurance Corporation in exchange for financial assistance pursuant to section 406(f) of the National Housing Act (12 U.S.C. sec. 1729(f)).".

SEC. 604. FSLIC FINANCIAL ASSISTANCE.

(a) Part II of subchapter H of Chapter 1 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new section:

"SEC. 597. FSLIC FINANCIAL ASSISTANCE.

"(a) EXCLUSION FROM GROSS INCOME.—Gross income of a domestic building and loan association does not include any amount of money or other property received from the Federal Savings and Loan Insurance Corporation pursuant to section 406(f) of the National Housing Act (12 U.S.C. sec. 1729(f)), regardless of whether any note or other instrument is issued in exchange therefor.

"(b) NO REDUCTION IN BASIS OF ASSETS.—No reduction in the basis of assets of a domestic building and loan association shall be made on account of money or other property received under the circumstances referred to in subsection (a)."

(b) CLERICAL AMENDMENTS.—The table of sections for Part II of subchapter H of Chapter 1 of the Internal Revenue Code of 1954 is amended by inserting after the item relating to section 596 the following:

"Sec. 597. FSLIC financial assistance".

SEC. 605. EFFECTIVE DATES.

(a) The amendment made by sections 601 and 602 shall apply to any transfer made on or after January 1, 1981.

(b) The amendment made by section 603 shall apply to any distribution made on or after January 1, 1981.

(c) The amendment made by section 604 shall apply to any payment made on or after January 1, 1981.

Mr. BOSCHWITZ. Mr. President, I think we can dispose of this amendment rather quickly. It has been cleared with the chairman of the Committee on Finance and with the ranking minority member.

The PRESIDING OFFICER (Mr. WARNER). The Senators are requested to clear the well and aisles.

Mr. BOSCHWITZ. Mr. President, I offer this amendment on behalf of myself and the Senator from Texas (Mr. BENTSEN), and, as I said, I believe we can dispose of the amendment rather quickly. It has been cleared with the chairman of the Finance Committee and the Treasury Department. It has been supported by the Federal Home Loan Bank Board, the distinguished ranking minority member of the Finance Committee, and the U.S. League of Savings and Loans.

This amendment would facilitate the infusion of capital to a failing savings and loan or the merger of a savings and loan with another financial institution by clarifying that these transactions are nontaxable events.

The other alternative to capital infusions or mergers in the case of a troubled savings and loan would be liquidation by the Federal Savings and Loan Insurance Corporation. This would require payment out of their insurance funds to all insured depositors and would have unfortunate results for noninsured depositors. The potential cost to the Government, depositors and shareholders could be significant. This amendment will help the Federal Home Loan Bank Board avoid these consequences.

Under current law, there is some uncertainty about the tax consequences of capital infusions to savings and loans or mergers of savings and loans. This uncertainty deters potential investors and will likely result in the more costly liquidation pay outs by the FSLIC.

Deeming a merger or capital infusion to be a taxable event will deny possible benefits to a financial institution taking over a troubled savings and loan and would trigger additional tax liability of a savings and loan which received additional capital.

For example, if new capital is provided it may be considered a contribution to capital by a nonshareholder, which would require the savings and loan association to reduce its tax basis on certain assets under section 362(e) of the Internal Revenue Code.

Also, the repayment of this capital might be considered a redemption of capital stock from the association's bad debt reserve, which would trigger payment of ordinary income tax. This amendment would assure that these transactions are tax-exempt and thus allow the FSLIC to loan capital to weakened savings and loans until they are back on their feet. If not, we could end up with a Government bail-out of depositors, a result that could ultimately prove very costly.

The need for this amendment is immediate. The Federal Home Loan Bank Board currently has 404 institutions on their troubled list. Through June of this year we have already seen as many mergers as took place in all of 1980. This year there has also been the first liquidation of a savings and loan since 1971.

Surely an infusion of capital to a troubled institution to allow it to become viable again is a far better solution than letting it go under. And surely a merger of a failing savings and loan serves the public interest better than liquidation.

This amendment in no way impacts upon the all-savers amendment which was adopted last Thursday. The amendment addresses a set of problems different from that of the all-savers amendment, and it is equally important in these circumstances.

I have been informed by the Treasury Department that there is no revenue loss in this amendment, and they have no objection to it.

I hope we can now move to accept this amendment, and I move that we do accept the amendment.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Richard T. Pratt, Chairman of the Federal Home Loan Bank Board.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERAL HOME LOAN BANK BOARD,
Washington, D.C., July 23, 1981.

Hon. RUDY BOSCHWITZ,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BOSCHWITZ: I am writing to seek your support for an amendment to H.J. Res. 266 that would resolve several technical tax issues that may otherwise impede the effectiveness of the Federal Savings and Loan Insurance Corporation's actions with respect to ailing insured savings and loan associations.

Pursuant to the amendment, subsections of the Bankruptcy Tax Act of 1980 would be clarified to provide that all mergers instituted for supervisory reasons by the FSLIC, the Federal insurance corporation directed by the Federal Home Loan Bank Board, would be tax-free reorganizations under Section 368(a)(1)(G) of the Code. In addition, Section 382 would be amended to ensure that losses of weakened associations would be carried over to acquiring entities to the same extent that loss carryovers of other types of businesses can be transferred in tax-free reogranizations. Finally, Section 593 would be amended and a new Section 597 would be enacted to ensure that no tax liability would result from FSLIC capital infusions to weakened associations and subsequent repayments of the infusions by rehabilitated associations.

In order to prevent a default or restore an insured institution in default to normal operations, the FSLIC may make loans to, purchase the assets of, make contributions to, or arrange the merger of a failing institution. If liquidation is the least costly alternative, the FSLIC will liquidate the institution and effect a payout of insured accounts. The Board recognizes the extraordinary nature of mergers arranged in a supervisory context and exempts them from certain procedural requirements and general rules usually applicable in non-supervisory cases. I believe that the Internal Revenue Code should also reflect the extraordinary nature of these supervisory circumstances and afford tax-exempt status to FSLIC imposed supervisory mergers and assistance activities.

A literal reading of the Internal Revenue Code might result in FSLIC assistance to an association in the form of cash or an interest bearing note being treated as a contribution to capital by a non-shareholder, with reductions in the basis of assets required under Section 362(c). Also, if a recipient institution issues a mutual capital certificate or similar equity instrument in consideration for the FSLIC assistance, repayment of the assistance might be determined to be subject to the rules of Section 593(e) regarding redemption of capital stock and produce adverse tax consequences to the association. Finally, there are varying degrees of uncertainty concerning the tax-free reorganization status of various types of supervisory mergers, in particular, mergers of a mutual association into a stock association and mergers of a stock association into a mutual association.

In many instances, these potential adverse consequences could significantly increase the cost of supervisory activities to the FSLIC. In some instances, the increased costs resulting from adverse tax consequences could cause the cost of FSLIC assistance to exceed the cost of liquidation, and thus, require a liquidation that otherwise could be avoided. In all instances, the uncertainty of the tax ramifications of FSLIC assistance adds a significant degree of technical difficulty, delay and doubt to the activities of the FSLIC and its relationships with involved insured institutions and other potential acquirors of failing institutions.

At the present time, the resolution of two sensitive supervisory mergers—one involving an insolvent association and one involving an almost insolvent association—have been significantly delayed due to the inability to resolve the tax treatment for the mergers. And the number of supervisory mergers raising tax problems absent adoption of this amendment may increase significantly in the coming months. I believe that the Board's exercise of its statutory responsibilities should not be hindered by the rigid imposition of rules that are inappropriate in a supervisory context, but may be valid in non-supervisory situations.

Resolution of these matters will greatly facilitate assistance activities in this period of increased pressure upon the FSLIC to conserve its assets while, at the same time, protecting depositors in FSLIC insured savings and loan associations.

Sincerely,

RICHARD T. PRATT,
Chairman.

Mr. SARBANES. Mr. President, will the Senator yield for a question?

Mr. BOSCHWITZ. I yield.

Mr. SARBANES. Does the amendment affect in any way the nature of institutions which can engage in these mergers or the geographical territory in which such mergers can be engaged?

Does the amendment except existing law in that regard and seek only to clarify a nontax consequence of such a merger?

Mr. BOSCHWITZ. That is correct. The latter is correct.

Mr. SARBANES. I thank the Senator.

Mr. DOLE. Mr. President, I understand that the Senator from Minnesota has discussed this amendment with the Senator from Louisiana, and Senator BENTSEN is a cosponsor of the amendment.

We are prepared to accept the amendment and are prepared to yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 277) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move that

the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. The questioning is on agreeing to the motion.

The motion was agreed to.

AMENDMENT NO. 507

(Purpose: To amend the Internal Revenue Code of 1954 to allow the credit for production of natural gas from certain nonconventional sources only if such natural gas was sold at a lawful price without regard to section 107 and subtitle B of title I of the Natural Gas Policy Act of 1978)

Mr. TOWER. Mr. President, I call up my amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an amendment numbered 507.

Mr. TOWER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert: That (a) subsection (e) of section 44D of the Internal Revenue Code of 1954 (relating to the credit for producing fuel from a nonconventional source) is amended to read as follows:

"(e) APPLICATION WITH THE NATURAL GAS POLICY ACT OF 1978.—

"(1) NO CREDIT IF SECTION 107 OF THE NATURAL GAS POLICY ACT OF 1978 IS UTILIZED.—Subsection (a) shall apply with respect to any natural gas described in subsection (c)(1)(B)(i) which is sold during the taxable year only if such natural gas is sold at a lawful price which is determined without regard to the provisions of section 107 of the Natural Gas Policy Act of 1978 and subtitle E of title I of such Act.

"(2) TREATMENT OF THIS SECTION.—For purposes of section 107(d) of the Natural Gas Policy Act of 1978, this section shall not be treated as allowing any credit, exemption, deduction, or comparable adjustment applicable to the computation of any Federal tax.".

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1979.

Mr. TOWER. Mr. President, I ask unanimous consent that the names of Senators BENTSEN, JOHNSTON, and HART be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I ask unanimous consent that I be permitted to amend my amendment, simply to correct a typographical error.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. On page 1, line 10, of the amendment, the letter "B" should be substituted for the letter "E." That is a typographical error.

The PRESIDING OFFICER. The amendment will be so modified.

Mr. TOWER. Mr. President, my amendment is of a technical nature, is noncontroversial, and, according to assurances by the Joint Committee on Taxation and the Treasury Department, is revenue neutral. It is offered merely to eliminate an unintended problem facing producers—usually small, independent producers—who are prejudiced by the interaction of two laws, the Natural Gas Policy Act of 1978 (NGPA) and the Windfall Profit Tax Act of 1980, with regard to natural gas production from so-called tight sands formations.

Mr. President, the text of this amendment is identical to that of S. 1183, introduced on May 14, 1981, by my distinguished colleague, Senator BENTSEN, and cosponsored by Senators MCCLURE, BOREN, JOHNSTON, RANDOLPH, and myself.

The problem which my amendment seeks to relieve is the unintentional "whipsaw" that the interaction of these two laws imposes on many independent producers of "tight sands" gas, who are denied the special incentive ceiling price established by the Federal Energy Regulatory Commission (FERC) for production of high cost, "tight sands" gas.

The problem arises from a provision of the Windfall Profit Tax Act, section 231, which triggers section 107 of the NGPA, which requires producers to take the affirmative step of filing an election with the FERC on the date surface drilling commenced. This is required, Mr. President, even though it is usually not the case for producers to know whether they will be fortunate enough to find natural gas, let alone what kind. According to the terms of the NGPA, however, failure of the producers to be clairvoyant by filing, on day 1, an election with the FERC precludes the producers from selling such gas at the higher incentive price that is otherwise available to, and intended for them. The alternative of taking the tax credit, made available under the Windfall Profits Tax Act, however, is without real value because this credit is phased down under the statute so as to provide little in the way of production incentive. The result, Mr. President, is that for these producers it is simply no longer economical to enter into "tight sands" gas production.

Mr. President, it is clear from the legislative history of the acts that Congress intended to offer producers a choice between the incentive price and the tax credit. My amendment clarifies this intention, but, like S. 1183, would bar the producer from having the possible double benefit of collecting both the credit and higher prices.

This amendment is necessary, Mr. President, because under existing law there is no fair chance for these producers to make the proper election required by the terms of the NGPA. In fact, many small producers are not always so sophisticated as to be aware of the requirement that they must anticipate the need for an election. As a result, many producers, who are denied the incentive ceiling price at which such natural gas may be sold, are eligible for only a phased-out credit for their tight sands gas production.

Mr. President, this is a technical amendment, one that, I understand, has no revenue impact. To describe the problem in more detail, however, I ask unanimous consent that the text of a legal memorandum on this matter be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

FEBRUARY 23, 1981.

PRODUCERS PRECLUDED FROM INCENTIVE PRICE ON TIGHT SANDS GAS

PROBLEM

Due to the unanticipated mechanical operation of certain filing provisions in the Natural Gas Policy Act of 1978 (NGPA) and the Crude Oil Windfall Profit Tax Act of 1980, many natural gas producers may be arbitrarily and unjustly precluded from receiving the special incentive ceiling price established by the Federal Energy Regulatory Commission (FERC) for production of high cost natural gas from geological formations known as "tight sands."

INTERACTION OF WINDFALL PROFIT TAX ACT AND NATURAL GAS POLICY ACT

The enactment of the Windfall Profit Tax Act triggers the application of Section 107 (d) of the NGPA, requiring producers to file an election with the FERC on or before the later of May 2, 1980 (i.e., the 30th day after the enactment of the Windfall Profit Tax Act) or the date on which surface drilling of the well began in order to collect the special incentive ceiling price in lieu of a tax credit provided for such production by Section 231 of the Windfall Profit Tax Act. If producers did not timely make such an election, they may be precluded from collecting any incentive price whatsoever (since the tax credit has been rendered worthless under a phase-out formula) and are thereby economically precluded from entering into tight sands production.

NEED FOR PRODUCTION INCENTIVES

Tight sands are made up of low porosity rock formations containing trapped natural gas. A gas producer who drills into such formations must utilize expensive and risky production technologies such as hydraulic fracturing in order to encourage the flow of tight sands gas to the well.

Congress clearly recognized the need to encourage production of the estimated 150 Tcf (trillion cubic feet) in recoverable reserves of tight sands gas when it authorized the FERC to set a special incentive price. The FERC also recognized the need to compensate producers for the extraordinary risks and costs when it established the incentive ceiling price at a level much higher than might otherwise be collected for such gas. At this time, certain low porosity geological formations in Texas, Colorado, Wyoming, New Mexico, and Louisiana have been formally designated as tight sands, and formations in Ohio, Pennsylvania, and West Virginia are being considered for such designation. However, many producers may not be able to collect the incentive price in lieu of the phased out tax credit due to the operation of the election procedure.

EXAMPLES OF INABILITY TO COLLECT INCENTIVE PRICE

In the following situations, for example, the producer may be unable to collect the special incentive ceiling price:

(i) A producer, who still has not filed the election required by NGPA Section 107(d) to be made on or before either May 2, 1980 or the date surface drilling of the well began, has an interest in a well surface drilled after January 1, 1980 and discovers tight sands gas in an area with no history of tight sands production.

(ii) A producer who simply failed to file the election before commencing surface drilling discovers tight sands gas in an area with no history of tight sands production.

(iii) A producer who elcted after May 2, 1980 to collect the special incentive ceiling price on all future wells subsequently reenters and deepens an existing dry hole surface drilled before July 16, 1979 and discovers tight sands gas.

(iv) A company formed after May 2, 1980 enters into production activities, files a

blanket election to cover all of its wells, but like the producer in example (iii) reenters a dry hole surface drilled before July 16, 1979 and discovers tight sands gas.

(v) A producer acquires an existing well surface drilled in 1980 for which no election was ever made, which is now producing tight sands gas.

(vi) A royalty interest owner (including an overriding royalty interest owner able to take his gas in kind) who has not filed his election with the FERC on or before the later of May 2, 1980 or the date surface drilling began arguably is precluded.

NEED FOR LEGISLATIVE REMEDY

In order to realize full production of the nation's vast reserves of tight sands gas as soon as possible, all producers must be provided with a meaningful incentive to drill for and produce tight sands gas. It is clear from the legislative history that Congress intended to offer producers a choice between the incentive price and the tax credit in order to promote both drilling for and production of tight formation gas. However, because in circumstances such as the ones described above many producers had no fair chance to make an election, or no reason to anticipate they would need to make an election, or in other circumstances because of misunderstandings regarding the need to affirmatively elect the incentive price, many producers may be relegated to a phased out tax credit for their tight sands gas production.

This effective denial of both the incentive price and the tax credit acts as a disincentive to tight sands production for these producers and is clearly contrary to the intent of Congress.

Mr. JOHNSTON. Mr. President, I introduced S. 1183, which was a Bentsen bill, cosponsored by me, Mr. BOREN, Mr. TOWER, Mr. MCCLURE, and Mr. RANDOLPH.

Under the present law, because of the interaction of the windfall profit tax and the Natural Gas Policy Act, it has become virtually impossible to produce tight sands gas. Under the Natural Gas Policy Act, we provided for a higher incentive price for tight sands gas. However, under the windfall profit tax, you must make an election as to whether you are going to get the tax credit provided for under the windfall profit tax—you must make that election between tight sands and the tax credit at the time you penetrate the earth.

Producers do not know what kind of gas they are going to get when they first penetrate the earth. They do not know whether they are going to get gas at all, let alone tight sands gas. Consequently, virtually no one makes the election for tight sands gas; and if they find the tight sands gas, then the great expense of producing tight sands gas comes after you find it, because it requires what we call "fracking," bringing in the expensive equipment—in effect, fracturing this big formation with the high-pressure introduction of sand and other materials to open up the formation. It means that you simply cannot produce it. That was never intended.

The Tower amendment, which I have cosponsored, will indeed and in fact clear up that problem. So I hope that my colleagues—particularly on this side of the aisle—will realize that the amendment is not one to give some fabulous bonanza to oil companies but, rather, is a means to carry out the intent of Congress under the Natural Gas Policy Act, that intent being to give the higher incentive price to tight sands, tight sands having already been described in the Natural Gas Policy Act and rules having been promulgated.

So I hope my colleagues will go along with the amendment. As I understand it, it has zero revenue effect and is a very needed amendment.

Mr. BENTSEN. Mr. President, I am pleased to join my distinguished colleague, the senior Senator from Texas, in urging our colleagues to adopt a technical, noncontroversial amendment on high-cost gas. The amendment we are presenting is identical to S. 1183, which I introduced on May 14 of this year.

Let me briefly explain the problem. An unforeseen technical problem has arisen for natural gas producers due to the mechanical interaction of the tax credit provisions of the Crude Oil Windfall Profit Tax Act of 1980 (COWPTA) and certain filing requirements contained in the Natural Gas Policy Act of 1978 (NGPA). As a result, many taxpayers who have interests in high-cost gas wells are unable to receive either of the two economic incentives that Congress provided under these statutes to encourage the production of high-cost gas.

The COWPTA provides a tax credit for certain high-cost gas production, including gas produced from geopressured brine, coal seams, devonian shale, and tight formations. In addition, Congress in the NGPA deregulated the price of high-cost gas produced from devonian shale, geopressured brine, and coal seams, and authorized the Federal Energy Regulatory Commission to set a special incentive price for gas from tight formations.

The enactment of the COWPTA tax credit triggered a restrictive filing requirement contained in section 107(d) of the NGPA. Under this provision, producers who wish to collect any deregulated or incentive price in lieu of the tax credit must file an election with the FERC on or before the later of May 2, 1980—that is, the 30th day after enactment of the Windfall Profit Tax Act—or the date on which surface drilling of the well began. Thus, a producer who did not make a timely filing to elect the deregulated or incentive price is regulated to the COWPTA tax credit.

However, the COWPTA tax credit has already been phased out for high-cost gas produced from coal seams, geopressured brine or tight formations under a formula contained in the COWPTA. The credit phases out entirely when the average weighted price of uncontrolled crude oil reaches $32.14 per barrel. The average deregulated price of crude oil is now over $33 per barrel, so that it is unlikely that the tax credit will ever be worth anything for producers of these three types of high-cost gas.

Nevertheless, this "credit" triggers the NGPA election requirement. Many producers did not file a timely election that satisfied this requirement and, consequently, can neither charge the incentive or deregulated price nor collect a real tax credit. In many cases, for example, it is extremely difficult, if not impossible for a producer to know what type of formation he will encounter prior to drilling in a wildcat area. Therefore, the producer will not realize that he has missed the election deadline until he has completed the well.

Congress clearly intended to permit all producers to collect either a higher incentive price or a meaningful tax credit in order to promote both drilling for and production of high-cost natural gas. Congress recognized that producers should be compensated for the extra costs and risks of producing such, appropriately labeled, high-cost gas. However, Congress did not anticipate that, due to the technical operation of the two statutes, many producers would have no fair chance to make an election or no reason to anticipate they would need to make an election.

Our amendment provides that a producer will automatically be eligible to receive the incentive or deregulated price for his high-cost gas production. However, a producer may collect any credit for which he is eligible instead of the higher incentive or deregulated price. Our intent to prevent "double-dipping", or collection of both the credit and higher prices, is thus preserved. In addition, this amendment will obviate the need for filing for the deregulated or incentive price, thus reducing thousands of needless filings by producers. This amendment will also provide a real incentive for the production of high-cost natural gas, and finally, the level of the credit is unchanged.

At the same time this proposal preserves the availability of the tax credit for gas produced from Devonian shale, which is the only type of high-cost gas for which the credit provided by the COWPTA is real and substantial. The credit for Devonian shale gas is not tied to the price of decontrolled crude, until 1983 and thereafter. For 1980, 1981, and 1982, this credit will not start phasing out until the average sale price of Devonian shale gas reaches $4.05 per mmBTU, and will not entirely phase out until that average price reaches $5.08 per mmBTU. The average price of this gas is now less than $3 per mmBTU, and will probably not increase markedly in the next year or two. Accordingly, this proposal lets Devonian shale producers collect the credit for these years, and then receive the deregulated price thereafter.

Mr. President, this election problem is emerging as an industrywide and nationproblem for small and independent producers of natural gas. This amendment would remedy this problem by establishing a new but more workable and fair election requirement than exists under current law. Because this problem is so important to maximize gas production in this country and because it should be remedied as soon as possible, I hope that my colleagues will adopt this simple provision. The effective denial of both the incentive price and the tax credit acts as a disincentive to high-cost gas production for many producers and is clearly contrary to the intent of Congress and the best interest of this country.

Mr. TOWER. Mr. President, it is my

understanding that the two managers of the joint resolution are prepared to accept this amendment. I am prepared to let it go by voice vote and yield back the remainder of my time if there is no time taken in opposition.

The PRESIDING OFFICER. Has all time been yielded back?

All time having been yielded back, the question is on agreeing to the amendment of the Senator from Texas.

The amendment (No. 507) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SASSER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 278

(Purpose: To amend the Internal Revenue Code of 1954 to simplify the excise tax provisions relating to certain sporting goods)

Mr. SASSER. Mr. President, I send an amendment to the desk on behalf of myself and Senator DECONCINI, Senator MCCLURE, Senator BENTSEN, and Senator SYMMS, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. SASSER) for himself and Mr. DECONCINI, Mr. MCCLURE, Mr. BENTSEN, and Mr. SYMMS proposes an unprinted amendment No. 278.

Mr. SASSER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 171, add the following new section after line 16:

"SEC. 253. EXCISE TAX SIMPLIFICATION.

"(a) IN GENERAL.—Section 4182 of the Internal Revenue Code of 1954 (relating to certain excise taxes) is amended by redesignating subparagraph (c) as (e) and by inserting after subparagraph (b) the following new subparagraphs:

"(c) MANUFACTURER, PRODUCER.—For the purpose of this subchapter, a manufacturer or producer shall be deemed a person who engages in the business of manufacturing and produces more than 50 items per annum.

"(d) SHELLS AND CARTRIDGES.—There shall be no tax imposed on an individual who handloads shells or cartridges for himself or others only on a not-for-profit basis.".

"(b) EFFECTIVE DATE.—The provisions of this section shall take effect upon enactment, except that the provisions of subparagraph (c) of section 4182 of the Internal Revenue Act of 1954, as amended by this section, shall apply to all pistols, revolvers, and firearms sold after December 31, 1975.

Mr. SASSER. Mr. President, this amendment is a noncontroversial amendment which I have discussed with the distinguished floor managers of the joint resolution, Senator DOLE and Senator LONG, and I understand that it is acceptable to both of these distinguished Senators.

This amendment does two things. First, it provides for a sensible and consistent definition of a manufacturer so that the Nation's custom gunsmiths will not be liable for Federal manufacturer excise taxes of 10 to 11 percent that are now imposed on American firearms producers.

The problem that we have today is that there are many, many custom gunsmiths throughout the Nation that manufacture only a few firearms a year and do not properly regard themselves as firearms manufacturers. These custom gunsmiths produce a limited number of handcrafted guns either for themselves or for gun collectors throughout the country. They really are not firearms manufacturers.

But because of some inconsistencies in the definition of firearms manufacturers, there are a number of custom gunsmiths who contend that the IRS will improperly judge them to be firearms manufacturers and thereby be held liable for back excise taxes. Indeed, there is one reported case, I understand, where the IRS spent nearly 3½ years and a considerable sum of money to collect some $10,000 in back taxes from a custom gunsmith.

But these custom gunsmiths fear that their small businesses and hobbies will be disrupted or even wiped out by the threat of an IRS ruling that might hold them liable for back taxes.

Mr. President, there has been so much confusion in this area, it is my understanding that very little tax revenue has thus far been collected from custom gunsmiths so this amendment has a negligible revenue impact. Adoption of this amendment will lead to consistent enforcement of our tax laws.

The second part of this amendment provides that individuals who handload shells or cartridges for themselves or others shall also not be liable for excise taxes when they perform such services on a not-for-profit basis.

Passage of this amendment means that custom gunsmiths and American sportsmen will be free from arbitrary and unfair IRS actions to collect Federal excise taxes which are incorrectly applied to their activities.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. SASSER. I yield to the Senator from Idaho.

Mr. SYMMS. I thank the distinguished Senator from Tennessee for yielding.

Mr. President, I wish to compliment the Senator for bringing this to the attention of the Senate. I support the amendment.

I can say that my senior colleague, Senator MCCLURE, who was here in the Chamber just a few moments ago, spoke with me about the amendment and gives it his support and endorsement.

Mr. DECONCINI. Mr. President, I am pleased to cosponsor this amendment with my distinguished colleagues from Tennessee (Mr. SASSER) and Idaho (Mr. MCCLURE).

As Senator SASSER noted the purpose of this amendment is to resolve an ambiguity that has arisen in the application of the excise tax on firearms to the Nation's custom gunsmiths, and to exempt not-for-profit cartridge loaders from the tax. As the Senator noted, these are uncontroversial amendments which clarify the application of the excise tax to certain small groups of citizens.

This amendment has a negligible impact upon the revenues of the United States and yet it may well be the only means by which to prevent the extinction of a significant number of this Nation's gunsmiths. It is contrary to the national interest for this body to permit the Internal Revenue Service to tax small business into bankruptcy. A combination of conflicting statutes and regulations, and a decision by the fourth circuit court of appeals has placed numerous of the custom gunsmiths in this country in the position of owing substantial back taxes on the basis of a provision which was considered inapplicable to them for years.

Mr. President, taxing the custom gunsmiths of this country into extinction serves no useful purpose and the economic costs of exempting this limited group of people from the tax is more than outweighed by the contribution small business has made and continues to make to this Nation. I therefore join my distinguished colleagues in moving the adoption of this amendment.

Mr. SASSER. Mr. President, I ask unanimous consent that the distinguished Senator from Nevada (Mr. CANNON) be added as an additional cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I withhold the remainder of my time.

Mr. DOLE. Mr. President, I understand this amendment has been cleared with the Senator from Louisiana.

Mr. LONG. Yes.

Mr. SASSER. It has been cleared with the Senator from Texas.

Mr. DOLE. And it has been cleared with Senator METZENBAUM.

Mr. SASSER. It has been cleared with Senator METZENBAUM also.

Mr. DOLE. I have no objection.

We may proceed.

Mr. SASSER. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 278) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DECONCINI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, does any Senator, here have an amendment that

is not under negotiation? There are some we are negotiating.

Mr. BAKER. Mr. President, we have a good attendance in the Chamber now. We still have more than 80 amendments on the list.

Surely some Senator has some amendment he is willing to call up at this time.

Mr. President, while I consult with the minority leader and the distinguished chairman and ranking member of the committee, I will suggest the absence of a quorum and charge it against the bill.

The PRESIDING OFFICER (Mr. WARNER). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I wonder if the distinguished Senator from Arizona (Mr. DECONCINI) would be willing to bring up his earnings limitation amendment now?

Mr. DECONCINI. Mr. President, I do not intend to bring that amendment up.

Mr. BAKER. May I inquire did the distinguished Senator from Arizona say he does not plan to offer his amendment?

Mr. DECONCINI. The Senator is correct.

Mr. BAKER. At all?

Mr. DOLE. That counts.

Mr. BAKER. The Senator has my profound thanks.

Mr. DOLE. Does anybody else not plan to offer his amendment that we can scratch off? There is an ESOP amendment.

Mr. DECONCINI. Mr. President, I am not prepared to offer that amendment at this time, but I intend to bring it up Monday, before the final vote.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I think we can complete a colloquy here between the distinguished Senator from Hawaii (Mr. MATSUNAGA) and myself and the distinguished Senator from Louisiana (Mr. LONG).

OVER WITHHOLDING OF INCOME TAX

Mr. MATSUNAGA. Mr. President, according to a Government Accounting Office report many employees are subject to overwithholding of income tax under present law. Employers are withholding more taxes than the workers will actually owe, and the workers will not be able to regain these withheld amounts until they file for a tax refund. I wish to clarify that this overwithholding will be corrected by the Economic Recovery Tax Act of 1981.

Employees who do not voluntarily choose to be overwithheld are subject to overwithholding because the withholding system is not sufficiently flexible and because present law limits adjustments for withholding to particular "itemized deductions." The tax legislation now before us authorizes the Treasury to issue regulations to correct these problems. The Senate should make clear its intent that the Treasury should promptly issue these regulations, and any needed forms, tables, and computational procedures.

This measure envisions prompt regulations allowing employees to adjust the amount withheld by taking into account the items that affect their income taxes, such as deductions from gross income and itemized deductions. These regulations should provide the same standards as current regulations to determine the deductions which are reasonably expected and can be taken into account for withholding adjustment.

In addition, these regulations should not prevent a particular kind or class of deduction, credit or additional item from being taken into account, unless doing so would distort the amount of tax withheld in relation to the amount of tax owed. Also, these regulations should set forth the circumstances under which the taxpayer's total estimated income—or the estimated income of the taxpayer and his spouse if they file jointly—must be taken into account in determining the amount of withholding. Also, these regulations should take into account the problem with taxpayers claiming grossly exaggerated numbers of withholding allowances or a total exemption from withholding in order to avoid having any taxes withheld.

Might I have the majority floor manager's view on the withholding provision.

Mr. DOLE. I appreciate the Senator's remarks and share his concern about overwithholding of income taxes. The bill contemplates that the Treasury would act promptly to issue the needed regulations, forms, tables, and computational procedures to implement the provisions in the bill and should allow employees to adjust withholding in the manner, and under the standards, described by the Senator. These regulations should provide that the items that affect income taxes owed may be taken into account to adjust withholding unless they would distort the amount of tax withheld in relation to the amount of tax owed.

Mr. MATSUNAGA. Does the distinguished minority floor manager of the measure share this understanding?

Mr. LONG. Yes, I do.

Mr. MATSUNAGA. I thank both floor managers and I yield the floor.

MORTGAGE REVENUE BONUS

Mr. SYMMS. Mr. President, the passage of the omnibus budget reconciliation bill of 1980 severely crippled the State housing agencies' ability to successfully sell mortgage revenue bonds.

Last year, Congress sought to place restrictions on single family mortgage revenue bonds for a variety reasons. The Congress sought to direct the benefits of the program from rural areas to big cities, and on this count, Congress succeeded by providing big cities with virtually no restrictions on the use of the program. The housing needs of Idaho's citizens, particularly in remote and rural areas of the State will not be met but we are more than meeting the housing needs of those living in large urban areas.

The Congress also sought to limit the amount of "public profit" these programs generate, and on this count the Congress succeeded by requiring programs to be operated below the level of self-sufficiency and financial responsibility.

In addition, the Congress sought to eliminate potential tax losses to the Treasury by increased use of the program. Congress failed on this issue because as decreased housing starts and lumber industry unemployment have taken builders off of tax paying jobs and put them on unemployment benefits.

The Congress sought to eliminate competing credit demands and reduce interest rates by restricting the amount of bonds sold. On this count, the Congress failed since no bonds have been issued since January 1, 1981. Yet, interest rates being charged on January 1, 1981, compared to interest rates being charged on February 15 show that rates rose.

The Congress sought to direct the benefits of the program to first time homebuyers: On this count, Congress succeeded in allowing the first time homebuyer to buy a four-plex and get into the rental business, but denied a mobile homeowner, renting in a park, from leaving serfdom.

The Congress sought to balance the Federal budget through limiting the issuance of these bonds. On this count, the Congress would be credible if it had tried to balance the budget by eliminating some of the bureaucratic programs at HUD that are not beneficial to a national housing policy.

The entire issue of mortgage revenue bonds needs to be reviewed and voted upon by the Congress. It seems to me that if the U.S. Government intends to have a national housing policy, then the viability of mortgage revenue bonds as a part of that policy needs to be examined. If we are not going to have a national housing policy and we intend to close the Department of Housing and Urban Development then mortgage revenue bonds need not be an issue.

Mr. DOLE. Mr. President, I might say to the distinguished majority leader that I do not think there are going to be any more votes, unless we vote on adjournment. We have gone through the list of amendments. There are seven, eight or nine that are in the pending stage with Senators, as they are talking to Treasury, our staff and the joint committee. I think in the morning we ought to have quite a flock of amendments, but I cannot seem to find any more this evening.

Mr. BAKER. Mr. President, let me ask the distinguished chairman and the minority manager of the bill what they can offer to us in terms of amendments that can be sequenced and amendments that can be laid down this evening.

Mr. DOLE. I do not know of any we can lay down, but I can promise the ma-

jority leader we will have one ready to go at 10 a.m.

Mr. BAKER. Mr. President, I must say that I have tried as hard as I know to find some Senator who is in a position to offer an amendment tonight. I believe the minority leader has done as much. The distinguished chairman of the committee has tried hard, going through his list repeatedly, as has the minority manager, to find some amendment that is eligible and ready.

It had been my fondest hope that we could have at least one, perhaps two more amendments this evening. But I have to say I do not believe we are going to make it.

What we will do instead, Mr. President, is schedule at least three amendments for action in the morning, two of the three will require rollcall votes, one probably will not, and adjust the convening hour so that we can get on this bill at 10 o'clock.

I would like now, Mr. President, to put a unanimous-consent request.

Mr. RANDOLPH. Mr. President, reserving the right to object, and I shall not object, I would like to ask a question. May I presume to ask a question?

Mr. BAKER. Yes. I have not yet put the request. I yield to my friend from West Virginia.

Mr. RANDOLPH. I wonder if there is any decision made in reference to the time on tomorrow afternoon or evening or night when we would stop working here in the Senate.

Mr. BAKER. Mr. President, there is not. I cannot do that, as much as I would like to accommodate the wishes of the Senator from West Virginia.

Mr. RANDOLPH. I thank the leader very much.

Mr. BAKER. I really cannot do that. I know I am doing a disservice to every Member of the Senate by not doing that. I indicated earlier that we would be in until 11 o'clock tonight. I think this train is pulling the engine instead of the engine pulling the train. So I am not going to presume to suggest what time we will finish tomorrow night, but it will be a full day's work. We will stay as long as we can gin up amendments, and that is going to be until late afternoon and maybe into the evening.

ORDER FOR RECESS UNTIL 9:15 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the convening of the Senate on tomorrow be changed from 10 a.m. to 9:15 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR REDUCTION IN LEADERSHIP TIME TOMORROW AND FOR RECOGNITION OF CERTAIN SENATORS

Mr. BAKER. Mr. President, I ask that the time allocated to the two leaders under the standing order be reduced to 5 minutes each, if that is agreeable to the minority leader, and that after the recognition of the two leaders under the standing order, as reduced, there be special orders for the recognition of the distinguished Senator from South Carolina, the President pro tem (Mr. THURMOND), and the distinguished Democratic Whip, the Senator from California (Mr. CRANSTON).

The PRESIDING OFFICER. Without objection, is is so ordered.

ORDER TO RESUME CONSIDERATION OF TAX MEASURE TOMORROW AND INITIAL SEQUENCE OF AMENDMENTS

Mr. BAKER. Mr. President, I ask unanimous consent that at the hour of 10 a.m. tomorrow, the Senate resume consideration of the pending measure, and that at that time the junior Senator from Indiana (Mr. QUAYLE) be recognized to call up an amendment on rehabilitation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Parenthetically, it is not anticipated that the Quayle amendment will require a rollcall. Of course, any Senator can ask for one, but we do not anticipate it, nor do we anticipate a long debate.

Mr. President, I ask unanimous consent that after the disposition of the Quayle amendment, as described, that the distinguished junior Senator from Tennessee (Mr. SASSER) be recognized to call up an amendment on social security.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that after the disposition of the Sasser amendment Mr. BAUCUS be recognized to call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. After the Baucus amendment, it is likely that we will call up a Heflin amendment. That has not yet been cleared. I will advise Senators that is probably to be added to the sequence sometime tomorrow.

Now, Mr. President, we have disposed of 24 amendments from the list of 101, 22 of them today with six rollcall votes and two of them last night. That is good progress. But, once again, Mr. President, it is not good enough to avoid the stampede of amendments that almost inevitably will occur beginning on Wednesday at 3 o'clock.

Mr. President, let me explain to the Senate, to every Member, why I have tried to push as hard as I have today.

I fully appreciate the fact that the Senate has granted a unanimous-consent order providing for the disposition of this measure to third reading not later than 3 o'clock on Wednesday. If we are going to finish our work and get out of here anyplace close to the beginning of the first of August, we are going to have to do at least that well, because we are going to end next week with two conference reports, I predict, two monumental conference reports, one on the tax bill and one on budget reconciliation.

If we do not improve on that Wednesday time for third reading on the tax bill, we are going to end up with both of those conference reports in our laps, maybe on the same day.

Mr. President, I am not asking for a change in the consent order that has already been entered. I certainly am not ungrateful for the accommodation Senators have already provided for the third reading time of next Wednesday. But I urgently ask Senators to consider offering as many amendments as possible tomorrow, that we have a good full day of work tomorrow, and a good day; a late day on Monday; and that we try to get to third reading on this bill on Tuesday rather than Wednesday.

The order provides, as Senators will all recall, that we will reach third reading not later than 3 o'clock on Wednesday.

Mr. President, I respectfully challenge the Senate to try to improve on that by 1 day. In order to do that, Senators are going to have to do better than we did today, although 24 amendments is an extraordinary accomplishment by the Senate by any measure. This is an extraordinary bill. There is a great number of amendments. But it simply is not good enough.

I commend the distinguished chairman of the committee, the ranking minority member, the minority leader, and all Senators for working hard and working late this day. But I urge them once again, Mr. President, to improve on our list of accomplishments by tomorrow.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. BAKER. Yes.

Mr. DOLE. I certainly share the views expressed by the distinguished majority leader. What we really need is someone to start coming over with amendments. I have to say we have not had too much downtime. Maybe we have had 15 or 20 minutes all day in quorum calls.

I think we can process the amendments even more rapidly. Hopefully, tomorrow we will have a lot of people here asking to be put into some sequence. We will be very happy to do that, probably on a rotation basis which would be fair to both sides.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, the distinguished majority leader is correct in his evaluation of the situation. There will be the conference report once the conferees finish action on the tax measure and the conference report when the conferees wind up on the reconciliation measure.

The majority leader will have my support in advancing the action to third reading on this measure by the close of business Tuesday. I will do everything I can.

Mr. BAKER. Mr. President, I am extremely grateful to the minority leader. I learned much from him in his years as majority leader. One of the things I learned most profoundly was that it usually takes the joint leadership to move an important piece of legislation.

I acknowledge my gratitude to him and the necessity for his cooperation, which he has so generously offered.

Mr. President, there will be no more votes tonight, I must announce reluctantly.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I now ask that there be a brief period for the transaction of routine morning business, not to extend beyond the hour of 10:10 p.m., in which the Senators may speak for not more than 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DEATH OF THE STAR

Mr. PRESSLER. Mr. President, Time, Inc.'s announcement today of their intention to terminate publication of the Washington Star is disturbing. The Star is a 128-year-old Washington institution and is one of the Nation's finest evening newspapers. If no new backer can be found to continue publication of this great newspaper, it would be a deplorable loss for the city, the Nation, and the journalism profession.

The demise of this paper would leave Washington, D.C., in a regrettable position as the only city of its size in the Nation to have only one major newspaper.

August 7 will be a sad day when the work of the Star's editorial and reporting staff, including some of the finest journalists in the country, will no longer be available to newspaper readers in Washington. Murray Gart has done well in providing Washington with an afternoon voice along with the superior editorial skills of Edwin Yoder and Sidney Epstein. Among the reporters of the Star's staff whose work I have enjoyed are Mary McGrory, Lisa Hornig, Eleni Epstein, and Ymelda Dixon. I might say that Jeanne and Murray Gart did a great deal of fine work for this community.

It is my hope that several options could be pursued to keep the Star in operation in the event Time, Inc. is unable to find a buyer.

First, it would be to the benefit of Washington if the Star and the Washington Post could renew their attempts to work out a joint publication formula. As the editors of the Post have pointed out themselves, any newspaper, no matter how outstanding, functions better with good professional competition.

Second, like Harpers magazine which teetered on the brink of extinction almost 2 years ago, private foundations may have an interest in continuing the Star's operations. When the MacArthur Foundation announced its decision to run the magazine, the foundation's president stated that the purchase was "an example of the way in which private philanthropy can contribute to the quality of thought in the United States." Surely the continuation of the Star is of the same importance.

Third, perhaps the Star can consider an employee-ownership plan. Although the profitability of the Star may preclude further consideration of this option, employee ownership could reduce the profit and loss pressures which frequently take on such immense importance when a major corporation owns a newspaper.

In conclusion, Mr. President, I know all this is easier said than done but I am concerned about the concentration of power in the media. We now have most of our major cities having only one major newspaper, and newspaper chains across our country are coming to own more and more of our media. People running them are of the best intentions, but if we do not have a diversity of outlets, a diversity of sources, the quality of news lessens. There was a time in American history when we had the independent journalist, the independent editorial writer. The fact of the matter may be that that time is fading, except in some instances. That is of great concern to me.

So it is a sad day. The Star died today and it is a very sad thing when we think about it. The greatest Capital in the world has only one newspaper and we do not have the benefit of that diversity of opinion in the greatest Capital in the world. It is with a note of sadness that I conclude this statement. I wish that something could be done to keep the Star going.

THE YOUNGEST OLD MEN IN JOURNALISM

Mr. PERCY. Mr. President, few people in Washington today have witnessed and reported on the breadth and continuum of events in this town as have Richard L. Strout, who recently began his 61st year with the Christian Science Monitor, and Marquis W. Childs, who, in June, retired after serving for 55 years as a reporter and columnist for the St. Louis Post-Dispatch.

Their commitment to the highest journalistic standards and their contributions to our understanding of the people, issues, and events of Washington are impressive indeed.

It is for this reason that I ask unanimous consent today to have printed in the RECORD a very fine tribute to these men which appeared in the Washington Post on June 21, 1981, and was written by their admiring colleague, David S. Broder.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE YOUNGEST OLD MEN IN JOURNALISM

(By David S. Broder)

We had a breakfast the other morning to honor one of our own, a reporter for the Christian Science Monitor named Richard L. Strout. It was an ordinary working day for him, as for us, except for Dick Strout it was the start of his 61st year on beat.

He was hired by the Monitor on June 13, 1921, and two years later drove his Model T down to Washington and began covering the administration of Warren G. Harding, the first of 11 presidents he has seen. He is a tall Yankee with a neatly trimmed moustache, straighter and slimmer than most of us a generation or two younger. He stays fit, he says, by steady work; 60 years for the Monitor; 38 years doubling in brass as the weekly columnist for The New Republic, writing under the non-disguise of TRB, an acronym with no meaning.

He may well be the best print journalist working in Washington. His claim to that title was probably strengthened when a colleague and competitor named Marquis W. Childs retired at the beginning of June after 55 years as a reporter and columnist for the St. Louis-Post Dispatch. Childs quit so he could write some more books, a decision Strout probably thinks he will get around to—in due time.

As we sat with Strout the other morning, hearing him do capsule profiles of the presidents he had known and discourses on his favorite topics—the dangers of the arms race and the folly of our political sweepstakes—all of us, I suspect, were thinking of what such a career can mean. Journalism is, in many respects, in public disrepute these days; the polls and everyday conversation tell us most of our readers disbelieve what they find in our copy and have meager confidence in our ability to get the story right.

Yet Strout and Childs are regarded with affection and trust and confidence, not only by colleagues in the business but by people about whom and for whom they have written.

What lessons can they teach us? One is the importance of steadiness. They did not flit. Sixty years on one paper in Strout's case; 55 for Childs. Most of it on one beat, the nation's capital. They learned the ground they were covering, and they let both their subjects and their readers know what to expect from them.

Today, too many of us move from beat to beat, from paper to paper, from network to network—seeking novelty or fame. We sacrifice the knowledge and credibility of a Strout or a Childs in the process.

The second characteristic the two men have in common is their liveliness and their love of the human follies they have seen. They are the youngest old men in journalism. Childs was a connoisseur of gossip, carrying tidbits both ways across the Atlantic on his frequent trips, reveling in a colleague's rendition of some particularly implausible anecdote.

Strout speaks of the roguish Harding with more affection than any of the late greater presidents he knew, still marveling at his dalliances among the galoshes in a White House closet, while the Secret Service stood guard.

But, at heart, both men are dead serious about their work. They have witnessed a lot of history, but they have read widely, avidly, to encompass more. They have the scholar's fetish for accuracy, for getting the names and numbers right, for checking their recollections against the reference books.

They care deeply about the fate of this country and this world—and they do not disguise their concern. Childs in his valedictory column and Strout in two of his most recent New Republic essays wrote about the dangers of nuclear arms in the hands of those "fanatics, the ideologues," as Childs called them, "who have brought on one catastrophe after another in this bloody century."

But they are—as journalists must be in order to rise and write another day—optimists. "If occasionally I have despaired over earthlings who seem bound to destroy our small planet," Childs wrote, "I have fallen back on the tough stuff of human nature and the ingenuity of mankind, which has survived despite all the plagues, natural and man-made."

Finally, they have immense pride in their craft. "For all the 'new journalism' and the public's skepticism over what sometimes seems to be invention, it is a splendid trade, and there are admirable practitioners who serve the cause of intelligence and order in a turbulent world," Childs told his readers as he left.

Strout offered this advice to fellow journalists at the National Press Club a couple of years ago: "I hope they will stay committed. I hope they will retain their curi-

osity—their interest; yes, and at their heart a touch of anger. When the Adrenalin runs low, when the little flame of anger flickers out, I think it is time for the reporter to think about going into some more remunerative form of work."

Fortunately, Dick Strout and Mark Childs have not found that other form of work—in all these years when they could have been looking. For us in this troubled, and vulnerable line of work, their example is important.

CHICAGO SUN-TIMES EDITORIALIZES ON DEFENSE

Mr. PERCY. Mr. President, the Chicago Sun-Times recently published what I regard as a first-rate series of editorials on the U.S. defense posture.

The series examined a wide range of related issues, including the level and rate of defense expenditures, net assessment and threat analysis, technology and reliability tradeoffs, the procurement and defense contracting process, and manpower.

In its concluding piece, the Sun-Times endorsed the need for a substantial buildup in our national defense forces, but cautioned against believing that current deficiencies can be redressed simply by spending more money. The concluding editorial placed particular emphasis on redoubling our efforts to insure that the problem of defense waste and mismanagement is addressed in an organized, continuous, and concerted way, a point of view which I am sure we all strongly support.

Mr. President, I ask unanimous consent that this series of editorials be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Sun-Times, June 21, 1981]

A STRONGER DEFENSE

The American people are moving along toward the costliest buildup of their military forces in peacetime history.

Congress is approving, with all but inaudible opposition, a 1982 defense bill of $136.5 billion, up 28 percent after inflation. And this is just the first installment on the administration's plan to spend $1.5 trillion on defense through 1986. On an annual basis, that's a jump of 70 percent after inflation.

There is a broad national consensus for such massive spending, in spite of the enduring burdens of inflation, recession, high taxation. The people have had, apparently, their fill of humiliation at the hands of the Vietcong, ayatollahs, OPEC sheiks and Kremlin hierarchs. And they are determined to build military muscle so they can feel secure again.

There is assuredly a need for muscle building. The Soviets are projecting their power well beyond their borders—into Afghanistan, at the approaches of the Persian Gulf, in Southeast Asia, Africa and the Caribbean.

And they have what it takes to do so after lavishing—for three decades—precious resources on history's greatest military buildup.

From a zero base, they have achieved nuclear equivalence with the United States and, by some accounts, will soon imperil our silo-based retaliatory missiles. Their army is more than twice as large as ours. They have 50,000 tanks, we 10,000. Their navy, much enlarged, now moves freely in distant seas.

They are not, to be sure, 10 feet tall. Nor are we, thanks to superior technology, only 4 feet tall. Our allies, furthermore, are stronger than theirs, and far more trustworthy.

But the numerical disparities between us in specific areas and our new responsibility to defend interests beyond Europe and the Pacific—notably at the oil wells of the Persian Gulf—make it essential that we attend to our weapons and the people who man them.

When Harold Brown left office as President Carter's defense secretary, he was pleased about "the long-overdue consensus for increasing our nation's military strength" and President Reagan's determination to sharply raise spending on it. But he also warned that big defense budgets do not automatically translate into greater military power.

This the Reaganites have not thus far heeded. Brown's successor, Caspar W. Weinberger, a good administrator with no experience in military matters, in short weeks produced the huge new budgetary numbers. The primary question asked in compiling them was not "What do we need?" but "How much should we spend?" And what the numbers add up to, mostly, is more of the same.

In "The Defense of the United States," the fine series CBS–TV aired last week, a persistent question arose: "Will throwing money at our problem solve it?" The answer is no.

A Senate military expert, Gary Hart (D-Colo.), calls the current defense bill "dangerous" because its programs are unrelated to "what history suggests is important for an effective military. . . . The bill provides more of the same ships, planes and tanks we have been . . . buying for decades. With its emphasis on $3.5 billion aircraft carriers, $650 million submarines, $40 million fighter planes and $2.5 million tanks, [it] makes it unlikely we can have the numbers we need."

Numbers are one need. So is what Sen. Hart calls usability of materiel—"the ability to function in bad weather . . . in the hands of real soldiers, without much maintenance." We need simpler, more mobile equipment to respond quickly to unforseen threats.

On a higher level, we need sharper assessments of Soviet strengths and weaknesses so we don't keep spending on the wrong things.

But for this essential wisdom Americans are called upon to trust a military-industrial-congressional complex that has repeatedly and shamelessly squandered their resources.

Past spending, though less than the future's, was hardly puny. Yet much of it went for "wrong things," resulting in a technologically brilliant but often inoperative force that, while it might respond appropriately to a challenge in Europe, left us all but naked to Soviet expansionism and radical nationalism on the Persian Gulf. Items:

The new M–1 tanks are so huge that only one at a time can be airlifted by the biggest U.S. transport, the C–5A.

The Air Force's new MX missile was designed just a bit too big to fit in the Navy's new Trident submarine's missile tubes, requiring costly alternative deployment, as in the Utah-Nevada "race tracks."

A new armored personnel carrier, the infantry's key vehicle, doesn't fit in the ramp opening of our assault transport planes.

The Army—because of the priority given to high technology—can't afford to properly train its troops. It has a third of the ammunition it needs for war. Six of 10 combat divisions are "not combat ready."

A third to two-thirds of our complex tactical aircraft are grounded at any given time for maintenance and to await—for as much as nine months—replacement parts, of which the Air Force lacks $2.1 billion worth.

The Navy lacks 20,000 petty officers and more of other personnel, so that warships often languish in port, unready to fight.

Clearly, throwing money at problems does not necessarily solve them. What is required for an adequate national defense is not simply "more," but prudent, well-reasoned answers to the questions "what?" and "why?"

William Kaufmann of the Massachusetts Institute of Technology shows in a new study that we can close the gap on the Soviets with just small increases in force strengths.

But this can be done only if most of the money available is spent on force readiness, which includes adequate and well-trained regular and reserve manpower, simpler weaponry to arm them and improved ability to transport them quickly and on short notice.

Thats where President Reagan, the Pentagon and Congress ought to be headed. They have not yet shown that they are.

[From the Sun-Times, June 22, 1981]

SOVIETS OVERRATED—AND PENTAGON OVERREACTS

Lavish as the administration's defense budgets are projected to be, prudent choices will have to be made on how our precious dollars are spent. No realistic budget could ever accommodate the wish lists of generals and admirals and their civilian managers.

But prudent choices depend on wise assessment of what the Soviet are up to, and here the U.S. intelligence community historically has made flagrant errors that promoted wasteful U.S. responses. Rep. Les Aspin (D-Wis.), one of the wiser heads of the House Armed Services Committee, confirms the point in his Personal View on the opposite page.

Other warped assessments pervert perceptions of Soviet strength, and thus they pervert the Washington reactions based on them.

Most notorious are the CIA "studies" of Soviet defense spending, showing that Moscow's military budgets are far larger than ours. Truth is bent (probably by design to justify support for higher American budgets), and how it's done is shown by one example:

To arrive at the cost of the 4.5-million-man Soviet army, the CIA assigns the pay scales of U.S. military *volunteers* to the *conscripted* Soviet soldiers. Then it adds the American overhead of more than $10,000 per volunteer. When Uncle Sam gives our GIs a raise, the CIA gives an equivalent "raise" to Soviet soldiers and kites its totals that much more.

The CIA's statistical humbug has been credibly analyzed and realistically revised by Franklin D. Holzman, a Tufts economist and a fellow at Harvard's Russian Research Center. His understated conclusion: "The corrected figures indicate that the Soviet Union has not been outspending the United States."

The Pentagon also habitually makes U.S.-Soviet comparisons without including their respective NATO and Warsaw Pact allies. When you add them in, even using the CIA's cockeyed Soviet budget figures, the perspective (see the accompanying table) tends to ease the alarm over our "weakness."

Take into account also the character of our allies compared with the Soviet's, Poland for one. The U.S.S.R. has been described properly as the only major power surrounded by enemies—almost all of them communist.

Go on, if you will. Add the China factor, including 4.4 million troops. The Chinese are not, to be sure, our allies, but they certainly are not the Soviet Union's friends.

And none of this takes into account the quality of weaponry. Returning to Holzman:

"It is paradoxical to read in the Joint [congressional] Economic Committee hearings for various years that, according to the CIA, the Soviet Union has been regularly producing and deploying more military equipment than we have, and has almost twice as much military; yet the predominant opinion of participants is that the United States is still the stronger power.

"The resolution of this paradox is not hard to find. Clearly the basis for this view is the

superior quality and technology of U.S. equipment. Unfortunately, this crucially important factor is not captured in CIA estimates."

The matter of accurate, prudent assessment of Soviet strengths and what we should do to counter them bears heavily on crucial decisions the Reagan administration is to make soon, perhaps starting as early as next week.

These include two very costly projects—the MX missile and how it is to be deployed and construction of a manned bomber (or two bombers) to replace the venerable B–52.

The MX is the $40 billion-minimum nuke launcher with which the Pentagon proposed to scar up much of Utah and Nevada in a race-track configuration. That deployment is so monstrous that it may no longer be in the cards. But others are.

The real question is not how, but whether it should be deployed. And the answer revolves around the validity of the two canons of Pentagon theology invoked to justify it—"the window of vulnerability" and Soviet "first-strike capability."

The thesis is that in the mid-80s, before the MX can be deployed (that's the "window" in time), Soviet intercontinental nukes will be so accurate that they will be able to destroy our land-based Minutemen—and many of our submarine missiles—in a "first strike" without risking destruction of their own society.

But is a window really opening? In the 1970s we deployed 5,250 intercontinental nuclear warheads (present total 10,000), they deployed 4,341 (total 6,000). Ours are more accurate and in more hardened silos. Three-fourths of theirs are fixed in place on land. Most of ours are moving targets at sea or in the air.

The vulnerability idea is based on questionable assumptions—untested in war—about the accuracy of Soviet missiles. Excellent evidence indicates that from 100 to 300 of our silo-based missiles would survive, as would hundreds in undersea and air deployments.

Are the Russians mad enough to gamble 10 million, or 100 million, of their own on a theoretical first-strike capability? Are we?

On procurement of the new manned bomber: President Carter shelved the B–1 on the sound ground that the B–52 would be good enough (well into the 1990s, some experts say) to launch the new, cheaper, highly accurate cruise missiles without having to penetrate Soviet air defenses.

Now it's said that Defense Secretary Caspar Weinberger is leaning toward not one but two new manned, penetrating bombers—the advanced technology Stealth bomber for the '90s and later, and an updated version of the B–1 to tide us over until then. Do we really need and can we really afford the B–1?

We don't know the answers to all the questions. We do know that the Reagan administration is too new to be making fast-draw decisions . . . based on questionable assessments . . . pumped out by an incestuous military-industrial complex . . . for approval of vote-hungry congressmen eager to provide jobs in their thriving Sun Belt districts.

And we know that weapons systems once conceived—malformed or not—rarely, if ever, are aborted. They survive for decades to suck the milk from what should be a well-trained, realistically armed, mobile military force.

[From the Sun-Times, June 23, 1981]

HIGH TECH'S MIXED BLESSING

Military experts often agree that American technological superiority gives U.S. forces an edge on the Soviets in spite of their greater numbers in many weapons classifications.

That position has been battle-tested, especially in the air, when U.S. equipment was matched against the Soviets' in Korea, Vietnam and the Middle East.

But high tech can become—many say has become—a god that's worshipped for its own sake, even when more sophistication endlessly delays production, drastically inflates costs, compounds maintenance problems (effectively reducing force readiness) and, most important, reduces combat effectiveness.

Last week's CBS-TV series, "Defense of the United States," pointed up one notorious example of useless high tech—the Navy's F–18 fighter, now seven years in development.

Its birth model was priced at $5 million; that's now up to $30 million. And it is a dog in war games. The cockpit's "Star Wars" gadgetry dazzles pilots, so that they are consistently beaten by pilots flying smaller, simpler, much cheaper F–5s.

Sen. Gary Hart (D-Colo.) tried to scrap the F–18 project. But the military procurement establishment does not scrap the junk it creates; it gold-plates the mistakes and muddles on. And Congress goes along: 20,000 companies in 44 states make F–18 parts.

The F–18 is by no means the only such mistake. Many more are catalogued in the new book by James Fallows, National Defense, which should be force-fed to anyone who has anything to do with military budgets, especially members of Congress.

The Fallows thesis is that Washington is trapped in a "culture of procurement . . . that draws the military toward new weapons because of their great cost, not in spite of it."

That might be overstated, but Fallows is chillingly persuasive when he writes:

"To survey the first-line equipment of each service—the Army's new Abrams tank, the Navy's Trident submarine and F–18 fighter, the Air Force's MX missile, F–15 fighter and various 'smart' missiles—is to see a pattern. The weapons cost between 2 and 10 times as much as systems they replace; their technical complexity leads to behind-schedule deliveries and long periods in repair shops; their performance is better suited to computer-simulated war games than to the unpredictability and disorder that have typified real combat."

From Fallows and elsewhere these others:

The heat-seeking Sidewinder, first guided missile used in war, is still the best. It cost $3,000 ($10,000 today). The newer, radar-guided Sparrow and Phoenix cost 10 and 100 times as much and are less reliable.

The F–15 fighter is grounded at least a third of the time, partly because its maintenance depends heavily on diagnostic computers. And these computers themselves are out of order 20 to 50 percent of the time.

The Navy is equipping its newest warships with high-tech radar that can track and automatically fire weapons at hundreds of attacking planes or cruise missiles. One problem: It works only 60 percent of the time.

This is not an argument against technology that serves the defense interest, which much of it does. It is an argument against mindless excesses that compound the military's central problem, combat readiness, by filling its shops with inoperable gadgetry and diverting scarce money from basic needs—essential maintenance, adequate spare parts and ammunition and personnel training.

Defense Secretary Caspar Weinberger and his deputy, Frank Carlucci, have set up a special office to check the addition of the brass hats to ultrafancy weapons systems. But the monkey has been on their back for so long, there's no going cold-turkey. It will take continuous attention from dedicated straights.

ITS HIGH COST

The high cost of high technology to defense capability has been illustrated by retired Air Force Col. Everest Riccioni, a specialist in the subject. He compares three fighters—the simple but able F–5, the moderately complex F–4 and the super-sophisticated F–15.

The same amount will buy:

F–5	1,000
F–4	500
F–15	250

Now consider that the more complex a plane is, the more time it is down for maintenance and repairs. Flight availability is measured in "sortie rates"—flights per day a plane can be counted on for duty. The sortie rates of the three planes:

F–5	2.5
F–4	1.5
F–15	1

Multiply the number of planes above by the sortie rate and the fighting product is:

F–5	2,500
F–4	750
F–15	250

The question is not whether pilots would rather confront a MiG fleet in F–5s or F–15s but whether they would prefer to confront it with 10 planes or 100. The answer is obvious.

[From the Sun-Times, June 24, 1981]

MORE MONEY, LESS DEFENSE

"Runaway costs characterize our entire defense procurement program. These vast expenses have nothing to do with maintaining the strength of our military forces. They are . . . the result of a system that permits Defense Department officials to operate as though the public purse has no limits. It is a system that can and must be changed."

The authors of that statement are not your everyday pointy-headed unilateral disarmers. They are Senators Barry Goldwater (R-Ariz.) and Howard M. Metzenbaum (D-Ohio).

The two properly indict the "system," which goes beyond the Pentagon to include the defense industry and members of Congress less concerned with the national interest than the narrow interest of their own constituents.

The point is supported in detail in "The Iron Triangle," written by military affairs expert Gordon Adams and published just last week by the Council on Economic Priorities.

The triangle, Adams writes, is a "community of shared interests [that] excluded public participation from military decision-making" and reinforces "shared expectations that another generation of weapons is both desirable and necessary, whatever the cost."

Here's how the three sides of the triangle are welded together:

Defense contractors maintain elaborate lobbying offices to press their self-serving projects on the Pentagon and Congress. Costs are charged off to the taxpayers.

At least eight contractors have set up their own potential action committees, which dole out millions in campaign funds to congressmen representing districts in which they have plants and those in key positions on defense-related congressional committees.

Movement of key personnel within the triangle reinforces the incestuous relationship. During the 1970s, the eight contractors hired 1,671 Pentagon and NASA officials; 270 contractor employees went the other way.

"The triangle costs taxpayers hundreds of millions of dollars directly," the study finds, "and may cost billions indirectly by formulating policies that boost arms purchases above what is required for national security." Adams concludes: "Because of the Iron Triangle, the U.S. will end up buying less defense for more."

Similar indictments and demonstrations of gross waste enrich the literature of military procurement: The House Appropriations Committee identifies 46 areas where huge

sums could be saved. The General Accounting Office lays out 15 ways to economize.

Both estimate that 10 percent of defense budgets represents waste. Apply that to the $1.5 trillion the administration proposes to spend through 1986, and you have $15 billion.

Goldwater and Metzenbaum cite a government study showing that only "modest improvements in efficiency could reduce [defense] outlays by $16 billion."

What could $15 billion or $16 billion buy? Enough cost-efficient tanks and tactical fighters to overcome the Soviet lead in those areas—with $10 billion left over to restore a fourth of the funding Washington is now slashing from civilian programs.

Evidence supporting the primary theses of *The Iron Triangle* abounds for the close reader of daily news reports. Here are just two examples:

Seventeen graduates of the last Congress have registered as lobbyists, according to Congressional Quarterly. Two of them, Richard Ichord (D-Mo.) and Bob Wilson (R-Calif.), held key positions on the House Armed Services Committee. They have now registered as the "Washington Industrial Team" to twist the arms of their former colleagues in behalf of 7 of the top 10 defense contractors.

In three recent fiscal years, the Air Force did not ask for any appropriations to build more Lockheed C-130 transports, made in Georgia, or more A-7 attack fighters, made in Texas. Thanks to Sen. Sam Nunn (D-Ga.) and House Majority Leader Jim Wright (D-Tex.), Congress funded a minimum of 10 of each anyway. In the last fiscal year, the Senate balked, so Congress compromised by funding only six of each of the unwanted planes.

[From the Sun-Times, June 25, 1981]

CAN WE AFFORD IT? MAYBE

As the Reagan administration gears up to invest $1.5 trillion of U.S. resources in a defense buildup, economists are engaged in fierce debate over whether we can afford it.

With reason, Defense spending is scheduled to balloon from $159 billion in the current year to $250 billion in fiscal 1984 and an all but incredible $336 billion in fiscal 1986.

The field is crowded with economists saying, "No, we can't afford it, certainly not while cutting taxes 30 percent." They point to President Lyndon B. Johnson, who fathered the modern inflationary era by refusing to raise taxes while he mobilized the nation for the Vietnam War. And we are starting from an inflation base more than twice as high as the highest of the Vietnam catastrophe.

Administration economists and those who take their side believe the country can hack it. They note that President Reagan's buildup will be slower, more gradual and end up costing less than LBJ's as a share of the nation's wealth. Between 1965 and 1967 defense spending grew from 7.1 percent to 8.9 percent of the gross national product, or 1.8 points. Reagan plans to go from 5 percent to 6.7 percent of GNP, or 1.7 points, in six years.

But the unconvinced argue that the Reaganites' numbers are based on overly optimistic estimates of how supply-side economics will buck up the economy's performance. They assume a rosy 4.4 percent annual growth in the GNP and a healthy increase in productivity—which until recently had been stagnating—of 3 percent a year.

They also—and this deserves stress—expect inflation of defense costs to drop to 6.2 percent in three years. But inflation is much more severe in defense industries than in the economy as a whole—20 percent for primary weapons systems in 1980 alone. And it seems unrealistic to hope that a preshrunk, narrowly competitive industry can become more cost-efficient as demand for its products soars.

Whatever the eventual effects of the military buildup on inflation, Americans will have to pay dearly for it in other ways.

CBS-TV "Defense" series last week held up on yardstick: The cost of making something out of the fragmentary rapid deployment force—which we favor—will amount to more than the proposed budget cuts in education. Social Security, Medicaid, Medicare, transportation and energy put together.

There will be other massive dislocations of precious resources. Money, manpower and material for defense must come, sacrificially, from somewhere else.

The administration is embarked on a campaign to stimulate the sluggish American economy, to expand investment and productivity in the private sector, to reverse the decline in the U.S. share of world markets.

But the defense buildup will sharpen the competition for the limited investment funds available. Some authorities predict that 20 percent prime rates and 15 percent mortgages will continue to be a drag on private-sector business—and on the American dream.

And the competition for skilled labor—already brisk—also will weigh down the civilian sector (and inflate wage costs).

Rep. Les Aspin (D-Wis.) notes that the U.S. work force has the largest proportion of scientists and engineers in the world—20 percent higher than Japan. But we are still losing our competitive edge abroad and at home because the arms industries, even now, suck up at least 20 percent and perhaps as much as half of it. No comparable sacrfice is demanded of the civilian industries of our market-grabbing allies.

The United States does retain a technological edge in electronics and aerospace manufacturers, but these are precisely the pitchers that will be drained to fill the defense cups.

More is needed for the military, as we have said from the outset, but diverting the more is bound to be painful.

It will have to be managed in a controlled, continually monitored way to keep from exhausting American social, economic, and political structures. These are as essential to America's strength and security as the might of its armed forces.

[From the Sun-Times, June 26, 1981]

MANNING THE NEW WEAPONS

In this series of editorials on national defense, we have not, thus far, addressed the critical issue of manpower, which is central to the discussion.

Neither, for that matter, has the Reagan administration.

What almost everybody wants is to be mightier than the Russians. But if it requires drafting American youths to make us so, some insist that's not the democratic way.

Yet the all-volunteer force is well short of success, "democratic" as it is (undemocratic may be more accurate, considering the disproportion in the armed services of poorly educated, less employable non-WASPs).

Six of 10 U.S. Army divisions are rated "not combat ready," largely because of gaps in the ranks. The Navy, traditionally more elitist, is short more than 20,000 petty officers. The Air Force lacks 2,100 pilots and 400 navigators.

In the face of such gaping holes, the Pentagon proposes to expand the mission of the armed forces, to make them capable of fighting two and a half extended wars at one time (Europe and the Pacific for the whole numbers, Southwest Asia for the half) instead of one and a half brief wars (Europe and a "brushfire" somewhere else).

On the books, the Pentagon will be expanding Army divisions by four, Navy ships by 150, Air Force wings by five. This will require at least a 200,000-man addition to the existing force of 2 million.

Where will they come from, taking into account not only today's lack of enthusiasm but tomorrow's demographics? The number of American males reaching age 18 will drop a fourth by the late 1980s.

President Reagan says he is determined to stick with volunteerism, even when he is told that, if the aim of our buildup is to deter the Soviets from aggression, conscription on the lawbooks would be more persuasive than tanks in the field.

Defense Secretary Caspar W. Weinberger said this week he intended to avoid the draft issue "as long as possible," which implied that he can't avoid it forever.

Lawrence J. Korb, assistant defense secretary for manpower, told us in Chicago last week that "we haven't given the all-volunteer force a fair chance," that the concept was "undermined" when the incentives that were to have accompanied it were withheld.

These, he said, the Reagan Pentagon intends to provide: pay levels competitive with the civilian, improved living conditions for service personnel, training at acceptable levels, cultivation of what is perceived as a rising pride in service to the country and, in fiscal 1982, post-service education benefits like those offered under the GI Bill.

We have no quarrel with these plans, especially in the absence of a clear public mandate for conscription. A draft in any case would help only initial recruitment. It would do nothing to solve the problem of retention—reducing the dropout rate of personnel trained at high cost to operate increasingly complex weapons and their sophisticated support systems.

But as the administration gears up to spend billions on new hardware, it had better be assured there will be hands and minds enough to work the stuff when it's here.

[From the Sun-Times, June 28, 1981]

$1,5-0-0,0-0-0,0-0-0,0-0-0—WHERE TO SPEND IT AND HOW TO CONSERVE IT

In the last week, we devoted most of this editorial space to a single issue, the buildup of the national defense forces.

The attention has been justified, we're convinced, because Americans have never before, in peacetime, been called upon to sacrifice so much of their precious resources on a single program: $1,500,000,000,000 over the next five years.

We have tried to make these points:

A large and continuous investment is required because of the Soviet Union's expansionism, backed up by a spectacular buildup of its own military force, which in key areas surpasses ours.

But the problem of imbalances can't be solved by throwing money on the whole catalogue of weapons systems, as the Reagan administration for the most part is hastily doing. Soviet strengths and weaknesses must be realistically assessed, and dollars appropriately targeted.

The problem of defense waste must be addressed in an organized, continuous, concerted way. Federal authorities estimate 10 percent could thus be saved. That amounts to $150 billion, barely less than the current year's entire defense budget, not $15 billion as we said in error on Wednesday.

To do so, the Pentagon must be cured of its obsession with high technology. Technology often gives U.S. forces an edge over Soviet numbers. But abused, it creates unnecessarily complex weapons that are less effective in combat at costs that drain money from force readiness.

The public interest must be imposed upon the Iron Triangle—the closed, incestuous relationship of Pentagon, defense contractors and shameless congressmen—which too often

creates and perpetuates costly weapons systems, not to enhance the national security, but for private benefit.

After extensive study of military issues, we're convinced that—in spite of Washington's scare talk of "Soviet first-strike capabilities"—the U.S. forces have a significant edge on the Russians in intercontinental nuclear weapons, and that a greater proportion of defense spending should go into conventional forces.

U.S. security especially requires:

A ready force, with adequate, well-trained manpower, equipped with weapons that are cost- and combat-efficient and light and otherwise mobile enough to be moved great distances in short times.

Air and sea transport in numbers enough to move the force is, of course, essential. So are ammunition and spare parts in quantities adequate for a long war, not the quickie the Pentagon has prepared for.

A Navy powerful enough to contain the Soviet fleet, which in recent years has grown from a simple coastal patrol force to one that can project Soviet power into seas far from its home bases.

We discussed the first point in earlier parts of this series. As to the second:

Sen. Gary Hart (D-Colo.), a sane and expert congressional voice, puts the Soviet naval challenge in historic perspective, calling it "the greatest since Admiral [Alfred von] Tirpitz built the German high seas fleet to challenge Britain early in the century."

"We no longer have the automatic naval supremacy," Hart insists, "that allowed us to pursue a continental [European] strategy . . . without risking other vital interests—not just American interests, but Western interests." The Persian Gulf, for one.

We concur, without, however, endorsing the positions of Navy Secretary John F. Lehman Jr. He has the Pentagon admirals' dedication to big-deck nuclear aircraft carriers, in spite of their vulnerability in the modern naval era of "smart" missiles.

Lehman wants three big carriers, each costing $6 billion (before cost overruns) with their essential escorts. Such fortunes could be spent more prudently on smaller, less targetable carriers and other attack vessels.

The U.S. Navy already leads the Soviets' in raw tonnages. Their huge lead is in numbers of warships.

It will be the height of national irresponsibility if the military managers in Washington continue to squander the enormous new appropriations in the same old ways. If they do, they will also squander the strong consensus they have for the buildup. The media are watching, perhaps as never before.

To direct the White House, the Pentagon and Congress into the proper spending channels, public input is required if public acquiescence is expected. The Center for Defense Information proposes a blue-ribbon National Commission on U.S. Defense Policy, and that could be beneficial.

Somehow, also, the Iron Triangle must be broken open to impose national frugality on its three self-serving legs. For openers, we need tighter controls on lobbying by defense contractors, on their campaign contributions to congressmen, on the freeflow of personnel among the three divisions, all of which abet a shared interest in weapons systems, an interest from which the public is excluded.

For continuous monitoring of the spending, a new mechanism is in order—some kind of inspector-generalship acting for the taxpayers. The Government Accounting Office, an arm of Congress, has in the past been useful—when called upon—in pointing out where the waste is and how to get rid of it. Perhaps a permanent monitoring unit could be established within it. Or in the White House Office of Management and the Budget, where it would be more independent of Congress.

On the other side of the defense ledger, this administration must, in the name of humanity, eventually face the issue of limiting destructive systems—of not building them at all, of imposing ceilings on their numbers, even reducing them—in agreement with the Soviet Union.

As to our friends, pressures will have to be kept on them to share, more generously, the great burden carried by Americans to protect the common interests of the free world. The United States has the nuclear problem in hand. Its allies could make the greatest contribution to conventional forces—Europeans on their ground, Japan in its coastal waters.

Finally, Reagan and his team must recognize that the threat of force, by itself, does not constitute a policy for the secure and civilized conduct of international affairs.

Nearly half a year into his administration, Reagan has nothing that can be called a foreign policy, apart from bluster and gunrattling. These, and his embrace of tyrants—on condition only that they be anti-Soviet—have projected abroad a questionable moral base for the way Americans should behave in the world community.●

TRIBUTE TO DENVER DICKERSON

Mr. MATHIAS. Mr. President, I join Senator PELL and Senator CANNON, in mourning the death of Denver Dickerson, former staff director of the Joint Committee on Printing and in that position a principal source of strength to the chairman of the Rules Committee.

During his long and distinguished career of public service, Mr. Dickerson was greatly admired by all those who had the privilege of working with him. We will miss his humor, his graciousness, and especially the kindness he showed to his friends and his associates.

Mr. Dickerson's career was marked by many successes. At the age of 28 he was elected the youngest speaker in the history of the Nevada State Assembly. During World War II, he joined the Army and served in the Pacific theater as a technical sergeant and correspondent. After the war, Mr. Dickerson became press officer in the U.S. Embassy in Rangoon, Burma, and in 1957 he came to Washington to become press secretary to former Senator Alan Bible. President Kennedy appointed him as Lieutenant Governor of Guam in 1963, and he remained in that post for 6 years.

Mr. Dickerson returned to Capitol Hill in the early 1970's to work as a professional staff member of the Senate Rules Committee, and in 1973 he became staff director of the Joint Congressional Committee on Printing where he remained until retiring in 1980.

I know I speak for all of us who remember Mr. Dickerson with admiration and respect when I extend our sincere sympathy to his wife Maxine, his daughter Diane, and his son Jeffrey.

PIONEER DAY

Mr. CANNON. Mr. President, on July 24, 1847, the first of a visionary and hardy band of pioneers arrived in Salt Lake Valley and began establishing the first permanent settlements in Utah. This first group numbered 147 weary but dedicated souls.

The leader of this first pioneer group was Brigham Young, a man of infinite capacity for organization, leadership, and spirituality. He organized an exodus of his followers from the then United States and led them into an uncharted and untamed territory. This movement spanned the years 1847 until the railroads were built in 1863, and involved many hundreds of individuals. There is no parallel to this organized movement in American history. Brigham Young was not content merely to establish a haven in a new town named Salt Lake City; he sent teams of his "saints" throughout Utah territory, Nevada territory and beyond to establish a far-flung theocratic dominion.

But it was more than Brigham Young's charismatic personality which motivated his followers. Those who endured the long trek across the plains were a sturdy group willing to make whatever sacrifices were necessary to secure their religious freedom. They sought the chance to raise their children free from persecution and to lead them along the path of a restored religion that involved every aspect of their daily lives. They bent the raw wilderness to their goals and created from it a land of milk and honey.

In retrospect, the fruits of their labors can be seen clearly on this 134th anniversary, and those fruits are impressive indeed. From its beginnings in 1830 in Fayette, N.Y., with a total of six members, the church which so motivated these pioneers has grown to nearly 5 million today. From its humble beginnings, Salt Lake City is now one of the great cities of our Nation and rightfully claims the distinction of being the "Crossroads of the West". The church is now a worldwide organization.

The history of my home State of Nevada has been strongly influenced by the Mormon pioneers, including my own forebears. "Mormon station," the present Genoa, Nev., was the first known settlement in Nevada territory. My grandfather, David H. Cannon, traveled on foot through Carson Valley in which Genoa is located, on up through Washoe Valley near where Reno now stands, and worked for a period of time for the prominent church leader, Orson Hyde, and then moved on to San Francisco.

Present day Las Vegas was initially an outpost of the colonizing efforts of Brigham Young and has a large Mormon population today. Early in 1855, church members began construction of a fort in one of the few natural oases between the Pacific Coast and Salt Lake City. Portions of that structure remain preserved today in Las Vegas.

The descendents of those first pioneers have continued the traditions of their fathers and mothers. Devotion to family, church and nation; commitment to hard work; patronage of the arts and music; and development of each individual's talents are the guiding principles of church members today. Their contributions to the strength of our Nation are simply beyond enumeration. Truly, there is much to celebrate on this 134th anniversary of the day when the first wagons of tired

and humble pioneers descended into Salt Lake Valley.

I, myself, was born into a Mormon family in one of those settlements begun under the direction of Brigham Young. That settlement is the present St. George, nestled in the beautiful red hills of southern Utah, from which I moved to Nevada a number of years ago. My grandfather, David H. Cannon, helped build the beautiful St. George temple, the first Mormon temple completed in Utah, and then served for many years until his death as its President. I am proud of that heritage.

Mr. President, I salute the church and Mormons everywhere on this celebration of "Pioneer Day."

HIGH INTEREST RATES

Mr. BOREN. Mr. President, press reports indicate that the stock market continued its decline yesterday. The market went down another nine points yesterday. According to wire reports, the uneasiness which caused the decline of the market to the lowest level in several months was "fueled by worry about high interest rates."

As the press reports came in from the Ottawa Summit indicating a likelihood that high interest rates would not decline in the near future, the markets have taken a nosedive.

The stock market was not the only market affected. Agricultural markets, already severely depressed, plunged sharply with reports of a continuation of the high interest rate policy. Hogs and pork bellies have gone down their maximum limit for 3 days in a row. Cattle prices have gone down more than $2 in the past 2 days to their lowest levels during the life of current contracts. The Wall Street Journal on July 22 attributed the decline in meat prices to rising interest rates.

Even though a Government cattle inventory report released Monday was widely interpreted as being bullish, it failed to boost cattle futures and one of the reasons analysts noted was high interest rates.

Mr. President, I can only express my frustration at the fact that while the danger signals grow increasingly clear, it seems apparent that they are not being heeded. Last night's Washington Star contains an article which indicates that the Ottawa summit leaders were informed that high interest rates would continue in the United States. It is also clear from reading between the lines that our allies appear resigned to such a policy but are far from happy with it. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OTTAWA SUMMIT ACCEPTS HIGH INTEREST RATE LEVELS

(By Jeremiah O'Leary)

OTTAWA.—President Reagan and the U.S. delegation apparently convinced the leaders of the industrial democracies at the economic summit that high interest rates are here to stay—at least until inflation subsides.

This was the message in the communique issued yesterday by leaders of the seven industrial democracies as they wound up their three-day meeting.

"We see low and stable monetary growth as essential to reducing inflation," the communique said. "Interest rates have to play their part in achieving this and are likely to remain high where fears of inflation remain strong."

"But we are fully aware that levels and movements of interest rates in one country can make stabilization policies more difficult in other countries by influencing their exchange rates and their economies.

"For these reasons, most of us need also to rely on containment of budgetary deficits by means of restraint in government expenditures as necessary. It is also highly desirable to minimize volatility of interest rates and exchange rates; greater stability in foreign exchange and financial markets is important for the sound development of the world economy."

The leaders of the seven industrial nations assembled here with much of the focus on the controversial high interest rates in the United States that have dramatically affected European investment.

Reagan, however, showed no inclination to change his economic recovery policy of budget cuts, tax cuts and tight money.

West German Chancellor Helmut Schmidt told the summit conferees he would have to go home and tell his people interest rates were going higher and that he was going to have to make more budget cuts.

However, Treasury Secretary Donald T. Regan did say the United States probably will consult more with the other industrial nations.

"We won't change what we are doing, but we will discuss it more," he said. "They will go home satisfied that they gave us their ideas.

"They saw our problem and wished us well in getting interest rates down in a hurry."

The next most controversial matter was intervention in exchange markets. France and Italy in particular wanted the United States to agree to some form of intervention to promote stability.

The United States, however, took the position that attempting to control the rise and fall of currency values is futile.

"I'm a fair-market man," said Secretary Regan. "If that's what the dollar is worth, that's what it's worth."

One American official said facetiously: "We upped our interest, now up yours."

On another controversial matter, the United States sidestepped proposals for so-called "global negotiations" aimed at helping development in Third World nations.

The final communique said: "We reaffirm our willingness to explore all avenues of consultation and cooperation with developing countries in whatever forums may be appropriate.

"We are ready to participate in preparations for a mutually acceptable process of global negotiations in circumstances offering the prospect of meaningful progress."

U.S. officials said this language meant the United States is ready to talk generally about global negotiations but not to get boxed in at some United Nations-like discussion with a one-country, one-vote situation.

The participants in the summit took a slam at the Soviet Union by declaring in their communique: "The Soviet Union and its partners, whose contributions are meager, should make more development assistance available, and take a greater share of exports of developing countries while respecting their independence and non-alignment."

There was a potential for difficulty on the question of European trade with the Soviet bloc and future imports of Siberian natural gas by West Germany.

East-West trade was of concern to the United States because of the risk of European nations' becoming vulnerable to the Soviet Union through dependence on Eastern resources.

The United States also was concerned about gaining consultations on strategic technology exchanges by Western nations with the Soviets.

U.S. officials wanted the communique to say there would be joint action if threats arose from dependence on Soviet bloc resources.

The communique, which traditionally does not include anything to which any of the seven members object, said instead: "We also concluded that consultations and coordination are necessary to ensure that in the field of East-West relations, our economic policies continue to be compatible with our political and security objectives. We will undertake to consult to improve the present system of controls on trade in strategic goods and related technology with the USSR."

The summit leaders reaffirmed their commitment to liberal trade policies and to continuing resistance to protectionist pressures.

The Japanese escaped condemnation from the others for their alleged protectionism, although the communique noted that any protectionist measure, whether as a trade restriction or in the form of a subsidy to prop up an industry, undermines economies and aggravates inflation.

President Reagan said in a statement: "It is good to see just how far we have come in our talks this week."

Reagan said that to the rest of the world it looked as if this would be a difficult summit, with the seven nations sharply divided.

"The true measure of these past two days, filled with candid but always friendly talks is that we leave with a true sense of common understanding and common purpose," Reagan said. "I was particularly grateful to the other leaders for their degree of understanding and support for the economic policies we are embarked on in the United States.

"As Chancellor Schmidt has told us, our unity in economic matters is the best insurance we have against a return to the disastrous beggar-thy-neighbor policies of another era."

The summit leaders agreed to meet again for the second cycle of economic meetings next year in Paris.

Reagan flew back to Washington last night.

Mr. BOREN. Mr. President, I have spoken each day not for any political purpose but from a sincere desire to alert those who make policy to the danger at hand. How many thrift institutions will be forced to collapse? How many farmers and small businessmen will be driven into bankruptcy before the danger is recognized?

I am concerned that the President is not being well served by his advisers. I wonder if a sufficient contingency plan has been developed to halt a panic in the event that one should develop. Do the Federal Reserve and the various insurance corporations have sufficient reserves and powers to restore order to the markets and the financial institutions if a serious disruption occurred? Does Mr. Volcker understand the difference between cooling down the economy and snapping it completely by applying pressure to brittle segments which will snap instead of bend?

I hope that the President will consider the anguish of those who are on the brink of losing all they have worked to build if interest rates are not quickly reduced. Far too many as I said yesterday,

have already had to see the work of a lifetime completely erased by high interest rates. It is unconscionable to allow such a policy to continue. Unless something is done soon, the optimism which the American people now feel for the future of the economy under the new administration will soon become a faded memory, mentioned only in disillusionment.

THE VOTING RIGHTS ACT: EXTENSION, NOT EXTINCTION, IS WHAT IS NEEDED

Mr. EAGLETON. Mr. President, if constitutional rights were ranked in terms of their importance, the right to vote would surely rank very, very high on the list.

The free and unfettered exercise of the right to vote safeguards a democracy in which many other important constitutional rights can be exercised. Also, through granting or withholding their votes, our citizens hold their elected officials accountable for their actions.

Today I am pleased to become a cosponsor of S. 895, the bill to extend the Voting Rights Act of 1965 beyond its present August 1982 expiration date. Most importantly, the bill would extend the act's present requirement that jurisdictions with a history of using their laws to discriminate against minority voters must approve any changes in those laws with the U.S. Justice Department—these jurisdictions are primarily, but not exclusively, in the South—S. 895 would also: First, extend the Voting Rights Act protections for minority groups whose voting rights are threatened by language barriers and, second, clarify, in light of a recent Supreme Court decision, the type of proof that must be offered to show a violation of the act.

It has been over a hundred years since enactment of the 15th amendment promise that, "the rights of citizens of the United States to vote shall not be denied or abridged * * * on account of race, color, or previous condition of servitude." Students of American history know only too well of the sordid means by which voting rights were systematically and arbitrarily denied by various post-Civil War State and local governments. First, through overt intimidation and rigged "literacy tests," then through such devices as gerrymandering and "at large" voting districts, voting by minority groups has repeatedly been excluded and diluted.

The Voting Rights Act, particularly its important requirement for Justice Department clearance of legal changes, has helped to bring about dramatic changes in the pattern of voting discrimination. According to one recent article on the Voting Rights Act, the "preclearance" requirement has permitted the Justice Department to defend the voting rights of minorities in some 811 cases since 1965. (Significantly, 538, or roughly 66 percent of those cases, has occurred since 1975.) Analysts give the Voting Rights Act major credit for the extraordinary gains minority groups have made in voter registration, vote casting, and in election of officials from their ranks.

Twice before, the Voting Rights Act has come up for extension. Twice the Congress has reaffirmed its belief that the Voting Rights Acts protections were appropriate and essential.

These previous efforts have not been without controversy. However, as the act comes before the Congress once again for extension, larger numbers of increasingly strident voices have been raised to discredit it.

In that light, I believe it is particularly important for those who believe that the Act is effective and essential to stand up, be counted, and expose the errors of those who oppose the act's extension.

Ironically, one of the arguments used to discredit the drive for Voting Rights Act extension is that the act has worked so well. Thus, we are told that voting rights violations have abated to such a degree, in response to the act's enforcement provisions, that they are no longer necessary.

As the statistics cited above demonstrate, this is plainly not so. Numerous egregious violations of this basic constitutional guarantee have been attempted in recent years.

However, even if the violations were actually lessening, this would hardly be a reason to let the Voting Rights Act lapse. Just as no reasonable person would disconnect a burglar alarm because it has served to decrease robberies, no thoughtful official should let the Voting Rights Act die because it has prevented the theft of minority ballot power.

A second, equally bogus, attack on the Voting Rights Act portrays it as an example of an excessive, bureaucratic procedure, significantly interfering with "States' rights." This argument conveniently ignores the fact that the preclearance process is a very simple one indeed. A very tight time limit is allowed for Justice Department consideration. (It usually takes 60 days, and at most, it takes 120 days.) Further, the threat of arbitrary Justice Department action is reduced by ample appeal rights and procedural protections.

All told, the act provides no real interference to the vast majority of States and jurisdictions whose voting rights laws are approved expeditiously in the pre-clearance process. What the act does provide is very potent interference with a government that would discriminate against minority voters—something that it, of course, has no "State's right" to do at all.

In closing, Mr. President, let me say that I am particularly distressed with the Reagan administration's continued unwillingness to throw the important weight of the Presidency behind the voting rights extension. Recently, President Reagan disappointed the delegates to the NAACP convention in Denver by remaining noncommittal on the question. Further, the President's Attorney General said in a recent interview that the administration is still "in the process of looking into" the act's merits and may endorse some undefined "alternative" instead. Despite the administration's failure to make up its mind on one of the most important, visible civil rights question in recent years, the Attorney General tried to give assurances that administration officials are "strongly in favor of the underlying purposes of the Voting Rights Act."

I can think of no better way for the administration to demonstrate its true commitment to voting rights than to endorse extension of the single most effective device yet developed for protecting them. Such an endorsement would prove that in electing President Reagan "for a change," the American public did not get an unplanned and undesired change in this Nation's strong commitment to equal voting rights under law.

THE RETIREMENT OF JOHN PRICE

Mr. HATFIELD. Mr. President, on the occasion of his retirement, I am pleased to pay tribute to a truly exceptional employee of the U.S. Senate, Mr. John Price, chief janitor and head of custodial services.

Mr. Price has been a dedicated and respected member of the Senate staff, and it was with a feeling of regret that I recently discovered he will be leaving the Senate at the end of this month.

His tenure in the Senate has been a commendable one, and those of us who have known and worked with Mr. Price realize what an asset he has been. He began his career in the Senate on July 13, 1948, as a laborer in the custodial services division, and on July 1, 1973, was promoted to his present position as chief janitor—a productive 33 years in the Senate.

Mr. Price has met many of the most influential and historical leaders of the world—Presidents, heads of states, world figures, Senators, Congressmen—and has mementos from many of these occasions. These experiences, combined with his accommodating, conscientious, and eternally pleasant manner, have produced high regard for Mr. Price from his staff, other employees in the Senate, and those of us here on the Senate floor.

I could not allow this occasion to pass without calling attention to the fine character and unique talent of Mr. Price. I will miss him but wish Mr. Price a continued industrious, healthy, happy life.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:08 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

At 6:15 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4035. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent, and referred as indicated:

H.R. 4035. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 4034. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97–163).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. 778. A bill to amend Public Law 96–36 to authorize additional funds to plan for the development of the area south of the original Smithsonian Institution Building, adjacent to Independence Avenue at Tenth Street Southwest, in the city of Washington (Rept. No. 97–164); and

S. Res. 146. Resolution to amend Senate Resolution 324 of the 87th Congress to provide for the participation of the Department of Defense education system for dependents in overseas areas in the Senate youth program (Rept. No. 97–165).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 192. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 778; referred to the Committee on the Budget.

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 4035. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes (Rept. 97–166).

By Mr. MATHIAS, from the Committee on Rules and Administration:

S. Res. 193. An original resolution to establish within the Office of the Sergeant at Arms and Doorkeeper of the Senate a Senate Placement Office (Rept. No. 97–167).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, with an understanding:

Exec. A, 93–1. The Treaty Between the Government of the United States of America and the Government of the Republic of Colombia, concerning the Status of Quita Sueno, Roncador, and Serrana, signed at Bogota on September 8, 1972 (Ex. Rept. No. 97–16).

By Mr. PERCY, from the Committee on Foreign Relations, without reservation:

Exec. N, 96–2. International Convention Against the Taking of Hostages, adopted by the United Nations General Assembly on December 17, 1979 and signed on behalf of the United States on December 21, 1979 (Ex. Rept. No. 97–17).

Exec. H, 96–2. Convention on the Physical Protection of Nuclear Material, adopted at a Vienna Meeting of Government Representatives on October 26, 1979, and signed by the United States on March 3, 1980 (Ex. Rept. No. 97–18).

Exec. M, 95–1. Revised Customs Convention on the International Transport of Goods Under Cover of Transport International Routier Carnets (TIR Convention), done at Geneva on November 14, 1975, with annexes (Ex. Rept. No. 97–19).

Exec. K, 96–2. Amendments to the Convention on the Inter-Governmental Maritime Consultative Organization, signed at Geneva, March 6, 1948 (The IMCO Convention) (Ex. Rept. No. 97–20).

By Mr. BAKER (for Mr. GARN), from the Committee on Banking, Housing, and Urban Affairs:

Robert W. Karpe, of California, to be President, Government National Mortgage Association;

Nora Walsh Hussey, of South Dakota, to be Superintendent of the Mint of the United States at Denver; and

Clifford M. Barber, of New York, to be Superintendent of the U.S. Assay Office at New York, New York.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. INOUYE:

S. 1510. A bill for the relief of Apolonio P. Tumamao and others; to the Committee on the Judiciary.

By Mr. HEINZ:

S. 1511. To amend the Tariff Act of 1930 to clarify the determination of the definition of a country under the agreement, and for other purposes; to the Committee on Finance.

By Mr. McCLURE (by request):

S. 1512. A bill to extend the expiration date of section 252 of the Energy Policy and Conservation Act; to the Committee on Energy and Natural Resources.

By Mr. MATSUNAGA:

S. 1513. A bill for the relief of Cirilo Raagas Costa and Wilma Raagas Costa; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

S. 1514. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Finance.

By Mr. HATFIELD:

S. 1515. A bill to repeal Federal provisions of law establishing agricultural programs concerning the marketing of and price support for tobacco; to prohibit compacts among States for regulating tobacco production and commerce; to amend the Tobacco Inspection Act and the U.S. Warehouse Act to provide for the assessment of certain fees to cover the costs of inspection, licensing, and other activities carried out under those Acts; and to amend the Internal Revenue Code of 1954 to increase the tax on cigars and cigarettes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. WARNER (for himself and Mr. McCLURE):

S. 1516. A bill to amend the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.) to expedite exploration and development of geothermal resources; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. INOUYE:

S. 1510. A bill for the relief of Apolonio P. Tumamao and others; to the Committee on the Judiciary.

● Mr. INOUYE. Mr. President, I would like to introduce a bill today which has been recommended by the Comptroller General of the United States for the purpose of relieving six Federal employees of liability for overpayments, and providing reimbursement for the high rate of per diem involving their claim.

Ordinarily, one might expect matters of this nature to be corrected by making the appropriate readjustments governed by the executive branch's fiscal directives.

However, I am informed, by virtue of the amount involved, approximately $11,000, that this is impossible and a private bill of this nature is required. I would hope that this bill would receive prompt attention since the bill seeks to correct administrative failures by officials of the U.S. Government in implementing a regulatory change in per diem for these employees of our Government.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1510

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That each of the following-named persons is relieved of all liability to repay the United States and is entitled to a refund of the amount which appears beside his name:

	Indebtedness
Apolonio P. Tumamao	$1,137.50
Milton M. Ikawa	2,032.50
Malcolm B. Shin	2,032.50
Mamerto A. Garma	1,938.00
John B. MacKinnon	2,028.75
Kenneth A. Grigsby	2,032.50

The amounts represent overpayments of per diem allowances as a result of administrative failures by officials of the United States Government in implementing a regulatory change in the per diem rate in the case of the above-named civilian employees of the Department of the Navy who were performing extended temporary duty training assignments during the period May 1977 to January 1980. In that audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for the amount of payments made pursuant to this Act.●

79-059 O - 85 - 23 (Vol. 127) Pt. 13

By Mr. HEINZ:

S. 1511. A bill to amend the Tariff Act of 1930 to clarify the determination of the definition of a country under the agreement, and for other purposes; to the Committee on Finance.

DEFINITION OF A COUNTRY UNDER THE TARIFF ACT

● Mr. HEINZ. Mr. President, the trade policy issues I have been concentrating on this year have for the most part dealt with what I would call leftover items from the multilateral trade negotiations—issues, like the treatment of unfair trade practices from nonmarket economies, or revision in our generalized system of preferences (GSP), which were unresolved by those negotiations. I have already introduced legislation on those two specific matters, S. 958 and S. 1150 respectively, and I plan further legislation in the fall to deal with some other issues not adequately resolved in the MTN.

Today, however, I want to comment on a problem which has grown out of the MTN and which did not exist prior to that agreement. I refer, Mr. President, to the problem of how and under what circumstances the United States will accept new countries' accessions to the subsidies code, thereby committing our Government not to take action against their subsidized imports without a determination that someone in this country has been injured.

At the time the MTN agreements were presented to the Congress for approval in 1979, significant gaps remained with regard to their application to developing countries. It had not been possible during the MTN to negotiate universally acceptable criteria and specific procedures for having individual LDC's forgo the "special and differential treatment" which they, collectively, have come to regard as a permanent feature of the trading system. The United States was virtually alone among the industrialized countries in pressing the point, and was basically at a loss to come up with some mechanism that would be appropriate for all LDC's. The range of economic and competitive situations among the countries of the Third World is simply too vast to be covered by a single, uniform formula.

The result was that the operative parts of the MTN codes, such as the subsidies code, were left deliberately vague (or loose) with regard to potential LDC signatories. The expectation was that the executive branch—specifically, the U.S. Trade Representative—would for several years be engaged in one-on-one negotiations with LDC's interested in joining the various codes. Such an arrangement would appeal to the administration, of course, since it permitted maximum flexibility for reconciling trade policy and foreign policy concerns on a case-by-case basis.

In order to sell this open-ended negotiating mandate to the Congress and the private sector, in the case of the subsidies code, the administration gave explicit assurances as to the minimum levels of obligations that would be required of any developing country which sought to accede to the code. These were specifically said by administration spokesmen to include:

First, an obligation not to extend existing export subsidies to any wider range of products;

Second, an obligation not to raise the amounts of existing export subsidies;

Third, an obligation not to introduce new export subsidies; and

Fourth, a commitment to phase out existing subsidies, and to eliminate immediately those for products in which the subsidizing country is already competitive.

These assurances are those specified in the legislation I am proposing today. Unfortunately, the record of the past 18 months shows that these minimum expectations either have not been pursued seriously by the administration, most notably in the case of Pakistan, or have been openly flouted by countries which have accepted them, as in the case of Uruguay. The continuation of this state of affairs threatens to undermine the integrity of all of the codes negotiated in the Tokyo Round.

The United States is in a position to rectify this situation because it alone is able to grant or withhold the principal benefit—an injury test in U.S. countervailing duty proceedings—which accrues to countries signing the subsidies code.

In light of experience to date, legislation clearly is needed to specify the minimum conditions under which a developing country may be treated as a "country under the agreement." With such legislation, U.S. negotiators will be in a strong position to insist upon the acceptance of, and continued adherence to, those conditions—which all countries participating in the negotiation of the subsidies code understood were the basic foundation of that code.

The inclusion of these specific commitments in our law would also have the beneficial effect of insuring that developing nations are treated within the same parameters. As a result of the Carter administration reneging on its promises to Congress in the case of Pakistan and then trying to adhere to those promises in the case of India several months later, we are now involved in a messy legal dispute in the GATT, where the Indians are accusing us of violating the most-favored-nation principle of the GATT which obligates us to extend to all GATT members the benefits we have extended to one.

By accepting a lower level of commitment on subsidies from Pakistan, India argues, we are now obligated to accept the same from them. Although the legal issues here are far from clear—the subsidies code itself gives broad latitude for rejecting such commitments—this dispute will be a divisive one in the GATT which will tarnish our standing in other LDC's and complicate our efforts to protect our interests with other LDC's. Had we had in the law definition of the acceptable commitments early in 1980, this difficult situation would not have arisen. This bill provides an opportunity to rectify that situation.

It should also be kept in mind, Mr. President, that another purpose of this legislation is to continue congressional efforts to depoliticize the countervailing duty and antidumping processes that begin with the transfer of those functions from the Treasury Department to the Commerce Department in 1980.

It has always been my view that the decision to accept Pakistan's inadequate commitments was a political one made by White House personnel for foreign policy reasons and not for the trade policy reasons established by the Congress. Aside from the irony that it seems to have had little visible impact on our relations with Pakistan, this decision stands out as precisely what we in the Congress feel should be avoided—the granting of permanent trade benefits on the basis of often illusory short-term political factors.

Unfortunately a similar circumstance has just occurred in the new administration with respect to a case involving toy balloons from Mexico. This decision is particularly distressing in view of the strong commitments made by several high ranking Commerce Department officials to enforce these laws aggressively and objectively.

This case is now in litigation, which I hope will quickly rectify the error the Department has made. Episodes such as this undercut the Government's credibility with American companies seeking to exercise their rights under our unfair trade practice laws and thereby encourage the Congress to act once again to clarify the law and reduce the administration's discretion.

Mr. President, this bill deals with this same principle. It seeks simply to codify the Government's promises and hold it to them. I hope we will be able to act on it promptly. I ask that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1511

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 701 of the Tariff Act of 1930 (19 U.S.C. 1671) is amended by redesignating subsection (c) as subsection (e) and by inserting after subsection (b) the following new subsections:

"(c) LIMITATION ON ACCEPTANCE CONCERNING DEVELOPING COUNTRIES.—Notwithstanding subsection (b) or any action previously taken to designate a country as a 'country under the Agreement', no country shall be so designated until it has committed itself to the General Agreement on Tariffs and Trade to eliminate its export subsidies promptly; except that in the case of any country which is a beneficiary developing country under section 502 of the Trade Act of 1974 (19 U.S.C. 2462), such country may be so designated if, in lieu of such commitment, such country agrees—

"(1) not to increase the number of product classes receiving export subsidies;

"(2) not to introduce new export subsidies;

"(3) not to increase the amount of existing export subsidies; and

"(4) to a timetable, agreed to by the United States, for reducing and eventually eliminating completely export subsidies, except that such elimination shall be immediate for any class of products which the International Trade Commission, after referral by the President, determines is already competitive in the United States mar-

ket and would be competitive in the absence of export subsidies.

For purposes of determining the competitiveness of any class of products, the International Trade Commission, at the request of the President, shall conduct an investigation and shall determine and report to the President not later than 60 days after receiving his request, whether the class of products is already competitive in the United States market and would be competitive in the absence of export subsidies.

"(d) REVIEW OF DETERMINATIONS.—In the case of a beneficiary developing country which enters into an agreement under subsection (c), the President shall review the current status of, and compliance with, such agreement at least once during each 12-month period following the date on which the agreement becomes effective. Upon determining that any such country has introduced export subsidies inconsistent with such agreement, the President shall promptly revoke the designation of such country as a 'country under the Agreement'. If, within 12 months after the International Trade Commission has made a negative injury determination pursuant to sections 703(a) or 705(b) of this Act, the President revokes the designation under this section of a country as a 'country under the Agreement', the determinations of the Commission with regard to imports from such country which were the subject of such injury determination shall be deemed null and void and the administering authority shall issue a countervailing duty order.".●

By Mr. McCLURE (by request):

S. 1512. A bill to extend the expiration date of section 252 of the Energy Policy and Conservation Act; to the Committee on Energy and Natural Resources.

EXTENSION OF ANTI-TRUST DEFENSE OF ENERGY POLICY AND CONSERVATION ACT

● Mr. McCLURE. Mr. President, today I am introducing at the request of the administration a bill to extend the expiration date of section 252 of the Energy Policy and Conservation Act.

I note that the administration's bill is identical to S. 1475, a bill introduced by me, together with Senator JACKSON, on July 14, 1981.

Mr. President, I ask unanimous consent that the administration's transmittal letter and the text of the bill be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1512

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 252(j) of the Energy Policy and Conservation Act (42 U.S.C. § 6272(j)) is amended by striking "September 30, 1981" and inserting in its place "June 30, 1985".

DEPARTMENT OF ENERGY,
Washington, D.C., July 22, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is proposed legislation "[t]o extend the expiration date of section 252 of the Energy Policy and Conservation Act."

This proposed legislation is part of the Department of Energy Legislative Program for the 97th Congress. The Office of Management and Budget advises that, from the standpoint of the Administration's program, there is no objection to the presentation of this legislation for the consideration of the Congress.

PURPOSE OF THE LEGISLATION

This bill would amend subsection 252(j) of the Energy Policy and Conservation Act (EPCA) by changing the expiration date of section 252 from September 30, 1981, to June 30, 1985. The extension would continue the antitrust defense afforded by section 25 (f) of EPCA to United States oil companies participating in the Agreement on an International Energy Program (IEP), thus facilitating the continued participation of United States oil companies in the IEP.

BACKGROUND

The IEP was originally signed in 1974 as the result of an effort by the United States to promote cooperation among major industrial countries in reducing dependence on imported oil. There are presently 21 signatories to the IEP, consisting of most of the principal industrialized oil consuming nations. The IEP provided for creation of the International Energy Agency (IEA) as an autonomous entity within the Organization for Economic Cooperation and Development and, under the auspices of the IEA, of an international oil sharing system for use during oil supply emergencies, and an information system on the international oil market. It also required each country to establish an emergency petroleum storage program, and to have a means for restraining demand for petroleum products in the event of an interruption of petroleum supplies to the IEP countries.

Section 252 of EPCA sets out procedures applicable to the development or carrying out of voluntary agreements and plans of action to implement the allocation and information provisions of the IEP. Under this authority, effective March 21, 1976, United States oil companies entered into the Voluntary Agreement and Plan of Action to Implement the International Energy Program (the Voluntary Agreement) (41 F.R. 13998, April 1, 1976). At present, 21 United States oil companies, including both major international oil companies and independent oil companies, are participants in the Voluntary Agreement.

The antitrust defense provided in section 252(f) is essential to the participation of United States oil companies in the Voluntary Agreement and, through it, in the IEP. The IEP, in turn, can function effectively only with participation by United States and foreign oil companies which are primary sources of the information about conditions in the international oil market and would be the primary actors in redistributing oil if the IEP's emergency sharing provisions were activated.

This bill simply extends to June 30, 1985, the effectiveness of the section 252 antitrust defense, thereby synchronizing its expiration with that of Titles I and II of EPCA, and assuring continuity of U.S. company participation in the IEP. All of the other conditions and safeguards presently incorporated in that section will remain unchanged.

COST AND BUDGET DATA

Enactment of this legislation would cause no apparent increase in budgetary requirements for the Department of Energy.

Sincerely,

R. TENNEY JOHNSON,
General Counsel.●

By Mr. MATSUNAGA:

S. 1514. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Finance.

DISABILITY BENEFITS FOR THE BLIND

Mr. MATSUNAGA. Mr. President, I am today introducing legislation that is designed to provide improved disability insurance for the blind. My measure would amend title II of the Social Security Act so as to moderate the eligibility requirements that blind persons must meet in order to qualify for disability benefits.

Currently, benefits to the blind are eliminated whenever a sightless person begins to earn $458 a month. Under my proposal, a person who is blind and has worked 6 quarters in social security covered employment would be able to qualify for disability benefits. And, such payments would continue for as long as the blindness lasts.

By reducing the work requirement, we would be recognizing the unique difficulty that blind persons have in securing employment. Because they are frequently the last hired and first fired, many blind persons are often not able to acquire the necessary quarters for coverage.

In fact, as presently written, current law actually prevents many blind people from even seeking employment. It is not unusual for those who have managed to qualify for disability benefits to be afraid to take jobs, for fear of losing their disability checks. The risk of being forced to relinquish their benefits is just too great compared to the low wages and lack of job security that awaits them upon entering the work force.

The changes that my bill would accomplish would put an end to this unfortunate and regressive situation, and in fact, would be the culmination of a process begun in the 88th Congress by the late beloved Senator from Minnesota, our Nation's former Vice President, Hubert H. Humphrey.

After 20 years of deliberation, and several piecemeal efforts to enact well-meaning legislation, the time has come for the Congress to provide the blind with the appropriate legislative portal they need to play a greater role in our Nation's society. It is time that we tapped their talent and ability for the sake and prosperity of our Nation's economy.

In doing so, we should be mindful that welfare payments to the blind would be reduced substantially if these blind but capable persons were to be given this additional incentive to work. The National Federation of the Blind estimates that 75,000 blind people would become ineligible for social security insurance, if they were instead able to qualify for disability benefits under the provisions of my bill. Certainly, many of these beneficiaries would subsequently become employed and would eventually also contribute both income and social security taxes to our Nation's Treasury.

Mr. President, my legislation addresses the specific economic problems of the blind and merits the support of all of my colleagues who are interested in encouraging people to work rather than to exist on public assistance. Accordingly, it is paramount that we seek to complete the work that was begun over 20 years ago and strive to mainstream the greater portion of our Nation's blind into fuller and more productive roles in our society. This can be accomplished through the enactment of my bill, which would cre-

ate the viable economic opportunities that the blind so fervently desire and eliminate the bureaucratic obstacles that presently stand in their path.

By Mr. WARNER (for himself and Mr. McCLURE):

S. 1516. A bill to amend the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.) to expedite exploration and development of geothermal resources; to the Committee on Energy and Natural Resources.

GEOTHERMAL STEAM ACT OF 1981

Mr. WARNER. Mr. President, I am introducing today, for myself and Senator McCLURE, the Geothermal Steam Act of 1981. As chairman of the Energy and Minerals Subcommittee of the Senate Energy Committee, I plan to remove constraints, and provide incentives for widespread development of our abundant geothermal resources.

It has been recognized for several years that amendments to the Geothermal Steam Act of 1970 are necessary in order to induce the private sector to invest the considerable capital sums necessary to develop geothermal. As with any new technology, much has been learned, through trial and error, of how to locate and define a geothermal reservoir sufficient in size to warrant commercial exploitation. However, we feel that now the technology is at a point where institutional barriers such as insufficient acreage availability for geothermal exploitation on Federal lands, contained in the existing law, must be removed or modified if utilization of this vast resource is to become a reality.

Although, to date, most of the geothermal resources which have been defined in the United States lies west of the Rocky Mountains, recent exploration on the east coast and gulf coast have revealed that substantial quantities of geothermal potential may exist in these areas as well. Although the temperatures of the resources outside the West are somewhat lower, technological improvements for the utilization of relatively low temperature geothermal could make this resource eventually available as a replacement for fossil fuels on a nationwide basis.

However, in order to stimulate early development, we obviously must provide access to those areas where the most viable resources under current economic conditions exist; and this is clearly on public lands in the Western States.

The bill I am introducing increases the acreage available per State to each company developing geothermal from 20,400 to 51,200. The bill also provides authority for the Secretary of the Interior to increase this acreage in 1985. We anticipate that the Secretary will look closely at the amount of development which takes place under the modified acreage limitation in determining whether the acreage limitation should be increased again.

It is my intention in working with Senator McCLURE, chairman of the full Energy Committee, to seek early consideration of this measure in order to stimulate the private sector into committing capital resources necessary to bring significant amounts of geothermal energy into production, both for direct heat use in space heating and agri-farming and electric generation, at the earliest possible time.

I realize that considerable lead time is necessary to explore for, define, and bring a geothermal reservoir into production. Just the construction of a powerplant, for example, to utilize the resource takes a number of years and can be further delayed by obtaining necessary permits, especially environmental permits.

However, if we do not provide some stimulus to the industry now, and if we let yet another Congress pass without legislation, the considerable interest which has been shown by the private sector in this resource may diminish and capital will be diverted into other endeavors. This would be unfortunate indeed, since geothermal offers potentially tremendous saving in more scarce fuels, not to mention the fact that since combustion is not necessary to generate geothermal heat, its environmental impact is insignificant when compared with fossil fuels.

Mr. President, I commend this measure to the consideration of my colleagues.

ADDITIONAL COSPONSORS

S. 29

At the request of Mr. LUGAR, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 29, a bill to repeal the Federal requirement of incremental pricing under the Natural Gas Policy Act of 1978.

S. 484

At the request of Mr. CHILES, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 484, a bill to amend the Social Security Act to insure adequate short- and long-term financing of the old-age, survivors, and disability insurance program and the medicare program.

S. 537

At the request of Mr. HEFLIN, the Senator from Montana (Mr. BAUCUS), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. DECONCINI), the Senator from Nevada (Mr. LAXALT), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Mississippi (Mr. COCHRAN), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 537, a bill to aid State and local governments in strengthening and improving their judicial systems through the creation of a State Justice Institute.

S. 881

At the request of Mr. RUDMAN, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 881, a bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy.

S. 895

At the request of Mr. MATHIAS, the Senator from Vermont (Mr. STAFFORD), the Senator from Delaware (Mr. ROTH), the Senator from Missouri (Mr. EAGLETON), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes.

S. 979

At the request of Mr. LUGAR, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 979, a bill to amend the Internal Revenue Code of 1954 to clarify the tax exemption for interest on obligations of volunteer fire departments.

S. 1081

At the request of Mr. MATHIAS, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1081, a bill to amend the Internal Revenue Code of 1954 to provide for a deduction for certain amounts paid into a reserve for service liability losses and expenses of design professionals and for other purposes.

S. 1230

At the request of Mr. CRANSTON, the Senator from Minnesota (Mr. DURENBERGER), the Senator from Wyoming (Mr. SIMPSON), and the Senator from Washington (Mr. JACKSON) were added as cosponsors of S. 1230, a bill to provide for the minting of commemorative coins to support the 1984 Los Angeles Olympic Games.

S. 1373

At the request of Mr. DECONCINI, the Senator from Arkansas (Mr. PRYOR), the Senator from Alabama (Mr. HEFLIN), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 1373, a bill to authorize the President to call a White House Conference on Veterans.

S. 1417

At the request of Mr. SPECTER, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 1417, a bill to establish a Presidential Protection Commission to advise the President and the Congress on reducing the risk of assassination at public appearances and otherwise to increase efforts to prevent criminal assaults against the President and to recommend amendments to title 18 of the United States Code and other provisions of Federal law relating to safeguarding the President.

S. 1448

At the request of Mr. MATHIAS, the Senator from Minnesota (Mr. DURENBERGER), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 1448, a bill to provide for the issuance of a postage stamp to commemorate the seventieth anniversary of the founding of the Girl Scouts of the United States of America.

S. 1493

At the request of Mr. ABDNOR, the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of S. 1493, a bill to deauthorize several projects within the jurisdiction of the Army Corps of Engineers.

AMENDMENT NO. 507

At the request of Mr. TOWER, the Senator from Louisiana (Mr. JOHNSTON), the Senator from Colorado (Mr. HART), and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of amendment No. 507 proposed to House Joint Resolution 266, a bill to provide for a temporary increase in the public debt limit.

SENATE RESOLUTION 192—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 192

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 778. Such waiver is necessary because S. 778 authorizes the enactment of new budget authority which would first become available in fiscal year 1982, and such bill was not reported on or before May 15, 1981, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit Congressional consideration of statutory authority to plan for the development of the area south of the original Smithsonian Institution Building adjacent to Independence Avenue at Tenth Street, Southwest, in the City of Washington.

S. 778 provides an authorization for fiscal year 1982 of $1,000,000. Although $500,000 was authorized in fiscal year 1980, no funds in that year or fiscal year 1981 were appropriated for the planning of the proposed Quadrangle development in the area south of the Smithsonian Institution's original building, now known as the Castle.

The specified sum is included in the President's fiscal year 1982 budget request. The Appropriations Committees of the Senate and the House of Representatievs have therefore had adequate notice of this authorization. Thus, Congressional consideration of this authorization will in no way interfere with or delay the appropriations process.

SENATE RESOLUTION 193—ORIGINAL RESOLUTION REPORTED TO ESTABLISH A SENATE PLACEMENT OFFICE

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution which was placed on the calendar:

S. RES. 193

Resolved, That (a)(1) there is established, within the Office of the Sergeant at Arms and Doorkeeper of the Senate (hereinafter referred to as the "Sergeant at Arms"), an office to be known as the "Senate Placement Office" (hereinafter referred to as the "Office").
